The correlation between specific personality and biographical variables and the grade point average (GPA) of 211 first quarter community college and technical institute students was investigated using the Adult Nowicki Strickland Internal-External scale to determine locus of control, the Post High School Self-Concept of Academic Ability scale, and the Survey of Study Habits and Attitudes scale. Locus of control, self-concept of academic ability, and study habits and attitudes were found to be significantly correlated with GPA, as were age, sex, race, and marital status. Delay avoidance in undertaking academic pursuits made the greatest contribution to the explanation in variance in GPA in the multiple regression equation used, followed by self-concept of academic ability, age, sex, race, locus of control, work methods, study habits, and acceptance of educational goals. Study orientation, teacher acceptance, marital status, and study attitudes did not contribute to the multiple regression equation. In a paradigm of interactive factors believed to facilitate academic achievement, biographical variables accounted for 8% of the variance in GPA and personality variables for another 19%; the remainder was attributed to intelligence and other assumed factors. A literature review is included. (Author/MB)

Descriptors-Adult Students, Broadcast Industry, Community Colleges, Cost Effectiveness, Delivery Systems, Educational Administration, Educational Television, Financial Support, *Instructional Media, *Junior Colleges, *Mass Media, Program Development, Programing (Broadcast), Program Planning, Teacher Role, *Telecourses

The nine articles in this collection by members of the American Association of Community and Junior Colleges' Task Force on the Uses of Mass Media for Learning are concerned almost entirely with television, since the telecourse is the medium with which the most experience has been gained and which has the most potential for many community colleges. The individual articles address the following topics: (1) the history of instructional television including a discussion of the necessity of cooperative activities among colleges; (2) consideration of various programming elements for successful development of working relationships with broadcasters; (3) the roles of technology, demographic changes, and heightened awareness of the function of lifelong learning in serving the adult learner's needs; (4) the economics of television-centered courses in terms of acquisition of materials, development of a delivery system, and the delivery of services; (5) college television consortia and their governance, administration, financing, and legal bases, and relationships with broadcasters; (6) telecourse design, development, and evaluation; (7) the role of the faculty in mass media courses; (8) communication with distant learners and time and space factors; and (9) effective community promotion of telecourses. Identifiers-Information Analysis Products

Four types of developmental education programs have been designed to help students overcome or compensate for: (1) deficiencies in grades or subjects required for admission to a senior institution or to colleges and transfer programs (Pre-Transfer); (2) deficiencies in reading, writing, speech, arithmetic, study habits, motivation, and other personality traits (Remedial); (3) deficiencies in literacy and in basic skill subjects necessary for a high school diploma (Adult Basic Education ABE); and (4) physical or mental handicaps that impose limitations on the functioning of students academically or socially (Handicapped). The four types of programs support the traditional community college role in preparing the academically, economically, socially, or physically disadvantaged for entering the mainstream of American life. The present trend is toward integrating the various developmental programs with the regular programs. Pre-Transfer is most closely allied with the regular program and ABE least integrated. The Remedial Program tends to focus on high school graduates or recent dropouts who are slightly older than the regular students. The Handicapped Program includes three principal classifications of students: the blind or visually handicapped, the deaf or hearing impaired, and the mobility-impaired. (Author/MB)

Identifiers-Arizona (Maricopa County)

An outline of the proceedings of a conference to plan the educational priorities of the Maricopa County (Arizona) Community College District and the subsequent report to the governing board are presented. Task force groups focused on the role of Maricopa Technical Community College in the district; the role of the district in statewide postsecondary education; occupational education from the institutional point of view; the student's perspective on occupational education; the role of general education and transfer education; efforts and problems in developmental education; the role of student services; and use of potential and available fiscal resources. Policy statements express the need for decision-making, budgetary commitments, and timetables for implementing plans in areas of: (1) student retention; (2) attracting new clientele; (3) ongoing assessment and identification of the client groups to be served; (4) improving delivery systems; (5) program of community involvement; (6) delineation of functions and responsibilities of the board, administration, faculty, and staff; (7) increased resource for staff development; (8) funding new concepts; (9) developing a process of evaluation; (10) improved communications; and (11) providing better service. The Quality of Police Education: An AACJC Response.

American Association of Community and Junior Colleges, Washington, D.C.

Pub Date-Feb 79

Note-20p.; Papers presented at a National Symposium on Higher Education for Police Officers (Washington, D.C., February 6, 1979)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Associate Degrees, Bachelors Degrees, *Book Reviews, Community Colleges, Criminal Law, *Job Training, Junior Colleges, Law Enforcement, Legal Education, *Police, *Postsecondary Education, *Program Evaluation

Identifiers-Quality of Police Education (Police Foundation)

These two symposium presentations are endorsed by the American Association of Community and Junior Colleges in response to the book, The Quality of Police Education,'' which was prepared by the Police Foundation with support from the Law Enforcement Assistance Administration. Specifically, the papers refute allegations made in the book in criticism of community college police education programs. James R. Mahoney's response to the book points out the age and unverifiable nature of much of the data upon which the criticisms were based; contains quotes from Police Education Program administrators in response to specific claims made in the book; criticizes the stylistic tactics which, without evidence, cast a negative light on the programs; and points out the impracticality of the recommended baccalaureate degree requirements in police education. Additionally, the address points out the values of the study. Howard Rasmussen's presentation contradicts the premise of the study that the role of police education programs should be to educate police for institutional change, stating that the more important goal is the generation and dissemination of knowledge. Also questioned is the belief that a liberal-arts-oriented, full-time, residence education is the best model for police education programs. (AYC)

Fernandez, Thomas V., Jr. And Others

Comparative Academic Performance at the Baccalaureate Level Between Graduate Transferees at Nassau Community College and Native Students at Selected Public/Private Institutions.

Nassau Community Coll., Garden City, N.Y.
Note-30p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Academic Achievement, Bachelors Degrees, *College Graduates, Colleges, Comparative Analysis, *Grade Point Average, *Junior College Students, *Postsecondary Education, Private Colleges, *Transfer Students, Universities

The academic performance of 1973 graduate transferees from Nassau Community College (NCC) was compared at the baccalaureate level with 1975 native student graduates from 12 four-year public and private colleges and universities. These senior institutions were selected on the basis of the large number of NCC transferees they received. The baccalaureate grade point average was used as the primary indicator for comparison. The mean performance of transfer students graduating with a baccalaureate degree (2.96) is comparable in level to that of native students (3.16), although the difference is statistically significant. Comparisons across the 12 institutions in the curricular areas of business, education, humanities, social science, natural science, and services showed that the native students performed at significantly higher levels in business, education, social science, and natural science. A factor which appeared to contribute to the performance of transferees was institutional proximity; transferees performed significantly higher at the local (private) schools than they did at "out of town" (public) institutions. Before aptitude equalization, the generally higher mean performance of native students was a function of the campus. Data tables by campus and curricula are appended. (Author/MB)

JCCC Data Processing Program in its Tenth Year: Present Status and New Directions for the Instructional Program.

Johnson County Community Coll., Overland Park, Kans.
Pub Date-Feb 79
Note-69p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Community Colleges, Community Surveys, *Computer Science Education, *Curriculum Evaluation, Data Processing, *Data Processing Occupations, Employer Attitudes, Job Skills, Job Training, *Junior Colleges, Manpower Needs, Needs Assessment, Occupational Surveys, Participant Satisfaction, Programing, School Surveys, Student Attitudes, *Student Characteristics

In the first of two studies of the data processing program at Johnson County Community College (Kansas), students enrolled in data processing classes during spring 1978 were surveyed to collect basic demographic data and to obtain opinions about the program. There were approximately as many men as women enrolled and the median age was 25, slightly higher than the overall college median of 22. About one-fourth of the students had bachelor's degrees and another fourth had attended another college. About one-third planned to receive an Associate of Arts degree; slightly more than 40% planned to take only certain courses. Overall, instruction and curriculum were rated better than the equipment and facilities, however, more hands on'' experience was desired. In the second study, area employers and students were surveyed to assess the adequacy of existing data processing course offerings. There was interest in courses related to both large and small systems. About 25% of the employers required an Associate Degree, while 10% required a Bachelor's. Half required from one to two years experience. Persons with four or more years experience were most in demand. Approximately 56% of the employers had some interest in using students for part-time employment. Teleprocessing was the major interest of both employers and students.

Data tables are included and the survey instruments appended. (Author/MB)

An Examination of Potential Career Programs. Special Reports.
Johnson County Community Coll., Overland Park, Kans.
Pub Date-Jun 78
Note-108p.
EDRS Price MF-$0.83 HC-$6.01 Plus Postage.
Descriptors-Accounting, Agribusiness, Auto Mechanics (Occupation), Building Trades, Child Care Occupations, Community Colleges, Curriculum Planning, Dental Technicians, *Employment Opportunities, Employment Projections, Employment Qualifications, Fire Science Education, *Health Occupations Education, Journalism, *Junior Colleges, Manpower Needs, Medical Laboratory Assistants, Medical Record Technicians, *Needs Assessment, *Occupational Surveys, Physical Therapy Aides, Printing, Radiologic Technologists, Trade and Industrial Education, Veterinary Assistants, *Vocational Education
Identifiers-Advertising Occupations, Equine Management, Kansas (Johnson County)

Surveys of local employers were conducted by Johnson County Community College to determine the needs for potential career programs as related to job opportunities in the following areas: (1) accounting; (2) advertising and journalism; (3) animal health technology; (4) automotive technology; (5) building construction; (6) child care for preschoolers; (7) dental laboratory technology; (8) equine management; (9) fire protection and public safety technology; (10) medical laboratory technology; (11) medical records technology; (12) mental health technology; (13) physical therapist assistants; (14) press operators; (15) radiologic technicians, and (16) urban agribusiness. Results of these surveys are presented in 16 distinct reports which consider the national employment outlook, local manpower needs, salary potentials, relevance of an associate degree in qualifying for positions, and other job qualifications. Some reports also discuss existing job training opportunities and their impact on employment needs; program options and costs; staff and site selection considerations; and student interest and recruitment. Many reports include references. (MB)

An Assessment of JCCC Student Interest in Potential Career Programs and Expanded Student Services; Spring 1978.

Johnson County Community Coll., Overland Park, Kans.
Pub Date-Oct 78
Note-75p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Academic Aspiration, College Majors, Community Colleges, Curriculum Planning, Educational Background, Females, Institutional Research, *Junior Colleges, Males, Needs Assessment, School Surveys, Student Attitudes, *Student Characteristics, Student Employment, Student Interests, *Student Personnel Services, Vocational Education, *Vocational Interests

Surveys were administered to 609 students from 40 randomly selected classes at Johnson County Community College (Kansas) to update student demographic information and to assess interest in expanded student services and potential career programs. In terms of student characteristics, it was found that: the percentage of women students had increased to 56%; about one-third of the students had attended another college previously; 75% of the students were working, with 20% working 40 hours or more; about 30% spent 20 hours or more per week in meeting home responsibilities; 62% of the males and 43% of the females were preparing to transfer to a four-year college; evening and weekend students were more interested in developing job-related skills; less than half intended to complete an associate degree; and business related programs were most popular. Attitudes regarding services showed that: Saturday and Sunday afternoons were the preferred weekend hours for the library; half of the respondents were interested in using a mathematics laboratory, one-third in a writing lab, and 30% in a reading lab; and 83% of the evening students felt the services they needed were available. Interest in career programs focused on building technology and automotive technology for males and social services and health technology for females. Data tables are included and the survey instrument is appended. (Author/MB)

For the last few years, courses (credit and non-credit) have been offered on-site at a number of businesses within Johnson County, Kansas. This study aimed to acquaint county businesses with Johnson County Community College programs and to identify course areas in which businesses would like employees to obtain instruction. The 10 areas of most frequently expressed interest were: management skills, salesmanship, business skills, job-related skills, human relations, communications, secretarial skills, business writing, technical skills, and data processing. About one-third of the businesses had space for on-site instruction and 22% preferred on-site rather than campus instruction. Some businesses wanted employees to obtain additional education, but not necessarily through an in-house training program. About half the companies felt employees preferred classes with the following characteristics: credit or certificate of completion; evenings or weekends; four hours or less per week; and six months or less with most preferring less than three months. Changes in technology had affected and were expected to continue to affect more than 60% of the businesses during the next five years. Electronics, certification requirements, data processing, legislation, management and business procedures, automation, and energy costs were identified as major areas of change. Data tables are included and the survey instrument is appended. (Author/MB)

A Descriptive Study of Community Education Students, Kishwaukee College.

Pub Date-Feb 79
Note-177p.; Parts may be marginally legible due to small type ; Study prepared in collaboration with the International Reading Association's Special Interest Group for College Reading Teachers
EDRS Price MF-$0.83 HC-$10.03 Plus Postage.
Descriptors-Adult Basic Education, *Adult Education, Adult Students, Community Colleges, Community Education, Community Programs, Continuing Education Centers, Enrollment Trends, Evening Students, Extension Education, Junior Colleges, *Junior College Students, *Nontraditional Students, *Outreach Programs, *Student Characteristics, Test Wiseness, Vocational Education

A demographic survey of community education students enrolled at Kishwaukee College during fall 1975 through summer 1978 focused on the characteristics of and differences among community education, career, and transfer students; student enrollments in relation to the district and over time; enrollments at different centers and in different types of classes; and differences between students who withdrew and those who persisted. In each area of investigation, the following characteristics were considered: age, sex, marital status, race, first enrollment, years since attending school and last school attended, full- or part-time status, reasons for attending, educational background, residence, occupation, concurrent enrollment, and credits previously earned. Results of the study indicated that while career and transfer studnts seemed to be similar to others in their group, there was no typical community education student. The diversity in the characteristics of community education students, seemed to bring the college student profile closer to the demographic profile of the district. Evening enrollments in the career and transfer areas were reaching a significantly different audience than the day enrollments in all areas except sex. Community education students attending off-campus centers appeared to be especially non-traditional in their characteristics. Data tables are included. (MB)

Forum For Reading: The Journal for College Reading Teachers. Volume 9, No. 1.

Pub Date-Nov 78
Note-49p.; Journal prepared by the International Reading Association
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Community Colleges, *Junior Colleges, Postsecondary Education, Program Evaluation, Reading Ability, Reading Comprehension, Reading Development, Reading Improvement, *Reading Instruction, *Reading Programs, Reading Tests, Remedial Reading Programs, Surveys

Five articles concerning college reading instruction are included in this special interest journal. Bill Fowler and Barry M. Kroll investigate hidden factors in tests of reading comprehension, revealing that most conventional tests have question-design weaknesses allowing students to perform successfully by the use of test wisdom alone. Imogene Freer reviews the changing aims and functions of reading programs over the past 20 years. Helen Covington and Lee Mountain discuss junior college faculty and student expectations regarding reading courses as determined by questionnaire responses from faculty at 59 Texas colleges and students from eight schools. Areas covered include comprehension, library research, inductive learning, and reading rate. Faye Curran presents an evaluation of the tutorial program at Miami University-Middleton. Faculty, tutors, and tutees were surveyed and ACT and College Entrance Exam Board scores were used to predict grade point average as a measure of success. A final paper by Walter J. Lamberg studies changes in reading rate of students after participation in a reading improvement mini-course. (MB)

Descriptors-*Articulation (Program), *College Credits, College Graduates, Junior Colleges, *Postsecondary Education, *Program Coordination, Proprietary Schools, Statewide Planning, *Transfer Policy, Transfers, *Transfer Students, Universities, Vocational Schools
Identifiers-Kentucky

Data regarding transfer and non-transfer students who graduated from four representative Kentucky universities were studied with focus on three issues: program articulation, transfer of credits between different types of postsecondary institutions, and types of potential transfer students. The following problems were revealed: the lack of adequate program articulation between postsecondary institutions of different types, particularly between postsecondary vocational or proprietary institutions and the more traditional institutions; the lack of adequate individual course credit transfer and application toward degree programs; and the lack of uniformity among institutions evaluating non-academic or non-traditional experiences for credit in degree programs. Recommendations include: (1) a permanent statewide articulation committee to review and recommend policies and articulation agreements should be established; (2) all institutions need to develop course equivalency guides similar to those currently in use at many institutions; (3) each institution should have a committee for responding to articulation problems; (4) a transferability guidebook should be compiled to explain both institutional and statewide procedures; and (5) mechanisms for the evaluation of credits should be developed. Appendices contain institutional data. (Author/MB)

This report describes how barriers to planning for children inappropriately placed in foster care were overcome in a 3-year demonstration project: Freeing Children for Permanent Placement, conducted by the Children's Services Division, Department of Social Services, State of Oregon. Clients, amount of effort made, personnel involved, social work and legal components, process, cost savings, and the problems and successes encountered are described. Chapter 1 introduces the Oregon project. Chapter 2 discusses the need for permanency planning. Chapter 3 describes the children and their parents who were served by the project. Chapter 4 describes direct services, administrative resources, the institutional framework and the technology of permanent planning. Chapter 5 gives a case history of one family in order to show the way the project worked to achieve permanency planning goals. Chapter 6 describes the prerequisites to mounting a child advocacy effort on a scale broader than simple trial proceedings. Chapter 7 details the project's expenses and compares them to an estimate of what would have been spent had the children served remained in foster care. Chapter 8 highlights some of the events that shaped the development, acceptance and implementation of permanency planning in Oregon. (Author/RH)

Rehmann, Jacqueline T.

A Study of the Conjoint Drawings of Identical and Fraternal Twins: A Pilot Study.

Pub Date-78
Note-26p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Childrens Art, Clinical Diagnosis, Elementary School Students, *Individual Development, *Maturation, Psychiatry, Self Concept, *Self Congruence, *Twins

Drawings designed by three identical and three fraternal, normal, 6- and 7-year-old twin pairs are inspected for signs of a struggle for individual identity. Each twin must go through the process of becoming aware of him/herself as separate from the mother and must individuate from his/her twin as well. Interdependence may retard maturation. In the case of identical twins, the individuation process may be more complicated than it is among fraternal twins. Artwork is a reflection of ego integration and adequate functioning. Spatial relations, organization of the elements within the picture and symbolic representations demonstrate the ability of the ego to integrate unconscious material with reality. In the conjoint task of producing a drawing together, the dynamic interplay between the members drawing the picture enhances the potential of the art production as a graphic illustration of dimensions of the twinship. Comparison of the drawings of identical and fraternal twins and their behaviors in the drawing situations indicates that identical twins may have more anxiety and exhibit more rivalry than fraternal twins. Therapist determination of the relation of pathology to the twinship relation is a matter requiring further study. (Author/RH)

Identifiers-*Canada

This followup study, one of a series of documents assessing the University of Western Ontario Preschool Project, examines the long range effects of the Project on the performance of children from low income families after entering the public schools. This study summarizes data accumulated by the end of the academic year 1977-78 and describes subject performance at three grade levels (Kindergarten, Grade 1 and Grade 2). Two groups of preschool program graduates (one group including children who had started preschool as 3-year-olds, another including children who had started preschool as 4-year-olds) were compared with a group of control children who had begun kindergarten as 5-year-olds without prior preschool or group care experience. Measures were used to assess social adjustment as well as cognitive competence, intellectual ability and academic achievement. The results so far indicate that preschool graduates have maintained their preschool IQ and other gains; their academic achievements have been generally satisfactory and have been superior to those of the controls; all of the preschool graduates have been promoted each year, but several of the controls have repeated a grade. In general, children who started preschool as 3-year-olds appear to have made greater initial cognitive gains than children in the other groups, and have so far maintained these gains. (Author/SE)

Identifiers-*Texas

Based on the report of the Interagency Collaboration Project to Improve Services to Children, this book presents 78 facts about Texas children from birth to 18, on topics that range from broad environmental factors to specific handicapping conditions. Amplifying these facts are comments that provide the broader dimensions of cause, effect, scope, and prognosis. Subject areas are: environment, family, health, handicaps, education, troubled youth, child care, hidden children, and services. Each subject area is introduced by a general discussion of related problems. Factual statements based on statistics are given on subsequent pages. Frequently, the facts are given dramatic graphic illustration. The sources of facts and comments are cited. (Author/RH)

Identifiers-Behavior Assessment, *Foster Parent Training Project

One of a series of manuals for the Foster Parent Training Project, this workbook has been developed at Eastern Michigan University to assist instructors in presenting to foster parent trainees information concerning foster children with developmental disabilities. In 16 sessions foster parents are encouraged to (1) develop greater insight into their own attitudes and values and become more comfortable with themselves in working with foster children, (2) acquire a greater understanding of normal child development and the dynamics underlying problems in childhood, particularly those manifested in the behaviors of foster children, (3) acquire the skills needed to assess children's behavior and develop plans to assist children in coping with their problems and particular situations, and (4) develop management techniques to cope with children's day-to-day behavior so that children not only function at a higher level but are helped to feel better about themselves. An introduction to the instructor's manual is provided. In the lesson material instructions to the instructor are on colored paper. White pages are copies of the trainee manual. Instructor's material on these pages is in red ink. Excerpts from the 1974 Guidelines for Special Education Programs and Services in Michigan, AAMD (American Association on Mental Deficiency) Adaptive Behavior Scale Manual, an Instructor's Resource List and an Instructor's Bibliography are appended. Descriptors-Foster Children, *Foster Family, *Instructional Materials, *Legal Education, Legal Responsibility, Lesson Plans, Manuals, Parent Education, *Parent Role, Postsecondary Education, Teaching Techniques, *Training
Identifiers-*Foster Parent Training Project

One of a series of manuals for the Foster Parent Training Project, this workbook has been developed at Eastern Michigan University to assist instructors in presenting to foster parent trainees information concerning foster parents involvement with courts, legal proceedings, and public and private agencies. In eight sessions foster parents are encouraged to acquire greater understanding of the legal procedures by which children enter foster care and the ways in which courts operate; understanding of their responsibilities and rights under the law and the limits of their authority; and skills in record keeping and in providing testimony in order to assure that the children in their homes receive full protection under the law. An introduction to the instructor's manual is provided. In the lesson material instructions to the instructor are on colored paper. White pages are copies of the trainee manual. Instructor's material on these pages is in red ink. Various related material is appended: information on income tax exemption for foster children, some legal theory, the changing status of foster parents, a memo concerning judical considerations in child care cases, and federal law applying to education for the handicapped. (Author/RH)

Descriptors-Behavior Problems, Foster Children, *Foster Family, *Instructional Materials, Lesson Plans, Manuals, *Moral Development, Parent Education, *Parent Role, Postsecondary Education, *Socially Deviant Behavior, Stealing, Teaching Techniques, *Training
Identifiers-*Foster Parent Training Project

This manual, one of a series of manuals developed for the Foster Parent Training Project at Eastern Michigan University, was designed to assist instructors in presenting course content to foster parents on how to deal with problems of lying and stealing in their foster children. The introductory section presents information for the instructor on aspects of classroom dynamics (such as principles for teaching adults, choosing the physical facilities, classroom arrangement, establishing good classroom procedures, and teaching techniques) that the project staff has found successful in working with foster parents. Instructor's materials and copies of pages from the trainee workbook are included for four class sessions: (1) Orientation/Introduction, (2) What Dishonesty Means to Me, (3) Teaching Children to Behave Honestly and (4) The Development of Conscience in Children. An introduction to the instructor's manual is provided. In the lesson material instructions to the instructor are on colored paper. White pages are copies of the trainee manual. Instructor's material on these pages is in red ink. A skit to stimulate thinking about dishonesty is appended. (JMB)

Identifiers-Placement Stability

In 1973 the Children's Services Division (Oregon State) initiated a project to reduce the backlog of children in indeterminate status by developing more Permanent alternative placements. This follow-up study evaluates the placements of foster children who returned to their parents, were adopted, or remained in foster care. A literature review indicated that there were no evaluations of the stability of foster parent adoption. A two-phased study of 509 project children and two comparison groups was designed. The first phase measured stability of placements over 16 months. The second measured the quality of placement through interviews. It was found that permanent placements were more frequent and foster care placements were less frequent in the project group. Perception of permanence was more important than the placement a child was in. Placements with biological parents, while full of problems, were found to be satisfactory. Adoption by new parents was seen by children as an improvement over the past. On all measures, foster parent adoption was as successful as other placements. Foster care placement scores were high. Data, interview schedules and parent questionnaire are appended. (Author/RH)

Social Relations and Innovation: Changing the State of Play in Hospitals.

Pub Date-77
Note-222p.
Available from-Routledge and Kegan Paul Ltd., Ayer Building, Lawrence, Massachusetts 01843 ($12.50)

Document Not Available from EDRS.

Descriptors-*Elementary School Students, Foreign Countries, *Hospitals, Innovation, *Kindergarten Children, *Organizational Change, Organizations (Groups), *Play Therapy, Research, Social Structure, *Social Systems, Values
Identifiers-Cognitive Structure, England, Wales

Data on the process and impact of introducing play therapy in children's hospitals in England and Wales are presented in this book. The effects of the introduction of play therapy on children's behaviors in children's wards and on the relationships between parents, doctors, nurses, ancillary staff, and playleaders are described. The responsiveness of the hospital as an organization to change and reform is analyzed in terms of the power relations and value orientations among the participants at the ward level. The problems caused for children by the lack of information, meaninglessness and ambiguity about their situations are presented through observational data which reveal a predominantly laissez-faire system of authority in wards. Comparative studies of hospitals and social organizations are discussed and it is suggested that the view of hospitals as complex social organizations and children as social actors in these organizations facilitates explanation of why children are unhappy in hospitals and why attempts to remedy the situation are difficult and slow to put into practice. Overt Verbalization and Delay Behavior in Children: The Effects of Evaluative Statements and Freedom of Choice.

Pub Date-Apr 78

Note-5p.; Paper presented at the Biennial Southeastern Conference on Human Development (5th, Atlanta, Georgia, April 27-29, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Behavioral Science Research, *Delay of Gratification, Preschool Children, Rewards, Self Control, *Verbal Communication

The maintenance of self-imposed delay of gratification by preschool children was briefly examined in two studies. One study investigated the effects of overt verbalization on the delay behavior of 75 preschool children. Children who periodically spoke of the delayed reward during the delay task, regardless of whether they spoke positively or negatively, waited less than subjects who were not instructed to make any particular statement during delay. Children who uttered a positive statement about waiting delayed longer than non-instructed subjects, while children who spoke negatively of waiting did not differ in delay from non-instructed subjects. A related study, involving 98 preschoolers, examined the influence of two factors the content of overt self-verbalization (rewards or waiting) and freedom of choice (statement selected by child, statement assigned to child by experimenter, statement periodically heard by passive child) on delay maintenance. The influence of specific statements was affected by the level of involvement allowed the child in the selection and utterance of the statements. (Author/SE)

The Effect of Modeled Rationales on Moral Behavior, Moral Choice, and Level of Moral Judgment in Children.

Pub Date-Apr 78

Note-20p.; Portions of this paper were presented at the Biennial Southeastern Conference on Human Development (5th, Atlanta, Georgia, April 27-29, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Decision Making, Developmental Stages, *Elementary School Students, Males, *Modeling (Psychological), *Models, *Moral Development, Research

The impact of adult models on the moralities of seventy-two 5- to 7-year-old boys was assessed in this study. Each subject was exposed to a televised adult model and was then administered tests of moral behavior (resistance to deviation in a laboratory situation), moral choice (in a hypothetical situation) and moral judgment level (on an intentionality scale). Boys exposed to a model who said he would resist deviating from a prohibition and who supported this statement with a morally immature justification (based on reward/punishment) were subsequently more likely to use that model's statements to guide their own moral behavior and moral choice than were boys exposed to a model advocating resistance to deviation with a morally mature justification (based on reciprocity). Immature models expressing a deviating moral choice led to more deviating moral decisions in observers than did mature deviating models. The moral judgment levels of the subjects were not significantly affected by the models. The subjects' moral behavior was predictive of their moral choice while moral judgment level was not significantly related to the other two indices of morality. (Author/MP)

Descriptors-*Attachment Behavior, *Bibliographies, Child Abuse, *Children, *Data Bases, Day Care Services, Handicapped Children, Hospitalized Children, Infants, Neonates, Parent Child Relationship, Peer Relationship, Preschool Children, *Search Strategies

This bibliography compiles citations from seven selected data bases on the topic of attachment and children. The citations are grouped into eight categories: (1) Attachment General; (2) Institutions Hospitals, Prisons; (3) Day Care and Attachment; (4) Handicapped Children and Attachment; (5) Separation; (6) Child Abuse and Attachment; (7) Peer Attachment; (8) Neonatal Attachment. Each citation lists the title of the document, author, source of publication, descriptors, identifiers and data base(s) in which the citation appears. The data bases are ERIC, Psychological Abstracts, Exceptional Child Education, MEDLINE, Social Science Citation Index, Agricola, Sociological Abstracts. The introduction to the bibliography discusses the strategy used in searching these data bases by computer and offers some observations on searching multiple data bases. (Author/SE)

Descriptors-*Action Research, Adoption, Affirmative Action, *Agency Role, Caseworkers, *Child Welfare, Counseling, Day Care Programs, Foster Family, Parent Role, Preschool Children, Race Relations, Research, Social Agencies, *Social Services, Tables (Data), Unwed Mothers

This book describes an action research program in a child welfare agency. The purpose of the program was to evaluate agency services and to disseminate agency thinking and experimenting to other social workers. In the introduction (Part I) the development of the research project is briefly outlined. In Part II the areas in which research was conducted are elaborated. Background to the study, plan of the study, summary and implications of the findings and other information are provided for each area of investigation. Research areas include adoption, foster care, counseling, day care and affirmative action. A brief discussion and evaluation of the implementation of computer processing of research data are included. Part III offers conclusions about the uses of research in a social work agency. Researcher sensitivity to the needs and concerns of agency personnel and the utilization of personnel input are key elements in the success of the research programs. (RH)

This document presents the full text of two United States Senate hearings before the Subcommittee on Child and Human Development of the Committee of Human Resources on the subject of child care and child development programs. The hearings were held to gather information and examine how best to shape future federal legislation involving child care and child development. Hearing witnesses (comprised mostly of program directors and coordinators, all from California) addressed the Committee on November 25, 1977 and December 12, 1977 about topics such as community based child care delivery systems, children's centers, school care, drop-in and crisis care, infant handicapped care, Head Start and other related programs. Also included in the text are prepared written statements by witnesses. Information on child care research and publications is presented as well as four written sets of responses to questions asked by Senator Cranston on various aspects of child care. The appendix contains additional written statements by witnesses; letters and communications to U.S. Senator Cranston from program directors, committee chairmen and other leaders in the field of child care in California; and background material concerning child care services. Identifiers-*Maine

This study was designed to measure the economic impact on state agencies, AFDC recipients and child care providers if day care payments were calculated as income disregards rather than Title XX expenditures. The methodology, used in preliminary surveys in four states (North Carolina, Oregon, California and Maine) consisted of three major steps: (1) obtaining a random sample of 200 employed AFDC recipients whose children receive child care financed by Title XX; (2) obtaining data which would enable the AFDC grant to be evaluated to ascertain the impact if recipients were to pay their own child care with funds made available through an income disregard policy; (3) obtaining fiscal data which would enable the sample findings to be projected to the governmental bodies which appropriate AFDC and Title XX funds. The major findings included are the following: (1) the federal government would face a large increase in AFDC funding with no offsetting of earnings; (2) the state and local governments would free far more Title II dollars for reallocation than they would spend on increased AFDC payments; (3) wage earning AFDC clients would have to find far cheaper forms of day care than at present in order to avoid substantial monetary losses; (4) the negative financial impact on AFDC clients would vary and would most affect those earning the lowest wages. Dimensional Salience and Developmental Effects Upon the Learning of Rules.

Pub Date-Apr 78

Note-8p.; Filmed from best available copy; Paper presented at the Biennial Southeastern Conference on Human Development (5th, Atlanta, Georgia, April 27-29, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Age Differences, Cognitive Processes, *Concept Formation, *Dimensional Preference, *Elementary School Students, *Kindergarten Children, *Problem Solving, Research

This study had two major purposes: to examine the effects of dimensional salience upon the learning of conjunction and disjunction rules, and to investigate an alternative to the prevailing cognitive-change accounts of developmental differences in multidimensional problem solving. The relative salience of each of four stimulus dimensions (form, color, number and position of items on cards) was assessed among 32 kindergarten, second-, and fourth-grade children. Approximately two weeks later, conjunctive or disjunctive complete rule learning problems were administered utilizing each subject's two most-salient dimensions (A and B) or each subject's most- and least-salient dimensions (A and D, respectively). As expected, conjunctive problem solving was superior to disjunctive problem solving, and developmental differences tended to be larger on the latter tasks. Problem solving on tasks with A and B relevant to solution was superior to performance on corresponding problems with A and D relevant to solution. Although developmental differences were obtained on problems with A and D relevant, no such differences were obtained with A and B relevant. The implications of these findings for a perceptual-change model of development were discussed. (Author/MP)

Available from-North Dakota Study Group, Box 8039, University of North Dakota, Grand Forks, North Dakota 58202 ($2.00, plus $0.50 handling charge)

EDRS Price MF-$0.83 HC-$3.50 Plus Postage.

Descriptors-*Children, Evaluation, Group Dynamics, Group Structure, Observation, *Organization, *Program Development, Recall (Psychological), *Research Methodology, *Teacher Seminars, *Thought Processes

This monograph, one of a series initiated by the North Dakota Study Group on Evaluation, describes the background and workings of a set of seminars in which experienced teachers from different schools meet regularly to study children's thinking. Anecdotal accounts from seminar discussions are utilized extensively throughout. Chapter I examines the role of observation and recall in the seminar, describing how teachers train themselves to recall what happens in their own classrooms and emphasizing the importance of sharing teachers' observations and recording their discussions. The development of the seminar structure and process is traced in Chapter II, and basic assumptions about learning, teachers, respecting children, continuity, and research are examined in Chapter III. Chapter IV discusses evaluation within the context of the seminar, and Chapter V projects future seminar developments which may become possible as more seminars are instituted. (JMB)

A Study of the Relationship of Kindergarten Class Size, Length and Scheduling of the Kindergarten Day and Teacher Self-Concept to School Success.

Pub Date-15 Dec 78

Note-17p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Academic Achievement, Behavioral Science Research, Classroom Arrangement, *Classroom Research, *Class Size, Comparative Analysis, Extended School Day, Kindergarten Children, Literature Reviews, *Preschool Teachers, *School Schedules, *Self Concept, Small Classes, Student Adjustment, Teacher Attitudes, Teacher Role

Identifiers-*Length of School Day

Research studies on the length and time scheduling of the school day, class sizes and teacher self-concept were examined in an attempt to determine the influence of these variables on the academic success and developmental growth of children during their kindergarten year and beyond. Section I reviews research literature on class size and discusses nine major statements on the effects of class size on both teachers and students. Section II reports on the results of several studies dealing with the length and scheduling (full day, half day, alternate full days) of the school day. Section III contains conclusions and recommendations. Major results are discussed. The literature reviewed on class size generally supported the smaller class size as being more beneficial than larger classes in the areas of cognitive development, academic development, social development, emotional development, teacher effectiveness and teacher satisfaction. The literature search on length and scheduling of the school day did not produce conclusive evidence as to the advantages of half-day or full-day programs for children. However, teachers who worked with two groups of children each day indicated frustration with trying to provide for all the needs and interests of two different sets of children. Teacher self-concept appeared to be a variable that affected student self-concept and school achievement. (Author/SE)

A review of the seminar proceedings on ``The Realities of the Declaration of the Rights of the Child'', held in Melbourne, Australia in May, 1978 is presented in this paper. The report contains the opening address and speeches on the following topics: (1) the rights of the child myth or reality; (2) present social and judicial developments and practical problems pertaining to the principles presented in the 1959 United Nations Declaration of the Rights of the Child; (3) a reaction against child rights; (4) issues and policies concerning who's responsible for the rights of children in a changing society; (5) relationships between childhood socialization and the role of parents and the role of society; (6) major problems and differences affecting children's growth and development in both Third World and Western urbanized industrial countries; (7) rights, needs and demands of the individual child, the child's family and the state; (8) public policies for children; (9) children's rights and cultural diversity; (10) world hunger and the child; and (11) language development in children. Also included: a list of questions posed as guidelines for group discussion; the introduction to the plenary session of the seminar; a summary report of the seminar, and a bibliography of the rights of the child and the family. Ross, Helen Warren

Other Than Mother Care and Its Effect on the Mother.

Pub Date-Oct 76

Note-24p.; Paper presented at the meeting of the American Association of Marriage and Family Counselors (San Francisco, California, October 7, 1976)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Child Care, Comparative Analysis, *Day Care Services, *Decision Making, *Mother Attitudes, *Mothers, Questionnaires, Research, *Working Women

Available literature does not provide systematic data concerning the problems mothers face when leaving their children in the care of others as they pursue career or education. This study is designed to provide such data. A questionnaire including standard demographic questions and two general questions (Why did you decide to place your children in day care? Did the decision cause you any problems?) was administered to two sample groups. Two two samples consisted of 32 University student parents and working class families from the San Diego area. Analysis of the data indicated that: (1) the campus population had younger children in care, had more mothers continuing in careers, expressed more concern about the child's placement, and had less difficulty with fees; (2) mothers forced to work because of economic necessity tended to attribute the need for day care placement to the need for the child to learn ``to get along with others''; (3) parents who had some options about child care and who left their children in child care were more apt to say that they needed care for the child so the mother could ``take a break'' or ``pursue her own goals'' and were more likely to question and worry about having others care for their children. Descriptors-*Child Care Workers, Cost Effectiveness, *Curriculum Development, Early Childhood Education, *Instructional Materials, *Learning Modules, *Performance Based Teacher Education, Postsecondary Education, Preschool Education, *Preschool Teachers

The objective of this project was to develop and test ten module units of a competency-based training system for adults who work with young children. Phases of the developmental process are described. Training sessions for voluntary participants in the module writing project are outlined, and planning, writing and editing activities are indicated. Plans for evaluating the completed modules are pointed out. Pretest sessions were held for 45 day care personnel who volunteered to participate in the evaluation effort. Following the pre-test the adults received a copy of a self-selected module and were asked to study and practice doing the skills of the module with their young children. A written post-test and an observation were the final means of evaluation. Each module was tested by at least seven adults, and most users were able to demonstrate the module skills. Problems of cost effectiveness are considered. Conclusions and recommendations are suggested. Various forms and materials used in the development effort are attached. (Author/RH)

This collection of policy papers by a dozen national experts in subject areas related to child welfare is designed to assist public and voluntary agency program directors in their efforts to update current programs or to design new ones. Sequentially the chapters: (1) set a framework for the following papers, (2) examine the provision of foster care to children as a decision making system, (3) provide analytic reference points about institutional care of children and use them for the projection of program goals, (4) examine change in the roles of the key actors in the adoption system, (5) analyze problems in the implementation of child welfare services, (6) develop a perspective on adolescent pregnancy and parenthood, (7) examine the functions and other dimensions of the child welfare field, (8) describe the national problem of adolescent status offenders and advocate a program outside of the juvenile justice system, (9) develop plans for children of divorce, (10) advocate reforms to protect the rights of neglected children and to restrict state regulation of family relationships, (11) provide an overview of problems of the Spanish speaking/surnamed poor and advocate appropriate programs, and (12) present reasons for developing a federal level, comprehensive, cohesive family policy. Cardiovascular Conditions of Children 6-11 Years and Youths 12-17 Years: United States, 1963-1965 and 1966-1970.

Bureau of the Census (DOC), Suitland, Md.; National Center for Health Statistics (DHEW), Rockville, Md.

Report No.-DHEW-PHS-78-1653
Pub Date-Apr 78
Note-55p.; Vital and Health Statistics: Series 11, Data from the National Health Survey; No. 166
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Adolescents, Age Differences, *Cardiovascular System, *Children, Family Income, Geographic Regions, *National Demography, *National Surveys, Parent Education, Racial Differences, Rural Urban Differences, Sex Differences, *Special Health Problems

This report presents estimates of the prevalence of heart and other circulatory conditions of children and youths age 6 through 17 years in the noninstitutionalized population of the U.S. Estimates are based on diagnostic impression data from the direct, standardized examination findings of the Health Examination Surveys among national probability samples representative of the 23.8 children age 6 through 11 years in 1963-65 and of the 22.7 million youths age 12-17 years in 1966-70. Findings are analyzed by age, sex, race, geographic region, urban-rural residence, annual family income, and in relation to other findings. Among children, about 570,000 have a significantly abnormal heart or other circulatory condition. Among youths, more than 1 million have a significant cardiovascular condition. Among children nearly three-fourths of these conditions are considered congenital, while among youths nine percent are considered congenital. The prevalence of cardiovascular conditions is higher among Negro children and youths than among white groups, higher among those living in the South or in rural areas, and higher among the unschooled and poor. Survey data are presented in 15 tables. Statistical notes, definitions of demographic and socioeconomic terms, and medical history and physical examination forms are appended. (Author/RH)

Descriptors-Academic Achievement, *Elementary Education, *Individualized Instruction, *Information Dissemination, *Program Evaluation, Research, Student Attitudes, Teacher Education, Teaching Methods

This report collects the findings of three sequential evaluation studies of a network system approach to the dissemination of techniques of individualizing instruction in elementary schools. In the network approach, college education personnel trained coordinators from school districts who, in turn, disseminated individualization materials and techniques to classroom teachers. Results of teacher surveys showed that teachers rated initial training sessions and summer workshops effective and found that participation in the training increased their use of individualizing techniques. Third and fifth grade students' achievement and attitude data from 1974 and 1976 were analyzed cross-sectionally and longitudinally to investigate program effects in three schools: Model, Parallel, and Atypical. The Model school was designated as a model of the use of individualized instruction. The Parallel school had a population similar to the Model school but used less individualization. The Atypical school consisted of high-IQ children of middle to upper middle class parents. On almost all achievement subtests, Atypical scores were higher than Model scores. Model scores were higher than Parallel. Reference ability, an outcome emphasized in the individualization program, was greater in the Model school. Attitude data indicated that the individualized programs promoted better attitudes among children toward school and school subjects. The dissemination effort resulted in the development of an undergraduate course in open education at the network college. (Author/RH)

On February 8 and 20, 1978, the United States Senate Subcommittee on Child and Human Development heard testimony regarding child care and child development programs which would provide background information to committee members examining how best to shape future federal legislation involving child care and child development. Testimony and prepared statements were presented on several aspects of child care, including operational and health policies, costs of child care, scope of services, and delivery systems. Testimony was heard from parents, child care providers, program directors and others concerned with the welfare of children. Articles, other publications, communications and responses to child care questions posed by Senator Alan Cranston were added to the record. (The appendix contains additional statements, communications, reports, and research studies.) (SE)

Identifiers-*Education Commission of the States

This booklet, which contains the papers, provides a variety of alternative points of view concerning the implementation of parent education in public schools. The first paper outlines a conceptual framework useful for differentiating between types and levels of educational change involving parents. The second suggests potential methods for implementing a comprehensive program of parent and family education. The third suggests some practical steps for implementing parent education in a way that will encourage local initiative. The fourth discusses organizational problems in institutionalizing parent education in the public schools. The fifth concentrates on four key questions that crop up in discussions of parent education and suggests how communities can begin to move at the local level. The sixth presents a number of criteria for successful parent education on the local level. The seventh examines the role of the public school in the parent's education. The eighth describes the California program as a model for parent education. The ninth examines the program characteristics necessary to bring about successful implementation. The tenth underscores the need for an informed and systematic approach as policy makers consider alternatives for implementing parent education in the schools. (MP)

Blocks: Essential Equipment for Young Children. A Self Instructing Learning Package.

West Virginia State Dept. of Education, Charleston. Div. of Instructional Learning Systems.
Pub Date-78
Note-34p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Child Development, Early Childhood Education, *Educational Equipment, Equipment Storage, Guidelines, Learning Activities, *Manipulative Materials, *Preschool Children, *Teacher Role
Identifiers-*Blocks

This inservice package for teachers provides a rationale for using blocks to enrich the young child's classroom environment and suggests numerous ways blocks can be used to encourage the physical, intellectual, social and emotional development of young children. A brief delineation of the developmental aspects of the block play stages through which a child passes is followed by a discussion of the adaptability and creative potential of block building. Ways in which block play lends itself to physical activity, providing a background for mathematical and scientific concepts and the social development of young children are described. Criteria for the selection of blocks, information on various types of blocks and basic accessories for the block area are listed. Guidelines for purchasing blocks, comments on the importance of having sufficient blocks and adequate work space and shelving, and suggestions on how to arrange to have blocks constructed inexpensively are included. The role of the teacher in encouraging the children's development in the block area is emphasized. (CM)

The purpose of this textbook is to provide students in early childhood education, who have had previous contact with a child care center, with the technical information needed to operate different kinds of viable programs. In 16 chapters, a director's responsibilities for starting and maintaining a center program are given. The role of the director as a model of caring and respect for others and the importance of good interpersonal relationships and trust within a center are emphasized in the first chapter. Subsequent chapters focus on assessing community need and establishing a program; licensing and certification; establishing and working with a board; handling financial matters; funding the program and writing proposals; developing a center facility; equipping the center; grouping and enrolling the children; managing the food and the health and safety programs; evaluating center components; providing for personal and professional staff development; working with parents, volunteers, and the community; and being an effective administrator. Class assignments and exercises are provided for each chapter. Working papers which cover, among other program dimensions, need assessment questionnaires, sample philosophies, federal child care data, association bylaws, budgeting, membership applications, sample proposal and source list for funding are included. Descriptors-*Curriculum Design, Decision Making, *High School Students, Parent Attitudes, Parent Child Relationship, *Parenthood Education, Personal Values, *Program Administration, *Program Content, *Program Development, Program Guides, Secondary Education, Self Concept, Teaching Methods

Identifiers-Oregon

Based on a pilot project in ten Oregon high schools, this adopter's guide describes a training program designed to prepare high school students to be mentally and emotionally healthy parents. Three overall curriculum goals are identified: providing practice in clarification of personal values and responsible decision making, clarifying and strengthening self image through interaction with young children, and introducing realistic expectations of parenthood through dealing with concepts which promote physical and mental well being. Program teaching methods include the use of lectures, videotapes, values exercises, films and direct experience at schools or child care facilities in the community. The guide is divided into six sections: (1) deciding whether to adopt the model (assessing potential community support, resources and finance), (2) planning program operation (defining organizational and personal roles and responsibilities, and setting management objectives), (3) founding the program (securing field sites and maintaining community support), (4) implementing the program (orienting and training teaching staff and child care personnel), (5) operating the program (identifying curriculum goals and instructional guidelines), and (6) planning and conducting summative and formative evaluation. Appendices include a project overview, the program adoption budget summary, a sample budget for an on-campus child care center, the pre-parenting preservice format, a student skill checklist, an interim evaluation report, and a sample 18-week schedule of classes. Descriptors-Emotionally Disturbed, *Handicapped Children, *Individualized Programs, Parent Child Relationship, *Parent Participation, Parent Responsibility, *Parent Role, Physically Handicapped, *Special Programs, Teaching Methods
Identifiers-*Parenting Skills

This paper discusses ways parents influence the educational and emotional development of their handicapped children and how parent involvement in special education programs facilitates growth processes in these children. Research findings indicating the importance of the parent-child relationship and parenting styles are summarized. Program descriptions are presented and suggestions are given for implementing aspects of parent involvement in programs designed to meet the needs of handicapped children. Included are discussions of the desire for varied program approaches to meet individual parent-child needs; language delay and creative programming in the home; child abuse problems and solutions; severe emotional handicaps in children and how parents can help; the need to provide information for parents (on their children's handicapping conditions, on various types of programs and the theories on which they are based, and on mainstreaming possibilities) to help them make decisions as to the best placement for their children. Advantages of parent-to-parent models which provide opportunities for parents of handicapped children to talk and work together are discussed along with programs focusing on the prevention of childhood handicaps through parent education; educational resources for parents; and parental characteristics and behaviors which are likely to promote optimum development of handicapped children. An Interdisciplinary Educational Model to Promote Family Development and Individual Growth: Teachers and Social Workers Learn Together.

Pub Date- 77
Note-49p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Educational Programs, Educational Responsibility, Family Counseling, Family Problems, *Family Programs, Family School Relationship, Field Experience Programs, Higher Education, Institutional Role, *Interdisciplinary Approach, *Maladjustment, Models, Parent Education, Preschool Education, *Preschool Programs, Program Descriptions, Social Responsibility, *Social Services, Social Work, Sociopsychological Services, Team Training

This report describes a five-year interdisciplinary training program in education and social service for the children, parents and university students at the Wayne State University College of Education Laboratory Nursery School and details the impact of the training model on six representative families enrolled in the nursery school. The basic components of the training program are: primary emphasis on total family approach, intensive family involvement at all levels of the program, and parent education. Chapter One outlines the structure of education and social work personnel participation in the training program. Chapter Two indicates the range and kinds of interventions program workers made in six severe but representative cases. Chapter Three briefly assesses the program. Implications of the program for creating a new professional (human service educator) who assumes responsibility for the total family, are discussed. (Author/RH)

Identifiers-*Medicaid

This booklet provides an overview of the Medicaid Early and Periodic Screening Diagnosis and Treatment program (EPSDT). In five brief sections the origins, operations, concepts, functions, and questions and answers about EPSDT are covered. Section I emphasizes that the EPSDT is a step toward a comprehensive health care system that combines outreach, supportive services, follow-up, and case management services for

children of Medicaid-eligible families. A Medicaid EPSDT implementation timeline for the states is provided. Section II covers federal and state responsibilities and program planning and implementation. Section III defines the concepts of the program: early, periodic, screening, diagnosis and treatment. Section IV presents the rationale for the program. An inventory of common EPSDT screening procedures is included. Section V consists of questions and answers about EPSDT. (Author/RH)

This guide for administrators, based on the best practices found in 25 states, proposes a prototype system within which a more humane and sensitive delivery of services at the agency level can be efficiently achieved for children and their families. System goals for assisting clients are described, and the objectives which must be met to achieve those goals are listed. Characteristics of the system are described in terms of inputs to the system (e.g., clients and personnel), system functions (community outreach, reception, emergency service provision, diagnosis), standards the system must satisfy, feedback required by the system, and the system's results in terms of service to clients, agency outcomes, and information outputs. The prototype also specifies requirements for effective operation; these are grouped into four categories: resource management (e.g., staffing), general management (e.g., office administration), self assessment and planning, and information processing (with emphasis on case records). The final section briefly discusses implementing the system. Diagrams are included to illustrate system structure, operations and relations with outside agencies and the community. (BH)

The purpose of this guide is to provide background and focus material for political action regarding several areas of concern related to children and their families: unemployment and the working parent, supports for family economic stability, health and family services, and the environment and the working parent. Each chapter presents brief sketches of typical family problems in contemporary U.S. society, text which provides background information related to these problems, and questions leading to local investigation and public action. Chapters focus on (1) stable jobs for parents, (2) public support for the poorest families, (3) equal job chances for all parents, (4) combining jobs and parenthood, (5) social services for all families, (6) child health and safety, and (7) the politics of children. A list of organizations and resources from which statistics, research, policies, and programs may be obtained is included. (Author/RH)

Identifiers-Cincinnati (Ohio), *Project Head Start

Designed to evaluate the progress of children who had gone through the Cincinnati Public School System Head Start Program as a means of getting some feedback about the long range impact of Head Start, this study compared referred Head Start, non-referred Head Start and non-Head Start groups of third grade school children on academic and social achievement, language processing and classroom behavior. One hundred fifty six randomly selected subjects were assigned to one of three groups: (1) Referred Head Start, including Head Start children who were referred to special or supportive services in elementary school; (2) Non-referred Head Start, including Head Start children whose developmental and/or adjustment patterns did not require special services; (3) Non-Head Start, including control children of the same age and grade as the Head Start sample. These students were administered the Kuhlmann-Anderson Intelligence Test; the Metropolitan Achievement Test, Primary 2, Form L.M.; the Myklebust Picture Story Language Test; and the Devereux Elementary School Behavior Rating Scale. A Two-Way Analysis of Variance and a Stepwise-Discriminant Analysis/Priors Equal to Size analysis were performed on the test data. Among the results discussed, it was concluded that the Head Start and non-Head Start students did not demonstrate any significant differences in cognitive abilities or in achievement-related classroom behavior overall. There were more areas of significant behavior differences for the main effect of sex between subgroups of Head Start (referred and non-referred) than specific cognitive subgroup differences. Descriptors-*Child Care, Day Care Programs, *Early Childhood Education, Educational Anthropology, Educational Experience, Ethnography, *Research Methodology, *Research Needs, Research Projects, Social Factors, Social Science Research, Social Systems

Identifiers-*Qualitative Studies

The purpose of this paper is to indicate priorities for qualitatively-based research in child care. Three main foci for research are indicated. Researchers should examine the multi-faceted cultural and social experiences of the children in programs, investigate the social system in which adults form formal and informal child care arrangements, and study the political and economic influences on all types of child care. The complex ways in which programs work to bring about particular outcomes and how children acquire the culture of centers have not been sufficiently studied. Specific attention should be given to the adjustments children must make in the transition from home to center care. Ethnographic and behavioral approaches can be used to study the child's behavior within the context of the social system of the center. Case studies eliciting the social and political context and atmosphere in which centers operate are needed. Wtihin-program conflicts and resolutions concerning matters such as education, race, value orientations and minority employment, etc., should also receive attention. Anthropologists may effectively assist center participants in conducting in-house research. Appropriately fashioned research and analysis needs to be done so that policy discussions become more clearly based on underlying political and ideological realities. Anthropologists may clarify dimensions of ethical concerns related to disputes over home versus center care. Twelve pages of bibliographic citations are included. (Author/RH)

Fogel, Alan

Beyond Sex Education: How Adults Relate to Children's Sensuality.

Pub Date- 77
Note- 17p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Affection, Affiliation Need, Childhood Needs, *Child Psychology, Children, Cultural Context, Parent Attitudes, *Parent Child Relationship, *Parent Role, *Sex Education, *Sexuality, Social Attitudes

Current cultural attitudes toward children's sexuality resemble attitudes toward adults' sexuality; there is an emphasis on purely genital and orgasmic pleasure. Adults and children need warmth, physical contact, and a sense of belonging for which genital stimulation may be unnecessary or inappropriate. Children's sexual advances to adults, as well as adults' sexual attraction to children is re-interpreted in the broader perspective of love and affection in human relationships. It is suggested that adults learn to accept and recognize their own, and children's feelings of arousal, while firmly setting limits on mutual sexual behavior. This approach, coupled with warm, non-sexual physical contact between adults and children, is an essential accompaniment to the sex education curriculum. (Author/JMB)

Descriptors-*Child Care, Day Care Programs, *Early Childhood Education, *Economic Disadvantagement, Family Environment, *Family Programs, Federal Government, Federal Legislation, *Federal Programs, Government Role, Low Income Groups, *State of the Art Reviews

This report to Congress has been acknowledged by Department of Health, Education and Welfare officials as an accurate and comprehensive view of child development issues in the United States, circa 1979. Chapter 1 lists multi- purposes of the review, recapitulates Congressional interest in early childhood and family development programs, defines basic terms, overviews recent federal involvement in early childhood programs, recounts recent major reports on national policy on children and families and establishes the scope of the review. Chapter 2 stresses the importance of environment on development, surveys recent views on early childhood development and emphasizes the importance of the family. Chapter 3 surveys serious problems existing in the United States which adversely affect the development of children, including single-parent families, lack of prenatal care, poor environments, poor nutrition, lack of immunization, and child abuse. Implications of these conditions for school performance are discussed. Chapter 4 explores research findings which indicate that early childhood programs are effective and that parents are receptive to such programs. Chapter 5 delineates the scope of present programs and indicates the unmet need for child and family development programs. Chapter 6 describes HEW-sponsored demonstration programs. Chapter 7 indicates potential benefits and costs of programs and suggests considerations for program implementation. Selected program data are appended. (Author/RH)

Descriptors-Child Development, *Community Health, *Disadvantaged Youth, Economic Disadvantagement, *Health Programs, *Identification, Medical Services, *Preventive Medicine, Safety, Screening Tests, Special Health Problems
Identifiers-*Medicaid

One of six information booklets with accompanying training materials for the Medicaid Early and Periodic Screening Diagnosis and Treatment (EPSDT) program, this booklet describes the stages of child growth and development and some of the health problems which EPSDT clients might have. Section I describes tests commonly included in an EPSDT screening program. Section II overviews five stages of child growth and development: pregnancy, infancy, early childhood, childhood and adolescence. Child safety considerations are emphasized and issues faced during adolescence are discussed. Section III indicates the pattern of non-use of health care systems among EPSDT clients and provides guidelines for establishing a good relationship between parents and their child's doctor. Section IV discusses selected health problems which EPSDT clients are likely to have and about which EPSDT workers may want information. Health problems in the following categories are defined: anemia, child abuse, dental health, diabetes, hearing and speech, high blood pressure, immunization, lead poisoning, malnutrition, obesity, parasites, rheumatic fever, sickle cell conditions, skin problems, substance abuse, tuberculosis, venereal disease, vision. Treatment procedures and implications for the EPSDT worker are indicated. Section V lists selected references. (Author/RH)

Descriptors-Adoption (Ideas), *Delinquency Causes, *Delinquency Prevention, Delinquent Rehabilitation, *Delinquents, *Delivery Systems, Employment Opportunities, Family Influence, Financial Problems, Human Services, *Justice, Juvenile Courts, Law Enforcement, Peer Influence, Personnel Needs, Recreation, *Rural Youth, Social Values
Identifiers-*Tennessee (East)

Juvenile delinquency problems and ways to improve youth services were explored in a survey conducted in 1975 in 15 East Tennessee counties surrounding Knoxville. The 51 persons interviewed were associated with law enforcement, judicial, and counseling services; respondents believed that juvenile delinquency was on the increase in rural areas and that offenses among younger age groups were becoming more common. Crimes of violence were not mentioned so often as breaking and entering, theft, drug problems, and status offenses. Problems in the home environment, including family breakups, financial difficulties, and weak parental guidance and control, were most often cited as the main causes of delinquency. Lack of recreational facilities, limited job outlets, changing social values and peer pressures were also mentioned as contributing factors. When asked to evaluate nine kinds of programs used to tackle delinquency problems, respondents listed professional counseling and probation services, temporary detention facilities, and recreational outlets as the areas most often needing improvement at the local level. Funding, problems in gaining public acceptance of new ideas, and difficulties in finding qualified people to handle localized programs were mentioned as obstacles to improving youth services. Decentralizing juvenile services by pooling facilities among localities is discussed and costs are examined as well as other considerations. (Author/DS)

A Social, Economic, and Cultural Study of the Crow Reservation: Implications for Energy Development. Summary Report.

Crow Impact Study Office, Mont.; Mountainside West Research, Inc., Billings, Mont.

Spons Agency-Old West Regional Commission, Billings, Mont.
Pub Date-77
Note-26p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Academic Achievement, American Indian Culture, *American Indians, Developing Nations, *Economic Development, Economic Status, Educational Improvement, Environment, *Natural Resources, *Quality of Life, Reservations (Indian), Social Change, *Socioeconomic Influences, Statistical Data, Tables (Data), Tribes
Identifiers-Coal Mining, *Crow (Tribe), *Energy Development

Crow people want their resource decisions to benefit and strengthen the tribe socially and economically and to minimize damage to the tribal way of life, culture, and reservation environment. Based on a survey of 1016 reservation and non-reservation Crow families, conducted as part of a study of the impact of resource development on the reservation, the Crow want to stabilize reservation economy by the establishment of local, tribal-owned and operated small businesses. Crow people want improved local school facilities and curricula and their own community college. Currently, only Crow who are college graduates are employed at a level commensurate with their education. There is only 60% employment on the reservation, most of it menial and mostly from the various public agencies. The median family income is $4,500 per year. Fifty-three percent of Crow people interviewed favor the development of agricultural resources, 17% favor recreational and tourist resources, 14% favor coal resources and .4%, energy plant construction. They feel coal development will change their personal and tribal way of life positively by providing more money and jobs and better housing and education, but also negatively, because a large influx of outsiders would bring over-population, loss of tribal reservation control, increased social problems, and possible environmental deterioration. (SB)

Nordstrom, Jean And Others
The Northern Cheyenne Tribe and Energy Development in Southeastern Montana. Volume I: Social, Cultural, and Economic Investigations.
Spons Agency-Crow Impact Study Office, Mont.
Pub Date-Oct 77
Note-265p.
EDRS Price MF-$0.83 HC-$14.05 Plus Postage.
Descriptors-*American Indian Culture, American Indians, Business, *Community Development, Developing Nations, *Economic Development, Environmental Research, Guidelines, Industrialization, Lumber Industry, Natural Resources, *Policy, Quality of Life, Reservations (Indian), Rural Environment, *Socioeconomic Influences, Tribes
Identifiers-Coal Mining, Differentiation Theory, *Energy Development, Montana (Southeast), *Northern Cheyennes

Although there are no easy answers to the economic problems faced by the Northern Cheyenne in Southeast Montana, any economic development plans should stress long-term tribal self-sufficiency, serve community needs, and consider the Cheyenne culture. Differentiation theory is appropriate for understanding the local rural area and the special place the reservation occupies there, a place where people have been dependent on exporting extracted products and have lost any real control over their lives. The Bureau of Indian Affairs has mismanaged Cheyenne resources and unemployment on the reservation is high. Neither mere switching of export products nor total dependence on agriculture will solve the basic economic problems of the reservation, whose members favor the development of small businesses, certain industries, and coal mining for local use only. They feel that large scale mining would be both socially and environmentally harmful. Tribal members also feel the Cheyenne culture survives on the reservation, is significant, and must be preserved. Because community and economic development must proceed together, 13 guidelines help evaluate economic development options in terms of their compatibility with Cheyenne culture, concerns, and attitudes. Tribal participation is crucial to any economic development studies. Some tables, maps, and schematics illustrate points presented in the narrative. (SB)

Tippeconnic, John W.

Reaction to the Summary of Education Findings and Recommendations of the American Indian Policy Review Commission.

Pub Date- Apr 77

Note-26p.; Compiled at the Annual Indian Education Conference (18th, Arizona State University, Tempe, Arizona, April 13-15, 1977)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Agency Role, American Indians, *Conference Reports, *Delivery Systems, *Educational Finance, Educational Needs, Federal Aid, Federal Legislation, Higher Education, *Opinions, Teacher Education, Tribes

Identifiers-*American Indian Education, *American Indian Policy Review Commission, Bureau of Indian Affairs, Federal Indian Relationship, Office of Education, Tribal Sovereignty

Approximately 500 persons attended the 18th Annual Indian Education Conference that was held to provide Indian groups and individuals an opportunity to register their reactions to the educational findings and recommendations of the American Indian Policy Review Commission (AIPRC). Ten General Findings were presented and participants discussed and recorded their reactions in workshop sessions. The workshops also presented 20 additional findings in the areas of the Bureau of Indian Affairs (BIA) delivery system, higher education, the U.S. Office of Education (OE), tribal control, and State role in Indian education. Forty-five percent of the participants agreed with the AIPRC recommendation to shift all federal education programs from the OE and BIA to one administrative agency; 23 percent were undecided and 14 percent agreed. The recommendation to shift control of federal funds for Indian education from state and local governments to tribal governments drew support from 40 percent of the participants with 21 percent disagreeing and 11 percent undecided. Seventy-seven percent of those attending agreed with the finding that the new consolidated Indian agency would require efficient administration and an accurate funding mechanism to assure that target monies reached the tribes. In addition to tabular data showing the percentages and degrees of agreement, disagreement, and indecision, the document also lists specific comments made on each of the findings. (DS)

Pillai, K. Sivadasan

Non Formal Education for Agricultural Workers & Fishermen. A Case Study.

Pub Date-Feb 78
Note-47p.
Available from-Dr. K. Sivadasan Pillai, Reader, Dept. of Education, University of Kerala, Trivandrum-695014, S. India ($2.00)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Academic Achievement, *Adult Basic Education, Adult Vocational Education, Age Differences, *Agricultural Laborers, Case Studies, *Community Development, Developing Nations, Educational Background, Educational Methods, Foreign Countries, Health Education, Indians, Literacy Education, *Nonformal Education, Numbers, Rural Development, *Rural Population, Self Concept, Sex Differences, Transfer of Training
Identifiers-*Fishermen, *India (Kerala State), Socioeconomic Development

An attempt to integrate socioeconomic development with literacy through nonformal education programs in Kerala, India, involved illiterate and semi-literate adults (1050 men, 450 women) in two pilot literacy projects organized by the Sanghom (library organization), Mitraniketan, and state government. Two literacy primers were developed, using an idea-sentence-word-alphabet method, with topics focusing on numeracy skills, vocational improvement, social studies, health education, and subsidiary vocations. Course time was increased from 150 hours in the first program to 300 hours in the second. For final evaluation, literacy gains were tested and compared by age, sex, occupation, religion, and location; attitudinal/behavioral changes were assessed. Mean score of total learner attainment was 63.45 out of a possible 100, with a standard deviation of 20.65. Comparative achievement findings included: men scored significantly higher than women, fishermen scored higher than agricultural workers; no significant difference existed between skilled/unskilled workers; districts nearer project headquarters scored higher; previous schooling gave the learner an advantage; effect of age on achievement was negligible; no significant difference was found among Hindus, Christians, and Muslims. Attitudinal/behavioral changes included the learners using vocation, health, and literacy knowledge, improved self-concept, and greater interest in community development. (RS)

Navajo and Zuni A Bibliography of Selected Materials.
Gallup-McKinley County Schools, Gallup, N. Mex.
Spons Agency-Office of Education (DHEW), Washington, D.C. Office of Indian Education.
Pub Date-75
Note-166p.; Revised from 1974 edition; For related document, see ED 124 367
EDRS Price MF-$0.83 HC-$8.69 Plus Postage.
Descriptors-*American Indians, *Audiovisual Aids, *Bibliographies, Books, *Classroom Materials, *Cultural Enrichment, Elementary Secondary Education, Fiction, Films, Indexes (Locaters), Literature, Nonfiction, Periodicals, Reading Materials, Resource Guides, Self Concept, Tribes
Identifiers-*Navajo (Tribe), *Zuni (Tribe)

No attempts at selectivity, critical appraisal or value judgment are made in the revised, partially annotated bibliography, which focuses on materials printed by and about Navajo and Zuni Indian Tribes and is intended to acquaint elementary and secondary educators with the wide variety of materials available for classroom use to enhance the self-concept of the Indian student. About 1500 entries are organized into 6 sections. Entries for books published between 1928 and 1974 are contained in two book sections, one for Navajo themes and one for Zuni. Entries are alphabetized by author and divided into Fiction, Non-fiction and General. Publication date, publisher's name, latest price (if available), and type of binding are given for each book. Arbitrary judgments as to reading and interest levels are sometimes included. Annotated listings of films, filmstrips, discs, tapes, cassettes, multimedia kits, pictures, maps, transparencies, museums and agencies are alphabetized by title and organized by type in the Audiovisual Aids Section. Prices, times, availability, interest level and other pertinent data are included. The price and publisher's name of those Indian periodicals of interest to educators in Zuni-Navajo areas are included in the annotated Periodicals Section, organized alphabetically by title. A Book Publisher's Index and Media Publisher's Index are included. (SB)

Snowshoeing!
Pub Date-78
Note-35p.; Not available in hard copy due to use of colored ink
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Activities, *Construction (Process), Design, Elementary Secondary Education, Equipment Manufacturers, *Guides, *History, Illustrations, *Interdisciplinary Approach, *Outdoor Education, Safety, Scientific Principles
Identifiers-*Snowshoeing

Designed for use at either the elementary or secondary level, this guide to snowshoe instruction provides teachers and students with background information, proper care instruction, and various methods of use. Emphasis is placed upon an interdisciplinary approach to outdoor education and winter studies. Illustrations and photographs enhance opportunity for detailed instruction re: the snowshoe's history, design, care, construction, manufacture, use, and basic scientific principle. Additionally, this guide includes snowshoe activities and safety instructions. A list of snowshoe manufacturers located in the United States and Canada is also provided along with a 10-item reference list that includes one film. (JC)

A Multiethnic/Multicultural Curriculum for Young Children Designed for Yakima Indian Nation Early Childhood Programs.

Fort Wright Coll., Spokane, Wash.; Yakima Indian Nation Education Div., Toppenish, Wash.

Pub Date-78

Note-77p.

Available from-Kamiakin Research Institute, P.O. Box 509, Toppenish, Washington 98948 ($4.00 plus $0.50 for package and mailing)

Document Not Available from EDRS.

Descriptors-*American Indian Culture, *American Indians, Bibliographies, *Cross Cultural Training, Cultural Awareness, Cultural Pluralism, Curriculum Development, Curriculum Evaluation, *Curriculum Guides, *Early Childhood Education, Environment, Formative Evaluation, Group Dynamics, Health, Learning Modules, Safety, Self Concept, Student Characteristics, *Values

Identifiers-American Indian Literature, *Yakima (Tribe)

When Kamiakin, a famous chief of the Yakimas, was asked at the treaty council of 1855 what he thought of the proposals Governor Issac Stevens had just put forth, he replied: ``I do not speak of . . .myself, it is my people's wish''. In that great tradition of respect for the individual's unique contribution to the decision of the whole group, this curriculum for the Yakima Indian Nation preschoolers is born. The guide consists of four major areas: the Curriculum Development Process; Framework for the Curriculum; Criteria for Evaluating Curriculum; and the Curriculum. Cognitive style, general goals, objectives/learning experiences, and multicultural learning experiences are included in the unit. The main portion of the document consists of learning objectives and corresponding activities with a multicultural focus. Divided into six competency area levels, the guide strives to help Yakima Nation children acquire the skills of the dominant culture and the value system of the Indian culture, thereby lessening the negative effects of culture conflict. Understanding of the Yakima unique cultural heritage and identifying with it through parents and teachers develop the child's healthy, positive self-image. A resource bibliography, resource listing, and appendix conclude the document. (Author/RTS)

A Comparative Evaluation of Indices of Rurality Are Rural Consumers Adequately Represented in the Shaping of Community Health Services?

Spons Agency-Kellogg Foundation, Battle Creek, Mich.; Pennsylvania State Univ., University Park. Pennsylvania Agricultural Experiment Station.
Pub Date-1 Sep 78
Note-20p.; Adapted from a paper presented at the Rural Sociological Society (San Francisco, California, September [illegible], 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Consumer Economics, Definitions, Delivery Systems, Demography, Federal Programs, Geographic Distribution, *Governing Boards, *Health Services, *Research Methodology, *Rural Population
Identifiers-*Health Systems Agencies, *National Health Planning Resource Development Act, New York, Pennsylvania

In order to investigate the extent to which rural residents are represented among consumer Health Systems Agencies (HSA) governing board members, alternative indices of rurality were examined. Data were used from eight HSA's in Pennsylvania and one bi-state HSA (Pennsylvania and New York); 241 consumer addresses were analyzed. Two discrete, single variable measures which focused upon demographic and geographic approaches were used to define rurality in order to determine the degree to which the proportion of consumer ``rural'' members agreed with similar proportions of the population. Using a ``rough approximate'' test it was found that for either measure the proportion of HSA consumer board members did not consistently parallel the residential characteristics of the population in the various health service areas. The two indices were then compared to determine if an HSA region varied from one index to another; again, discrepancies existed depending on the index of rurality used to classify consumer residencies. It was concluded that if HSA's continue to be required to have governing boards broadly representing the geographic areas of their health service areas, then a number of issues have to be resolved; the foremost of these is determining the philosophical underpinning for the working definition of rural (i.e., on the basis of demographic and geographic characteristics, economic characteristics, or occupational characteristics). Descriptors-*Access to Education, Agency Role, American Indians, Educational Finance, *Educational Legislation, Elementary Secondary Education, *Evaluation, Federal Legislation, Federal Programs, Government Role, Government School Relationship, *Hearings, Interviews, *Self Determination, Treaties, Tribes, Vocational Education

Identifiers-*American Indian Education, Bureau of Indian Affairs, Federal Indian Relationship, *Indian Basic Education Act

On February 7, 8, and 9, 1978, the subcommittee held hearings to obtain input from official representatives of Indian tribal governments and the Bureau of Indian Affairs (BIA) regarding H.R. 9810 which is intended to amend certain sections of Public Law 874 in order to provide for the basic education of Indian children, to provide improvements in the delivery of other educational services for Indians, and for other purposes''. The subcommittee considered the testimony to be an expression of Indian self-determination. Most witnesses were in general agreement with the intent of the bill but proposed further amendment or changes. The BIA could not endorse enactment of the bill as presently written because it would not contribute to the effective delivery of education services to Indian children. Among those testifying were representatives from ten different Indian groups: Tribal Councils of the Winnebago, Yakima, Warm Springs, Sisseton-Wahpeton Sioux, Papago, and Navajo; All Indian Pueblo Council; Flathead Reservation; Seneca Nation; and Minnesota Chippewa. The hearing proceedings include the text of the bill. Some tables and schematics illustrate the narrative. (SB)

Descriptors-Abstracts, *Annotated Bibliographies, *Behavioral Science Research, Bibliographies, *Correctional Rehabilitation, *Educational Research, Experiential Learning, Literature Reviews, *Outdoor Education, Psychology, *Reference Books, Research Design, Resource Guides, Subject Index Terms, Theories
Identifiers-Experiential Education, *Outward Bound

The main purpose of this reference volume on Outward Bound (OB) is to provide access to the research literature by giving the reader a sense of the state of the literature, providing analysis on salient research and programmatic issues, granting easy access to individual pieces of research, and opening up related research literatures. Section I is an overview of the research literature on OB presented in tabular form and listing title, author(s), topic, type of study, type of course, assessment, and whether or not the study's findings are reported in Section II. Explanations are provided on how to use the table and its relationship to other sections in the volume. Section II is a report on what has been learned about academic and research issues from the literature; it constitutes a review of empirical studies, covering research design, theory, special OB topics, and other observations. Section III consists of two types of summaries: (1) summaries by the author of this volume which include critical commentary; and (2) summaries in the words of the authors of the research. Section IV is an extensive bibliography of related research literatures organized under three major headings: (1) Education; (2) Psychology; and (3) Corrections. A minor heading Other'' is also included. The bibliography includes well over 1000 citations dating from the early 1900's to the present. Section III includes over 100 summaries by Shore and by the research authors covering OB from its inception to the present. (JC)

Cardwell, G. R.

Research and the Fallacy of Recidivism. Studies on Wilderness Programs for Troubled Youth.

Pub Date-30 Sep 78
Note-13p.; Presented at the Annual Conference on Experiential Education (6th, St. Louis, Missouri, September 30, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Delinquent Rehabilitation, Delinquents, *Evaluation Criteria, Expectation, Experiential Learning, Needs Assessment, Objectives, *Outdoor Education, Physical Fitness, *Program Evaluation, *Recidivism, Self Esteem, Skill Development, Youth, Youth Programs
Identifiers-*Adventure Activities, Outward Bound, Project DARE, *Wilderness Education Programs

Past recidivism studies on adventure/wilderness programs for delinquent youth have suffered from several problems: lack of uniform definition and interpretation of recidivism; varying lengths of study time; different follow-up periods; provincial or state variance in returns to Training School or incarceration in an adult system and in the process for returns; failure to differentiate between type and severity of criminal offenses; and assumption of recidivism based on charge with an offense rather than judicial findings. Six recidivism studies, five on Project DARE, bear out these shortcomings. It behooves wilderness programs dealing with delinquent youth to establish criteria under which they wish to be evaluated. Two alternative evaluation criteria are economic (per diem program costs compared with costs in an institution) and the fitness factor (possible correlation between increase in physical fitness during program with increase in self-esteem). The key issue, however, in establishing alternative evaluation measures lies with demonstration of personal growth and social and physical functioning in a program that is replicable. Effective programming requires specification of (1) target behaviors/needs, (2) processes to achieve acquisition of new skills/attitudes, (3) logical reasons why processes should work, (4) desired outcome and expected duration of effect, and (5) expected level of success. (RS)

Burnham, Ruth Bradford

An Experiential Learning Center: A New Approach in Student Affairs Programming.

Pub Date-78
Note-44p.; Submitted as partial fulfillment of degree requirements for Master of Education, Colorado State University
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Experiential Learning, Facilities, Handicrafts, *Higher Education, Innovation, Institutional Role, Interagency Cooperation, Interdisciplinary Approach, Leisure Time, Outdoor Education, *Program Development, Program Evaluation, Recreational Activities, *Student Personnel Services, *Student Unions, Volunteer Training
Identifiers-Cultural Journalism, *Experiential Education, *Experiential Learning Centers, Student Activities

Rooted in the philosophy of John Dewey and the work of Kurt Hahn, experiential education is a process of whole person education based on active participation by the learner in the learning situation. As professionals committed to student development, student personnel administrators are particularly well-suited philosophically and institutionally to implement an experiential learning program. They command a variety of resources and can accommodate experimental efforts more readily than other university entities. A student affairs experiential learning center (ELC) could, for example, offer outdoor and survival education, cultural journalism, craftsmanship, and/or a variety of avocational leisure-time activities, as well as volunteer service learning activities. The student center is especially well-suited to house an experiential program, for it already has the facilities needed in an ELC program, an adaptable staff, and great campus visibility. Development of a student affairs ELC must include open communication with other groups and agencies and an interdisciplinary approach that encourages cooperation rather than competition. Provision also must be made for insurance to cover ELC staff, student center, and the university. Evaluation is essential to the program's credibility and its ability to learn from experience. Elements subject to evaluation include individual student outcomes (satisfaction and personal growth), teacher outcomes (personal and instructional development), and program outcomes (effectiveness in terms of the target population). Descriptors-*Agricultural Laborers, Capitalism, Farm Labor, Farm Labor Problems, Foreign Workers, *Labor Conditions, Labor Supply, Mexican American History, Mexican Americans, *Mexicans, Migrants, *Migrant Workers, Minority Groups, *Racial Attitudes, Racial Discrimination, Racism, Rural Areas, Seasonal Laborers

Identifiers-*Labor Repression, *Texas (South)

Racism and racial exploitation, rather than disappearing with the march of capitalist development, appear instead as its intimate companions. The racial experience of the Mexican in South Texas was shaped by the rapid development of agriculture there in the early part of the century, between 1900-1910 and 1920-1930. The agrarian land revolution collapsed the existing Mexican class structure; by 1920 the Texas Mexican had generally been reduced to the status of landless and dependent wage laborers. A system of migratory wage labor began to emerge and with it "labor repressive control," which was basically the use of extra-market criteria and sanctions for organizing the recruitment, work activity, and compensation of wage labor. Mexicans were subjected to such exploitation as immobilization through debt, horsewhipping and other forms of physical abuse, shotgun dismissal to avoid payment of wages, and cancellation of credit at the local store. Their movement was restricted by vagrancy laws, local "pass" systems, manipulation of labor contracts, and labor agency laws. "Imperial Texas" was not a sovereign state, however, and labor repression failed to become a formal, coherent system because of external limitations. Rising demand for the Mexican worker in other parts of the U.S. along with certain federal court decisions resulted in the failure of the white commercial farmers (and white industrial workers) in their efforts to keep Mexicans in the fields. Identifiers-*American Indian Education, Bureau of Indian Affairs, Federal Indian Relationship, *Johnson OMalley Act

The need for basic federal support of Indian Education, the adequacy of federal programs in fulfilling that need, the problem of whether current educational delivery systems are meeting the educational needs of Indian children, and the creation of Indian controlled postsecondary institutions were the principal topics explored in the three days of hearings held in May of 1977. Particular discussion was devoted to the history and uses of Johnson O'Malley compensatory funds and other kinds of federal support. Officials from Arizona, South Dakota, Minnesota, and Montana described Indian educational needs and programs in their respective states. Other witnesses included administrators from various Indian schools as well as representatives from such tribes as the Miccosukee, Papago, Sioux, and Navajo. The final day of hearings concerned matters relating to Senate Bill 1215, which would provide for grants to Indian postsecondary educational institutions. Speaking in support of the bill were witnesses from the American Association of Community and Junior Colleges, American Indian Higher Education Consortium, Navajo Community College, Sinte Gleska Community College, National Indian Education Association, National Congress of American Indians, and National Tribal Chairman's Association. Three officials from the Bureau of Indian Affairs appeared to testify on the Bureau's policies and procedures for providing educational services to Indian students. A few graphics illustrate points presented in the narrative. (DS)

Indian Education Oversight; Part II: School Construction Johnson-O'Malley. Hearings Before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, 95th Congress, 1st Session (September 21 and October 6, 1977).

Identifiers-*American Indian Education, *Bureau of Indian Affairs, Federal Indian Relationship, Johnson OMalley Act

Oversight hearing held on two days in September and October of 1977 focused on school design and construction by the Bureau of Indian Affairs (BIA) and on the supplemental and basic support offered to Indian education by the Johnson O'Malley program. On both days Dr. William Demmert, Jr., Director of the Office of Indian Education Programs, BIA, appeared as a principal witness. In a panel discussion with other BIA officials and a representative from the General Services Administration Dr. Demmert described the new five year system the BIA had developed to identify need and define priorities in its school construction programs; he also presented a list of the 23 projects to be initiated under the plan. A representative from the Hopi tribe appeared to tell of frustrations the tribe was encountering in trying to get the BIA to begin design of a new high school. The hearing on the Johnson O'Malley fund system dealt specifically with the current phase-out of the basic support funds and problems encountered by tribes with the supplemental assistance. Dr. Demmert and two other BIA officials appeared to answer questions regarding BIA support of schools. Testimony was also offered by representatives from the Omaha, Winnebago, Santee Sioux and Minnesota Chippewa tribes. Directors from two alternative or experimental Indian schools also appeared. This document includes hearing proceedings, formal statements, and supplementary materials. (DS)

Indian Education Oversight; Part III: Bureau of Indian Affairs Reorganization. Hearings Before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, 95th Congress, 1st Session (September 26, 28, 29, and 30, 1977).

Identifiers-*American Indian Education, *Bureau of Indian Affairs, Johnson OMalley Program

Four days of hearings in September, 1977 were conducted on the need to reorganize the Bureau of Indian Affairs (BIA) with particular attention devoted to H.R. 9157, a bill to change the Bureau's Office of Education programs. Opening the testimony was a panel of BIA officials, including Forrest Gerard, Assistant Secretary for Indian Affairs. Mr. Gerard stated that reorganization would be initiated immediately and should be completed within a year and a half, adding that the management study of the American Indian Policy Review Commission would be used as a basis for the reorganization. Representatives of national Indian organizations and various tribes as well as officials from a number of Indian schools appeared to voice concerns about the proposed bill. Some of the areas they cited as needing attention included funds for facility construction, research to establish standards for basic education of Indian children, special education of both handicapped and gifted children, hiring practices (including the question of whether Indian preference was always desirable), teacher education programs, and the need for direct funding to tribal governments. Two witnesses from the National Indian Education Association and the National Congress of American Indians questioned whether the education services of the BIA should be pulled out and legislated separately from the rest of the Bureau, especially at a time when that agency was attempting a reorganization. Olivas, Michael A.
Hispanics in Higher Education: Status and Legal Issues.
Pub Date-4 Oct 78
Note-35p.; Paper presented to the National Association of College Admissions Counselors (Bal Harbour, Florida, October 4, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Access to Education, Admission Criteria, Census Figures, Cultural Awareness, Cultural Differences, Educational Legislation, Educational Policy, *Educational Research, *Enrollment Trends, Equal Education, *Higher Education, Junior Colleges, Mexican Americans, Minority Groups, Puerto Ricans, Role Models, *Spanish Speaking, *Student Recruitment
Identifiers-Chicanos, *Hispanos

In considering participation of Hispanic students in higher education, focus is on racial and ethnic data available, research on Hispanic students, education litigation and legal issues impacting on Hispanics, and recruitment. Though Hispanic enrollments in higher education have increased, high concentration of full-time undergraduates in two-year colleges (least-prestigious, least-funded institutions) carries resulting inequities. Graduate and professional enrollments are even bleaker than undergraduate statistics. Factors impacting on Hispanic participation in higher education include the shortage of highly trained Hispanic personnel to serve as catalysts for change and role models, lack of a federal policy on Hispanic higher education, few high level Hispanic appointments to agencies affecting national educational policy making, and little research attention to Hispanic students. Three research areas which do offer guides to improved access are models of student profiles, institutional research and marketing models, and Chicano student stress research. Legislative remedies are needed on census data and Title III administration, while legal issues include residency, desegregation, testing, and admissions. Improved recruitment is tied to surveys of Hispanic populations, examination of internal policies hampering Hispanics, use of Hispanic students in recruitment/monitoring, cultural awareness, and better support systems. Lira, Juan R.
An Investigation of Bilingual Teacher Training and its Effect on Bilingual Bicultural Instruction.
Pub Date-10 Jan 79
Note-41p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Academic Achievement, Attitudes, *Bilingual Education, *Bilingual Teachers, Educational Attitudes, Educational Finance, Elementary Secondary Education, Language of Instruction, Literature Reviews, *Mexican Americans, *Multicultural Education, Objectives, Program Evaluation, Spanish Speaking, Success Factors, *Teacher Education, *Teacher Influence, Teacher Qualifications
Identifiers-*Texas

To investigate bilingual teacher training and its effect on bilingual bicultural instruction, a review of the literature was undertaken and teacher training for a bilingual bicultural program in a Texas school district was analyzed through an interview with the program supervisor. The review focused on the academic achievement of language minority groups, success factors in bilingual education programs, bilingual teacher certification and competencies, correlations between teacher attitudes and bilingual education, bilingual education program rationales, inclusion of culture in instruction programs, and the University of Texas at Austin teacher preparation program, New York City Bilingual Teacher Intern Program, and six French bilingual projects in New England and Louisiana. Findings on the Texas school district bilingual program (intended to develop capability in English and Spanish) revealed: a real attempt to give teachers necessary training; inconsistency between philosophy and practice, e.g., student evaluation through standardized tests in English; that the supervisor had too many responsibilities but lacked input into essential program components; personal attitudes (influenced by salary and class size) affected the performance of those involved. Recommendations relate to the understanding of bilingual education goals, community involvement, curriculum, program assessment, and program financial support. (RS)

A Descriptive Study of the Outdoor Recreation Programs and Services Provided by Selected U.S. Colleges and Universities.

Pub Date-15 May 78
Note-43p.; Parts may be marginally legible due to blurred print
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Athletics, Clubs, Cocurricular Activities, *Comparative Analysis, Credit Courses, *Delivery Systems, Experiential Learning, Financial Support, *Higher Education, Institutional Role, Leadership Training, *Legal Responsibility, Objectives, *Outdoor Education, Physical Activities, *Program Descriptions, Program Design, Program Guides, Recreational Activities, Services, Staff Role, Student Leadership, Student Unions
Identifiers-*Continuum of Outdoor Program Delivery Systems, Cooperative Wilderness Adventure Programs, Outward Bound, Prepackaged Programs

Twenty selected college and university outdoor programs are grouped along the points of Blaesing's Continuum of Outdoor Program Delivery Systems'' in this guide to planning, development, and modification of outdoor programming. Grouping was done on the basis of questionnaire responses by institutions according to these primary variables: degree of student leadership desired, organization/program continuity, implications for institutional liability, available staff support, and amount of participant input desired in program initiation/planning. Under each program type, the guide gives a synopsis of basic features and a description of each school program. Program types and colleges under them are Cooperative Wilderness Adventures universities of Oregon, Idaho, Oregon State, Washington State, California at Davis, California at Irvine; Coordinated Outing/Outdoor Clubs universities of California Polytechnic State at San Luis Obispo, Pittsburgh, Wisconsin at Madison; Individual Outing Clubs none; Canned (Pre-Packaged) Programs universities of California at Los Angeles, West Virginia, Arizona, California State at San Bernardino, and Montana College of Mineral Science and Technology; Credit Courses Fort Steilacoom Community College, Earlham College; Commercial Programs (Outward Bound) University of North Carolina, Charlotte; No Programs universities of California at Berkeley, San Francisco State; New Program Central Michigan University. The appendix contains the questionnaire. (RS)

Identifying the Community Power Actors: A Guide for Change Agents. North Central Regional Extension Publication 59.

North Central Rural Sociology Committee.

Spons Agency-Extension Service (DOA), Washington, D.C.; Farm Foundation, Chicago, Ill.

Pub Date-Oct 78

Note-33p.

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Change Agents, City Officials, *Community Action, Community Development, *Community Leaders, County Officials, *Decision Making, Guides, *Identification, Local Issues, Methods, *Power Structure, Rural Areas, Social Change, Voluntary Agencies

Purposes of this guide for change agents are to (1) present four methods for identifying community power actors (community leaders), (2) provide a description of how change agents might use each of the four methods, (3) compare the four methods, (4) suggest ways to use a combination of methods or combine elements from various methods, and (5) suggest factors for change agents to consider in selecting an appropriate method. The guide is intended for use by change agents whose major objectives focus on promoting and stimulating social change in rural communities, such as Extension workers, community development specialists, government agency personnel, school administrators, community planners, ministers, business leaders, union leaders, and voluntary association leaders. The four methods presented are the positional, reputational, decision making, and social participation; for each method, the guide gives a description, assumptions, procedures for implementation, types of power actors identified by the method, and its advantages and limitations. The appendix contains suggestions to aid the change agent in applying each method: positional a suggested list of formal positions; reputational and decision making sample questionnaires; social participation sample list of voluntary organizations. Descriptors-*Achievement, *Aspiration, Attitudes, Blacks, Caucasians, *Educational Objectives, Females, Longitudinal Studies, Males, *Marriage, *Occupations, Racial Differences, *Rural Youth, Sex Differences, Southern States

Identifiers-*Southern Youth Study

Effects of early marriage and marriage deferment on educational attainment and occupational achievement of black and white youth were investigated in a longitudinal study of 1,052 rural youth from Alabama, Georgia, Louisiana, Mississippi, South Carolina, and Texas. Data were obtained from the larger Southern Youth Study, 1966-72. Within the framework of the life cycle perspective, early marriage was found to be associated with a set of attitudinal antecedents generally indicative of lower level achievements. Specific findings showed: both blacks and whites who held aspirations and expectations during adolescence for lower level education and occupation married early; actual early marriage was associated in early adulthood with lower attainment as well as with continuation of lower achievement orientations; negative achievement influence of early marriage was generally pervasive for both males and females, blacks and whites. An unexpected finding was that the interrelationship between marital deferment and achievement attitudes did not appear until early adulthood for blacks, and then for expectations and attainments only. For whites, early marriage had a depressant effect on adolescent and early adult aspirations and expectations, both educationally and occupationally. Findings taken collectively point to timing of marriage as an important behavior influence in status attainment processes. (Author/RS)

Child Abuse and Neglect Prevention and Treatment in Rural Communities: Two Approaches.

National Center for Child Advocacy (DHEW/OHD), Washington, D.C.

Report No.-DHEW-OHDS-78-30154

Pub Date-78

Note-184p.; This is a reprint of two separate documents: ``A Rural Community Self-help Approach to the Prevention of Child Abuse and Neglect'' produced by the Appalachian Citizens for Children's Rights and ``Operation Reach Wyoming People Reaching Out to help their Abused and Neglected Children'' produced by the Wyoming Department of Health and Social Services, Cheyenne, Wyoming

EDRS Price MF-$0.83 HC-$10.03 Plus Postage.

Descriptors-Agencies, Change Agents, *Child Abuse, Child Advocacy, *Community Involvement, Education, Human Services, Information Dissemination, *Neglected Children, *Prevention, Program Design, Program Evaluation, *Rural Areas, *Self Help Programs

Identifiers-Appalachia, *Treatment Programs, Wyoming

The two reports reprinted here address prevention and treatment of child abuse and neglect in rural areas through self-help programs. The larger report, that of the Appalachian Citizens for Children's Rights (ACCR) Project, describes project purposes: to develop a community development model for child abuse/neglect using resources already existing (human service professionals, agencies, and community citizens) in most of rural America and to demonstrate the model and develop self-help materials providing technical assistance for other communities. In addition to general information about child abuse and the rural setting, the report describes ACCR and deals with self-help groups, innovation and diffusion, and children's rights. Various human service systems are examined (social and health services, law/law enforcement, education, recreation, child care, self-help groups) and brief suggestions are made for developing a community project without a federal grant. The second, shorter report describes Operation Reach (involving five Wyoming communities) which placed a community organizer in each project area for two months to mobilize the community and help residents draft and implement a child abuse/neglect prevention program, and includes rationale, concepts, and a description of each program. It also contains recommendations, a budget breakdown, and comments on program adaptability. (RS)

Children and Youth Camp Safety Act, 1978. Hearing Before the Subcommittee on Child and Human Development of the Committee on Human Resources, United States Senate, 95th Congress, 2nd Session on S. 258 To Provide for the Development and Implementation of Programs for Children and Youth Camp Safety (March 21, 1978).

Descriptors-*Camping, *Children, Definitions, Federal Government, *Federal Legislation, Government Role, Health, *Hearings, Organizations (Groups), Outdoor Education, Resident Camp Programs, *Safety, Standards, *Youth

Identifiers-*Children and Youth Camp Safety Act, Congress 95th

The product of some 10 years of work directed toward federal legislation addressing and defining youth camp safety, the Youth Camp Safety Act (S. 258), as presented in these hearings, calls for the federal government to assume a role in the development of state health and safety standards for children attending youth camps in any state in the nation. Arguments presented in favor of this legislation contend that most (80%) of the states do not presently have safety regulations applicable to youth camps, and it is maintained some camps operate under "appalling" conditions. Arguments presented against this bill contend that youth camp injuries and deaths are not statistically significant and that implementation of the Act would produce administrative waste and ineptly derived standards which would then be enforced by bureaucrats, rather than trained camp personnel. Statements are presented by witnesses representing the following groups: Girl Scouts, United States of America; American Camping Association; Boy Scouts of America; Christian Camping International; Word of Life International; Camp Fire Girls, Inc.; Camping Association for Mutual Progress; Wilds Christian Camp and Conference Center; Department of Health, Education, and Welfare; Center for Disease Control, Public Health Service; Environmental Health Services Division, Public Health Service; and two U.S. Senators from Connecticut. Additional information is presented in the way of nine articles or publications and one communication. (JC)

Identifiers-*Florida (Suwannee County), Topography

Agriculture and the railroad were significant forces in the development of Suwannee County, Florida, formally created in 1858 but explored and settled beginning some 300 years earlier. Lumber and cotton caused an early 20th century boom in the county which soon saw the negative effects of both industries. The introduction of tobacco in the late 1920's caused an agricultural resurgence which has continued to the present. By 1970, Suwannee County had become a leading producer of chickens and tobacco. Economically, the county followed national trends in that there were fewer, larger farms in the 1970's than before. From 1950 to 1970 farm-based employment declined 31.7% but the steady increases in manufacturing, construction, and wholesale/retail trade indicated that those industries will grow in importance, thereby strengthening the county's economic base through diversification. Suwannee County leaders identified this economic potential as one of the county's main strengths but noted the need for recreational and educational improvements to support an expanding economic base. By 1970 non-agricultural employment had become a more important source of income but personal income for county residents was still far below the state average. County population growth statistics were consistent with those for the state of Florida. (SB)

Identifiers-*Florida (Hardee County), Topography

In 1977 leaders of Hardee County, Florida, listed relationships and attitudes of residents, rural atmosphere, environmental conditions, and economic potential among the county's strong points, and public service and facility improvements, developing economic potential, recreational and entertainment development, and planning and zoning as its most pressing needs. An area of over 400,000 acres on the Peace River in south central Florida, Hardee County was officially established in 1921. Population in the area grew slowly until after the railroad arrived in the 1880's when both farm products and land increased in value. Historically, agriculture has dominated the local industrial scene, with citrus production, which grosses an estimated $31 million annually, especially important. While agriculture will continue to be important, phosphate mining may provide a major impetus to the county's growth by 1990. Since 1950 there have been increases in service group, clerical, craftsmen, and foremen occupations. The county's median income in 1969 was much lower than that of the state of Florida, which averaged only half as many living below poverty level. The county also contrasted the state's booming population growth trends until 1970 when an upsurge began. (SB)

Revitalizing Rural Education and Small Schools in Iowa. A Position Paper Prepared for the House and Senate Education Committee of the 68th General Assembly, First Session.
Pub Date-25 Jan 79
Note-28p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Classification, Declining Enrollment, Delivery Systems, *Educational Finance, *Guidelines, Organization, *Rural Education, School Districts, School Services, *School Size, *Small Schools, *State Legislation, Teacher Education, Teacher Salaries
Identifiers-*Iowa

During 1976-77, 42% of U.S. schools operated with fewer than 600 pupils and 27% operated with fewer than 300 pupils; Iowa had 181 K-12 public school systems with fewer than 300 pupils in 1977-78. All of Iowa's smaller school systems were located in the more sparsely populated rural areas of the state, had higher than average per pupil assessed valuations and per pupil expenditures, and received lesser amounts of state aid per pupil. The gap in salaries for experienced and more highly degreed teachers in the smaller versus the larger districts had become appreciable and neared what could be called discriminatory. Smaller rural schools located in the more sparsely populated areas of the state experienced enrollment declines during the 1970's; projections indicate that the declines will continue into the 1970's, but with less severity than in the 1970's. Prepared as a guide for the 1979 session of the Iowa General Assembly, the paper provides national and Iowa perspectives of rural and small schools and presents guidelines and legislative alternatives for Iowa legislative action on thinking rural'', rural school and district organization, financing Iowa's rural

schools, a recommended classification system for rural schools with declining enrollment, Iowa's rural teachers, and delivering appropriate services and programs to Iowa's rural schools. Appended is a list of Iowa's rural school districts under 650 enrollment and some examples of various states' policies on sparsity. (BR)

Identifiers-Delta Foundation, Mississippi Action for Community Education, Southeast Alabama Self Help Association, Southern Cooperative Development Fund

Despite political gains and the lowering of social barriers, most Southern blacks still face formidable economic obstacles. More than half of rural Southern black families are living at or below poverty level. Efforts to improve their lot have included a number of cooperative and self-help community programs. The Southern Cooperative Development Fund, the Mississippi Action for Community Education, and the Southeast Alabama Self-Help Association are among those receiving large scale assistance from the Ford Foundation. The common goal of the three organizations is to enable those who wish to remain in the South to do so by providing a social and economic environment in which people can live and work with dignity and security. Their combined efforts include: funding to establish consumer, agricultural marketing and fishing cooperatives and credit unions; scholarships and other types of educational assistance; lobbying efforts; advancement of civil rights; demands for equalization of community services; creation of ombudsman agencies for the rural poor; establishment of health care services; and economic development of manufacturing, housing, construction, and financial services. This document reports on the growth of each of the three organizations and describes specific projects undertaken to provide opportunities and a better life for the South's rural poor. (DS)

Identifiers-Key Informants, *Lake Champlain Basin Study, *Public Issues

Design, application, and interpretation of a three-tiered sampling framework as a strategy for eliciting public participation in planning and program implementation is presented, with emphasis on implications for federal programs which mandate citizen participation (for example, Level B planning of Water Resources Planning Act, Federal Water Pollution Control Amendments). The three-tiered survey procedure was used in the Lake Champlain Basin Study, which dealt with development and implementation of long-range programs for conservation and development and use of water and land resources in a mixed rural/urban area of uneven socioeconomic status. Study goals were a broader data base, a representative basin constituency, and identification of and relative importance of basin issues; the tiers were high school, key informant, and organizational surveys. The seven basic categories of environmental concern ranked by respondents were land use, wetland issues, water pollution, socioeconomic issues, recreation, energy, planning/management. Results show that the research design gave representative groups a systematic opportunity to respond to issues and that the public did respond and rank priority issues. It is predicted that treating informant groups as constituencies will achieve a new dimension of coordinated integrated planning, which addresses the real complexities of preparing environmental plans likely to receive public understanding and support. Identifiers-American Indian Education, *Sioux (Tribe), *South Dakota

These materials are for use in the instruction on current occupations existing on the Standing Rock, Cheyenne River, Sisseton, Lower Brule, Crow Creek, Flandreau, Pine Ridge, Rosebud, and Yankton Sioux Indian Reservations in South Dakota. Objectives of the materials are to help learners identify the geographical locations of each of the nine Sioux reservations, gain an increased awareness and understanding of occupations that exist on reservations, understand the relationship of various occupations to the student's heritage, and understand the relationship of existing occupations to American Indians employed on the student's reservation (Positive Models). The packet consists of 11 maps of the state identifying each of the Sioux reservations and their geographical locations. Maps of each reservation list 20 occupations existing there, e.g., among the career opportunities on the Cheyenne River Reservation are post master, bilingual teacher, social worker, accountant, tribal attorney, office worker, law enforcement worker, dentist, nurse, rancher, and tribal official. Suggested uses of the materials include bulletin board displays, overhead transparencies for group presentation, and handouts for learners. A few student activities are also listed to serve as guidelines in adapting the materials to the local educational situation. As a supplement to this manual, a set of colored transparencies, identical in sequence and format is available from the originating project. (DS)

Descriptors-*American Indians, *Career Awareness, *Career Education, Career Opportunities, Career Planning, Elementary Education, Illustrations, *Instructional Materials, Learning Activities, Occupational Clusters, *Occupations, Role Models, *Teaching Guides, Vocational Education
Identifiers-American Indian Education, *Career Clusters Curriculum

Teaching and enrichment activities for use in the career education instruction of Indian students are presented in this teacher's manual to the Career Cluster Activity Book. Fifteen cluster areas of career education are identified, an example of one career in each cluster is illustrated, and learner objectives for each profession are listed to help in the identification of such aspects as the skills required, equipment used, training needed, duties performed, and the value of the work as related to Indian people. The primary purpose of the activity book is to provide illustrations that will create in the Indian student an awareness, understanding and motivation to become involved in work, both on and off the reservation. Through the use of the materials the teacher can provide learning experiences that would encourage the students' positive attitudes toward themselves, the world of work, and others. Materials should assist the students in making decisions about their future careers and in acquiring a sense of hope as they think about the future. Although directed toward the Indian student, the book can also be used by students of other ethnic backgrounds to gain an awareness of career clusters and occupations. The book also demonstrates that American Indians can and do work in the occupations illustrated. (Author/DS)

Identifiers-American Indian Education, *Career Clusters Curriculum

Simple black and white illustrations portray one occupation for each of 15 career clusters. Directed toward the Indian student and showing Indians at work in the occupations depicted, the illustrations are intended to create an awareness, understanding, and motivation for Indian students to become involved in work, both on and off the reservation. The 15 career clusters are health, personal service, manufacturing, environment, agri-business and natural resources, consumer and homemaking, marketing and distribution, construction, business and office occupations, hospitality and recreation, marine science, fine arts and humanities, public services, communications and media, and transportation. Their illustrated occupations are ambulance attendant, beauty operator, blacksmith, botanist, cattle rancher, clothes designer, grocery checker, heavy equipment operator, hospital administrator, hunting and fishing guide, oceanographer, photographer, police officer, sign painter, and truck driver. All of the illustrations, which may be colored by the student, should serve as a springboard to help the students in understanding what is the career, what training is required, the qualifications, the responsibilities, the earning potential, how it helps others, and what subjects can be studied in school to prepare for that career. Identifiers-*American Indian Education, Cultural Contributions, *Cultural Preservation

For many years American Society seemed to feel that all institutional and cultural development of the United States came directly from Western European historical tradition. The greater society lost much of the enrichment and perspective that comes from the acceptance of a cultural pluralism that includes American Indian contributions in society and cultural development. With the growth of the concept of cultural pluralism, however, the Indian community has undertaken programs and activities to preserve the further understanding of their cultures. Attention has been directed to the inadequacy of many textbooks in dealing with American Indian history and culture; efforts have been made to remove educational materials prejudicial to Indian culture. Other projects have sought to preserve the languages, legends, customs, and histories of various tribes. Cultural materials programs that might still evolve include publications on original histories and research on values systems, studies on Indian governments and legal systems, recordings of Indian languages, preservation of Indian oral literature, and changes in instructional and curriculum materials to accurately reflect Indian culture. In addition to describing efforts to preserve the Indian cultures and to promote understanding of them, this document traces the concept of cultural pluralism and its application in American Indian education and discusses the types of curriculum changes necessary to help the two cultures educate each other. Identifiers-Alaska, *American Indian Education, Contract Schools, Johnson OMalley Act

Various aspects of Indian education are treated in the two poems and 12 articles that constitute this issue of Thresholds in Education.'' An article entitled Indian Self-Determination and Indian Education'' charts the growth of the self-determination movement, the influence of cultural pluralism, and the increasing involvement of Indians in their educational processes. Rough Rock Demonstration School: The First Indian Contract School'' tells of program design, administration, and funding difficulties encountered in a school totally controlled by its Navajo community. Little Big Horn High School and Preschool'' describes the development and implementation of urban Native American education programs in Chicago. Also included is Lyman Pierce's Trends in Indian Education: The Views of an Urban Native American Community Leader''. Three articles deal with cross cultural education in Alaska; one cites factors accounting for the success of parochial schools in meeting the educational needs of Eskimo and Indian students, the other two describe learning opportunities for native adults. Other titles include: Landmarks on the Path of Indian Education'', The Johnson O'Malley Act in the Evolution of Native American Education'', Higher Education: a New Arena for Native Americans'', and Facets of Racism and Native American Culture''. Comprehensive descriptions of all federal programs which specifically benefit American Indians are compiled in this document which utilizes information contributed by government agencies and departments in 1974. The format of each program includes: (1) the name, nature, and purpose of the program; (2) eligibility requirements; (3) how to apply (including application and approval deadlines); (4) who to contact for information regarding the program; (5) how to obtain printed information concerning the program; (6) authorizing legislation; (7) administering agency; (8) available assistance; (9) use restrictions; (10) appropriations sought; (11) past appropriations; (12) obligations incurred; (13) Washington contacts; (14) local contacts throughout the United States; and (15) related programs. The document lists over 150 programs covering such areas as farm, business, and other types of loans, supplemental food assistance and nutrition services, educational assistance, development and protection of natural resources, fish and wildlife services, road construction, aid to small businesses, employment training, and cultural preservation. Programs are listed by the sponsoring agencies as well as in a topical index. (DS)

Historical causes of rural poverty and general recommendations for work among rural youth in India, Malaysia, Philippines, Sri Lanka, and Thailand are presented in this summary of national reports given before the Rural Youth Study Group in 1976. In addition to study papers on each country, the volume contains an introduction on rural youth and the rural predicament which summarizes the countries' common history, foreign influences, governmental and church-related rural development projects, rural poverty, and five essential systematic phases of rural development. Each national study paper contains a map, historical summary, and basic geographic, political, and socioeconomic data. Subtopics are as follows: India Indian independence movement, peasant movements, youth student movements; Malaysia racial problem, rural economy, rural youth in West Malaysia, church role in rural development; Philippines general background, land ownership, rural struggle, survey of village youth organization, local churches; Sri Lanka political-economic structures of rural society, caste system and religion, role of youth in rural struggle, survey of rural youth development programs; Thailand community solidarity, role of religion, economic problems of villagers, role of youth/students in rural struggle. A concluding paper treats the role of youth in the national struggle (training, motivating church youth). (RS)

Identifiers-*Telehealth System

Emphasizing primary care, this handbook focuses on the application of specific types of telecommunications technology to the process of information exchange within a rural health care system. Its purpose is to provide guidance to health care planners who want to consider the potential of telecommunications technology for improving quality, accessibility, and efficiency of care. Taking a functional, applications-oriented approach, it integrates the issues and recommends a decision-making process. The range of technologies discussed includes not only the expensive and exotic but also the rather inexpensive, everyday technologies that should be available in many parts of the country. Content includes background material on health care and information exchange; the concept of a network and the distinction between telecommunications links and end-instruments; functional applications of telehealth systems (patient care management, administration, education); technical components of telehealth transmission (narrowband, telephone, radio, broadband, networks), end-instruments (audio, telemetry, data/record, video, slow-scan television, patient-viewing video devices); process for assessing feasibility of telehealth in a specific setting; paying for telehealth. More than 50 current and planned telehealth projects and references for additional information are briefly described. (RS)

Identifiers-*Navajo Administrator Training Program NM, *Navajo Nation, University of New Mexico

The Navajo Administrator Training Program (NATP) was initiated to prepare graduate level Navajo administrators for Navajo schools. A cooperative program involving the Navajo Tribe, University of New Mexico, and the Carnegie Corporation, the nontraditional graduate program alternates intensive one-week on-campus sessions with five-week off-campus work experiences three times per semester during the academic year (six hours credit per semester). Students attend two eight-week summer sessions to complete the masters program in two years. Both field-based and university-based coordinators provide support services during off-campus periods. Of the 50 students enrolled since January 1975, 21 have graduated, most of whom are now holding administrative positions on the reservation. Instructors are regular university staff and guest lecturers. In addition to traditional educational administration courses, special attention is given to unique Navajo problems and applications. NATP, an exportable model of quality graduate education, has increased the number of on-reservation Navajo administrators, enhanced Navajo self-sufficiency and self-determination in education, strengthened bonds between university and tribe, and provided a professional career ladder for a population whose advancement was previously limited. Identifiers-*American Indian Education, *Eastern Cherokee (Tribe), North Carolina (Qualla Boundary)

No part of Cherokee life has been more important to the Tribe, past or present, than that of a good education.'' Despite this attitude, it has not been easy for the Cherokee to bridge the gap between their subculture and that of the larger dominant U.S. society. Discipline and white enculturation were zealously pursued in early boarding schools and the bitterness created is still felt by many older Cherokee. Even today educational programs attempt to destroy the remnants of the unique folk culture and replace it with the Protestant ethic. Often the responses expected of children are in complete opposition to the values held by the Cherokee culture. Educational programs must be developed that will preserve the positive attributes of the marginal subcultures and yet at the same time prepare the student to meet the challenges of the dominant culture. Such a program is underway by a Cherokee group at Qualla Boundary. It seeks to promote the Cherokee culture, provide tutorial and counseling programs to help students stay in school and prepare them for college, encourage students to go on to college, and assist them in various ways to remain there. An adult education program is in operation at the new 7.5 million dollar high school, and college level courses offered on the reservation make it possible for adults to complete up to two years of college. This paper describes the history and culture of the Cherokee, presents the inadequacies of past and present educational programs, and sets forth specific programs of the Qualla Boundary group. (DS)

Identifiers-China, *India, Land Tenure

One hundred years of rural development in India is surveyed, tracing the impact of colonial administration up to and including the decades of independence an administration built on elitism, centralism, and paternalism. Four major rural problems of famine, abuses of land tenure, peasant indebtedness, and rural disaffection and how political entities have attempted to overcome them are discussed. It is shown that colonial rulers dealt with scarcity, disparity, and disaffection in a variety of ways: agricultural ``demonstration and propaganda'' to counteract scarcity, cooperatives/tenancy reforms to check disparity, local government to redress disaffection, and techniques of rural reconstruction. The measure of success is addressed, and the shift from community development to agricultural extension as a means of rural development following World War II is chronicled. The fifties are described as a decade of community development and agriculture extension during which American influence intermingled with colonial traditions and the sixties as the culmination of American influence, with a return to older traditions. This decade is seen as one of consolidation, with comparisons drawn between development in India and China. Whether the new poverty and target groups orientation accomplishes overall rural development, so far elusive, or is merely a change in methods, remains to be seen. (RS)

Identifiers-*American Indian History, Sovereignty, *Struggle for Freedom, Trust Responsibility

More than 60 historical documents related to the struggle of American Indian nations to preserve their sovereignty from the first resistance to the European invasions of the Americas up to and including the present are contained in this chronicle. Covering the period from 1622 to 1978, this updated version is expanded to include documents generated by the resurgence of the Indian protest movement during the 1970's. Organized under 29 topics or time periods, the book includes a discussion preceding each document or set of documents giving the setting and events leading up to its issuance. Some postscripts to documents are included, relating subsequent events or uses of a document. The chronicle begins with ``A Declaration of the State of the Colony and Affairs in Virginia'', relating to the attack by the Powhatan Confederacy on white settlements and ends with material from the seventies such as the Trail of Broken Treaties, Wounded Knee, Geneva Conference, Land Claims Cases and Trust Responsibility, and the Longest Walk. Intervening sections include pronouncements by American Indians and documentation about the Native American struggle, including such personages and events as Geronimo, Cochise, Chief Joseph, the Pueblo revolt in Taos, Tecumtha, Black Hawk, Memorial and Protest of the Cherokee Nation, Red Cloud's War, Sitting Bull, the Navajo and the New Deal, and Alacatraz Reclaimed. Identifiers-*Federal Indian Relationship, Land Tenure, Legal System, *State Indian Relationship, Tribal Sovereignty

Another in the Contemporary Legal Education Series, this book questions how the law and the legal system have contributed to the support or destruction of separatist tendencies ``in a context where there has been a rather formal debate on the precise issues of assimilation and preservation of cultural identity''. The book is designed (1) to complement Felix Cohen's text, the ``Handbook of Federal Indian Law'', (2) to spur an increase of the study of Indian legal problems, (3) to provide an accurate assessment of such problems as a necessary supplement to college level American history course material, and (4) to provide useful and practical material for Indian people and their lawyers to increase the more effective use of the law by those parties. The chapters provide a detailed examination of five broad topics: Sovereignty and the Flow of Power; Power of the States; Concepts of Property in Federal Indian Law; Land Tenure, Land Use, and Economic Development; and Strengthening Tribal Government. Each topic is illustrated and supported by pertinent notes and cases, and the approximately 500 cases cited are listed alphabetically in a Table of Cases. Finally, there is a bibliography of about 200 Law Review articles related to Indian affairs. The bibliography is organized by subject. (Author/SB)

Identifiers-American Indian History, *Canada, Federal Indian Relationship, Land Claims, *Native Rights

Intended as a research and reference tool for Canada's native people and their legal advisers, this book is a comprehensive treatise on the law of aboriginal rights and treaties, the historical pattern of dealing with those rights, and alternative judicial and legislative solutions for the settlement of native claims. Secondarily, it is intended to provide the Canadian public with the legal theory and history of aboriginal rights. This second edition, substantially a new book, focuses on how the principle that Indian and Inuit people have the right to use and occupy aboriginal lands or receive compensation for their loss has been effected by the legislative, executive, and judicial branches of government. After an introduction and definition of who a native person is, the book is organized into six parts: law of aboriginal rights; law of Indian treaties; historical pattern of dealings with native peoples of Canada by various provinces/territories; current issues (hunting and fishing rights, mineral rights, federal control over Indian Reserves); alternative solutions for settlement of native rights (the U.S. Indian Claims Commission, the Alaska Settlement). A table of cases lists more than 100 pertinent international cases, with the pages on which they are cited. Various government proclamations, treaties, and a 1969 speech by Prime Minister Trudeau are appended. (RS)

Identifiers-*Bureau of Indian Affairs, *Indian Self Determination and Educ Assistance Act

Although self-determination funds in fiscal year 1977 accounted for about 25 percent of the Bureau of Indian Affairs (BIA) budget for the operation of Indian programs, the BIA has not adequately supervised tribal performance under these contracts and grants. Questionable use of funds, incorrect interpretations of regulations, inadequate criteria to measure performance, conflicts of interest, and inadequacy of BIA guidelines in defining duties of employees were identified as contributing factors in a study that included trips to BIA headquarters, area offices and agencies, visits to reservations, and interviews with BIA and tribal officials. The BIA should develop management reporting systems to help monitor and control self-determination contracts, grants, and training and technical assistance activities. BIA policies, regulations, guidelines, and practices should also be revised to (1) prohibit award of contracts in which the starting date precedes the date of award; (2) establish specific criteria for measuring performance; (3) require supervision of contracts and grants by adequately trained area level officers whose responsibilities have been clearly defined; and (4) prevent self determination training and technical assistance funds from being used for assistance that does not help tribes to develop the capability to negotiate and administer self-determination contracts or grants or to improve their capabilities to fully exercise their self-determination options. Identifiers-*Alaska

Factors contributing to Native students' college success were examined in a study of 50 Native freshmen and 42 non-Native freshmen at the University of Alaska in the 1973-74 academic year. The study compared students in relation to three common explanations of college success: level of academic preparation, goal orientation, ease in the campus social world. Data were obtained from interviews with students, the Student Orientation Services (SOS) counselor, an SOS professor familiar with each student's daily work, and the dormitory advisor, plus university records showing ACT scores, urban/rural background, grade-point averages, and credits completed. Results showed that college success among Native freshmen was most strongly and consistently related to level of academic skills acquired in high school. Goal orientation, similar for Natives and non-Natives, did not appear to be important to success. Natives were significantly more likely to see the university as an unfriendly place with active prejudice, but no significant relationship appeared between these attitudes and college performance. Study results raised serious questions about the long-term consequences of decreased attention high schools are giving to college preparation of Native students. It was maintained that high schools must increase quality of academic preparation, especially for rural students interested in college. (RS)

Identifiers-Multilingual Education

The monograph is intended to help the education community understand and implement the concept of bilingual education. Part I notes recent forward moves in teacher education for multicultural programs and bilingual classes. In Part II descriptions of model programs in the Philadelphia School District are used to provide perspective on the problem of providing instruction in all academic subjects in the mother-tongue of “national origin-minority group children”. Part III discusses the competencies upon which bilingual teacher education curriculum content and design should be based, the teaching strategies appropriate for the bilingual bicultural classroom, and the preparation of teachers for testing student progress. The serious issue of the interpretation given to the “cultural” component in any program or class is dealt with in Part IV. Two evaluation instruments, aimed at the teacher in a preservice role, are included: Evaluation Profile for Areas of Performance for Teachers in Bilingual Settings and Self-Evaluation Profile for Teachers in Multicultural and Bicultural Situations. Appended are operational definitions for the Teaching Performance Profile for Bilingual Settings; the major program components, competencies, and experiences for bilingual teacher education programs; and lists of selected information sources and the ESEA Title VII Bilingual Training and Resource Centers. Identifiers-*Alaska

Educational strategies that small rural high schools can use to address important developmental needs of rural youth were explored, focusing on the importance of educational environments outside traditional high school classrooms, (i.e., work-experience programs, student exchange programs, and travel-study). Of the 92 Alaskan village high schools with enrollments under 100 which were surveyed, 46 responded. Rural youth developmental needs addressed both self-development oriented and ``other oriented'' educational goals. Approaches available, with percentages of responding schools having used them, included work-study at local sites, 28%; school-sponsored business, 23%; travel to other district high schools, 35%; travel outside school district 28% within Alaska and 19% outside the state; Rural Student Vocational Program, 40%; student exchange, 7%; traveling teachers, 14%. A planning framework is presented, suggesting the kinds of experiences most valuable in particular years of high school and ways to integrate programs into a systematic educational approach, along with potential benefits and costs. Programs are grouped into awareness, exploration, and transition programs. An appendix lists organizations that can assist rural schools in arranging experiences outside their district and curriculum/program materials for rural high schools. (RS)

Identifiers-*Alaska, American Indian Literature, Central Yupik (Language), Eskimo Literature, Inupiaq (Language), Nunamiut (Language), Pacific Gulf Yupik (Language), Siberian Yupik (Language), Taremiut (Language)

This annotated bibliography, containing approximately 732 entries, provides a general overview of English literature concerning Alaska Eskimos and cities. Although the earliest date of publication is 1843, the majority of the works have been done since 1900; there are no entries published later than 1975. Section I lists the works alphabetically by author and includes date of publication, title, abstract number, and page in the bibliography. Listed alphabetically by author, Section II provides complete bibliographic information and annotations. Section III classifies Eskimo literature by one general and four specific linguistic categories: (1) General Eskimo; (2) Inupiaq (including Diomede and King Islanders) with subgroups (a) Taremiut (Arctic Coast) and (b) Nunamiut (inland North Slope); (3) Siberian Yupik (including St. Lawrence Islanders); (4) Central Yupik; and (5) Pacific Gulf Yupik. Section IV organizes Eskimo literature according to the time of observation: precontact and early contact to 1900; 1901 to 1940; and 1941 to present. An appendix citing important bibliographic works for Eskimo references, and an addenda consisting of new entries and additions to existing notes completes the document. (RTS)

Wilson, Janet G. Black, Alice Brenda

Native American Indians and Variables that are Interrelated with Academic Achievement.

Pub Date-20 Nov 78
Note-33p.; Paper presented at the Annual Meeting of the Mid-America Association of Educational Opportunity Program Personnel (4th, Fontana, Wisconsin, November 12-15, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Achievement, American Indians, *Cultural Disadvantagement, Educational Environment, Elementary Secondary Education, Literature Reviews, Locus of Control, Low Achievers, Self Concept, *Self Esteem, *Student Teacher Relationship, Tribes
Identifiers-*American Indian Education, Self Fulfilling Prophecy

Self-esteem, the ability to control one's environment, pupil's perceived teacher's expectations, and achievement are among variables affecting the academic performance of Indian students from various tribes in elementary and secondary public and private schools. Many studies reveal the almost universally poor achievement of Indian students compared to their white counterparts, and researchers agree that cultural factors are the cause. Existing literature, while often conflicting, supports the hypothesis that Native American students' academic achievement is directly related to their low self-esteem and low ability to control their environment. Indian low self-esteem, directly related to group identity, is almost inevitable because of their treatment throughout history. The ability to control one's environment is directly related to self-esteem; therefore, it, too, is low for Indians. Furthermore, Indian children perceive their teachers' expectations of them as low and they perform accordingly; this poor performance reinforces their negative self-image. Many other factors, including legislative policies, urbanization, and personality as related to culture, are involved in Native American academic achievement. Recommendations include developing training programs for enabling teachers to understand Indian cultures and testing children in their mother-tongue. An annotated bibliography is included. (SB)

Descriptors-*Administrative Personnel, Camp Counselors, *Camping, *Experiential Learning, *Manuals, *Moral Development, Outdoor Education, Parent Participation, Personnel Evaluation, Personnel Selection, Recreational Programs, Resident Camp Programs, Staff Improvement, Staff Orientation, *Staff Role, Summer Programs, Values
Identifiers-*Value Education

The handbook is designed for use by the camp director, program director, and unit director, to help staff work effectively with campers on every-day values clarification, learning, and decision making. After an introductory discussion of seven key concepts in value education, the handbook is divided into seven chapters focusing on acquiring and training staff, conducting the camp, and evaluating the session, so as to make good value education a significant part of the total camp experience. Chapter 1 is a discussion of value awareness in staff recruiting and selection. Chapter 2 contains suggestions of strategies for dealing with value concerns during staff orientations. The third chapter presents activities for training the staff to help campers look at values and develop decision-making skills. Included is a sample 2-day staff training session schedule. Chapter 4 contains 37 specific value education strategies for use with campers in a variety of camp settings. Each is presented with objectives, process, materials, time, and setting. Ideas for involving the campers' families in value discussions before, during, and after the camp are given in chapter 5. Chapter 6 contains value-education issues for the staff to consider in self-evaluations. Chapter 7 is a brief, annotated reference list. (SB)

Identifiers-*Economic Development Administration

Since 1967 the Economic Development Administration (EDA) has carried out an Indian program that emphasized economic development of Indian reservations and trust lands. In the past 12 years Indian tribes in 32 states have received community and industrial development grants to assist them in developing a viable economic base on their lands. Tribes in Arizona have received the greatest amount of assistance with $113,263,174 awarded in the period from August 26, 1965 to September 30, 1977. New Mexico tribal groups received $37,927,795, and Indians in Washington received $37,467,572. Indians in Massachusetts received the smallest amount of assistance: $146,050. EDA grants were made for such projects as planning and impact studies, water and sewer systems, tourism facilities, industrial parks, and community facilities such as fire stations, community centers, and health centers. Assistance was also given to national Indian groups for conferences, training programs, studies, and other types of activities, including those related to industrial development. In addition to listing the total Indian project funding by state for the 12 year period, this document itemizes the amounts and kinds of assistance given to specific tribes in each state. It also lists the amounts and kinds of aid awarded to the national level projects. (DS)

Identifiers-*American Indian Education, Federal Indian Relationship, *Indian Education Act 1972, Local Education Agencies

Investigators used 7 data collection instruments to survey a sample of 223 local education agencies receiving funds under the Indian Education Act, Title IV, Part A, in order to describe the effectiveness of projects so funded, provide management and grant administration information to the Office of Indian Education, determine the feasibility of impact evaluation of the program, and document the interrelationship of federal programs supporting Indian educational policy. Results of analysis regarding the last objective proved inconclusive. Among the findings, reflected in the 41 conclusions, were that: there were regional differences in project emphasis, there were more effective programs in large urban districts for overcoming academic differences and providing support services, a large amount (75%) of funding at the local level was used for staffing, there was greater parent committee involvement in districts where per pupil expenditure was over $1,000, and there was inconsistent reporting of fiscal data by local districts. Ten recommendations included augmenting the level of program funding, identifying and assessing the special education needs of Indian children, subjecting Title IV Part A to impact evaluation, and increasing the Office of Indian Education staff. Most of the tables referred to in the summary are contained in appendices to the Final Report. (SB)

Descriptors-American Indians, Educational Administration, Educational Finance, *Educational Legislation, Elementary Secondary Education, Evaluation Criteria, Evaluation Methods, *Federal Aid, *Federal Legislation, Federal Programs, Federal Regulation, Government School Relationship, *National Surveys, *Program Evaluation
Identifiers-*American Indian Education, Federal Indian Relationship, *Indian Education Act 1972, Local Education Agencies

The purposes of the national evaluation survey of the Indian Education Act (IEA) Title IV, Part A, projects were to evaluate the implementation of Part A objectives, conduct a feasibility study to determine evaluation criteria for future impact studies, and identify non-fiscal obstacles to Part A projects. Exhaustive preliminary research resulted in development of evaluation strategy, sampling framework, survey management, and data analysis plans. The final sample of 223 local education agencies (LEA's) allowed for nationwide estimates for all funded urban LEA's, rural high-density Indian LEA's and rural low-density LEA's. Among the 41 conclusions (reflective of the findings) were that: parents rated programs in areas of overcoming academic difficulties from moderately to very effective; the major areas of need were Native American heritage, remedial reading, and remedial general academic areas; and lack of motivation, deficient early education, adverse home environment; and ethnic discrimination were factors contributing to the educational problems of Indian children. Ten recommendations included: examine the use of a minimum level of funding; align proposal, funding, and project implementation cycles more closely; and continue to require local evaluation. (SB)

Identifiers-*American Indian Education, Federal Indian Relationship, *Indian Education Act 1972

To aid the Office of Evaluation and Dissemination (OED) and the Office of Indian Education in development of a Request for Proposal to conduct an impact evaluation of the Indian Education Act, Part A, investigators used findings of the OED-sponsored evaluation of the Indian Education Act and observations of the principal investigator to establish design implications for such an impact evaluation. The three models tested in the evaluation study were the Glass model, for reading and math scores; the MANOVA model, involving the remedial reading, remedial math, and self-concept objectives; and the ANCOVA models, involving achievement test results. No differences were obtained in ANCOVA tests. The feasibility of impact evaluation in reading and self-concept areas appears generally favorable, but evaluation in math is not favorable. Recommendations for the six major design categories of conceptualization, sampling, testing, data collection, design, and analysis, include the following: (1) obtain near equivalent Indian control groups for impact evaluation model and address the most frequently obtained objectives; (2) study a larger sample and use large subsamples; (3) control testing in five specific ways and expand the definition of impact to focus on primary program emphasis; (4) collect data via site visits; and (5) consider pretest and post-test control group design. (SB)

Environmental Education Inservice Training Packet for the Intermediate Level.

Upper Mississippi River ECO-Center, Thomson, Ill.
Spons Agency-Bureau of Elementary and Secondary Education (DHEW/OE), Washington, D.C.; Illinois State Dept. of Education, Springfield.

Identifiers-Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

The inservice teacher training packet, developed with help from the environmental education program of the Upper Mississippi River ECO-Center, is designed to help intermediate-level teachers develop teaching skills which will enable them to introduce environmental or outdoor education to their students and develop those concepts, attitudes, and behavioral skills which lead to environmental responsibility. Reflecting the need for environmentalization on many instructional levels, the flexible one or two day program includes sections which focus on environmental awareness, classroom activities, school site activities, field trips, and community resources. The many activities in these sections can be adapted for class use with little or no change, and the activity descriptions usually include objectives, instructional levels, and materials lists. The interdisciplinary approach involves group and individual activities such as role playing, values clarification, games, home and school environmental surveys, career visits, art projects, science projects, and environmental observation. The packet also includes a sample inservice program schedule, a section on developing an environmental education program, references, equipment lists, field trip materials, resources, and an awareness test. Identifiers-*Adventure Education, Canoeing, Elementary Secondary Education Act Title III, Illinois (Carroll County), Upper Mississippi River ECO Center

The goals of "Operation Awareness", a 1974 summer program involving coeducational high school canoeing, camping, and study, were to acquire knowledge; acquire outdoor living skills; promote involvement in a conservation work project; and provide the opportunity for social, emotional, and physical growth through group living. Students, who paid a $20 fee for the course in its second year, were required to study certain subjects and complete one work project and one environmental impact study to earn academic credit for the course. Approximately 15 students participated in planning and decision-making phases of the 5-day course which included 4 days and 3 nights of canoeing and camping activities following a full day of instruction on such topics as Mississippi River history, outdoor skills, first aid, safety, and making environmental impact studies. Students enrolled because of the appeal of the outdoors and to experience canoeing and camping. They also enjoyed the planning stages and the togetherness afforded them, but felt there was not enough freedom or time to rest. The course was valuable because it taught personal strength, skills, and appreciation of both home and outdoors. Students rated the course as challenging, fun, hard, adventuresome, and interesting. The report contains equipment lists, information sheets, evaluation form, and test. (SB)

Identifiers-Elementary Secondary Education Act Title III, *Upper Mississippi River ECO-Center

First of a series of 6 publications containing environmental education activities, this booklet by the Upper Mississippi River ECO-Center describes 12 environmentally-based art and music activities for elementary and intermediate grades. Each activity description contains objectives, preparation, materials, directions, student evaluation, and variations where appropriate. Eight art projects teach basic art concepts, the artistic use of natural objects and throw-aways, materials combination, aesthetics, and texture awareness by means of the following outdoor oriented activities: dried material arrangements, sand castings, sand paintings, tracings, observations of nature, drawing with natural objects, and bur sculpture. The four music activities music in the study of animals, music made from articles found in nature, original songs, and selections pertaining to outdoor activities and sounds teach the uses and history of various instruments and an awareness of rhythm. (SB)

Identifiers-Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

This booklet containing 20 language arts activities is the second in the series ``101 Environmental Education Activities'' produced by the Upper Mississippi River ECO-Center. The description of each activity contains learning objectives, directions, and suggested student evaluation standards. Elementary and intermediate level students expand their vocabularies, learn new descriptive terms, practice spelling, and study poetry as they improve their powers of observation and their sensory awareness. The activities, based on environmental observation and the outdoor education process, include studying modifying and descriptive words, verbs, nouns, opposites, and figures of speech; drama and poetry writing, including haiku; writing and following directions; exploring outdoor sensations; studying plants and animals; and taking accurate field notes. The final project is a school site study. (SB)

Identifiers-Compass Activities, Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

Each of the 14 environment-related mathematics activities included in this publication by the Upper Mississippi River ECO-Center includes objectives, materials needed, preparation, and activity description. Occasionally, variations and helpful hints are added. Because the student can gain experience to help him with the practical application of abstract concepts by studying mathematics outdoors, special emphasis is given to the experiential study of metrics and the magnetic compass. The overall focus of the activities is on the use of mathematics in real life situations. Metrics activities include body measurements, pacing and measuring distances, and estimating heights. Compass activities include an introduction to the use of the magnetic compass, geometric figures, an introduction to mapping, constructing/teaching mapping courses, and games. In addition there are pollution, energy, and nature studies. The activities are designed to enhance elementary and junior high school students' awareness of mathematics found in nature, such as geometric shapes, and to teach metrics, the compass, and applied mathematics. This is the third in the series of environmental activities booklets by the ECO-Center, and is also related to their inservice Teaching Manual for environmental education. (SB)

Identifiers-Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

Fourth in the series ``101 Environmental Education Activities'' by the Upper Mississippi River ECO-Center, the booklet contains 39 environment-based science activities directed to students in primary, intermediate, and junior high classes. Organization of the activities usually includes grade level, objectives, procedures, and materials, evaluation criteria, and sometimes includes hints and follow-up activities as well. In general, emphasis is placed on learning about soils; weather; various life forms; ecological and environmental relationships; conservation; natural phenomena; and on enhancing the students' powers of observation, sensory awareness, and awareness of environmental problems. Activities include science and energy surveys, weather observations and predictions, soil study and analysis, tree study, plant and animal observations, and specimen collection. Field trips to forest, timber, marsh, and river areas, as well as new housing developments and waste disposal plants help students examine many aspects of their environment from the point of view of various sciences. (SB)

Identifiers-Cemeteries, Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

Forestry is the main focus of this fifth booklet in the series "101 Environmental Education Activities" by the Upper Mississippi River ECO-Center. Designed for students in the intermediate grades and junior high school, the booklet contains 9 science and social studies activities and 5 interdisciplinary activities. Most activity descriptions include the objectives, preparation, description, evaluation, materials, follow-up, re-plans, and reference sources when appropriate for the activities. Eight science and social studies activities are directed to the study of forests: the kinds and location; the national forests and parks system; fire causes, prevention, and fighting; tree identification; growth and uses; forest products and the lumber industry; wildlife; and tree ring time lines and the relation to the weather. There is also an activity which examines the relationship of the farm to the area economy. The 5 interdisciplinary activities include 4 field trips or hikes, 1 of which teaches the historical and resource value of cemeteries. These activities are designed to increase the students' powers of observation, sensory awareness* sense of aesthetics, and writing ability. (SB)

Identifiers-Elementary Secondary Education Act Title III, *Upper Mississippi River ECO Center

Based on the environment and directed at elementary and intermediate level students, 5 field trips are a significant part of the 12 social studies activities in the sixth booklet by the Upper Mississippi River

ECO-Center outlining environmental and outdoor education activities. Most of the activities include objectives, activity description, evaluation, grade level, and one activity provides a resource list and bibliography. Guide sheets are provided for survey activities based upon visits with city businesses, a school site, recreational areas, community citizens and a field trip site. Activities are designed to help students learn the difference between man-made and natural areas, the effect of recreational areas on the environment, techniques of observation, and the attitudes of their fellow students and themselves regarding the environment. Also included are writing activities based on the history of a field trip area and on pioneer living; these activities are designed to promote learning about the early settlers and their daily lives, the use of reference books, report writing, note taking, summarizing, and the value of local historical records. Identifiers-Continuous Flow Monitoring, Elementary Secondary Education Act Title I, *Monitoring Systems, *Oregon, Oregon Migrant Education Program

The continuous flow monitoring system is designed to provide data on migrant education at the time it is being created to the person who most needs that information. The basic assumption underlying this system is that the operation to be monitored is continuous or cyclic with interrelated events known in advance or predictable. By identifying critical events and monitoring them, the system evaluates the overall endeavor. Most monitoring tasks are done by the area directors, regional consultants from the Migrant Education Services Center perform a few tasks, and the State Coordinator takes care of one. The system is displayed by a basic frame showing how the student and his records flow through the system and an administrative frame covering the proposal planning and implementation cycle. General and specific monitoring questions on each of the two frames help ascertain program progress. Answers to the specific questions are taken from 21 task sheets. Task sheets and their accompanying report forms describe the task, who should do it, when it should be done, its disposition, and what actions may result. The 13 tasks in the basic frame cover checks on recruiting, certificates of eligibility, and Migrant Student Record Transfer System (MSRTS) records, and services and evaluation checks. The eight administrative frame task sheets examine proposals, hiring, budget, staff, utilization, interagency cooperation, and parent involvement. (DS)

Identifiers-*Elementary Secondary Education Act Title I, HR 15 (95th Cong 1st Sess)

Aspects of the Title I migrant education program were explored at a hearing regarding sections of H.R. 15, a bill to extend several elementary and secondary programs which expire at the end of fiscal year 1978. The panel of nine witnesses testifying included supervisors or directors of migrant education from four states as well as representatives from the National Education Association, the National Child Labor Committee, the Interstate Migrant Education Task Force, the Migrant Branch of the U.S. Office of Education, and the Migrant Student Record Transfer System. While the witnesses applauded Congressional efforts on behalf of migrant education and described the successful aspects of certain programs, they made numerous recommendations to improve the Title I program. Their recommendations include (1) coordination and cooperation between federal agencies to establish a uniform definition of ``migrant'', to set consistent eligibility requirements, and to assure a more uniform delivery of services; (2) coordination and cooperation between state educational programs to provide curriculum consistency as the children move from state to state; (3) expansion of funding beyond the 5 to 17 year age level to include day care and nursery school facilities for children from 0 to 5 years of age, and to create educational opportunities for the 18 to 21 age group. Testimony, prepared statements and supporting materials are included in this document. (DS)

Identifiers-*American Indian Education, *Maine, Passamaquoddy (Tribe), Penobscot (Tribe)

Institutional success of an instructional model that featured peer instruction, a strict performance orientation, and an insistence on mastery of specific skills led developers to believe the same model could be used by communities to disseminate skills and information at low cost and with efficiency. The system was utilized in setting up an Indian adult education program for four rural communities in Northern Maine. The core of the program was the precisely written performance criteria for each of the learning models. A local master craftsman taught the skill to one student, the student practiced until he mastered the skill according to the criteria checklist, and then he in turn became the teacher and passed the information on to another. The ``each one teach one'' philosophy permitted students to work without pressure at their own pace, to learn in their own language, and to work with someone they knew and trusted. Each community determined what types of instruction it wanted; the learning models drawn up included such areas as basketry, installation of studding, insulation, wallboard and molding, legal rights, home maintenance and repair, and making children's trousers. Community response was favorable and the program considered highly successful. This report describes the program and how it was conducted, and lists job descriptions and functions of the program administrators. (DS)

Mendelsohn, Everett, Ed. And Others

The Social Production of Scientific Knowledge. Sociology of the Sciences, Volume I - Yearbook 1977.

Pub Date-77
Note-294p.; For related document, see SE 024 817
Available from-D. Reidel Publishing Company, Lincoln Building, 160 Old Derby St., Hingham, MA 02043 (Order No. ISBN-90-277-0776-6, $13.50)

Document Not Available from EDRS.

Descriptors-Cognitive Processes, Conceptual Schemes, Higher Education, *Philosophy, Science Education, *Science History, *Scientific Enterprise, Scientific Methodology, *Social Sciences, *Sociology

This is the first volume of an annual publication that deals with the sociology of the sciences. The aim of the yearbook is to consider sociology from a very broad perspective and to develop a comparative, cross disciplinary understanding of the sciences. It does this by publishing papers from a number of perspectives and approaches on a specific topic. The basic standpoint of the yearbook views the sciences as a plurality of socially constructed ways of comprehending natural and social phenomena. It is intended for an audience that includes sociologists and all those interested in sociology of science, sociology of knowledge, theoretical sociology, philosophy and history of science, science policy, as well as post graduate students in those fields. The publication has three major parts: Part I deals with The Institutionalisation of the Sciences: Changing Concepts and Approaches in the History and Sociology of Science; Part II is on Social Relations of Cognitive Structures in the Sciences; and Part III discusses Social Goals, Political Programmes and Scientific Norms. (GA)

Document Not Available from EDRS.
Descriptors-Books, Educational Technology, Higher Education, *Industrial Technology, Mechanics (Process), Science Education, *Sciences, *Scientific Concepts, *Scientific Research, Social Sciences, *Technology

This book is the second volume of an annual publication that deals with the sociology of the sciences from a very broad perspective. This volume is designed to stimulate new discussion among historians and sociologists of science and technology, economic and social historians as well as philosophers of science aiming at a more appropriate understanding of the scientific and technological changes taking place. It is intended for an audience of teachers, students and all others interested in sociology of science, and history of science and technology. The publication has a compilation of articles arranged in four major parts: Part I deals with Science and Technology; Part II is on the Interrelation between Science and Technology; Part III discusses Science and Technology in Their Social Context; and Part IV considers the Scientification of Technology. A National Plan for Energy Research, Development and Demonstration.
Energy Research and Development Administration, Washington, D.C.
Report No.-ERDA-77-1
Pub Date-Jun 77
Note-49p.
Available from-Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock Number 060-000-00067-1; $2.00)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Energy, *Energy Conservation, *Environmental Research, Futures (of Society), Government Publications, *Government Role, Natural Resources, *Policy Formation, Resource Allocations, *Technological Advancement
Identifiers-*Energy Research and Development Administration

This booklet from the Energy Research and Development Administration presents a plan for the energy research development and dissemination activities of the Federal government. The discussions highlight present and proposed energy RD&D efforts and mention areas of needed research. Chapter titles, which indicate contents, are: (1) Understanding conservation; (2) Reviewing the conservation technology base; (3) Technologies that expand existing fuel sources; (4) Technologies that use new fuels; (5) Development of support technologies; (6) On-going program planning studies; and (7) Overview of ERDA's budget. This RD&D plan was designed to be in consonance with the President's National Energy Plan. This document could be of interest to those studying energy policy formulation. (MR)

Descriptors-Daylight, Electrical Systems, *Electricity, Energy, *Energy Conservation, Government Publications, Pamphlets, *Solar Radiation, *Technological Advancement, Utilities

Identifiers-*Energy Education, *Energy Research and Development Administration

This brochure gives an overview to solar photovoltaic energy production. Some of the topics discussed are: (1) solar cell construction; (2) parallel and series cell arrays; (3) effects of location on solar cell array performance; (4) solar economics; (5) space aplications of solar photovoltaic power; and (6) terrestrial applications of solar photovoltaic power. Pictures of some of these terrestrial applications are included. This publication can provide a general introduction to solar cell electricity. (MR)

Women in the Biological Sciences.

Pub Date-78
Note-31p.; Not available in hard copy due to copyright restrictions
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Biological Sciences, College Graduates, Doctoral Degrees, *Females, Medicine, Professional Personnel, Science Education, *Scientists, *Womens Education, *Womens Studies
Identifiers-*National Institute of Health

This paper presents an overview of the biological sciences, the number of women involved, and the opportunities available to them. Some of the women who attained prominence in biological sciences since the early days of women's college education are presented. Data and figure captions are presented to show the gains of women in biological sciences. The author states that women are earning an increasing percentage of the doctorate degrees awarded in nearly all fields; substantial numbers of women are found in the lower ranks of the academic faculty; the percentage of women consultants on review committees and councils has increased significantly since 1971 and more women in biological and medical sciences are applying and receiving research grants. It is also stated that women's salaries still lag somewhat behind those of men, few women are found at the top in decision-making positions, and fewer still receive accolades - honors and awards - of any kind. (Author/HM)

Commercial Economic Poisons Applicators Licensing Manual, Rough Draft.
Michigan State Dept. of Agriculture, Lansing, Div. of Plant Industry.
Pub Date- 78
Note-188p.; Drawings marginally legible; Contains occasional light and broken type
EDRS Price MF-$0.83 HC-$10.03 Plus Postage.
Descriptors-*Agricultural Chemical Occupations, Agricultural Education, Disease Control, Herbicides, Insecticides, *Instructional Materials, *Manuals, *Pesticides, *Postsecondary Education, Science Education, Weeds
Identifiers-*Michigan

This pesticide manual gives information on types of pest management, labels and labeling of pesticide containers, safety, types of pesticides (including chapters on insecticides, fungicides, herbicides, and nematicides), spray equipment, identification of pests (including weeds, plant diseases, and vertebrates), and environmental considerations. The primary purpose of the document is to provide the student with basic knowledge required to become a certified private applicator, or a certified commercial applicator. A secondary purpose is to stimulate the applicant to obtain suggested and related references in his special category of pesticide application, and learn more about his selected professor. The New Outlook for Science. Science and Belief: from Copernicus to Darwin, Block VI, Units 15-16.

Open Univ., Walton, Bletchley, Bucks (England).
Pub Date-74
Note-69p.
Available from-Director of Marketing, The Open University, 12, Cofferidge Close, Stony Stratford, Milton Keynes MK11 1BY England (no price quoted)
Document Not Available from EDRS.
Descriptors-Biology, Christianity, *Evolution, *Higher Education, *Instructional Materials, Interdisciplinary Approach, *Learning Activities, *Science Education, *Science History, Social Environment
Identifiers-Open University (Great Britain)

This text contains units 15-16 in the Open University course, Science and Belief: from Copernicus to Darwin. It is an inter-faculty second level course in the history of science. Unit 15 is concerned with Nature and History and includes uniformitarianism, human history, evolutionism, and Darwinism. Unit objectives, readings, and questions with the answers are provided. Unit 16 deals with the Specific Challenge of Darwinism to Religion. The same materials are provided for this unit as for unit 15. Illustrations are included throughout the text. A complete list of the units in this course appears at the end of the text. (MA)

Energy Conservation Education Resource Guide.

Guilford County School System, Greensboro, N.C.
Spons Agency-North Carolina Dept. of Commerce, Raleigh.
Pub Date-Jul 78
Note-175p.; Some colored pages may not reproduce well
EDRS Price MF-$0.83 HC-$8.69 Plus Postage.
Descriptors-*Elementary Secondary Education, *Energy Conservation, *Environmental Education, *Instructional Materials, Interdisciplinary Approach, *Learning Activities, Natural Resources, Resource Guides, Science Education
Identifiers-North Carolina (Guilford County)

Although designed as a resource for teachers in the Guilford County (North Carolina) School System, this guide contains information applicable to most K-12 curricula. There are five color-coded sections, each devoted to specific grade levels: K-3, 4-6, 4-9, 10-12. The Appendices include field trip possibilities, an energy use checklist, and illustrations. Each grade level section contains energy concepts, related activities, and resources for the teacher. There is an annotated bibliography containing entries for all resources listed at the end of each section. This resource guide is not intended to provide an exhaustive list of concepts, activities, and resources, but rather is a working tool to be amended and modified by teachers. An interdisciplinary and integrated approach is used throughout the guide. (MA)

Theobald, John Hamilton

Attitudes and Achievement in Biology: An Investigation of the Effects of Student Attributes and Teaching Styles on Attitudes and Achievement in Secondary School Biology.

Pub Date-77
Note-370p.; Ph.D. Dissertation, Monash University, Australia
EDRS Price MF-$0.83 HC-$19.41 Plus Postage.
Descriptors-*Academic Achievement, Biology, Doctoral Theses, *Educational Research, *Instruction, Science Course Improvement Project, *Science Education, Secondary Education, Student Attitudes, *Student Characteristics, *Teaching Styles
Identifiers-Australia

Using a specially-constructed category system (CATS), biology lessons are analyzed for attribute-treatment interaction (ATI) and the data submitted to analysis. Relationships between fifteen individual predictors (general ability, four personality factors, two cognitive preferences, treatment, and seven first-order attribute-treatment interactions) and criterion variables (four attitude scales and two achievement tests) are studied using multiple regression analysis. The unique contribution of each term, controlling for all others, is tested. Among the results reported, ``enjoyment in biology'' is considered to be a function of a cautious, convergent outlook, and an intellectual disposition. General ability and an intellectual disposition lead to high scores on a memory task in biology, and on this criterion, class-centered teaching is considered better for students who are both open-minded and have a cognitive preference for rate learning, and individual-centered teaching is considered better for dogmatic students and those with a cognitive preference for principles. On an achievement test sampling higher cognitive processes, high general ability, open-mindedness, and a cautious personality are advantageous and individual-centered teaching is better than class-centered teaching for all but students with a highly intellectual disposition. (Author/MA)

Butler, Thelma R.
Development and Implementation of a Metric Inservice Program for Teachers at Samuel Morse Elementary School.
Pub Date-Jul 78
Note-62p.; Practicum Report submitted in partial fulfillment of the requirements for the degree of Doctor of Education, Nova University
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-Educational Research, Elementary Education, *Elementary School Mathematics, Elementary School Students, Evaluation, *Inservice Teacher Education, Instruction, *Instructional Materials, Measurement, *Metric System, *Program Development

A model for organizing an introductory in-service workshop for elementary school teachers in the basic fundamentals and contents of the metric system is presented. Data collected from various questionnaires and tests suggest that the program improved the teacher's performance in presenting the metric system and that this improvement had a positive effect on the children's level of knowledge of metrics. Contents include: Background Information, Development of Program Strategy Through Review of the Literature, Practicum Objectives, Implementation of the Program, Evaluation of the Metric Workshop Inservice Program, Institutionalization of the Program, Conclusions and Recommendations, tests and questionnaires used, and their results. Descriptors-*Decision Making Skills, *Environmental Education, *Instructional Materials, *Learning Activities, *Natural Resources, Petroleum Industry, Problem Solving, Science Education, *Secondary Education, Simulation

Identifiers-Texas (Harris County)

This unit provides the student with a simulated experience in the development of decision making skills. The acquisition of petroleum resources in a hypothetical republic provides the basic scenario around which the simulation develops. Students are supplied with specific information about petroleum geology, finances, and drilling. With this knowledge, students are asked to make economic and environmental decisions concerning the future of the republic. Over half of this publication is devoted to maps, charts, and illustrations that can be removed from the unit and duplicated. Background information, as well as activity development of the simulation, is included for the secondary teacher. (MA)

A Study of the Interfering Effects of Some Deceptive Visual and Mathematical Clues Related to Area and Capacity and the Ability of Seventh and Eighth Grade Students to Use Analogy to Solve Capacity Problems.

Pub Date- 78
Note-12p.; Not available in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Educational Research, *Geometric Concepts, Grade 7, Grade 8, Instruction, *Measurement, *Problem Solving, Secondary Education, *Secondary School Mathematics, *Visual Perception
Identifiers-Area, Estimation, *Research Reports

Eleven students out of 94 selected a hexagonal container as larger than a triangular container having the same surface area, although the capacity of the former was 50% greater than the latter. When presented with hexagons and triangles of the same perimeter but different areas, 40 students selected the hexagon as the larger area. When the hexagonal and triangular containers were reconsidered, 51 chose the hexagonal container, 45 of whom used analogy with the area problem. Similar results were obtained using another transfer problem. (MP)

Descriptors-*Behavior Change, Conservation Education, Consumer Economics, *Contingency Management, Electricity, Energy, *Energy Conservation, Incentive Grants, *Research, *Science Education

This paper reports the results of two studies designed to evaluate the effects of a group contingency for conservation on use of electricity. Residents of 166 apartment units in three towers participated in the first study. The group contingency consisted of biweekly payments to residents of the value of the electricity they saved, as compared to predicted use based on temperature. In addition, resident meetings were held in each tower. The group contingencies were initiated in each tower at three-week intervals in a multiple baseline design. Subjects in the second study were residents of 255 apartment units, also in three towers. They experienced the same group contingencies in the same multiple-baseline design, except that they received only 50% of the value of their savings. In addition, they received a one-time bonus of five dollars if they used 10% or more less than baseline. Results are discussed in terms of theoretical and practical implications. (Author/HM)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Curriculum Development, *Curriculum Planning, Educational Development, *Elementary Secondary Education, *International Studies, *Planning Meetings, Policy Formation, *Science Education, Science Programs, Teacher Education
Identifiers-*Africa

This paper is concerned with the teaching-learning strategy of the Primary Science Project of the Science Education Program for Africa. It was presented in the 1976 seminar of the International Institute for Educational Planning (IIEP) of the UNESCO in Paris. The document includes six sections: (1) The concept of a strategy; (2) Description of the strategy; (3) Advantages and disadvantages of outcomes; (4) Development and implementation in Ghana; (5) The role of formative evaluation; and (6) Implications. The description of the strategy includes influence of teachers' decisions, time for learning, goals of learning, content of learning activities, structure of learning sequences, pupils' role, influence of diagnostic feedback, ideological bases of the strategy, and origin of the strategy. The implications discuss curriculum planning policy, teacher training and allocation of resources. (HM)

Causes of Recent Decline in the Mathematics Achievement of Public High School Students: A National Survey of High School Mathematics Teachers.

Pub Date-77
Note-26p.; Paper presented at the annual meeting of the American Educational Research Association (New York, New York, April 4-8, 1977); Not available in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Achievement, College Entrance Examinations, Curriculum, Educational Research, Instruction, *National Competency Tests, Secondary Education, *Secondary School Mathematics, *Secondary School Teachers, Student Characteristics, *Surveys, Teacher Characteristics, *Test Results

A nationwide survey collected opinions of high school teachers to determine if there is a decline in the mathematics achievement of high school students and to determine the causes for this decline. The following conclusions were reported: (1) students have a weak mathematical background when they enter high school and poor study habits in high school compound the problem; (2) minimum academic standards are not set by teachers, yet administrators do not encourage teachers to set minimum academic standards; and (3) students are more frequently absent from class than in the past. Piagetian Research in Science Education: Some Misgivings About Its Potential to Improve Practice.

Pub Date-78

Note-20p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (51st, Toronto, Canada, March 31-April 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Cognitive Processes, Curriculum Planning, *Educational Development, Educational Practice, *Educational Research, Elementary Secondary Education, *Learning Processes, Learning Theories, *Science Education, Teaching Methods

Identifiers-*Piaget (Jean)

This paper, intended to show some misgivings about the potential of the Piagetian research orientation for improving science education practice, was presented at the 1978 meeting of the National Association for Research in Science Teaching (NARST). The research orientation discussed is that derived from the developmental theory of Jean Piaget. The misgivings are grouped under two headings: educational claims and metatheoretical considerations. Discussion of these two areas leads to a consideration of how the Piagetian research orientation in science education could be related to professional practice, with particular reference to curriculum and instructional planning, and to the diagnosis of children's learning. It is suggested that in light of these misgivings, it might be useful to consider an alternative for planning and diagnosing. (Author/HM)

Kishta, Mohammed A. Mays, Eileen M.

The Relationship of Moral and Cognitive Development in Two Cultures and the Implications for Science Teaching.

Pub Date-78
Note-19p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (51st, Toronto, Canada, March 31-April 2, 1978); Not available in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Cognitive Development, Conservation (Concept), *Cultural Factors, *Educational Research, Elementary Education, Ethics, *Moral Development, *Science Education, Values
Identifiers-Piaget (Jean), *Research Reports

Sixty subjects were identified from two grade levels (second and fifth), in elementary schools in Iowa and in Jordan. Cognitive and moral judgment tasks were administered to each subject. The cognitive tasks measured conservation, class inclusion, multiplicative classification, and spatial perception. The moral judgment tasks presented situations related to reciprocity, values, and perspective of viewpoints. Significant differences were found in the following relationships: the relationship of cognitive development between second- and fifth-grade subjects within each culture and between cultures, the relationship of moral development between second- and fifth-grade subjects within each culture and between the cultures, and the relationship of moral and cognitive development within and between the cultures. Second Thoughts About the Potential Influence of Science Teacher Education Research.

Pub Date-78

Note-20p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (51st, Toronto, Canada, March 31-April 2, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Educational Research, *Inservice Teacher Education, Research, *Research Design, Research Methodology, Science Education, *Science Teachers, *Teacher Education

Identifiers-*Research Reports

Research in science teacher education does not appear to have made very much difference in the ways preservice and inservice science teacher education is conducted or in the ways participating teachers teach. This paper illustrates and suggests possible explanations for this state of affairs, and indicates research alternatives which seem to hold greater promise for improving practice. Examples of contemporary science teacher education research are presented, asking of each how significant the question is and to what extent the results achieved may be expected to improve science teacher education practices. It appears that the potential influence of the research is, in many cases, unduly restricted by the format of the research and by the implied assumptions about how science teachers and science teacher educators evaluate proposals for the improvement of practice. Alternatives to the most familiar form of science teacher education research are presented, looking at the significance of the questions and the potential influence of the results. (Author/BB)

Development and Validation of a Televised Test of Science Processes.

Pub Date-78

Note-18p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (51st, Toronto, Canada, March 31-April 2, 1978); Contains light type in Tables

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Cognitive Processes, *Educational Research, *Educational Television, *Elementary Education, Elementary School Teachers, *Instruction, *Process Education, *Science Education, Skills, Student Testing, Validity

Identifiers-Research Reports

This paper, presented at the 1978 meeting of the National Association for Research in Science Teaching, describes the development of a resource for the identification of science process skills in young children (grades 4-7). The Test of Science Processes (TOSP) of Tannenbaum was modified for presentation in a broadcast instructional television format by reducing the number of items using judges' opinions and item analysis data, and reducing the reading level of test questions. It is concluded that the Television Test of Science Processes (TTSP) provides elementary science teachers and administrators with a useful test of science processes that can be used for assessing science competencies in young children. Descriptors-Adoption (Ideas), Educational Change, *Educational Innovation, *Field Interviews, *Junior High Schools, Models, *Research Methodology, Science Course Improvement Project, *Science Education, Secondary Education

Identifiers-*Curriculum Implementation, Israel

This paper, designed to assess the degree of implementation of the important features of a curriculum innovation, was presented at the 1978 Bat-Sheva Seminar on Curriculum Implementation and its Relationship to Curriculum Development in Science, Rehovot-Jerusalem, Israel. It investigates the use of sub-interviews within the main interview to assess the level of use of each of the components of interest innovation bundle. The methodology described is used to measure the level of implementation of the junior high school science program, The National World (TNW). This is the revision and modular adaptation of the Intermediate Science Curriculum Study (ISCS). A total of five teachers using the TNW program were interviewed personally or by telephone. Results show that all teachers are regular users of the program and there are considerable variations in their degree and level use of the program. Scales used to measure the use of innovation and interview format are also presented. (HM)

Identifiers-*Canada

This publication, developed by the Ministry of Education, Province of British Columbia, Canada, is a teaching guide for the Earth Science 11 course. The course is intended to provide secondary school students with the background and desire to investigate their earth, its materials and its processes. The guide consists of four sections. Section A is concerned with astronomical sciences. It includes three units: stellar systems, solar systems and the third planet. Section B is concerned with geological sciences. It also includes three units. Section C is concerned with oceanographic and atmospheric sciences. It includes two units: the oceans and the atmospheric science. Section D is concerned with renewable and non-renewable earth resources. Learning outcomes, suggested activities and investigations, a list of references, and scope and sequence of the units are also included in each section. A list of equipment and supplies, audiovisual materials, supplementary reference texts and prescribed textbooks are presented in the appendix. An introduction including the purpose of the course is also presented. (HM)

Bright, George W. And Others

Cognitive Effects of Games on Mathematics Learning. A Revision of a Paper Presented at the Annual Meeting of the National Council of Teachers of Mathematics (Cincinnati, Ohio, April 1977).

Pub Date 78
Note 66p.
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors *Cognitive Development, Curriculum, Effective Teaching, Elementary Secondary Education, *Games, Instruction, *Learning, Learning Activities, *Literature Reviews, Mathematical Enrichment, *Mathematics Education, *Research Reviews (Publications)

In this document, available literature is identified and reviewed in order to determine whether there are substantiated cognitive effects associated with the use of games in the mathematics classroom. Three criteria were used for selection of the literature: the treatment was identified as a game; cognitive measures were obtained; and the dependent variables included mathematical variables. The paper observes that the study of games as an instruction-learning process in mathematics has so far been neither thorough nor systematic and no definite conclusions can be made about the use of games in teaching mathematics. Basics of Solar Heating & Hot Water Systems.
American Inst. of Architects, Washington, D.C.
Pub Date-78
Note-48p.; Shaded architectural plans may not reproduce well
Available from-American Institute of Architects, 1735 New York Avenue, N.W., Washington, D.C. 20006 ($5.00; quantity price $4.00)
Document Not Available from EDRS.
Descriptors-Building Design, Climate Control, *Energy Conservation, *Environment, *Heat, *Instructional Materials, Postsecondary Education, Science Education, *Thermal Environment
Identifiers-*Hot Water Heating

In presenting the basics of solar heating and hot water systems, this publication is organized from the general to the specific. It begins by presenting functional and operational descriptions of solar heating and domestic hot water systems, outlining the basic concepts and terminology. This is followed by a description of solar energy utilization that traces the principles of solar energy from climate to radiation gain to solar collection. Finally, the manner in which solar components can be organized into solar heating and hot water systems is discussed including: collector-storage arrangements, storage distribution arrangements, domestic hot water preheating types, and specific system components. Descriptors-Activity Units, *Conceptual Schemes, Curriculum Development, Energy, *Energy Conservation, *Environmental Education, Experiential Learning, *Instructional Materials, Interdisciplinary Approach, *Objectives

This publication provides the goals, concepts, objectives, and rationale for the six activity guides in this series of energy education materials. The organization of this series, as presented in this publication, centers around six goals which correspond to the activity guides. Under each goal are several concepts, which in turn, have several objectives. These concepts and goals are referenced above the activities included in the guides. The six goals are: (1) It is essential that each person know that there are many sources of energy; (2) It is essential that each person know that people are dependent upon energy; (3) It is essential that each person know that energy can be converted from one form to another; (4) It is essential that each person know how man's use of energy creates an impact on the environmental and economic systems; (5) It is essential that each person know that the earth's resources are limited; and (6) It is essential that each person know that new energy sources and more efficient systems, accompanied by different consumption practices, may alter the world energy dilemma. This conceptual outline may be of use to teachers, curriculum specialists, and researchers. (MR)

Identifiers-*Energy Education

This publication presents the activities pertaining to the first goal of this activity guide series. The activities in this publication focus primarily on the availability of resources, forms of energy, natural laws, and socioeconomic considerations. These materials are appropriate for middle school and junior high school students. These activities, organized by objective under the concepts listed, are interdisciplinary and can be used in a variety of ways. The activities are simply ideas of things that students can do to help them understand the concepts. It has been left to the teacher to choose and implement these ideas as desired. Activities range from an energy unit "treasure hunt" to dramatizing an Inca coronation. (MR)

Descriptors-*Activities, Activity Units, Conceptual Schemes, *Conservation (Environment), *Energy Conservation, Environmental Education, Instructional Materials, Interdisciplinary Approach, *Junior High Schools, *Middle Schools, *Objectives

This publication presents the activities pertaining to the second goal of this activity guide series. The activities in this publication focus primarly on awareness, conservation, and planning. These materials are appropriate for middle school and junior high school students. These activities, organized by objective under the concepts listed, are interdisciplinary and can be used in many ways. The activities are simply ideas of things that students can do to help them understand the concepts. It has been left for the teacher to choose and implement these ideas as desired. Activities range from writing a story that details the impact on members of a food chain when one member is removed to conducting a community survey to determine how people are trying to conserve energy. (MR)

Descriptors-*Activities, Activity Units, Conceptual Schemes, *Decision Making Skills, *Energy Conservation, Environmental Education, Instructional Materials, *Interdisciplinary Approach, *Junior High Schools, *Middle Schools, Objectives

This publication presents the activities pertaining to the third goal of this activity guide series. The activities in this publication focus on understanding conservation processes, efficiencies, socioeconomic costs, and personal decision-making. These materials are appropriate for middle school and junior high school students. These activities, organized by objective under the concepts listed, are interdisciplinary and can be used in many ways. The activities are simply ideas of things that students can do to help them understand the concepts. It remains for the teacher to choose and implement these ideas as desired. Activities range from stating the first and second laws of thermodynamics so the students' parents can understand them to designing a house which runs entirely on solar energy. (MR)

Descriptors-*Activities, Conceptual Schemes, *Energy Conservation, Environmental Education, Instructional Materials, *Interdisciplinary Approach, *Junior High Schools, *Middle Schools, Objectives, *Socioeconomic Influences

This publication presents the activities pertaining to the fourth goal of this activity guide series. The activities in this publication focus on the socioeconomic effects of energy uses and crises and the understandings needed to assess those effects. These materials are appropriate for middle school and junior high school students. These activities, organized by objective under the concepts listed, are interdisciplinary and can be used in many ways. The activities are simply ideas of things students can do to help them understand the concepts. It remains for the teacher to choose and implement those ideas as desired. Activities range from an experiment measuring sulphur dioxide in automobile exhaust to mapping the major sea lanes between oil producing countries and oil importing countries. (MR)

Descriptors-*Activities, Conceptual Schemes, *Energy Conservation, *Environmental Education, High Schools, Instructional Materials, *Interdisciplinary Approach, *Junior High Schools, Middle Schools, Objectives, *Policy Formation

This publication presents the activities pertaining to the fifth goal of this activity guide series. The activities in this publication relate to understanding nature and the natural limits to growth, personal consumption practices, and the social and technological implications of rapidly depleting the world's natural resources. These materials are appropriate for middle school and junior high school students. These activities, organized by objective under the concepts listed, are interdisciplinary and can be used in a variety of ways. The activities are simply ideas of things students can do to help them understand the concepts. It remains for the teacher to choose and implement these ideas as desired. Activities range from writing a story explaining what the earth's energy resources will be like by the year 2000 to role playing an election to illustrate how the class can get their views into the government. Some of these activities may be suitable for high school students as well. (MR)

Descriptors-*Agencies, Annotated Bibliographies, Audiovisual Aids, Curriculum Guides, *Educational Resources, *Energy Conservation, Environmental Education, Information Sources, *Organizations (Groups), Periodicals, *Resource Guides
Identifiers-*Energy Education, *Oregon

This publication is a resource guide to energy education and conservation materials and organizations. The stated purpose of this guide is to make teachers and other interested citizens of Oregon aware of some of the resources and sources of information on energy conservation education that are available in Oregon and in the United States and Canada. The first section lists the resources for energy education giving: (1) agency or organization name and address; (2) agency functions; (3) publications or films available from the agency; and (4) additional information about the agency and about speakers, if available, from the agency. The second section is an annotated bibliography of curriculum guides and teacher resource books. The third section lists multimedia materials with sources and addresses. The fourth section lists periodicals in the Oregon area that relate to energy conservation education. (MR)

Descriptors-*Adults, *Attitudes, Energy, *Energy Conservation, Environmental Education, *Knowledge Level, Measurement Instruments, *National Surveys, Research, Surveys, Tables (Data), Young Adults

This is a national assessment of energy awareness among young adults. A national probability sample of young adults, ages 26 to 35, was drawn and stratified by region and community size. Approximately 1,300 persons responded to each of the 76 attitudinal and 70 knowledge questions administered by trained energy assessment interviewers. Besides the standard demographic information, each participant was asked to respond to the energy assessment items in the appropriate booklet. The discussion centers upon national results. Group results are also presented according to race, sex, total household income, family size, education, etc. The first two chapters present the results while the third chapter presents the analysis of these results. Identifiers-*Connecticut

The design and methodology of the program of assessment is described and the student achievement data generated by the assessment are presented. Test results are reported for each goal area, each objective, and each test item by all 9-, 13-, and 17-year-olds, and by males and females within each age group. The results on test items in common with the three age groups are compared. Comparisons are made between groups of students formed on the basis of responses to questionnaires. The results of each age group are compared to the performance of students nationally. Results of a student questionnaire and of a principal questionnaire are reported. Copies of instruments are contained in the appendix. (MP)

Descriptors-Electricity, *Energy, Energy Conservation, *Environmental Criteria, Environmental Influences, *Nuclear Physics, Pollution, Public Health, *Radiation, *Safety, Utilities
Identifiers-*Energy Education, *Nuclear Power

This publication is a complete revision of an earlier booklet brought on by the dramatic changes in the energy outlook of the United States that occurred in 1973 and 1974. The purpose of this document is to inform the public on the overall U.S. energy situation, in particular electricity generated from nuclear reactors and other sources. The question and answer format is retained from the earlier version. Topics covered include: (1) Economics and Reliability; (2) Sources of Radiation; (3) Biological Effects of Radiation; (4) Plutonium Toxicity; (5) Thermal Discharges; (6) Safety: Emergency Core Cooling; (7) Benefit and Risk Perspective; and (8) Breeder Reactors. A bibliography is included. The authors are proponents of nuclear power and they have endeavored to present objective information in this publication. (MR)

Sex-Related Differences in Mathematical Problem Solving Performance and Intellectual Abilities.
Pub Date-78
Note-33p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Ability, *Educational Research, Elementary Education, *Elementary School Mathematics, *Intelligence, *Problem Solving, *Sex Differences
Identifiers-*Research Reports

Sex-related differences in mathematical problem solving performances and intellectual abilities were investigated. A battery of 19 reference'' tests for intellectual abilities and a mathematical problem solving test were administered to 82 fourth-grade females and 97 fourth-grade males. Sex-related differences were found for only two of the intellectual variables; neither of these were mathematics achievement variables. However, factor analytic procedures identified six factors (Verbal Comprehension, Induction, Numerical, Perceptual Speed, Symbolic Fluency, and General Mathematics) for females and five factors (Verbal Comprehension-Word Fluency, Induction, Perceptual Speed, Problem Solving and Mathematics Concepts) for males. These different intellectual structures suggested that males and females approach problem solving differently. (Author/MP)

Descriptors-Economic Climate, *Economics, Efficiency, *Employment, Employment Level, Employment Opportunities, Employment Potential, *Energy, *Energy Conservation, Environmental Education, Jobs, Politics, Solar Radiation

This document is a review of the work being done in the area of energy and the economy. The authors believe that increased energy efficiency, plus transition to a solar economy, can actually lead to a more stable economy and to more jobs than the large-scale system scenario, which corporate energy interests, many industrialists, and some government agencies, are promoting. The document includes the following sections: (1) energy and the economy; (2) substitution of energy for labor; (3) productivity and jobs; (4) energy growth and prosperity-the myth; (5) energy inefficiency and waste; (6) capital investment; (7) energy efficiency and jobs; (8) solar, wind, and biomass conversion; and (9) the politics of solar energy. Extensive footnotes are given. (TM)

Identifiers-*Research Reports

This document is about a program that was proposed and initiated involving the teaching of the metric system using performance objectives for each level from first through sixth grade. A total of 45 performance objectives were used for the six grade levels. The goal for the program was to have students master 80% of the performance objectives as measured by a criterion-referenced test. Formative and summative evaluations were conducted. The results of the summative evaluation disclosed that students in all six grade levels mastered the prescribed objectives beyond the 80% level. (MP)

Identifiers-*Research Reports

This document describes a practicum effort which entailed development and implementation of a mini-science instructional program for nine gifted students in an elementary school pilot program. The new program included development of necessary instruments and inservice training and utilized feedback from students, parents, and staff. Developmental and implementational components consisted of the following: setting goals, such as the students' ability to think critically and to solve problems; students' demonstration of increased knowledge of the scientific processes and their ability to hypothesize, analyze, and synthesize; and evaluation of their progress through observation and quizzes. Evaluation results indicate that the participating students mastered the objectives set for the mini-science program. The students, teachers, and parents involved considered the mini-science program effective, interesting, and worthy of replication the following year. (Author/BB)

Descriptors-Air Conditioning, Building Design, *Building Operation, Conservation (Environment), Energy, *Energy Conservation, Heating, Lighting, *School Buildings, School Districts, *Transportation, Ventilation, *Water Resources

This publication contains conservation suggestions for schools in California to save water and energy. Contents include: (1) a list of sources of additional energy education assistance and materials; (2) a discussion of energy conservation in schools including HVAC system operations, lighting and building design; (3) a summary outline of actions to improve school energy efficiency; (4) a list of factors to consider in designing new schools; and (5) an outline of suggestions to conserve energy in the school transportation operations. Suggested steps to conserve water in California schools are also presented. (MR)

Texas Energy Education Framework: A Pilot Draft.

Texas Education Agency, Austin.

Pub Date-78

Note-28p.; Contains occasional light and broken type

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Conceptual Schemes, *Curriculum Development, *Curriculum Guides, *Elementary Secondary Education, Energy, *Energy Conservation, Environmental Education, *Matrices, Units of Study

Identifiers-*Texas

This publication presents a conceptual framework for grades K through 12 energy education in Texas. Matrices are used in which basic concerns of people'' such as: (1) individual well-being; (2) career; and (3) social interactions are given on one axis and three learning dimensions: (1) knowledge; (2) applications; and (3) values are used on the other axis. These matrices are to serve as a guide to curriculum development and are given for grade levels K-3, 4-6, 6-8, and 9-12. Energy education experiences are given for parts of these matrices. Infusing energy education into existing curricula is expanded and a rationale for energy education is given. (MR)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Building Design, *Building Improvement, Building Materials, Climatic Factors, *Cost Effectiveness, *Energy Conservation, Heating, *Home Management, *Instructional Materials, Postsecondary Education, *Solar Radiation

This publication is a collection of solar heating ideas for the do-it-yourselfer. The ideas are presented in a clear, simple and sometimes amusing way. Although written for homeowners, these ideas may be used in businesses and schools as well. Some ideas may make good student projects. The suggestions are illustrated and their costs and probable effectiveness are given. These simple, non-technical solar energy ideas range from making and installing flexible insulating curtains and from installing passive solar heating window boxes to building an active solar trickle-type heating system and to constructing a pumped solar water heating system. A bibliography and a glossary are also included. (MR)

Reported in one document are the highlights of the findings of three studies funded by the National Science Foundation to assess needs and practices in pre-college science, mathematics and social studies in the nation's schools. One study involved a questionnaire survey of state, district, and local school personnel. Highlights of these data are presented. A second study focused on 11 in-depth case studies in selected U.S. school systems and the executive summary of these case studies is included in this document. The third study was an extensive literature survey in science, mathematics and social studies. The executive summaries for each discipline are included here. In addition to this information, procedures for obtaining complete copies of each study are given for those readers wishing more data. (PEB)

This collection of data and graphics were prepared in response to a request from the White House Energy Policy and Planning Staff. The focus of this document is on those environmental issues which will, in the near and midterm future, prove important to the rapid development of domestic energy resources. This report emphasizes coal because of its prominence as an energy resource during this period. Other energy sources such as nuclear power, oil shale, oil, and gas are discussed to a lesser degree. Long term resources such as solar and geothermal resources are considered briefly, but references for further reading on these subjects are provided. The intent of the document is to communicate concepts rather than technical detail, thus data are approximate. (Author/RE)

A particularly difficult area for many engineering students is the approximate nature of the relation between models and physical systems. This is notably true when the models consist of differential equations. An approach applied to this problem has been to use analog computers to assist in portraying the output of a model as it is progressively refined. This approach is illustrated using the ballistics problem. A demonstration program is presented. (Author/BB)

In certain boundary layer or natural convection work, where a similarity transformation is valid, the equations can be reduced to a set of nonlinear ordinary differential equations. They are therefore well-suited to a fast solution on an analog/hybrid computer. This paper illustrates such usage of the analog/hybrid computer by a set of applications of increasing complexity. The examples chosen are the growth of the boundary layer as expressed by the Blasius equation, the steady natural convection plume above a horizontal line heat source, and free convection from horizontal surfaces. The analog computer is effective in both educational and research contexts providing very rapid solutions to such problems. (Author/BB)

Descriptors-*Analog Computers, *Computers, *Computer Science, Digital Computers, *Engineering, Engineering Education, Instructional Materials, Models, Science Education, *Simulation, Systems Analysis

The simulation of a sampled-data system is described that uses a full parallel hybrid computer. The sampled data system simulated illustrates the proportional-integral-derivative (PID) discrete control of a continuous second-order process representing a stirred-tank. The stirred-tank is simulated using continuous analog components, while PID controller is simulated using discrete components that generate the sampling frequency and permit the recording or display of the system response. The simulation is totally inter-active enabling examination (in the repetitive operation mode) of the system response to changes of sampling frequency, controller gains and process-time constants. A software PID algorithm is also available to illustrate a form of direct digital control of the stirred-tank. The system simulation is sufficiently simple to introduce under-graduate students to some of the problems of sampled-data systems. (Author/BB)

Descriptors-Building Design, *Building Operation, Electricity, *Energy, *Energy Conservation, *Fuel Consumption, Heating, Lighting, Nonprofessional Personnel, Records (Forms), *School Buildings, School Maintenance, Ventilation

This booklet tells how to set up an Energy Conservation Program in individual school districts. It discusses: (1) appointing an energy conservation manager; (2) keeping energy consumption records; and (3) assessing the energy saving potential of each school; and it outlines (4) some of the steps that can be taken to cut down energy waste. Estimates vary, but most schools in British Columbia could reasonably expect to make at least a 20% reduction in energy consumption simply by improving their operating procedures (tightening their heat and lighting time schedules, maintenance practices, etc.) and by making minor alterations to their equipment. Sample copies of the energy consumption record sheets for electrical, oil/gas, and total energy consumption are included. (Author/TM)

Identifiers-*Research Reports

Questionnaires were sent to U.S. high schools soliciting information on former students who had earned doctorates. The questionnaire provided data on grades, rank in graduating class, and mental test scores. The grades were summarized into four grade-point averages (GPA's), one each for English and foreign languages, social studies, mathematics, and science. Data on the PhD's (and their classmates) were compared by sex, by type of school, by size of graduating class, and by region of the country. The PhD's were also compared by year of doctorate and by field of specialization. Some of the conclusions are as follows: despite the massive increase in doctorate production, there has been no measurable change in ability level of the PhD's; the doctorate-holders are, on the average, one and one-half standard deviations above the mean of the general population in measured ability. A random sample of the girls graduating in the same classes as the doctorate-holders scored slightly lower than their male counterparts on standardized tests, but achieved better grades, particularly in verbalistic subjects. Identifiers-*Fracture Mechanics

Fracture mechanics is a multidisciplinary topic which is being introduced to undergraduate engineering students in such courses as materials engineering. At a recent Conference on Fracture held at the University of Waterloo, a session was devoted to fracture education. Some of the ideas presented at that session are included and discussed here. The method of teaching fracture at Waterloo is then described. This method uses a cooperative system with alternate work and study terms over a five-year period. The paper concludes by focusing on methods of teaching and their relevance to mastery of the desired information and skills. (BB)

Identifiers-New York Sea Grant

This publication is divided into five parts. The first part provides the aims and objectives of the booklet. These include assisting high school students to discover the career opportunities in marine-related occupations and to prepare for some of the jobs listed in the booklet. Section two contains resource information: publications, organizations, and state resources. In section three, examples of scientific jobs available are described. These are divided into biological, chemical, geological, physical, environmental, and general. Professional Careers are listed in section four. These include careers requiring a college degree: Government Related, Environmental Affairs, Armed Services and Related Organizations, Consultation and Education, Engineering, Business and Industry, and General. Technical careers are treated in section five. Listed are Boat Building and Repair, Sales, Marine Construction and Maintenance, Commercial Fishing, Marine Recreation, and Maritime Operations. (MA)

Identifiers-National Science Teachers Association

Contained in this volume are six papers, each focused on a different area of research in science education, in which the authors attempt to identify the implications of research findings for classroom practices. The areas discussed are grading and evaluation practices, interaction of science and mathematics at the elementary level, field experiences, research on learning, helping handicapped pupils learn science by doing, and the use of computers in science teaching. This document presents a collection of field observations, from 11 sites, submitted as a part of the final report of a project funded by the National Science Foundation to gather data about science, mathematics and social science education in American schools. Schools involved a variety of settings: rural-urban, racially diverse, socioeconomically different, and located throughout the United States. Field observers spend 4-15 weeks on site, gathering data. Biographical information on each field observer accompanies his/her case study. (PEB)

This collection of energy teaching units is the contribution of participants in a U.S. Department of Energy sponsored institute for secondary science and social studies teachers. The objectives of the Institute were to: (1) provide an overview of past, present, and future energy problems, and (2) stimulate teachers to use this information in their own courses. The units are for a broad range of disciplines and include topics such as: fossil fuels, energy conservation, nuclear power, economics of energy, coal mining, future trends, U.S. energy policy, electricity generation, and chemical aspects of energy production. Each unit includes objectives, daily activities and bibliography. (TM)

Descriptors-*Classroom Observation Techniques, Educational Research, Evaluation Methods, *Laboratory Procedures, *Measurement Instruments, Science Education, *Student Behavior, *Teacher Behavior, Vocational Education
Identifiers-*Research Reports

An instrument is presented for recording and analyzing student and teacher behavior in laboratory or activity-centered vocational education classrooms. The instrument uses categories of behavior, such as: (1) asks extended thought questions, (2) shows or illustrates, and (3) management of lesson, for teachers; and categories such as: (1) asks questions, (2) reads lesson-related material, and (3) gets supplies or moves around the room, for student behavior. The categories are recorded using single-letter codes, along with codes to indicate to whom the behavior is being directed and the sex of the person to whom the behavior is being directed. This document describes the development and validation of the instrument, and gives descriptions of and rules for use of the categories. (BB)

Descriptors-*Chemistry, Chemistry Teachers, Curriculum Development, Educational Policy, Educational Status Comparison, *Higher Education, Instructional Materials, International Education, *Science Education, *Secondary Education, *Secondary School Science, Surveys, *Teacher Education

This book is a result of a project sponsored by the Working Party on Chemical Education of the Federation of European Chemical Societies, UNESCO, the Chemical Society and the Royal Society, London, England. The purposes of this publication are to: (1) inform chemists of the level and significance of the various chemical qualifications in Europe; (2) contribute to understanding between the various national educational systems; and (3) stimulate innovations in the teaching of chemistry by exchanging ideas and comparing practices. It covers all European countries except those that do not have developed systems of higher education. Both secondary and university levels as well as the training of chemistry teachers are covered. The book is divided into two parts. The first consists of a series of impressions of various aspects of chemical education by well-known chemical educators from various parts of Europe. Part two is a factual account of the various educational systems with details of the titles and abbreviations of qualifications, teaching assessment methods, higher education and teacher training. Haruspicating With Science Fiction Or Through the Looking Glass Dimly.

Library of Congress; Washington, D.C. Congressional Research Service.

Pub Date-31 Mar 78

Note-8p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Fantasy, *Futures (of Society), Literary Analysis, Literary Genres, Literature, *Prediction, *Science Fiction, Scientific Concepts

This paper examines the use of science fiction to predict the future. First, science fiction is compared to other fiction literature forms; then the changes in science fiction over the last 20 years are discussed. The influence of recent scientific advances on science fiction is also presented. The generation of alternative scenarios of the future is considered the most valuable function of science fiction as a predictor. (MA)

People Liberation: One Semester Course for Social Studies or Family and Consumer Studies.

San Juan Unified School District, Carmichael, Calif.
Pub Date-74
Note-45p.; Not availabie in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Body Image, Comparative Analysis, Consumer Education, Course Objectives, *Curriculum Development, Curriculum Guides, Educational Resources, Evaluation Methods, Family Life Education, Females, Higher Education, Learning Activities, Males, Secondary Education, Self Actualization, *Self Concept, Sex Differences, *Sex Role, Sex Stereotypes, *Social Problems, Social Studies, Teaching Methods, Womens Studies

An outline is presented for a one-semester course in people liberation'' which can be incorporated into social studies, consumer education, family education, or womens studies programs. Designed for senior high school, the course explores masculine and feminine roles in contemporary American society and helps students understand themselves as members of society. Unit topics include self-concept; role clarification; awareness of the physiological differences between the sexes and social attitudes regarding sexual behavior; social and political roles of women in past and present American society; changing opportunities for women in work and marriage; economic problems of women; and analysis of students' own life styles, aspirations, and career interests. For each unit the outline indicates the rationale and overall goal. The outline also elaborates, for each of the 82 days, specific objectives, teaching strategies, resources, and evaluation techniques. For example, in the unit on women's political role in American society, the objective is for students to apply the definition of political behavior to particular women in American history. The teaching strategy emphasizes individual research reports using resources in the school library. Evaluation is done through written papers in which students describe a famous American woman's accomplishments and examine factors which influenced her development. (AV)

Descriptors-Abstracts, American Indians, *Annotated Bibliographies, Bilingual Education, Blacks, Course Descriptions, Cross Cultural Studies, *Cultural Awareness, Cultural Background, Cultural Differences, Cultural Enrichment, Cultural Exchange, Cultural Interrelationships, Cultural Pluralism, Elementary Secondary Education, Ethnic Studies, Global Approach, Higher Education, *Inservice Teacher Education, *Intergroup Relations, Mexican Americans, *Multicultural Education, *Preservice Education, Racial Integration, Self Concept, Self Esteem, Social Studies, Teacher Education

This annotated bibliography identifies over 100 resources available through the ERIC system. It focuses on the improvement of inservice or preservice teacher training for the purpose of fostering intercultural awareness, intergroup understanding, and global solidarity. Topics listed include international understanding via student teaching abroad, developing creative materials for teaching the culturally different child, evaluation of curriculum materials, and reviews of literature related to segregation and racism. Some descriptions of training institutes for teachers and school administrators are also included. Entries for the bibliography were located in the ERIC system from 1966-1976. Information is included on author, title, institutional source, publication date, number of pages, ERIC accession number, and availability from the ERIC Document Reproduction Service. A 200-word abstract and ERIC descriptors are included. (KC)

Africa in U.S. Schools, K-12: A Survey.
African-American Inst., New York, N.Y.
Pub Date-78
Note-30p.; Best copy available
Available from-African-American Institute, 833 United Nations Plaza, New York, New York 10017 ($4.00, paper cover)
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-African Culture, African History, *Area Studies, Cognitive Measurement, Cognitive Objectives, Cross Cultural Studies, *Cultural Awareness, Data Analysis, Developing Nations, *Educational Assessment, Educational Needs, *Educational Practice, Educational Research, Educational Trends, Elementary Secondary Education, Foreign Countries, *Global Approach, Surveys, Teacher Qualifications, Textbook Evaluation
Identifiers-*Africa

The document presents findings from a study of K-12 educational programs dealing with Africa and Africans. Data were based on a survey of educators, librarians, students, and curriculum materials in California, Michigan, New Jersey, New York, North Carolina, and Wisconsin. Objectives of the study were to assess why interest in African studies was declining and to determine how the African American Institute could help educators improve African studies programs. Survey results showed that African studies is almost always presented in social studies courses, required at the pre-college level in New York and North Carolina, often taught by teachers with no preparation in African studies, viewed by many educators as irrelevant to Americans, and taught with the aid of low quality textbooks. Recommendations to improve teaching about Africa emphasize the need for educators to internationalize the curriculum, learn about international affairs at in-service workshops, and use only materials which adequately treat developing nations. Conclusions are that African studies will find a more meaningful place in the curriculum if better materials are available and if teacher education in international studies is expanded. (DB)

Saxe, Adele R.

The Young Look at the Old: Curriculum Building in the Area of Aging. A Manual to Assist in the Development of Courses on Teaching about Aging.

San Jose State Univ., Calif. School of Applied Science and Arts.

Pub Date-77

Note-77p.; Appendix B has been removed due to internal copyright

Available from-Gerontology Education and Training Center, School of Applied Science & Arts, San Jose State University, San Jose, California 95192 ($3.00, paper cover)

EDRS Price MF-$0.83 HC-$4.67 Plus Postage.

Descriptors-Adult Development, Affective Objectives, Bibliographies, Cognitive Objectives, Course Content, *Curriculum Development, Curriculum Guides, *Educational Gerontology, Elementary Secondary Education, Experiential Learning, Fine Arts, Geriatrics, Inservice Education, *Interdisciplinary Approach, *Interpersonal Relationship, Language Arts, Learning Activities, Lesson Plans, *Older Adults, Physical Education, Resource Materials, Social Studies, Teacher Education, Teaching Techniques

This manual is designed to aid elementary and secondary teachers in creating programs to teach about aging. Goals of this program are to (1) provide young people with a better understanding of the aging process, (2) provide a perspective of the meaning of education in one's own life, (3) establish cross-generational understanding and cooperation, and (4) provide materials on aging that will enrich the regular curriculum. Teaching approaches are cross-generational, cross-cultural, and interdisciplinary in nature, and can fit into subject areas such as art, music, literature, sociology, psychology, physical education, and economics. Separate sections in the manual discuss rationale, course content, teacher training, curriculum development, and course plans. Suggestions for funding, staffing, and providing texts and materials for inservice training are offered. Learning activities for students include writing biographies of local people 65 years or older, role playing elderly people, compiling booklets which depict old people favorably, and using popular songs which depict aging. Sample teaching units for grades four through 12, evaluation methods, and reference materials are provided in appendices. (KC)

Mediating Social Conflict: A Ford Foundation Report.

Ford Foundation, New York, N.Y.
Pub Date-Oct 78
Note-33p.; Photographs throughout document may not reproduce clearly
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Activism, Adult Education, Attitudes, Case Studies, Community Problems, *Conflict, *Conflict Resolution, *Decision Making, Educational Programs, Interpersonal Relationship, *Problem Solving, *Productive Thinking, Professional Training, Program Descriptions, Skill Development, *Social Problems, Success Factors

Third-party intervention is increasingly recognized as an effective means of settling social, institutional, community, and interpersonal disputes. Traditionally, mediation efforts have been directed toward conflicts involving labor/management relations. Since the 1960s, however, mediation efforts have also been applied to situations involving social disputes, environmental disputes, racial protests, and criminal and civil offense cases. Examples of mediation efforts which have been assisted since 1968 by the Ford Foundation include a racial/public disorder early warning system in Florida; housing disputes in New York, San Francisco, and Cleveland; demands of Puerto Rican activists for a day care center; Indian occupation of parkland in upstate New York; school desegregation in Boston; confrontations at various colleges and universities; and a struggle between black and Puerto Rican communities in New York for control of an antipoverty program. Programs to train people in conflict resolution techniques are sponsored by numerous groups including the American Arbitration Association, the Justice Resource Institute, and better business bureaus. Descriptors-Access to Education, Colonial History (United States), Curriculum, Educational Change, *Educational Development, *Educational History, *Educational Philosophy, Educational Practice, Higher Education, *Political Influences, Secondary Education, Social Class, *Socioeconomic Influences, United States History

This paper traces the development and contributions of the American academy, a type of school designed to serve the needs of the middle class by including subjects other than college preparation. The three types of 17th century American schools which existed prior to the academy are described: the petty or dame school, the writing school, and the Latin grammar school for the wealthy. The decline of the Latin school in the 18th century was a result of diminishing influence by European traditions and customs and an increasing democratic consciousness. Benjamin Franklin founded the academy system in 1749; it was comprised of three schools, Latin, English, and mathematical, with emphases on the practical applications of science, agriculture, commerce, and industry. By 1800 many academies had been instituted and the movement spread to the West Indies as a result of missionary and educational efforts. The academy system influenced the scope of courses offered in the universities and encouraged the education of girls. Some of its graduates became the best-educated teachers hired by elementary schools. Finally, the academy clearly marked a transition from the aristocratic Latin grammar school to the more democratic high school. (KC)

Putting Social Indicators to Work: An Annotated Bibliography.
California State Office of Planning and Research, Sacramento.
Spons Agency-Department of Health, Education, and Welfare, Washington, D.C.
Pub Date-Apr 77
Note-74p.; Certain pages may not reproduce clearly due to fading ink throughout original document
EDRS Price MF-$0.83 HC-$3.50 Plus Postage.
Descriptors-*Annotated Bibliographies, Living Standards, *Regional Characteristics, Social Characteristics, *Social Indicators, Social Science Research, Tables (Data), Trend Analysis

This bibliography identifies 134 resources about the use of social indicators in national, state, county, and city profiles. Most of the reports describe projects which (1) used a profile approach (presented a comprehensive view of an area by drawing together information on housing, crime, education, income, and employment), (2) had a policy focus (were concerned with needs and conditions rather than with numbers of people served by various programs), or (3) used social and economic indicators in a broadly defined sense (limited data to key items of information which are indicative of conditions in an area). The first two sections present citations of projects undertaken at national and state levels. Sections three and four present citations of local projects within California and in other states. Section five identifies organizations involved in research on the application of social indicators. An index gives charts showing the following characteristics of the reports in the bibliography: level of aggregation of the data, time period covered, type of analysis, type of data used, and type of data display. Values Education and the Emergence of a ``New Pedagogy'' in the Humanities and Social Sciences.

Pub Date-Oct 78
Note-43p.; Paper presented at the World Future Society Meeting (Houston, Texas, October 20-22, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Beliefs, Educational Change, Educational Philosophy, Educational Practice, Educational Problems, *Educational Psychology, *Educational Trends, Elementary Secondary Education, Futures (of Society), *Humanities, Interdisciplinary Approach, Literature Reviews, Personal Values, Self Concept, Social Change, *Social Sciences, Sociocultural Patterns, Student Motivation, Teaching Methods, Theories, *Values

Humanities and social science education are increasingly influenced by controversy over different conceptions of scientific thinking. The basic conflict is between those who view science as being objectively based and those who see scientific work as being based upon personal and societal variants such as values, feelings, and needs. The debate between value-free and value-laden research has been particularly strong in fields of social science, the humanities, and education. A growing body of writers is demanding that the educational system concern itself with social and economic problems. For example, Willis Harman suggests in his book, ``Alternative Futures and Educational Policies,'' that educational policy must be totally reevaluated. Victor Ferkiss suggests in ``The Future of Technological Civilization'' that a new type of ecological humanism is necessary for human survival. Several theories which have been developed to help educators transmit values emphasize morale building and leadership skills, belief in the relativity of values, individualism, and the conviction that values are formed by interaction of an individual with the environment. Several moral reasoning approaches based on these theories are widely used in schools, including values clarification, Kohlberg's theory of moral development, the Allen Environmental-Moral Reasoning Model, and the Coombs-Meux Moral Reasoning Model. The conclusion is that educational pedagogy will become increasingly value-based in the future. It is recommended, consequently, that educators use values education to help students choose between positive values and useless cultural traditions which impede development. (DB)

A Sense of Courage.

Pub Date-6 Oct 78

Note-27p.; Paper presented at South Atlantic Philosophy of Education Society Conference (Columbia, South Carolina, October 6, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-*Authoritarianism, Behavioral Sciences, Behavior Theories, Civil Liberties, Conflict, Conventional Instruction, Dissent, *Divergent Thinking, Dogmatism, Educational Accountability, *Educational Attitudes, *Educational Philosophy, Educational Policy, Educational Practice, Educational Problems, *Educational Theories, Elementary Secondary Education, Higher Education, Humanistic Education, Humanization, Intellectual History, Learning Theories, Performance Based Education, Performance Based Teacher Education, Policy Formation, Programed Instruction, Social Studies, Student Responsibility, *Teacher Responsibility, Trend Analysis

The history of the United States is one of the contradictory traditions of human rights and intolerance. Although human rights, diversity, and dissidence are inherent concepts in our constitution and in the Supreme Court system, this tendency has been invariably accompanied by intolerant uses of power. The Salem witchcraft trials, the Alien and Sedition Acts, 19th century immigration laws, and the 20th century McCarthy era are the more obvious expressions of intellectual and cultural intolerance. Present manifestations of this tradition in the realm of education are more subtle. Current attitudes in areas of educational accountability, research, policy making, and instruction give priority to empirical research, knowledge objectification, and deterministic theories of human behavior. In one school district which has contracted with a highly structured and sequenced educational program, teachers are required to sign a three-year contract pledging loyalty to the program; if they do not, they are subject to transfer. These intolerant trends prompt the author to conclude that educational philosophers must exemplify the courage of intellectual inquiry, develop a sense of ethical responsibility within students, and draw attention to the ideological ramifications behind policy decisions. This study explored competition and styles of research in the fields of education, political science, sociology, and psychology. The paper is based on a theory which considers science as a competitive activity. Basic, non-applied, experimental, and ``high qualitative'' research styles are considered more advantageous to competition because (1) they enable researchers to work simultaneously in the same area without fear of duplication, (2) they provide a more easily inspected criterion of accomplishment, (3) they create conditions promoting specialization, and (4) basic research is free from practical demands. Researchers favoring this style are more likely to describe themselves as ``scholars'' and ``scientists.'' Researchers favoring the disadvantageous styles of non-basic, applied, theoretical, ``soft'' research tend to describe themselves as ``teachers.'' Researchers who combine both styles tend to describe themselves either as ``professionals'' or ``intellectuals.'' A conclusion is that differentiation among researchers based on advantages in competition of their styles of research is paralleled by a differentiation among scientific self-images. (Author/KC)

These papers by four social scientists were prepared for a conference to analyze the current absence of a value consensus in American life and to examine grounds for a consensus. Further, the contribution of education and the media to the shaping and dissemination of values is explored. Kenneth Boulding contends that underlying moral diversity is a ``constitutional consensus,'' or agreement about the legitimacy of processes by which differing values are coordinated. A greater tolerance of diversity develops as the constitutional consensus becomes more secure. Robert N. Bellah suggests that the dominance of ``liberal individualism'' accounts for the current loss of moral consensus. Marvin Bressler examines the role of the university and notes that the components of scholarly investigation (integrity, open-mindedness, humility, communalism, accountability) may aid in defining the moral functions of undergraduate education. William Miller points out the all-pervasiveness of television, which is not morally neutral, but rather an ``enormously powerful phenomenon. . . about which society needs to make conscious social decisions.'' He emphasizes that the primary purpose of television is to deliver people to advertisers and that content is a secondary consideration. Miller concludes, however, that television justifies itself in its coverage of public events. A summary of discussions following the speeches is included. (KC)

Descriptors-Abstract Reasoning, Aesthetic Education, *Art Expression, Childrens Art, Composition (Literary), Creative Ability, Creative Development, Creative Thinking, *Creativity Research, *Critical Thinking, Developmental Stages, Early Childhood Education, Elementary Secondary Education, *Literature Reviews, Media Research, Poetry, Poets, Postsecondary Education, Productive Thinking, *Skill Development, *Symbolic Learning, Television Research

This report reviews major theoretical and empirical studies concerning the process of creativity and the skills involved in creating art. Part I describes process studies with adult subjects engaged in activities such as poetry writing, editing, and critiquing a poem. Ten amateur and ten professional poets were subjects. These studies analyzed the poets' thought process; writing process; characteristics of critical appraisal; and personal backgrounds, attitudes, and practices. Competence, sources of critical disagreement, difficulties in critical judgment, and errors in reasoning are also examined. Part II, Studies of Central Components in the Arts, comprises four sections which examine the way in which major symbol-using capacities develop in children aged 12 months to 19 years. The first, most extensive, section reviews studies on the development of skills deemed central to the arts, such as metaphoric competency, style sensitivity, and the emergence of critical skills. The second section reports studies of breakdowns of symbolic competence under certain conditions of brain damage. The third section focuses on the full range of symbolic systems rather than just those in the arts, and is concerned with the nature of symbolic media such as television. The last section, which is directed at the educational community, presents conclusions from a number of more general inquiries on aesthetic development and education. (KC)

Descriptors-*Comparative Analysis, *Ethnic Distribution, *Ethnic Groups, *Ethnic Status, Literature Reviews, *Measurement Techniques, Power Structure, Social Relations, Social Science Research, *Social Studies, Socioeconomic Status

This paper argues that ethnic status is a source of inequality conceptually independent from social class status. Many parallels exist between the development of measures and concepts for social class inequality and for ethnic inequality. Three measures of ethnic rank described in this paper correspond to dimensions of power, prestige, and wealth which have been used previously in measuring social inequality. By using three measures of ethnic rank, it is possible to compare the situation of identical ethnic groups in different countries and to compare different societies in relation to the amount of ethnic inequality within them. (1) Demographic characteristics of ethnic groups can be added to the measurement of ethnic social standing which is directly analagous to occupational prestige. These predictors estimate the social standings of ethnic groups within a particular country. (2) A power dimension can measure whether various ethnic groups are represented in institutions to the same degree that they are represented in the population served by that institution. (3) Payoff'' tables can measure the extent to which members of different ethnic groups are rewarded, either by income or occupational prestige, for equivalent performance. Finally, the amount of inequality within a society may be measured by applying an index of income inequality using the total income of each individual ethnic group. Using these measures, the authors calculate and compare social class inequality and ethnic inequality in Israel and Quebec. (KC)

Feminism and Patriarchy: Competing Ways of Doing Social Science.

Pub Date-78
Note-15p.; Paper presented at Annual Meeting of the American Sociological Association (San Francisco, California, September 4-8, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Cultural Context, Data Analysis, Data Collection, *Feminism, Information Needs, Knowledge Level, Literature Reviews, Relationship, Researchers, *Research Methodology, *Research Needs, Research Problems, *Sex Stereotypes, Socialization, Social Psychology, *Social Science Research, Sociocultural Patterns, Sociology

A social scientist's perception of subject matter is similar to an individual's perception of reality in that both are set within a cultural context composed of factors such as common sense and scientific fact. Variations in ways of thinking have particular ramifications for feminist scholarship. For example, understanding the importance of irrationality in the conduct of science and social science can increase concern with consciousness as a factor in social research and can encourage comparison between competing social science paradigms. To counteract the prevalence of theories which create models for man which in turn generate and verify knowledge about man and male society, women researchers are attempting to reverse the male-is-normal thesis. Feminist scholarship has evolved from an initial stage of imitation of male scholarship through a stage of protest and has arrived at a stage of exploring the feminist experience through innovative methodologies. The conclusion is that thorough analysis of the consequences of gender class membership and its effects by feminist scholars may well result in a more universal and more integrated social science. Identifiers-Africa, Germany

The report presents background information and proceedings from a conference held in Bonn, Germany, in September 1977 to encourage exchange of ideas between African and German educators and government officials. Specifically, the conference served to document the increasing interest of German educators to interact with educators from the third world, to afford insight into German educational aid programs, and to suggest possibilities for cooperative research activities. The proceedings are presented in five sections. Section I explains objectives of the conference. Section II provides an overview of the meeting, identifies major problems of educational aid and joint research, summarizes discussions of plenary and joint sessions, and identifies positive results of the conference. Section III presents a paper in which Dietrich Goldschmidt of the Max Planck Institute for Educational Research in Berlin outlined prerequisites for cooperation in cross-national educational research and planning. Section IV presents a design for a correspondence course in curriculum development. The document concludes with appendices which present a conference program outline, list of conference participants, and a bibliography. (DB)

The Myth of Time.

Pub Date-Nov 78
Note-14p.; Paper presented at Annual Meeting of the National Council for the Social Studies (Houston, Texas, November 22-25, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Concept Formation, Concept Teaching, Creativity, Current Events, Educational Methods, Educational Practice, *Fundamental Concepts, Relativity, Scientific Concepts, Secondary Education, *Social Studies, Teaching Procedures, Thought Processes, *Time

This paper offers a variety of approaches to teaching the concept of time. Many social studies courses traditionally emphasize time as measured by clocks and as useful for recording when events occur in relation to each other. In addition to this approach, the author suggests that students should reflect upon four other modes of time. These are concepts of time as present, as past, as perspective, and as simultaneity and succession. A number of techniques can be used to illustrate these modes. Present, or short-term time, can be understood by focusing on specific activities of the moment. Comparisons of various reports of the same current event may be made. Although calendars, diaries, and time lines usually illustrate long-term time, biological interpretations of past time can be more personal. Students may chart their own or some other person's biorhythm, which is the innate cycle of physical, emotional, and cognitive rhythms. To direct thinking toward the problem of time as perspective, case studies of cultural concepts of time and creation are effective. Time as simultaneity and succession is imaginative time; it is the time in which events occur at the same time. Life studies, interviewing people about their concept of time, and examining allusions to time in literature provide understanding of imaginative time. Such transformations of student understanding result in the knowledge that time is a subjective concept and that individuals are the true source of time concepts. (KC)

Reflections on Developing Democratic Citizens.

Pub Date- 79
Note-18p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Behavioral Objectives, *Beliefs, Changing Attitudes, *Citizenship, Citizenship Responsibility, Civic Belief, Cognitive Objectives, Cultural Awareness, *Democratic Values, *Educational Needs, Educational Objectives, *Educational Philosophy, Elementary Secondary Education, Futures (of Society), Government Role, Higher Education, Literature Reviews, Political Issues, *Social Change, Social Influences, Social Responsibility, Social Studies

Social change in the United States has prompted frequent observations that civic values, attitudes, and conduct are in a state of disrepair. One of the most often mentioned solutions to this problem is a resurgence of informed civic responsibility. A responsible citizen of a democratic society is interpreted as one who believes in the worth of the individual, the principle of freedom, and government by elected representatives. Behaviors of a responsible citizen include voluntary restraint of self interest when it conflicts with the common interest, resisting perversions of political power, working for elevation of qualified people to public office, and supporting passage of just and fair laws and policies. Several educational approaches can be taken to promote the development of citizens imbued with knowledge and commitment to democratic values. These approaches include discussing openly totalitarian regimes without denigrating the peoples or cultural achievements of any nation, practicing democratic values in schools, accepting the inherent limitations and failures of democratic institutions, stimulating interest in political philosophy, and studying life stories of individuals who exemplify the authentic spirit of democracy. Hepburn, Mary A.

Civic Education: Minding Our Goals and Objectives.

Pub Date-20 Oct 78
Note-8p.; Paper presented at Annual Meeting of the National Council for the Social Studies (Houston, Texas, November 22-25, 1978)
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Behavioral Objectives, Citizen Participation, *Citizenship, Citizenship Responsibility, Democratic Values, Educational Objectives, *Educational Trends, Elementary Secondary Education, *Performance Based Education, Political Attitudes, Political Socialization, School Environment, *Skill Development, Social Attitudes, Socialization, Social Studies

The late 1970s can be characterized as an era of practical concerns in civic education. There is a trend toward useful applied learning which can be evaluated by the actions or skills it produces. Current civic education programs are similar to curriculum reform efforts of the 1930s in that they are committed to educating citizens to function effectively in the political world. However, today's projects have specific civic performance outcomes, such as registering vote, serving on a jury, obtaining a driver's license, and circulating a petition. Such practical skills are useful, but they alone do not assure effective democratic citizenship. Practical skills must be related to an understanding of democratic philosophy and political and social knowledge. Unfortunately, the current emphasis on action is evident even in the way that intellectual goals are defined. Civic knowledge in its current mode of practicality must be quantitatively assessable by school administrators, state department evaluators, and local and state taxpayers. The author recommends that the learning of intellectual and participatory skills should be generated from the school environment. By studying the structure of authority within the school and the social-political milieu of school clubs and classes, students can gain an understanding of political relationships and develop a sense of public interest. Identifiers-*Romania

An overview of the educational system of Romania is presented in this pamphlet. The system consists of preschool education in kindergartens; ten years of compulsory general education divided into three cycles (primary, gymnasium, and lyceum or vocational education); one to two years of post secondary specialized education; and higher education in universities, institutes, academies, and conservatories. A number of specialized institutions also provide instruction for adults, art students, the handicapped, and Party cadres. Tuition is free at all levels. Romanian is the language of instruction throughout the country, although the Constitution also provides for education in the languages of national minorities. Student achievement is evaluated on the basis of classroom performance, oral and written examinations, and general behavior. Educational policies are formulated by the central executive organs of the Communist Party and are implemented primarily by state and other governmental organizations. The Ministry of Education normally formulates rules and regulations underlying the educational process for all levels and types of education. Recent developments include an emphasis on adaptation to technological changes through better trained professional manpower in engineering, chemistry, economics, and other fields. (Author/AV)

This monograph explores aspects of science and technology in contemporary society and suggests methods for teaching about social policy issues which have resulted from scientific and technological developments. Section one offers an argument for teaching about science and social policy; surveys the sociology, politics, and history of contemporary science and technology; and identifies methodological problems in teaching about science and social policy. Included is a discussion of six general learning objectives which should be met in a study of science and social policy. The objectives include understanding the (1) role of citizen participation in policymaking, (2) extent to which scientific and technological developments can change people's lives, (3) ways in which laymen depend upon experts' knowledge, and (4) importance of translating personal values into participative action. Section two presents social studies units on nuclear energy, electronic technology, and genetic engineering. Each unit includes expository reading material, learning activities, and reading lists. Identifiers-Information Analysis Products

The document reviews geography concepts and skills which elementary school children can learn in geography lessons. The study is based on research and evaluation studies with empirical test results and on anecdotal reports of what children have learned. The document is presented in four chapters. Chapter I describes the organization of the study. Chapter II focuses on testing children's basic map knowledge and skills before and after geography instruction. Findings indicate that elementary school children benefit from sequential programs of accelerated instruction in map skills. Chapter III reviews children's conceptual and analytical processes, including vocabulary, reading in geography, and general geographic knowledge. Information is also presented on curriculum evaluation research, sequencing geographic skills, and anecdotal accounts of geography for young learners. The final chapter presents conclusions: children can learn what teachers set out to teach, operate at a much higher conceptual level than is generally believed, and demonstrate aptitude for learning geographic concepts if they are given the opportunity. Materials developed by high school anthropology students to investigate and explain American culture are presented. The purpose of the handbook is to aid social studies classroom teachers as they develop and implement educational programs on the American way of life within the context of global culture. The activities presented in the handbook can be conducted inexpensively within most school and community settings. The 38 topics are grouped into four major areas of investigation: (1) cultural values and belief systems, (2) social and political organization, (3) language and communication, and (4) economic systems. Each concept area is introduced by a brief overview. For each topic, information is presented on focus, teaching procedures, and feedback. Topics include American sports behavior, commercialization of American celebrations, cultural ideas of behavior in various types of restaurants, body language, group membership, consumption of luxury items, and cultural definitions of right and wrong. Activities involve students in interviewing family and community members, observing behavior in fast food and gourmet restaurants, collecting recyclable material, drawing sociograms, conducting library projects, doing map exercises, debating, and maintaining logs of daily activities. Identifiers-Europe (West)

The booklet presents a synopsis of reports on national cultural policies by government officials of nations belonging to the Council of Europe. The main purpose of the document is to provide an overview of institutional facilities, financial resources, and goals of cultural policy. The document is presented in five major sections. Section I examines conflicts of interest between centralized administration of cultural affairs and the move to disperse institutional control among various local and regional units and governmental agencies. Section II explores formulation, aims, and resources of cultural policy in European nations. Section III focuses on conserving cultural heritage through archives and museums and fostering creativity in music, film, dance, opera, and architecture. Section IV discusses aid to creative artists in the form of guaranteed incomes, subsidies, and welfare payments. The final section describes movements in European nations to enable members of all social classes to become consumers of cultural services. Concluding comments emphasize the discrepancy between increasing public awareness of cultural problems and the lack of corresponding change in cultural policy. It is recommended that the increased interest in cultural policy and intensified demands for cultural opportunities be accompanied by a corresponding increase in resources. (DB)

Identifiers-Poland

Polish folk high schools are modeled after schools developed in the mid-1850s in Denmark to provide general, non-credit education for young adults in rural areas. The main objectives of the folk high schools are to provide a climate for individual student development and to serve as centers where young adults can learn about their cultural heritage. The first Polish folk high school was established in 1900. The folk high school movement developed and prospered along with the growing social consciousness and national awakening which characterized Poland up to World War I. Between the world wars, the folk high school movement was dominated by agricultural expert Ignacy Solarz. Solarz established and directed numerous folk high schools throughout Poland which endeavored to help young peasants become cultural and social forces in their communities. Political and ideological struggles in Poland after World War II resulted in closing most folk high schools. By 1958, however, changes in the ideological climate of East Europe encouraged the Central Committee of the Polish United Workers Party to reassess its position on cultural and educational matters and made it possible to reestablish the folk high schools. By the 1970s, the folk high schools have again become viable institutions which train young adults from rural areas to become social, vocational, and cultural leaders in their villages. (DB)

Teaching methods and learning activities are suggested to help youth develop value-decision skills and have positive growth experiences in value-exploration groups. The document is intended for use by staff of youth and family organizations as they develop values education workshops. The document is presented in six chapters. Chapter 1

introduces values education and explains how leaders of youth and family organizations can use teaching techniques described in the document. Chapter II discusses basic values education concepts, including values, valuing, values clarification and analysis, and values commitment. Chapter III emphasizes the importance of creating a supportive atmosphere when teaching about values. Chapter IV presents teaching strategies and learning activities to help individuals explore thoughts and feelings about values, make value choices, link values to actions, and share individual values with the group. Activities involve participants in group discussions, learning games, writing exercises, filling in worksheets, drawing pictures and symbols, role playing, and interviewing other group members. Chapter V suggests ways to plan a values education training session. The final chapter lists publishers who produce values education materials. (DB)

This document reports on a workshop which examined issues involved in psychoeducational assessment of non-English-speaking pupils. Attended by educators and psychologists, the workshop was held during June 1977 in Albany, New York. The major objective of the workshop was to provide assistance to school districts as they develop assessment methods which will guarantee protection of students when they are being evaluated. This protection is required by New York state legislation (Public Law 94-142). Six major conference papers are presented in the document. Topics discussed include the possibility of eventually achieving non-biased assessment, non-verbal communication among Puerto Ricans, a task analysis approach to assessing children of multicultural backgrounds, teacher/student relations in bicultural situations, African religions in the Caribbean, problems of bilingual Hispanic students, and environmental influences on educational achievement. A directory of participants and a colloquium agenda are included in the document. (DB)

Identifiers-Georgia

Growing emphasis on improving citizenship education at the local school system level is promoting projects which are smaller in size and cost, broader in objectives, and which motivate learning by focusing on local issues. This gradual shift from national curriculum reform programs is a result of the realization that students lack basic knowledge of state government and are deficient in citizenship skills, and that people prefer to be involved in local issues where they may have an impact. Increased funding from state and local agencies is another factor for increasing local curriculum programs. The newer citizenship education projects involve students, teachers, administrators, social science educators, and other university specialists in curriculum change. A case in point is the Title IV project in Georgia designed to define sequential citizenship skills, knowledge, and values objectives and to implement a program involving school and community groups in developing, reviewing, revising, and carrying out the objectives. Goals of the Georgia project are concerned with students' understanding of (1) the responsibilities of U.S. citizenship, (2) the role of the individual in the political decision-making process, (3) principles of individual rights, and (4) knowledge of current public issues and the skills for evaluating alternative choices. A committee of community leaders, state and local government officials, and interested citizens serves as an advisory and review board. (KC)

Identifiers-Africa (East), Australia, Canada, Europe, Japan, New Zealand, United States, USSR

This report reviews the problems of protecting nature in a heavily industrialized democracy such as the United States. Factors contributing to the establishment of protected areas in the United States are traced from the creation of Yellowstone National Park in 1872 to the present. Arguments in defense of wilderness areas consider nature as: (1) a reservoir of normal ecological processes, (2) a sustainer of biological diversity, (3) a formative influence on the national character, (4) a church, (5) a guardian of mental health, and (6) an educational asset in developing environmental responsibility. Diverse agencies, programs, and efforts exist at all levels. The National Park Service, the United States Forest Service, the Bureau of Land Management, and the National Wilderness Preservation System function on the federal level. Coastal zone management and land use laws protect natural areas on the state level, city and county parks serve as protected areas on local levels, and private organizations such as the Sierra Club also contribute to wilderness preservation. Problems arise from the conflict between economic development and nature preservation, and the popularity of nature areas which leads to their destruction. Programs in Japan, Australia, New Zealand, East Africa, Europe, the Soviet Union, and Canada are also described. (KC)

Descriptors-Agricultural Skills, Agricultural Trends, Conceptual Schemes, Cooperation, *Developing Nations, Economic Development, *Economic Disadvantagement, *Food, *Futures (of Society), *Global Approach, Government Role, Health Needs, Hunger, Needs Assessment, Nutrition, Population Growth, Productivity, Quality of Life, Research Needs, Tables (Data), Technical Assistance, *World Problems

Dimensions of the deteriorating world food situation are examined. Prepared for the congressional Subcommittee on Science Research and Technology and the Subcommittee on Domestic and International Scientific Planning and Analysis, the document focuses on the need to improve living standards of the rural poor in developing nations. The document is presented in nine sections. Section I presents an overview of agricultural development in poor nations and calls for worldwide cooperation to increase prosperity. Section II evaluates attempts to solve world food problems through synthetic foods, mechanized farming, and increased food production in the United States. Section III outlines a strategy to increase food production by introducing farmers to modern methods and providing financial assistance. Sections IV and V characterize economic needs and aspirations of developing nations. Section VI outlines agricultural research needs. Section VII reviews national and international programs dealing with agricultural research and development. Section VIII suggests how the United States can improve its agricultural research efforts. The final section concludes that hunger and poverty can be effectively reduced through technological and financial cooperation between developing and developed nations. (DB)

Descriptors-Air Pollution Control, Case Studies, Conference Reports, *Conservation (Environment), *Cooperation, Depleted Resources, *Environmental Influences, *Global Approach, Natural Resources, *Physical Environment, *Quality of Life, Regional Cooperation, Wastes, Water Pollution Control

The proceedings of a conference on international environmental monitoring is presented, along with a commentary, reports from activity groups, and appended tabular information. Major objectives of the 25 participants from international organizations, national governments, and research institutions were to review accomplishments in global and regional monitoring since 1972, reevaluate international monitoring needs, and provide guidance to the Rockefeller Foundation in supporting international environmental monitoring efforts. An overview of systems which monitor environmental quality is provided by Ralph W. Richardson, Jr., of the Rockefeller Foundation. A report by Martin Holgate (Department of the Environment, England) identifies major topics of concern related to environmental assessment, including environmental policy, costs of environmental monitoring, deciding what to monitor, and uses of monitoring data. Two papers by Brian Martin and Frances Sella (Global Monitoring System, Nairobi, Kenya) discuss global monitoring activities. The remaining papers are concerned with lead monitoring in Finland (Sven Hernberg, Institute of Occupational Health, Helsinki), rangeland resources in Kenya (David Western, University of Nairobi), monitoring organisms in coastal waters (Edward Goldberg, Scripps Institution of Oceanography, La Jolla, California), ozone networks (R.E. Munn, Interenvironmental Research Branch, Canada), and mercury monitoring in Sweden (T. Westermark, Royal Institute of Technology, Stockholm, Sweden). A directory of conference participants is included. (DB)

Identifiers-*Virgin Islands

This report reviews the legal status of female homemakers in the Virgin Islands and makes suggestions for action and legislation which will be more equitable in protecting homemakers' rights. The laws described in the report apply to wives who work at home as well as outside the home, but the report mainly concerns homemakers without outside employment because they are the most vulnerable to economic inequalities. The bulk of the report explains specific laws and situations which frequently arise in the following areas: (1) marriage tort and contract rights and liabilities of the wife, the wife's right to consortium, and rape; (2) widowhood U.S. Virgin Islands inheritance and gift tax, and planning opportunities; (3) divorce custody of children, award of alimony, support of relations, procedure for collecting support, tax aspects concerning divorce and separation, and property settlement; (4) guardianship; (5) home ownership; (6) public housing; (7) physical abuse procedure followed upon report of physical abuse, and proposed avenues to aid the abused female. A concluding section outlines recommendations for legislative changes involving estate laws, social security coverage, inheritance rights, and state help in collecting child support payments for families not on welfare. The document contains papers presented at a conference on global population trends. Conference participants, who represented international agencies and governments in developing nations, investigated social determinants of population trends, population policy, and population program assistance. Eleven papers are presented. Topics discussed include status of population development, sociopolitical implications of family planning, population agency activities, social research and population policy, medical developments in the field of contraception, collection and analysis of demographic data, and population education programs. A summary of conference proceedings indicates that population problems are (1) closely related to each nation's development process, (2) more complex than is generally understood, (3) best understood by scholars in countries where problems are most severe, and (4) in need of more social research. Descriptors-Birth Rate, Contraception, Cross Cultural Studies, Data Analysis, Demography, Developed Nations, Developing Nations, Economic Development, Family Planning, *Futures (of Society), *Global Approach, Government Role, Health Needs, *Needs Assessment, Policy Formation, Population Education, *Population Growth, *Problem Solving, Reproduction (Biology), Research Needs, Social Problems, Social Science Research, Sociocultural Patterns, World Problems

The document contains papers presented at a meeting to consider global population growth. The purpose of the conference was to promote the exchange of ideas relating to population growth between educators, government officials, and development agency personnel from developing and developed nations. Ten papers are presented. Topics discussed include ways to implement global population policies, social science research on population and development, progress toward new contraceptives, reproduction research, the role of international assistance agencies in family planning, trends in international population assistance, and international population policy. A summary of conference proceedings highlights findings. These include that the field of population studies is changing rapidly, there is more awareness of population problems in the developing world, experts are increasingly convinced that population problems are closely related to development, developing nations are beginning to increase funds for population research, and both developing and developed nations are experiencing a sense of urgency in coping with population problems. Humanistic and Behavioristic Teachers on the Precollege Level: A Second Report on the Non-Existent Differences Between Them.

Pub Date-22 Nov 78

Note-17p.; Paper presented at Annual Meeting of the National Council for the Social Studies (Houston, Texas, November 22, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Comparative Analysis, Course Content, Course Objectives, *Differences, *Psychology, Secondary Education, Social Science Research, Tables (Data), *Teacher Background, Teachers, *Teaching Methods

This paper reports on a study which compared the background and teaching methodology of high school psychology teachers who label their courses either ``humanistic'' or ``behavioristic.'' A sample of 154 humanistic and 119 behavioristic psychology teachers in Illinois provided data about variables including extent and kinds of professional and academic training they had received; make-up of the high school psychology classes they currently taught; objectives, content, and teaching methodologies of their classes; and types of audiovisual materials they preferred. Of a total of 114 variables examined, the teachers differed on only 14 variables. These data are very similar to results of previous studies in other states. Conclusions are that secondary school psychology teachers have articulated no clear framework for distinguishing between humanistic and behavioristic principles or methods. Another conclusion might be that teachers seek labels for their courses that are most comfortable for themselves or that they believe their schools' administration would most accept. (Author/AV)

Review of Research in Curriculum.

Pub Date- 77

Note-10p.; Paper presented at Annual Meeting of the Northeast Educational Research Association (Ellenville, New York, October 26-28, 1977)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Behavioral Sciences, Changing Attitudes, Community Attitudes, Comparative Analysis, *Curriculum Development, *Curriculum Problems, *Curriculum Research, *Literature Reviews, Philosophy, Relevance (Education), Research Methodology, Research Needs, Research Problems, *State of the Art Reviews, Trend Analysis

This paper examines research concerned with the definition, development, and effects of curriculum. Ten aspects of current curriculum scholarship are examined. The first three (the state of the field, the scope of the field, and the revolt against scientism and rationality) concern curriculum study as a whole. Despite the assessment that the field of curriculum research is dying (Schawb, 1969; Heubner, 1976), the author contends that two scholarly journals, ``Journal of Curriculum Studies'' and ``Curriculum Network,'' are signs of current vigor. However, the scope of the field may be too broad and may suffer from lack of focus. Recently, 19 types of studies which may be considered as curriculum research have been identified (Posner, 1976). Debates concerning the definition of terms and clarification of concepts also exist. The current revolt against rationality and empiricism is aimed at social scientists who use the behavior of human beings as objects of study. The author points out that the object of curriculum research is to be as rational as possible in investigating how various factors manifest themselves and interact in curriculum studies. Historical and comparative studies, an analysis of ``educational language,'' and new philosophical approaches are reviewed. The author concludes that although scholarly activity in the field is diverse, little in the way of a validated knowledge base for curriculum selection and organization exists. (KC)

Pedestrian Safety A Step in the Right Direction.

New York State Education Dept., Albany. Bureau of General Education Curriculum Development.

Note-124p.

EDRS Price MF-$0.83 HC-$6.01 Plus Postage.

Descriptors-Art, *Curriculum Development, Educational Objectives, Elementary Secondary Education, Evaluation Methods, *Interdisciplinary Approach, Language Arts, Learning Activities, *Pedestrian Traffic, *Safety Education, *Social Studies, Teaching Guides, Traffic Circulation, Traffic Safety, Traffic Signs

This guide contains interdisciplinary teaching materials to help administrators and teachers develop pedestrian safety programs. The materials can be easily integrated with language arts, art, and social studies courses. Objectives of the materials, which can be used in kindergarten through grade nine, include understanding pedestrians' rights and responsibilities, being alert to danger at all times, realizing that emotions and drugs can modify reactions to traffic hazards, and understanding that safety depends upon awareness, caution, and sensible behavior. The materials are presented in ten units. Each unit contains a pretest, key thoughts, learning activities, a lesson planning guide, evaluation materials, and a posttest. Content includes basic rights and responsibilities of pedestrains, importance of being clearly visible, effects of being emotionally preoccupied, rules of traffic control, dangers of intersections and traffic routes, bicycles and dogs, school buses, misconceptions about vehicle drivers always being alert, dangerous effects of drugs and medicines, and hitch-hiking. The guide concludes with lists of related resource materials. (AV)

Culture and Development: From Romantic Relativism to Reality.

Pub Date-Nov 78
Note-22p.; Paper presented at the Second National Conference on the Third World (Omaha, Nebraska, November 16-18, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Changing Attitudes, Cultural Background, Cultural Differences, *Cultural Factors, *Cultural Interrelationships, Cultural Traits, *Culture Conflict, Developed Nations, *Developing Nations, Ethical Values, Futures (of Society), Industrialization, Non Western Civilization, Quality of Life, Social Exchange Theory, Social Values, Sociocultural Patterns, *Technological Advancement, *Theories, Western Civilization, World Problems
Identifiers-Africa (West), Appalachia

Using case studies of French-speaking West Africa and Southern Appalachia, this paper examines the role of traditional culture in developing regions by challenging current theories on that subject. The capitalistic and Marxist approaches that dominated well into the 1960s maintained that elimination of traditional social relations and values was necessary for progress in underdeveloped areas. The strategy was to introduce modernizing influences which would transform local independence and self-sufficiency by integration into a market economy. Residents would internalize this perception and see progress in relation to urbanization. The romantic approach toward development which appeared in the 1960s and 1970s blamed external forces rather than native residents for the lack of development. This theory attributed underdevelopment to imperialist expansion by industrialized societies. However, it is important to note that underdevelopment would exist even without external exploitation. A synthesis of the capitalistic, Marxist, and romantic ideologies seems to be the best approach to understanding the relationship between traditional values and modernizing influences in developing areas. Balanced, humane development goals will be achieved by people who recognize, respect, and work with existing cultural values, but do not over-glamorize them. (Author/KC)

Identifiers-Arab States, China, India

Current trends in armaments and militarism in the third world countries must be assessed against a background of imperialism and in relation to the tendency to use nuclear power for peaceful ends and oil power for militaristic ends. Discussion of these factors with relation to China, India, and the Arab countries requires examination of militaristic attitudes and the activities of the International Atomic Energy Agency. The Arab world's discovery of oil power and subsequent formation of the Organization of Petroleum Exporting Countries (OPEC) are also discussed. It appears that interconnections among different sectors of policy exist along with interdependence among nations. The pursuit of disarmament or arms control cannot be separated from the struggle for equity in world politics. Since the power of the oil-producing nations is contributing toward a new world order, a new international military order becomes one precondition for a new international economic order. China's experimental rockets, India's nuclear devices, and the Arab consortium's arms industry may have to be placed alongside of OPEC as part of their total leverage if there is to be a change toward greater equity between developing and developed nations. Because nuclear capacity is linked with the third world's quest for dignity and power, some degree of proliferation may be the price for equality. (Author/KC)

Accepting the idea of food as a basic social right, the author examines how a global right to food might become a reality for the present generation of hungry people. The paper includes an analysis of the planet's physical capacity to assure food for all and suggests that development strategies will have to become more directly oriented toward meeting basic needs and creating new methods of growth. Also, third world countries will have to make major reorientations in both domestic and international relations. The links between the goals of increasing individual welfare and the desire for greater international justice are examined. The author suggests that an important step toward more equitable distribution of costs associated with meeting global food needs would be the creation of a shared foundation for dealing with the issues. This foundation would study problems such as the export of agricultural commodities by multinational corporations which may deprive people of the exporting country from food. (Author/KC)

Identifiers-Africa (South)

Presenting the view that global society is an apartheid system, this paper defines global apartheid, analyzes some of its most striking features, and suggests strategies to overcome its worst aspects. Apartheid occurs whenever a minority race dominates a majority of other races in a society; an example is South Africa. Global apartheid, then, is a structure in which (1) a minority of whites is affluent while a majority of other races is impoverished, (2) social integration is deterred by the barriers of skin color, economic position, and political boundaries, (3) economic development of the two groups is interdependent, and (4) the affluent white minority possesses a disproportionately large share of political, social, and military power. Statistics show that although two-thirds of the world's population is non-white and one-third is white, the predominately white nations, with the exception of Japan, are the richest in terms of gross national product. Life expectancy, weapons control, and violence are also proportionately related to global apartheid. The need for reform of such a system is urgent and necessary. Change will occur when the system is challenged from below by the majority of impoverished groups. This will disturb the status quo attitude of the white minority which continues to maintain apartheid at the cost of economic health and security, military security, liberty, and human growth for all people. Two social studies units highlight the origins and structure of government and the legislative activities of the United States government in particular. The units are part of a program designed to help 12th grade and adult education social studies teachers develop bilingual curriculum materials (English and Spanish languages) related to systems of government. The first unit, ``An Idea Becomes a Law,'' describes how laws are passed in a democracy, contrasts this process with the creation of laws in a dictatorship, and cites the variety of individuals involved in a bill's passage. The second unit, ``The State, Forms of Government, and Political Systems,'' explores the origins of government and provides examples of different types of government. For each unit, information is presented on background, primary idea, behavioral objectives, entry skills, and notes to the students about what they can expect to do and learn from working on the unit. Also presented for each unit are glossaries of political terms, tests, and answer keys. Students are involved in reading background material, answering essay and brief-answer questions in writing, filling in worksheets, taking true and false tests, and completing matching exercises. All materials are presented in both English and Spanish. (DB)

Forestry planning is essential if the global trend toward deforestation is to be reversed. World forest trends, although often based on inaccurate or misleading information put out by national governments, indicate that the area of land covered with closed forests has decreased from about 25% in 1950 to about 20% in the 1970s. Major causes of deforestation include logging, spread of agriculture, and collection of firewood. Among the economic consequences of uncontrolled deforestation are forest-product scarcity, rising dependence on imported forest products, increasing construction costs, inflation, soaring firewood and fuel prices, health deterioration due to lack of heat and warm food, shortage of paper, and increased flooding in watershed areas. Challenges facing world forestry include putting a halt to deforestation and meeting elementary fuel and wood needs of developing nations. Countries which have succeeded in reforesting their depleted areas include China and South Korea. In addition, other developing nations are beginning to recognize the urgent need for reform of forestry policies and are developing strategies to improve timber management practices. An example of a state which is experimenting with community forestry is Gujarat, India. (DB)

Identifiers-United States

This report analyzes data on population groups living in central cities, suburbs, and nonmetropolitan areas in 1977, and examines changes that have occurred since 1970. Subjects featured in the report are population, marital status, household relationship, family size, migration, educational attainment, labor force status, occupation, industry, income, and poverty. The bulk of the report contains tables of data for the white and black populations, and selected tables are given for the population of Spanish origin. Highlights of the report are summarized in an introductory section. The data indicate that the nation's metropolitan population grew by only four percent between 1970-77, but has not changed significantly since 1975. The population of central cities as a group declined from 1970-77, while the suburban population increased. [illegible] cities the number of young adults aged 25-34 increased, while the number of children under 14 years and adults aged 35-44 decreased. The black population in cities did not grow significantly between 1974-77, but the number of blacks living in suburbs increased by 34% during 1970-77. The labor force participation rate for suburban women began in the mid-1970s to exceed that for women living in cities. After adjusting for price increases between 1969-76, the median income of suburban families showed no change, the median income of city families declined slightly, and the median income for nonmetropolitan families showed a modest increase. The Anthropology of Dance. A Selected Bibliography.
Pub Date-78
Note-19p.; Revised edition
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Anthropology, *Bibliographies, Body Language, Communication
(Thought Transfer), Creativity, *Dance, Fine Arts, Motion, Music,

Symbolism
Over 250 monographs, journal articles, and papers are cited in this selected bibliography of resources on the anthropology of dance. Most of the entries were published during the 1960s and 1970s. Entries are arranged alphabetically by author and give information on title, publisher or journal, date, and page numbers. The bibliography is presented in ten major sections. Section one, General Theory relevant to the Study of Dance, contains subcategories of communication and semiotics, symbolism and ritual, aesthetics, creativity, and cognition, perception, and emotion. Section two on methods contains subcategories of movement notation and analytic units, and structural analyses of dance. Sections three through nine present citations on the following topics: conceptualizations of dance, reviews of dance study, aesthetics in dance, dance group dynamics and change, politics and dance, transcendance and dance, and symbolism. Section ten on interrelationships of the arts explores music, art, costume, and body decoration. The bibliography is not meant to be comprehensive or to include items of uniform quality. The material presented reflects the author's view of what dance researchers should be familiar with and what the field of the anthropology of dance should encompass. (AV)

Descriptors-Adult Education, *Bibliographies, Elementary Secondary Education, *Females, Higher Education, *Jews, Judaism, Life Style, Literature, Religion, Social History, Social Problems, Values, Womens Studies
Identifiers-Holocaust

This bibliography presents over 600 references to books, articles, essays, and journals which explore the history, values, problems, literature, and current life of Jewish women. The bibliography is designed to be used by researchers and teachers in Jewish and women's studies, sociology, history, and literature; by directors, workers, and members of Jewish organizations; and by general feminist organizations. Most of the citations were published during the 1960s and 1970s, although many of the historical entries were written earlier in the 20th century. The entries are presented alphabetically by author in nine categories: anthologies, history, religious life and law, Jewish women in the United States and Canada, in Israel, in the Holocaust and Resistance, other countries/miscellaneous, children's books, and poetry. Some entries are briefly annotated; all give information on title, publisher, and publication date. Content includes histories of Jewish pioneer women in America, accounts of the Holocaust, critiques of Judaism, and essays on contemporary issues of feminism and lesbianism. A concluding section lists relevant Jewish publications, non-Jewish publications, feminist publications, and independent publishers. (AV)

Guidelines for Art Education in Kentucky Schools K-12.

Kentucky State Dept. of Education, Frankfort. Div. of Program Development.
Pub Date-76
Note-81p.
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-*Art Appreciation, *Art Education, Creativity, *Curriculum Development, *Educational Objectives, Elementary Secondary Education, Guidelines, *Individual Development, *Learning Activities, Parent Role, Program Descriptions, Program Development, Program Evaluation, Skill Development, Student Attitudes, Student Motivation, Teacher Developed Materials, Teacher Role, Teaching Guides, Teaching Methods
Identifiers-Kentucky

Learning activities and educational objectives are suggested for use by K-12 art teachers as they develop and implement art education programs. The major objectives of the guidelines are to help teachers direct learning in areas of aesthetic sensitivity, imagination, cultural understanding, and creative skills. Various sections present information on the roles of the student, teacher, art consultant, and administrator in an art program; design concepts; materials and processes; art facilities; program requirements; program evaluation; art terms; guidelines for instructional media; and learning activities. Emphases within the curriculum include drawing and painting, graphics, two- and three-dimensional construction, ceramics, string and fabric design, communication media, architecture, the environment, and displays. Elementary students are involved in playing games, drawing lines and shapes, learning colors, and observing color contrasts in nature and in art. On the junior and senior high levels, students are involved in printmaking, display and exhibit planning, viewing and criticizing slides, discussing topics such as self-expression and aesthetic growth, and experimenting with different media. Grade levels and objectives are indicated for each activity. (DB)

Descriptors-Art Activities, Art Appreciation, *Art Education, Art Materials, Average Students, *Childrens Art, Curriculum Guides, Educational Objectives, Elementary Education, Freehand Drawing, Handicapped Students, Handicrafts, Lesson Plans, Painting, Photography, Resource Guides, Sculpture, *Skill Development, Teacher Role, Teaching Methods, *Visual Arts

Over 80 art activities for elementary school students are presented in this curriculum guide. Introductory sections define the roles of school superintendents, principals, art supervisors, and art teachers in supporting art programs; outline goals of an art curriculum; review developmental stages of children's art skills from age two through 13; and provide hints on handling media such as papier mache, clay, and tempura paints. The bulk of the guide consists of specific art lessons for each grade level from kindergarten through sixth grade. Each lesson explains materials, procedures, key vocabulary (i.e., texture, pattern), and design elements and principles. Lessons include clay pinch-pots, finger painting, paper weaving, tie-dye with crepe paper, monoprint, sand casting, still-life drawing, watercolor and India ink, multimedia tissue paper collage, printmaking with paraffin, burlap weaving, crayon batik, bas-relief in plaster and clay, box sculpture, glue-line relief prints, linoleum-block printing, and clay sculpture and jewelry. A section on photography offers activities for grades one through six and gives recipes, formulas, and instructions for making cameras and darkroom equipment. Concluding sections discuss art activities for handicapped students and list basic art equipment, facility requirements, and audiovisual and print resources. (AV)

EDRS Price MF-$0.83 HC-$10.03 Plus Postage.
Descriptors-Art Activities, *Art Education, Art Materials, Average Students, Curriculum Guides, Educational Objectives, Freehand Drawing, Graphic Arts, Handicapped Students, Handicrafts, Junior High School Students, Painting, Photography, Resource Guides, Sculpture, Secondary Education, *Skill Development, Teacher Role, Teaching Methods, *Visual Arts

Approximately 50 art activities for students in junior and senior high school are presented in this curriculum guide. Introductory sections define the roles of school superintendents, principals, art supervisors, and art teachers in supporting art programs, and outline goals and objectives of an art curriculum. The bulk of the guide consists of suggested art experiences in two-dimensional and three-dimensional techniques. Included in the two-dimensional techniques are activities related to elements of design (shape, color, texture), principles of arrangement (balance, harmony, contrast, movement), graphic representation, drawing, painting (watercolor, oil, acrylic, tempura, encaustic, sand, ink), print making (linoleum, wood block, silk screen), and photography. Among the three-dimensional techniques are activities in sculpturing, leathercraft, jewelry, lapidary art, ceramic art, and weaving. Other sections present miscellaneous activities such as decoupage and batik; review aspects of art programs for handicapped students; and list recipes, facility requirements, basic art equipment, supply sources, a glossary, and a bibliography. Teaching about Death to Undergraduates.

Pub Date-Sep 78

Note-12p.; Paper presented at 73rd Annual Meeting of the American Sociological Association (San Francisco, California, September 4-8, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Abortions, Accidents, Adult Education, *Changing Attitudes, *Course Content, Course Descriptions, Cultural Awareness, Cultural Context, *Curriculum Development, *Death, Educational Needs, Educational Problems, Emotional Experience, Grief, Higher Education, *Humanism, Social Behavior, Sociology, Student Interests, Suicide, Teaching Methods

Development, implementation, and teaching of a college-level course on dying and death are described. The authors review their own experiences in becoming involved with death education and describe teaching methods, problems, and content of their current course in dying and death at the State University of New York, College at New Paltz. Because of the large student enrollment, the approach is a lecture class for 200 students combined with small group sessions for 20 students each week at the instructor's home. Course goals are to explore the sociological implications of death, examine the social-psychological and institutional aspects of death in American society, and develop a personal understanding of death. Topics include death and social behavior, bereavement and grief, abortion and euthanasia, accidents and disasters, homicide and suicide, social meanings of the funeral, and living with dying and death. The course utilizes lectures, readings, films, and one-to-one discussion especially with students who have difficulty dealing with emotional reactions to the subject. Among the possible problems inherent in teaching about dying and death are the tendency of some academic departments to offer courses on death simply to increase departmental enrollment figures, danger of disciplinary compartmentalization when one department claims the sole right to offer death courses, proliferation of poorly-taught courses in response to student interest, and use of death courses to insulate against the pain of personal loss and grief. Identifiers-Europe (West)

Eleven articles by policy researchers, cultural experts, and officials from various European governments explore prospects for cultural policy in Europe. Specifically, the document examines international cooperation in cultural activities, problems caused by increased participation in cultural activities, the role of cultural leaders, recreational activities, town planning, and cultural centers. An introductory article characterizes expanding boundaries of the cultural domain in Europe and briefly summarizes the essays and empirical studies which comprise the remainder of the document. Two articles emphasize attempts by the governments of Norway and Sweden to decentralize cultural activities and to diminish governmental control of these activities. Other articles concentrate on integration of national and international cultural policy, cross-cultural research by international organizations, and the relationship between research and cultural policy. Several other articles present case studies of cultural activities in Norway, France, and Belgium. Summary comments indicate that there are considerable obstacles to solving cultural policy problems through international research. However, international cultural projects should be undertaken because they promote mutual understanding and friendship and contribute toward an atmosphere of cooperation which is conducive to solving the problems. Identifiers-Psychomusicology Research

This report describes features of the Audio Laboratory System (ALS), a device which supports research activities of the Southwest Regional Laboratory's Music Program. The ALS is used primarily to generate recorded audio tapes for psychomusicology research related to children's perception and learning of music concepts such as pitch, loudness, timbre, time, and form. Major sections of the document describe ALS's design, audio components, system components, audio modification, audio recording, monitoring events, and controlling events. Also presented is an inventory which details each module in the ALS control system by programming function. The inventory includes conversion modules, logic modules, timing modules, and counting modules. The report suggests that a major advantage of ALS for psychomusicological research is that it provides for controlled manipulation of the basic vibrational properties of sound. (DB)

Descriptors-*Course Content, *Course Objectives, Curriculum Development, Curriculum Guides, *Females, Feminism, Junior High School Students, Secondary Education, *Social Studies, Social Studies Units, *United States History, Womens Studies

This teaching unit was developed to highlight the role of women in American history. Written for the junior and senior high school level, the unit examines how women's role has changed, what contributions were made by women in the almost 400 years of our history, effects of the women's rights and suffragist movement of the 19th century, and changes accomplished by the current women's movement. Objectives include development of the ability to compare American ideas of masculinity and femininity with those of other cultures, discuss Freud's opinions about women, explain how scientists and anthropologists have analyzed the conditioning of American women, and discuss contributions of specific women during specific periods of history. The unit contains pre- and posttests, a list of 25 objectives, suggestions of content material for each of 15 days, background issues with related study questions, and a bibliography of 25 resources. The Data Book contains descriptive analyses of new social studies materials for kindergarten through grade 12, teacher resource materials, ERIC abstracts of curriculum guides, and a listing of all social studies materials published in 1978. It is intended to help teachers, administrators, curriculum coordinators, and college methods professors in selecting appropriate materials on the basis of grade level, discipline, underlying philosophy, goals, strategies, structure, content, innovativeness, and merit. There are four major sections in the book. Section one includes 60 two-page analyses of social studies materials arranged in categories of textbooks, supplementary and non-print materials, and games and simulations. Section two includes 20 short analyses of teacher resource materials. Each analysis summarizes the purpose, intended uses and users, and contents of each resource book. Section three provides abstracts of 20 social studies curriculum guides identified through the ERIC system. Section four contains a listing of 336 social studies materials published in 1978 and is organized by subject area. Each section is indexed in the back of the book by author/editor, developer, grade level, publisher/institution, and subject area. (Author/AV)

Ten economics units are outlined for junior and senior high school use. Taken together the units comprise a one-semester (18 week) course. General objectives include understanding the differences between a free-enterprise economy, a mixed economy, and a planned economy; explaining how the government of a country controls the use of paper money; describing the differences between monetary and fiscal policy; and recognizing economic problems that contribute to inflation, recession, and depression. The ten units cover content areas such as banking and money, taxes, credit and budgets, advertising, housing and major purchases, individual and government roles in protecting the future, aids to consumers, and job-seeking. For each unit the guide lists specific objectives and an outline of content. (AV)

Information is presented from a study of achievement and interest among students in age groups nine, 13, and 17 in the area of art education. Major objectives of the study were to generate information on how much time students spend enjoying works of art, how important they perceive art to be, how they evaluate works of art, what types of art they prefer, and differences among art activities and attitudes of students in different socioeconomic groups. The document is presented in five chapters. Chapter I concentrates on students' appreciation of art. Findings indicated that substantial numbers of students value art and pursue it in some form. Chapter II presents detailed information about student perceptions of art. Findings indicated that a majority of young people appreciate art but do not indicate a broad or sophisticated understanding of the nature or function of art in American culture. Chapters III and IV examine young people's general criteria for evaluating works of art. The final chapter offers conclusions, including that students have little experience with art museums and galleries, display varying attitudes toward art depending upon their socioeconomic background, and that schools should place more emphasis on aesthetic education programs. Descriptors-Academic Achievement, Age Groups, *Citizenship, Comparative Analysis, Data Analysis, *Educational Assessment, Educational Research, Elementary Secondary Education, *Knowledge Level, National Surveys, *Political Attitudes, *Social Studies, Student Attitudes, Tables (Data), Trend Analysis

This report summarizes a study of citizenship and social studies attitudes and knowledge conducted by the National Assessment of Educational Progress. The survey of citizenship was conducted during the 1968-69 and 1969-70 school years; the survey of social studies was administered during the 1971-72 school year. During the school year 1975-76, items from both assessments were reassessed to determine changes in performance. Test items emphasized political knowledge and attitudes in five major content areas: constitutional rights, respect for others, structure and function of government, political process, and international affairs. In this report, the first five chapters describe results for each of the five content areas. Chapter six gives results for different population subgroups, and chapter seven presents interpretive remarks about the data by experts in the fields of citizenship and social studies. Many tables and charts supplement the written text in each chapter. (AV)

Identifiers-Africa, Asia (Southeast), China, Egypt, India, Japan

This curriculum guide presents nine units for the study of world cultures in the ninth grade. The guide has been designed as one component of an ongoing comprehensive social studies program. Among the social sciences concepts which the units develop are cultural diffusion, prejudice, task specialization, urbanization, nationalism, and ethics. Generalizations to be developed include that culture is a human universal and is in a constant state of flux, and that cultural interaction leads to cultural advancement. The first three units cover an orientation to world cultures, ancient Egypt, and the fertile crescent. The other six units, which can be taught in any sequence, examine the Moslem world, Africa, India, Southeast Asia, China, and Japan. Each of the units identifies specific objectives and gives a detailed outline of content. No instructional materials are identified. (AV)

Descriptors-Ancient History, *Course Content, Course Objectives, Cultural Education, Curriculum Guides, Grade 10, Greek Civilization, Medieval History, Nationalism, Revolution, Secondary Education, *Social Studies, Social Studies Units, *Western Civilization, *World History
Identifiers-French Revolution, Germany, Great Britain, USSR

This curriculum guide presents nine units for the study of western cultures in the tenth grade. The units contain up to 13 lessons each and comprise a two-semester course. Content includes ancient Greece and Rome, the Middle Ages, the Renaissance and Reformation, Great Britain, France as a case study of revolution, Russia, and nationalism and the unification of Germany. For each lesson, information is presented on objectives, motivational activities, an outline of content, key words, and an evaluation activity. No instructional materials are identified. Activities involve students in defining terms, discussing relevant concepts in class, identifying time period and major characteristics of literature and art works, explaining how and why certain movements such as the Reformation arose in response to specific conditions, and drawing parallels between historic and current events. Descriptors-Affective Objectives, Annotated Bibliographies, Cognitive Objectives, Cultural Pluralism, Curriculum Development, *Educational Needs, *Educational Objectives, *Educational Philosophy, *Educational Practice, Educational Trends, Elementary Secondary Education, Futures (of Society), *Global Approach, International Studies, Multicultural Education, Nonformal Education, Program Descriptions, *Social Studies, Student Exchange Programs, World Affairs, World Problems

The book explores objectives, needs, and practices in the area of global education in elementary and secondary schools. Major purposes of the volume are to present a comprehensive, up-to-date examination of existing programs, characterize components of an ideal global education program, and provide advice to educators as they develop and implement global education programs. Major topics discussed in the nine chapters include a scenario of a visit to an imaginary world-centered school, evaluation of the impact of world events on everyday life, world-centered educational alternatives, obstacles in the path of global education perspectives, imperatives for global education programs, affective and cognitive objectives of global education for elementary schools, models of world-centered schools, international student exchange programs, and an agenda for global education action. The document concludes with an annotated bibliography arranged in six parts: (1) imperatives and issues, (2) instructional materials, (3) sources for additional materials, (4) pertinent periodicals, (5) projects, programs, and agencies, and (6) research studies. Descriptors-*Changing Attitudes, Divorce, Experimental Programs, Family (Sociological Unit), Federal Programs, *Feminism, *Guaranteed Income, *Heads of Households, Marital Instability, *Marital Status, Mothers, One Parent Family, Racial Factors, Research Methodology, *Socioeconomic Influences, Surveys, Tables (Data)

This report examines the relationship between marital status change and enrollment in income maintenance programs for female heads of households. The report reviews the first 18 months of the Seattle and Denver Income Maintenance Experiments, which provide financial grants to low- and non-income families. Over 5,000 people enrolled in the program are categorized according to family type and race/ethnicity. Eligibility requirements are restricted to family units with at least two members whose household heads are between 18 and 58 years of age and whose 1970 incomes were less than $9,000 or $11,000, according to the number of heads. The sample includes all female heads of households and studies all changes in marital status for the 18-month period. Preliminary results indicate that the impact of income maintenance increases the rate of marriage dissolution. This effect can be understood when compared to the control programs (Aid for Dependent Children and food stamps): (1) income maintenance programs involve less stigma and make fewer demands than the control programs, and (2) guarantees are explained to all families on income maintenance so that they are aware of their eligibility even if the marriage dissolves. Also, the introduction of an income maintenance program may focus attention on problems in the marriage. The impact on remarriage differs according to race/ethnic groups. For black women the probability of remarriage increases considerably; for Chicanas the effects are opposite; for white women there is no discernible effect. (KC)

Attitudinal and Normative Factors Associated with Adolescent Cigarette Smoking.

Pub Date-Oct 78
Note-29p.; Paper presented at the Annual Meeting of the American Public Health Association (Los Angeles, California, October 16, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Adolescents, *Behavior Patterns, *Health Education, Parent Influence, Peer Influence, Secondary Grades, *Smoking, Social Behavior, *Student Attitudes, Teacher Influence

This paper describes an attempt to use a model of behavioral intention as a diagnostic tool to provide useful data for the preparation of health education programs for adolescents in the area of cigarette smoking. The theory of this model is that a person's behavior is a function of their behavioral intention which, in turn, is a function of their attitude towards a behavior and their perception of subjective or social norms concerning that behavior. Participants in testing this model were high school students in the upper three grades. Questionnaires were designed to indicate students' attitudes on smoking, reasons for smoking or not smoking, and the extent of the influence of significant others on their decisions. It is stated that use of this model provides a qualitative as well as a quantitative understanding of cigarette smoking by high school students. Included in this document are samples of questionnaires submitted to participants and tabular analysis of results. (JD)

Cigarette Warning Labels as Educational Devices.

Pub Date-Oct 78

Note-23p.; Paper presented at the Annual Meeting, American School Health Association (Dearborn, Michigan, October 12, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Adolescents, *Communication (Thought Transfer), *Critical Reading, Educational Attitudes, Effective Teaching, *Health Education, Language Usage, Response Mode, *Smoking

Identifiers-*Advertising

This paper reports an investigation on the educational impact of warning labels on cigarette packages on adolescents. Subjects were asked to identify the locations of warning labels on cigarette packages and advertising and to restate the warning label. Results indicated that official warnings may be well known in general terms but poorly known in specific terms. It is suggested that if mass public warning statements about health are educational devices, they should be developed and pretested with care and evaluated before they are widely disseminated. (JD)

McClenaghan, Bruce

Personalizing Motor Development for the Elementary Child.

Pub Date-Jun 78
Note-19p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Ability Identification, Elementary Education, Elementary Grades, Individualized Instruction, Learning Processes, Motor Development, Performance Factors, *Physical Education, *Psychomotor Objectives, *Psychomotor Skills, Student Evaluation, Teacher Attitudes, *Teaching Techniques

The ways in which a physical education program for elementary school children of all ability levels may be developed are examined. Central to this subject is knowledgeable and systematic observation of each child's physical movements on the part of the teacher. The physical educator must develop skills of the mechanics of human movement to identify those students who need a program of remedial motor activity. Emphasis is placed on treating all children equally, modifying teaching styles to meet the needs of all students, and identifying those who require specialized physical education. An example of a child's deficient throwing pattern is presented, and an example of how an instruction plan could be developed for improving the child's performance is outlined. (JD)

Descriptors-*Cues, Educational Research, Literature Reviews, Policy, Research Criteria, *Research Methodology, Research Tools, *Statistical Analysis, *Teacher Behavior, *Teacher Characteristics, Teaching Methods
Identifiers-*Teacher Judgment

Two research papers focusing on approaches and methods for discovering cues used by teachers in making judgments in the classroom are presented here. The approaches described in the first paper are: review of empirical and theoretical literature concerning the objects to be judged and the behavior of judges; interview of judges to determine what they believe the salient cues are; participant observation of situations in which the judgments of interest are taking place; and choice of very simple objects to be judged. The quantitative methods for discovering cues are listed in the second paper as follows: prespecify a large list of potentially relevant cues and then use observation and regression analysis to narrow the list; use the semantic differential; use multidimensional scaling; and use Kelly's Role Repertory Test. References are included. (DS)

Choice of a Model for Research on Teacher Thinking. Research Series No. 20.

Michigan State Univ., East Lansing. Inst. for Research on Teaching.
Spons Agency-National Inst. of Education (DHEW), Washington, D.C.
Pub Date-Jul 78
Contract-400-76-0073
Note-15p.
Available from-Institute for Research on Teaching, College of Education, Michigan State University, 252 Erickson Hall, East Lansing, Michigan 48824 ($1.50)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Behavioral Science Research, *Classroom Techniques, *Cognitive Processes, *Decision Making, Educational Research, *Interaction Process Analysis, Models, *Research Methodology, *Teacher Behavior

Two models for research on teacher thinking are discussed: the decision-making model and the information-processing model. Research on teaching guided by the decision-making model focuses upon explaining and understanding deliberate teacher activity and is deemed more appropriate for situations in which the teacher has sufficient time and incentive to deliberately decide what to do than it is in the fast-paced context of classroom interactions. In contrast, the information-processing model focuses on how the teacher limits and structures the environment in which he or she must act. Two studies, one using the decision-making model and the other the information-processing model, are examined. It is hypothesized that differences in these areas are due mainly to differences between the models used to conceptualize and guide the research. It is generally concluded that research guided by a decision-making model of teaching tends to be highly controlled, focusing on the decision-making behavior of teachers in situations defined by the researcher. Research guided by the information-processing model, on the other hand, tends to be descriptive, exploring the ways teachers define the situations in which they work and how they cope with a complex classroom environment. Identifiers-*Teacher Pensions

The descriptive-analytical detail of this study provides confirmation of the generality that, if teachers continue with the profession long enough, they will retire with allowance payments close to or even below poverty levels. The research reviews most aspects of teacher retirement including: (1) historical and philosophical background; (2) overall and administrative view of retirement systems; (3) financial operations of state-wide retirement systems; (4) the social security system and its relation to teacher retirement; (5) typical retirement plans and benefits; (6) disability retirement; (7) mandatory retirement, vesting retirement, and creditable years of service; (8) the mobile teacher; (9) death and survivor benefits; and (10) cost of living needs. All state programs for teacher retirement are analyzed and evaluated, and recommendations are provided for systems improvement in each state system. A bibliography is also provided. (DS)

Multicultural Education: Where Do We Go From Here?

Pub Date- 78
Note-13p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-College Faculty, *Cultural Pluralism, Cultural Traits, Ethnicity, *Ethnic Stereotypes, *Higher Education, Italian Americans, *Multicultural Education, *Social Attitudes, Social Integration, Teacher Education

It is pointed out that establishing classroom environments enabling students to actively engage in cross-cultural interaction and communication is essential to the success of a culturally pluralistic society. In this examination of an effective multicultural teacher education program it is implied that each institution has the responsibility for retraining faculty in attitudes conducive to cultural integration. Using the Italian American as an example of an ethnic group, five typical negative means of stereotyping are identified: (1) occupation class; (2) custom, religion, and politics; (3) natural inclinations; (4) illiteracy, crime, and delinquency within geographical areas; and (5) derogatory characterization. A single course on ethnic culture presented by a member of that particular ethnic group is regarded as limited and nonproductive; instead, an integrative approach is suggested for a complete multicultural curriculum. Each course in such a curriculum could be modified to include multicultural elements. Such considerations as the contributions by individuals from diverse cultural backgrounds, religious, or political affiliations, and persons with divergent personal characteristics or preferences would enrich such a curriculum and provide a wholesome culturally pluralistic environment. Descriptors-*Classroom Environment, Elementary School Students, *Independent Study, Individual Study, *Inservice Teacher Education, Instructional Materials, *Intermediate Grades, *Programed Materials, Skill Development, *Teaching Skills, Validated Programs

An inservice teacher education learning module is described which focuses on skill building in organizing independent learning in intermediate level classrooms. Content of the minicourse emphasizes acquiring information and practicing skills of helping pupils understand independent work, solve problems, and accept delayed teacher response, and of combining independent activity and small-group instruction on a permanent basis. Information is provided about course purposes, content, activities, resources, and history of development. A critique and ordering information are also included. (DS)

The intent of the inservice teacher education program described here is to allow teachers to focus on the possibilities that literature holds as a learning tool in children's education. Children's literature is interpreted here as a teaching device that contributes to both the child's skills in English language arts and reading and to his/her development as a self. The material is arranged in a series of activities that are designed to develop specific activity-related competencies. Information is provided on the program purposes, content, activities, resources, and history of development. Ordering information and a critique are also included. (DS)

The Student Teaching Experience: A Methodological Critique of the Research.

Pub Date-Feb 78
Note-86p.; Paper presented at the Annual Meeting of the Association of Teacher Educators (Las Vegas, Nevada, February 1978)
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-Behavioral Science Research, Comparative Analysis, *Educational Research, *Models, Preservice Education, Psychometrics, Research Design, *Research Methodology, Socialization, *State of the Art Reviews, Statistical Analysis, *Student Teaching, Success Factors, Teacher Attitudes, *Teacher Behavior

The issue of what educational research has illuminated to date about the universally accepted practice of student teaching is discussed in this paper. A critical review is provided of selected literature on student teaching within the context of two contrasting paradigms for conducting educational research: psychometric and social-anthropological. Most of the research that has been conducted falls within the dominant perspective of the psychometric paradigm under the following five major categories: (1) student teacher attitudes and personality characteristics; (2) the socialization of student teachers; (3) predictors of success in student teaching; (4) interpersonal relationships in student teaching; and (5) experimental attempts to modify student teacher behaviors. All of these categories are reviewed in depth. It is argued, however, that more emphasis should be placed on the social-anthropology paradigm. Extensive references are provided. (DS)

Inservice Education Preferences of Teachers.

Pub Date-78
Note-17p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Comparative Analysis, Conferences, Data Analysis, *Educational Alternatives, *Inservice Programs, Inservice Teacher Education, Program Budgeting, *Program Development, *Questionnaires, Statistical Analysis, *Teacher Attitudes, Teacher Workshops

A teacher inservice preference questionnaire was used to identify, categorize, and compare inservice preferences of educators, and findings indicated that workshops were ranked first as the inservice activity most preferred with conventions and professional conferences least preferred. Other categorical analysis indicated that professional development committees were the most preferred for planning, providing resource personnel, and evaluating professionalism. Governing boards were the first preference for budgeting for developmental activities. Differences exist on the motivation dimension of a theoretical model for the following categories: incentives, aspirations, expectations, and satisfactions. The sample ranked the expectations category first, incentives second, aspirations third, and satisfactions fourth as factors associated with successful inservice programs. (DS)

Attempting to assist teachers in involving parents more completely in school life, this resource guide provides information and ideas on working and communicating with parents, parent-teacher meetings, and parent guidance. Part one of the book discusses the importance of sensitive communications, individual differences, and protocol. Part two deals with specific kinds of parent-teacher meetings and activities. Part three provides teachers with some guidelines for answering some of the typical questions that many parents believe teachers should be able to answer. In the Appendix of Resources, a compilation of checklists, parent and teacher evaluation forms, referral agencies, and planning schedules is offered. The book is directed primarily toward elementary school teachers. (DS)

Identifiers-*Florida

This report focuses on the role of universities in teacher education centers in the state of Florida as well as on some of the issues and impacts related to that role. Research makes it clear that universities, almost entirely through colleges of education, have contributed substantially to the improvement of inservice education. Several factors have combined, however, to limit both that contribution and the potential role of colleges of education in Florida's teacher education centers. These factors include: (1) the focus on inservice education; (2) the weakness in collaborative relationships; (3) the lack of Teacher Education Center (TEC) program development in the universities; (4) policy instability; (5) shortage of resources; (6) the larger university system; and (7) the tenuous development of university organization for TEC activity. The institutionalization of TEC roles would help consolidate TEC goals as part of the university mission and lessen anxieties about the role of universities in teacher education centers. (DS)

The Helping Hand: A Tutorial Program.

Pub Date-Feb 76
Note-6p.; Paper presented at the Association of Teacher Educators National Conference (St. Louis, Missouri, February 4-7, 1976)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Cooperating Teachers, Elementary Education, *Field Experience Programs, Individual Instruction, *Preservice Education, Programed Tutoring, *Remedial Instruction, Teacher Education, *Tutorial Programs

A program designed to provide field based experience to students of education by engaging them in tutoring activities in elementary schools is described. This direct first-hand teaching experience is offered at the sophomore level of college. One important feature of the program is the control that each child's teacher has over the tutoring experience. The tutor must have a preliminary conference with the classroom teacher in which a specific task is identified, materials selected, and instructional strategies planned. Before beginning tutorial service the tutor makes an in-class observation of the pupil to be tutored. Teachers at participating schools assign tutors to children with specific remedial needs. Special arrangements are made for youngsters with various kinds of handicaps. At the conclusion of the assignment tutors are evaluated by their respective cooperating teachers, and the evaluations are forwarded to the appropriate university instructor. (JD)

Descriptors-Beginning Teachers, College Graduates, *College Supervisors, *Comparative Analysis, Followup Studies, *Graduate Surveys, Preservice Education, *Program Effectiveness, Questionnaires, Statistical Analysis, Student Teaching, *Teacher Employment, *Teacher Programs

This report summarizes responses to an 84-item survey completed by 536 of 994 randomly selected graduates of Michigan State University. The sample includes graduates of five teacher preparation programs (regular, cluster, and overseas student teaching, elementary intern, and competency-based four enrollment periods. The report also reviews responses to a 43-item questionnaire completed by 236 of the 269 supervisors identified by active teachers in the sample. The most significant findings include: (1) There has been a slight decline in the percent of graduates who secure teaching positions; (2) There has been a dramatic increase in the number who enter the profession as substitutes, paraprofessionals, or part-time teachers; (3) There are no significant differences among programs on any of the five subscales embedded within the surveys self-ratings of performance, supervisor ratings of performance, supervisor ratings of commitment to teaching, graduate ratings of the contribution of student teaching to skill development, and general satisfaction with student teaching; (4) The turnover rate is highest among young, untenured teachers; (5) There are significant program differences on several specific items that focus on employment histories, attitudes, or personal characteristics; and (6) graduates are generally satisfied with the student teaching experience and view the opportunity to teach at more than one grade level or subject area as its most valuable subcomponent. An appendix provides examples of questionnaires, and a bibliography is also included. (Author/DS)

Accommodating Reading Levels in a Subject Area Classroom: A Six-Step Model for Pre- and In-Service Training.

Pub Date - 78
Note - 10p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors - Cloze Procedure, Complexity Level, Elementary Secondary Education, Inservice Courses, Preservice Education, Reading Ability, *Reading Comprehension, *Reading Level, *Reading Tests, *Student Evaluation, *Teacher Education

An outline is given of a model procedure by which teachers can ascertain the reading level of students so they may match the students' ability in reading comprehension with the subject content of a course. This six-step model may be viewed as a continuum of material and student assessment, teaching, evaluation, and reassessment of material and student match. A Cloze test and vocabulary recognition test are first given to the students. The teacher then follows these steps to assure maximum comprehension of the subject: (1) determine the approximate level of difficulty of the books that are to be used by the students; (2) determine the students' proficiencies in the use of assigned textbooks and find an approximate reading level for less able students; (3) provide reading material at a variety of reading levels; (4) read the material in advance looking for obstacles to comprehension; (5) prepare the students for the ideas, vocabulary, and main objectives of the reading selection; and (6) follow up each lesson to ensure comprehension of the essential elements inherent in the lesson. Descriptors-Body Weight, *Cardiovascular System, *Exercise (Physiology), Health, Heart Rate, *Human Body, Lifetime Sports, Nutrition, *Physical Activities, *Physical Fitness, Preventive Medicine

The basics of physical fitness and information for developing a systematic program of exercise and physical activity for the individual are outlined. This book is divided into three major areas. Part one contains chapters dealing with basic physical fitness, understanding the human body and its needs, and methods of appraising individual fitness. In the second section chapters deal with individual conditioning exercises, conditioning for cardiorespiratory endurance, advanced conditioning methods, and weight training. The final part examines additional concerns related to physical fitness. Nutrition, weight control, and exercise are discussed as well as activity and heart disease. The relative merits of various sports and physical fitness are also considered. The appendix includes test scores for women and men, a body composition chart, and physical fitness profile charts. A glossary of terms is included. (JD)

A Psychophysical Test for Retinitis Pigmentosa.

Pub Date-Oct 78

Note-8p.; Paper presented at the Annual Meeting, Genesee Valley Psychological Association (5th, Rochester, New York, October 20, 1978) ; Graph on page 6 may not reproduce clearly

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Eyes, *Medical Research, Ophthalmology, Physiology, *Vision Tests, *Visual Acuity, *Visually Handicapped, Visual Perception

Identifiers-*Retinitis Pigmentosa

A new test designed to detect an hereditary eye disease called retinitis pigmentosa (RP) is described. This condition is revealed by pigmentation in the retina, but early diagnosis is difficult because the symptoms are subtle, and since it is genetically recessive it frequently occurs in families with no history of early blindness. In many cases RP results in gradual loss of vision and eventual blindness. The test for this problem is in a developmental stage and involves electrical signals picked up from a contact lens electrode placed on the subject's cornea. The responses of the eye to brief flashes of light may thus be recorded and charted and compared to those of subjects with normal vision. (JD)

Identifiers-Information Analysis Products

Focusing on various facets of the supervision of teachers in all capacities, this selected annotated bibliography was prepared for those cooperating teachers, student teachers, university supervisors, school supervisors, administrators, and other school personnel who wish to investigate in greater detail any number of aspects of the theory and process of supervision. More specifically, this work provides references to, and content summaries of, texts and articles on both the theoretical models and the more practical styles and techniques of supervision. In addition, each annotation includes a brief evaluation of the usefulness or application of the entry to a particular style of supervision. The bibliography includes sections on: History and Development of Teacher Supervision, Theories of Power and Behavioral Change, Major Theories and Models, Inservice Supervision, The College/University Supervisor: Changing Roles and Responsibilities, The Developing Role of the Cooperating Teacher, Observational Instruments, and Conferencing Techniques. Citations are from 1965 onward. (Author/DS)

The purpose of this manual is to provide teachers in an economically depressed rural school system with methods and techniques for implementing five mandated programs career, character, consumer, alcohol and drug, and environmental education into the ongoing curriculum of the schools. Unit outlines are provided for each grade level from kindergarten through grade 12. Suggested reading and activities are included in each unit as well as the objectives of each subject area. The teacher is expected to teach two units assigned to her or his grade level and is free to include any other unit. Emphasis is on career choices and vocational training at the secondary education level. Available resources for implementing this program are listed, including suggested reading and audiovisual materials. (JD)

Attitudes of Educators Toward the Free Enterprise System.

Pub Date-Feb 79
Note-24p.; Paper presented at the Annual National Conference of the Association of Teacher Educators (Orlando, Florida, February 1979)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Capitalism, *Democracy, *Economic Factors, Secondary Education, *Semantic Differential, *Statistical Studies, Student Teachers, *Teacher Attitudes, Teacher Educators, Teachers
Identifiers-Louisiana

A study was done on teachers, professors of education, and preservice teachers in order to investigate the process of measuring attitudes and to denote the level of attitudes held by these educators about the free enterprise system. The study used a semantic differential to determine the attitudes of 28 subjects toward selected economic concepts representing business, government, and labor. Overall the three levels of subjects had low to medium evaluative scores (denoting feelings and judgments concerning concepts), but higher activity ratings (denoting that certain economic elements were felt to be very strong and active within the economic system). One can conclude that attitudes of educators are transferred through subject matter as well as displayed in the classroom. (DS)

Four Issues in Teacher Inservice Education.

Pub Date-78
Note-17p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Administrative Organization, Educational Finance, Educational Legislation, Educational Objectives, Educational Policy, *Governance, *Inservice Teacher Education, *Interinstitutional Cooperation, *Needs Assessment

The problems facing implementation of a sound inservice program are examined from diverse viewpoints. Selective samples from policy papers by relevant educational institutions and organizations are analyzed. These papers present some consensus and some conflicting perceptions on the issues of shared governance, program content, resource allocations, and mode of delivery of materials. Composite characteristics of successful inservice projects are identified. Such projects should have revolutionary change goals and a committed continuous project staff management. Support from central and school administration as well as involved teachers are of primary importance to an inservice program. Finally, the program should be conducted on site, encouraging participants to develop, implement, and evaluate the program. Emphasis is placed on the need for collaborative leadership from educational institutions at all levels. (JD)

Descriptors-*Academic Achievement, Class Management, Classroom Communication, Effective Teaching, Elementary Education, Interaction, Interpersonal Relationship, *Student Attitudes, *Student Behavior, *Student Teacher Relationship, *Teacher Behavior, Teaching Skills

The main purpose of this study was to investigate the relationship between teacher behaviors and pupil behaviors, achievement, and attitudes. The study was conducted in six elementary school classrooms. Eight high-inference scales were also used to obtain measures of classroom management, instructional skills, and interpersonal skills. It was found that private interactions (1) occurred more often than public interaction, (2) favored low achievers in terms of frequency, (3) were positively related to pupil unproductive behavioral styles, and (4) were negatively related to pupil attitudes. Direct teaching patterns were functional for pupil achievement but not for pupil attitudes. (Author/JD)

Note-10p.; Not available in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Foreign Countries, Motor Development, Personal Growth, *Physical Fitness, *Psychomotor Skills, *Testing, Test Reliability
Identifiers-Japan

A combination of physical fitness tests designed to be administered to a wide spectrum of the population, male and female, children and adults, is described. Three tests are included in this battery motor fitness, physical fitness, and sports fitness. The philosophy behind this test structure is that motor fitness tests only measure and indicate roughly the tendency of an individual's fitness level while more precise tests for respective fitness factors are found in the items of physical fitness tests. Sports fitness tests differ from those two tests and are used independently due to the independent test items they contain, none significantly correlating with the other tests. Five test items are included: (1) standing long jump; (2) sit-ups for 30 seconds; (3) push-ups in two different forms; (4) timed shuttle run for 15 seconds; and (5) five-minute distance run. The diagnosis and evaluation of the total scores may be made in terms of physical fitness age versus calendar age. Exemplary tables for evaluation purposes are included in this document. (JD)

Pupil Perceptions: Mirrors for Growth in Teaching.

Pub Date-Feb 79
Note-11p.; Paper presented at the Annual Convention of the Association of Teacher Educators (Orlando, Florida, February 19-21, 1979)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Behavior Change, Class Management, Feedback, *Inservice Programs, Perspective Taking, *Student Evaluation of Teacher Performance, Teacher Behavior, *Teacher Improvement

An instrument for determining pupil's perception of teacher behaviors is described. The inventory asked pupils to respond to statements reflecting teacher behavior in four major aspects of teaching: relating to pupils; mediating the learning process; diagnosing and evaluating; and managing and structuring the learning environment. As a parallel activity, the teacher responds to the same items. This allows the teacher to tally student responses and identify those items where there was confusion between student responses and teacher responses. This perception inventory was used as a pivot for developing an inservice program for the improvement of teaching. The rationale for this program is that pupil perceptions, at any grade level, are relevant sources of information for the teacher interested in self-assessment and performance improvement. (JD)

The inservice learning module described here focuses on testing the teacher's understanding of and skill in using effective questioning techniques in the classroom. Inservice topics addressed include methods of verbal and nonverbal accepting or encouraging; probing techniques; and methods of asking effective questions. This description provides information on the purposes and content of the module as well as activities and resources. A critique, history of development, and ordering information are also included. Descriptors-Academic Achievement, Class Management, *Classroom Observation Techniques, Educational Research, Effective Teaching, Foreign Countries, *Interaction Process Analysis, Junior High School Students, *Student Characteristics, *Student Evaluation of Teacher Performance, Student Teacher Relationship, *Teaching Styles

A research program to investigate interactions of instruction styles and learner characteristics related to learning results in junior high schools is described. Data was gathered both by observation of the teacher in the classroom and by responses of pupils on their perceptions of the teacher. Different teaching styles are defined and referred to as functional teaching styles, because they deal with the functioning of the teacher in the teaching-learning situation. There are four phases to this research project: (1) determination of the teaching styles of about 100 junior high school teachers; (2) determining the pupil characteristics that are related to teaching styles; (3) determination of the criteria to which the interacting of teaching styles and pupil characteristics were compared, and (4) in the future, conducting the interaction project with a new group of teachers and pupils. The research is incomplete at this time, and only one hypothesis emerges as having strong support in class settings a teacher who teaches by means of questions and giving feedback rather than by means of explaining and answering is more effective than average when the criterion is a cognitive one. Descriptors-Class Management, Elementary Education, Feedback, *Low Achievers, *Mathematics, *Reading, *Small Group Instruction, Student Evaluation, Student Motivation, Student Reaction, *Teaching Methods

A teaching method particularly effective with children who are hard to teach arithmetic and reading is described. Known as a direct instructional system for teaching arithmetic and reading, it is a set of materials in which everything the teacher says and does is specified. This technique is effective in small group instruction. Specific procedures for presenting tasks and evaluating responses are: (1) getting classroom control: seat children close to the teacher; (2) presentation of the learning task: the materials are designed to teach with a sharp focus upon sequential details; (3) inducement of trial responses: the materials are designed for a fast rate of responses from the students and they can be controlled by the teacher's use of signals to secure responses; (4) corrections of trial responses: corrections are built in along with procedures for correcting and recycling; (5) evaluation of mastery: periodic criterion-referenced tests are built into the materials. Directions are given for advancing or recycling students after each test. The strength of the direct instruction approach is that it involves a specific method for teaching a set of skills and concepts. (JD)

Descriptors-*Academic Achievement, Class Management, Classroom Observation Techniques, Classroom Research, *Effective Teaching, English Instruction, Mathematics Instruction, *Measurement Techniques, Rating Scales, *Statistical Analysis, Student Evaluation of Teacher Performance, *Teacher Behavior, Teacher Characteristics, Teacher Evaluation, Teaching Techniques

This report presents the process-outcome relationships discovered in the Texas Junior High School Study of correlates of effective teaching. Classroom processes and cognitive and affective indices of outcome are discussed for two subject areas (English and math) and for classrooms with varying levels of entering ability. The four separate papers in this compendium focus on the following : (1) overview of methodology and rationale; (2) high inference ratings of general behaviors; (3) low inference coding of specific behaviors; and (4) comparison of findings for cognitive and affective criteria. The results indicated that student characteristics were most influential on learning outcomes in English classes, but that teacher behavior was more important in math classes. Effective instruction was more readily identifiable in the math classes as well. Further results emphasized that caution should be exercised in any attempt to use student ratings in teacher evaluation. The data for the research is presented in tables, and references are provided. Descriptors-*Class Management, Class Organization, *Classroom Techniques, Discipline, Effective Teaching, *Elementary Education, Expectation, Student Behavior, Task Analysis, *Teacher Behavior

Observation of two third-grade teachers during the opening days of school revealed different approaches to organizing their classes and instructing pupils on correct classroom behavior. The results of observation are given in narrative form and analyzed. Five principles that characterized the most effective teacher are presented: (1) The teacher who was better organized demonstrated an ability to analyze the tasks of the first weeks of school and presented them to students in small easily understood steps; (2) Before the morning began, the better-organized teacher had clear expectations about what she would accept in the students' behavior and what would be encouraged; (3) The better-organized teacher communicated her expectations clearly to the students from the beginning; (4) The better-organized teacher remained sensitive to the students' concerns and needs for information; and (5) The better-organized teacher monitored her students closely in order to give immediate feedback. Follow-up questions from the classroom organization study are appended. (JD)

Identifiers-Medical College Admission Test, *National Board of Medical Examiners Examination

The performance of the University of Arizona College of Medicine's graduating class of 1976 on the National Board of Medical Examiners (NBME) Parts I and II was analyzed in a structural equation model. Although the primary emphasis of this paper is toward model development, the effects of several background and demographic variables such as age, sex, socioeconomic and marital status were estimated, together with those of several major events in these students' medical school careers. About half of the variance in NMBE I total score could be explained with knowledge of overall undergraduate Grade Point Average (GPA), Medical College Admissions Tests (MCAT) scores, and the students' sex. Over 85% of the variance in NMBE II total score could be explained using the variables shown in the structural equation model. NMBE I performance did not greatly affect NMBE II performance when other variables were included. The methodological techniques used to isolate the effects of these variables can be applied to many other analyses in health professions education. (Author/CTM)

Identifiers-Army Alpha Examination, *Metropolitan Achievement Tests, Project Follow Through

Focusing on the use of the Metropolitan Achievement Test (MAT) with Project Follow Through evaluations, this report represents an extended discussion of the appropriateness of standardized tests for evaluation and policy research. First, the development of the MAT and its roots in the Army Alpha intelligence test are described in detail. The next section discusses metric problems that is, the types of scores standardized tests yield. The report recommends the use of the publisher's standard score, citing reasons why raw scores, percentiles, and grade equivalents are subject to misinterpretation. Psychometric problems those concerned with test validity are also discussed. It is argued that the use of standardized tests is not now justified because the tests may measure test wiseness, achievement motivation, general ability, and white middle class values rather than specific skills that schools are trying to teach. In the final section, recommendations are made for designing and validating new tests to fit particular goals: assessment and evaluation, identification of effective programs, diagnosis and prescriptions, and educational needs assessment. The appendix contains a history of the Army Alpha, notes on the norm referenced/criterion referenced distinction in testing, and results of the MAT analyses regarding the Philadelphia Follow Through Planned Variation evaluation. Identifiers-*Pediatric Examination of Educational Readiness

The Pediatric Examination of Educational Readiness (PEER) was designed as an integrated health and neurodevelopmental instrument to be administered by pediatricians and nurses in the assessment of preschool children. It may be used to identify potential learning disabled children who need intervention. The neurodevelopmental part of the test included 38 items and covered: (1) spatial body awareness; (2) gross and fine motor performance; (3) visual processing; (4) auditory language function; and (5) experiential knowledge. Neurological maturation was indirectly measured from ``soft signs'' such as the presence of associated movements, excessive body posturing, and poorly established hand preference. Processing efficiency the speed with which instructions were understood and carried out was also noted. When the PEER was administered to 178 children just before kindergarten entrance, approximately ten percent were flagged as being at educational risk, as indicated by ``age delayed'' scores in two or more areas of the PEER. These flagged children also had lower scores on the General Cognitive Index of the McCarthy Scales of Children's Abilities and on the Kindergarten Performance Scale, a rating scale completed by the kindergarten teacher. These correlations support the concurrent and predictive validity of the PEER. (Author/GDC)

Descriptors-*Clinical Diagnosis, Delinquents, *Diagnostic Tests, Emotionally Disturbed, Intelligence Tests, *Learning Disabilities, Males, Mentally Handicapped, *Psychological Testing, Research Methodology, Secondary Education

A detailed explicit definition of learning disability (LD) is presented in terms of the diagnostic procedures and decision points used in identifying that category among a group of juvenile delinquent and control group adolescent males. The described procedures include a review of existing records, interviews, and diagnostic assessments. Rationales for the choice of pertinent variables and measurement instruments are given. The assessment process and administrative arrangements are explained. The factor analytic studies of Witkin and his colleagues were deemed especially relevant and the Wechsler Intelligence Scale for Children (Revised) was used. Decision points eliminated boys who were mentally retarded (intelligence quotient below 75), and boys who were, or had been, diagnosed as emotionally disturbed (those diagnosed as untestable or presenting bizarre symptoms). Those chosen for further diagnosis included boys whose achievement score differed by two or more years from their ability score, or boys whose academic achievement was two or more years retarded. Interviews and diagnostic testing were carefully standardized and required about three hours for each boy. Training, quality control, and other administrative procedures are described. (CTM)

Identifiers-*Pennsylvania Educational Quality Assessment, Pensylvania

Superintendents from 155 school districts in Pennsylvania were surveyed regarding their participation in Pennsylvania's 1976 Educational Quality Assessment (EQA). Ten state goals for quality public school education were assessed in grades 5, 8, and 11, as part of the EQA. Questionnaire responses were returned by superintendents from 128 school districts, and focused on: (1) extent of dissemination of EQA results; (2) usefulness of EQA data; and (3) contributions of the EQA advisory service. Results indicated that the assessment results were widely disseminated, using a variety of means to publicize the data. Over 88% of the districts responding indicated that EQA information had been used for program planning. Thirteen percent of the districts had not yet used EQA data; this was largely attributed to lack of staff time. The most useful results involved the following goals: verbal and mathematics basic skills; self esteem; interest in school; and vocational aptitude. Opinions regarding the accuracy of the data and the assistance in interpreting it were also surveyed. The twenty-item questionnaire and extensive quotations from the comments received are appended. Descriptors-Adults, *Attitude Tests, Church Workers, Clergymen, College Students, Discriminatory Attitudes (Social), Factor Analysis, Higher Education, *Political Attitudes, *Religious Differences, Religious Discrimination, *Religious Factors, *Social Attitudes

The relationship between religious attitudes or orientations and prejudice was studied in a sample of 337 adults: college males, lay persons and ministers from local congregations, and seminary students in Louisiana and Texas. The study is based on Gordon Allport's theory concerning intrinsic and extrinsic religiousity. Ten religious groups were represented: Catholic; Episcopal, Methodist, Lutheran, Presbyterian, Christian/Church of Christ, Baptist, Pentacostal, Jewish, and Other. A 227-item test battery was constructed from the Committed-Nominal Religious Attitude Scale, Allport's Religious Orientation Scales, Religious Fundamentalism Scale, Altered Ethnocentrism Scale, Rokeach's Dogmatism Scale, and Crowne and Marlowe's Social Desirability Scale. Demographic variables included age, location, education, and social status. Correlational and multivariate analysis of variance showed that a general factor of religiousity, or of indiscriminantly pro-religious attitudes, was represented. This hypothetical pro-religious person is 35 or older, politically conservative, educated, and a church leader. Another profile, corresponding to Allport's extrinsic individual, was characterized as narrow-minded, less educated, lower middle class, and not a church leader. Results also suggested that the religious commitment and intrinsic nature of churchgoers increases with age. Further research using more valid tests was recommended. (Author/GDC)

Descriptors-*Attitude Tests, *Discriminatory Attitudes (Social), Factor Analysis, Rating Scales, *Religious Differences, Religious Discrimination, *Religious Factors, *Social Attitudes, *Test Construction, Test Items

Identifiers-*Committed Nominal Religious Attitudes Scale

A new test of religiosity was developed, since it was felt that religiosity was more complex than could be explained by the two previously used factors: intrinsic and extrinsic. Committed religiosity was defined as those behaviors and attitudes which indicate total dedication to religious beliefs; that is, they provide a purpose in life and the personal strength to achieve that purpose. Nominal religiosity describes the person whose life style indicates that the religious organization or philosophy has been accepted so that the individual receives personal or social gratification from an external source of power. Protestant ministers and church members provided adjectives describing these two types, and the rating scale was constructed. It was completed by 199 people representing 11 religious affiliations. Principal components analysis revealed thirteen significant factors, six of which were interpretable: (1) general religion; (2) closed-minded, ecclesiastical nominalism; (3) situational religion, true nominalism; (4) utilitarian nominalism; (5) anti-clerical, personal commitment; and (6) true commitment. Three second order factors were interpretable: nominalism; self centered narrow mindedness; and general religiosity. Preliminary questionnaires and the 130-item committed Nominal-Religious Attitudes Scale are appended. (GDC)

Identifiers-Blooms Taxonomy of Educational Objectives, Kit of Reference Tests for Cognitive Factors

Path analysis was used to reanalyze Kropp and Stoker's data from tests designed to evaluate Bloom's taxonomy of educational objectives in the cognitive domain. Scores for 1,128 students in grades nine through twelve were analyzed separately by grade level for four content areas on six taxonomic levels. A measure of general ability was also included in the 16 correlation matrices. Two different path analysis procedures were used, one depending on squared semipartial correlations and the other depending on standardized partial regression coefficients. In addition, each matrix was factor analyzed by image analysis procedures. The two different path analysis methods differed in their interpretation of whether prior intelligence or prior knowledge made a greater contribution toward comprehension. The results generally supported the hierarchical nature of the taxonomic tests, with the exception that evaluation appears to be more an effect of comprehension than of synthesis. The factor structures for grades nine and twelve were highly similar. (CTM)

Descriptors-*Correlation, *Critical Path Method, Goodness of Fit, Hypothesis Testing, Mathematical Models, *Multiple Regression Analysis, Predictor Variables, Sampling, Simulation, *Suppressor Variables
Identifiers-*Monte Carlo Methods

A Monte Carlo simulation was used to ascertain the degree of inflation that can occur in regression estimates when samples contain randomly occurring instances of a pattern among correlations called cooperative suppression. Ten thousand samples of scores on three variables were randomly drawn from a population in which the correlations among the variables were prespecified such that cooperative suppression did not exist. Cooperative suppression occurred in nearly 48% of the samples but the incidence of regression coefficients that were grossly discrepant from the population parameters was rare. The implications for multiple linear regression and a method of causal investigation called path analysis are discussed. (Author/CTM)

Strategies of Path Analysis.

Pub Date-Mar 78

Note-37p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Correlation, *Critical Path Method, Data Analysis, *Mathematical Models, *Multiple Regression Analysis, Predictor Variables, *Research Design, Research Methodology, Suppressor Variables, Validity

The purpose of this paper is to illuminate the advantages of path analysis for the exposition of results in data analytic papers. Probably the greatest advantage is that it provides a means by which the nature of the problem may be handily summarized. The method of path analysis, although conceived over sixty years ago by Sewell Wright, has only recently been introduced into educational literature. Its application in substantive analyses in education has also been infrequent. Path analysis requires the researcher to think about systems of intercausal connections and requires a degree of explicitness desirable in scientific writing. Path models may be classified into four categories: recursive, block, block-recursive, and nonrecursive. Each of these requires a somewhat different strategy of analysis. The strategy for each kind of model is illustrated with substantive examples. The more difficult task of path analysis involves the construction of models that are consistent with sound theory. Social Desirability as a Response Style on the Adjective Check List.
Pub Date-Mar 78
Note-14p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (24th, Atlanta, Georgia, March 15-18, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Adjectives, *Check Lists, Factor Analysis, Females, Higher Education, *Personality Tests, *Response Style (Tests), Self Esteem, *Test Validity
Identifiers-*Adjective Checklist (Gough and Heilbrun), *Construct Validity, *Social Desirability

The effect of social desirability on the variance accounted for by the scales of the Adjective Check List (ACL) was investigated in a sample of 366 female college students. Social desirability as a response style was defined as the tendency to present oneself in a favorable manner. The ACL was scored according to 23 of the 24 keys in the test manual. These data were submitted to principal components analysis, and the major resulting factors were rotated orthogonally for purposes of interpretation. A different sample of 20 females from the same college then rated the social desirability of each of the 300 ACL adjectives, on a scale of 1 to 5. Fifteen adjectives were selected as having high social desirability, 15 as neutral, and 18 as low. Statistical analysis indicated that three major components accounted for 75-78% of the total variance. The first of these three factors, social desirability, accounted for 35.6 and 35% of the variance in two principal components analyses. It was concluded that the primary factor measured by the Adjective Check List is social desirability. The data are appended. (Author/GDC)

Descriptors-Correlation, *Critical Path Method, Data Analysis, Educational Research, *Evaluation Methods, Intermediate Grades, Mathematical Models, *Multiple Regression Analysis, Predictor Variables, Program Evaluation, *Research Design, Research Methodology

Path analysis, a technique related to multiple regression analysis is used for ascribing causal relationships among variables. Path analysis involves the construction of explicitly formulated causal models and makes the reasoning explicit in the form of path diagrams and structural equations. Regression analysis is then used to construct path coefficients or beta weights. Several assumptions are required by this model of path analysis. In the given example; teacher age, teacher sex, teacher training, and class size are assumed to influence democratic classroom control directly, and also through their influence on teacher orientation toward task accomplishment (which is assumed to influence democratic classroom control directly). There are a number of advantages of path analysis, as well as a number of technical and practical problems. Path analysis enables evaluators to conduct local decision-oriented studies and at the same time to investigate theoretical causal mechanisms. However, there are many difficult problems associated with the valid use of the technique, and care must be taken in its application. (Author/CTM)

Descriptors-Academic Achievement, Affective Behavior, Behavior Change, *Changing Attitudes, Elementary Secondary Education, *Experimental Programs, *Performance Based Education, Program Effectiveness, *Program Evaluation, *Student Attitudes, Student Behavior, Teacher Attitudes, *Teaching Techniques

Identifiers-Las Cruces Public Schools NM

A competency-based education program was implemented in the Las Cruces, New Mexico public schools, with emphasis on teacher training and field testing of various competency-based models. Program impact was determined according to changes in teaching techniques, student achievement, and student social behavior in both experimental and control schools. Pre- and post-test attitude questionnaires were administered to both teachers and students. Students were tested in ten areas of language and mathematics achievement, using the California Test of Basic Skills. The results indicated the program was effective in changing the behavior of teachers toward a more cooperative and student-oriented (individualized) style. The affective behavior of the students was also changed as a result of the program; there were more achievement-oriented and fewer ambivalent students at the end of the program. No significant differences were found in student achievement between program participants and controls. This may be explained by premature timing of the achievement test administration. Appendices include brief descriptions of the School Image Description Questionnaire and the Instrument for the Observation of Teaching Activities; the Student Behavior Description Questionnaire; and the Philosophy of Teaching Form. Brick, Robert H.

On the Appropriateness of Testing Black Self-Concept.

Pub Date-10 Nov 77
Note-8p.; Paper presented at the Annual Meeting of the Midsouth Educational Research Association (6th, Birmingham, Alabama, November 10, 1977)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Black Attitudes, *Blacks, Black Stereotypes, *Group Status, *Identification (Psychological), Literature Reviews, Racial Attitudes, *Self Concept Tests, *Self Esteem, *Social Influences, *Test Validity

The author discusses the thesis that self-concept tests are not construct valid for blacks because they may be measuring group (rather than individual) self-concept. In several listed studies, black children failed to identify with their own group in doll selection tasks. Williams suggested that children's social learning emphasizes the concept that black is bad and white is good. Clark, in 1939, suggested that black self image is a reflection of society's image of blacks. Hraba and Grant found more positive self concepts in black children in 1970, perhaps due to the local "Black Movement" and increased pride. Fox and Jordan also found that social change enhanced black self esteem in a study of black, white, and Chinese children. A study comparing black and white college students in 1963 and in 1969 indicated that blacks felt increasingly positive toward blacks and less positive toward whites, while white attitudes remained constant. The author feels that it is plausible to assume that black self concept is a function of group rather than individual dynamics, since cross-sectional studies indicate shifts in self concept were uniform for the majority of black respondents. The project described here focused on obtaining basic information on the memory representation of movement stimuli. When a learner makes a simple movement and is later asked to reproduce it, what is abstracted from the first movement that allows accurate reproduction of the second. The underlying assumption of the project was that unless basic knowledge about how movement information is represented, stored and retrieved, practical considerations on how to teach motor skills will be ill-founded. Thus this report describes a series of experiments which were directed toward that goal in an attempt to isolate the contributions of movement information. Findings that examine the relative contributions of central and peripheral components in simple movement control are summarized, and educational implications are presented. (Author/RD)

Descriptors-*Analysis of Variance, *Bayesian Statistics, Hypothesis Testing, Tests of Significance

A Bayesian analysis for 2 to the k power factorial arrangements of treatments is presented in this paper. To perform the analysis, an experimenter must specify prior distributions on an orthogonal set of linear functions representing the main effects and interactions and on a function representing the grand mean. The solution is relatively straightforward and not unduly complex numerically. The independence of the functions and the fact that they represent the primary concerns in a factorial arrangement aids in the conceptualization of prior distributions. The independence also facilitates the computation of likelihoods since univariate normal distributions must be evaluated rather than a multivariate normal distribution. An experimenter may desire posterior distributions on other comparisons of the treatment means that are not included in the orthogonal set. For these situations a method is presented whereby posterior distributions for any Scheffe type contrast of the means can be generated without great difficulty. Although the solution given in this paper is specifically for 2 to the k power factorial arrangements, the method is immediately generalizable to any factorial. (Author/CTM)

Identifiers-Interrater Reliability

The development of a contextual classroom observation system is described. The system consists of an instrument, trained observers, data handling, and analysis. Thus, instrument development was necessarily paralleled by the development of training procedures, data recording and processing systems, programming, and analytic techniques. The comprehensive observation system described was initially developed for use in the evaluation of Head Start and Follow Through programs, but has received wide application and has led to the development of a number of derivative observation systems. Data collection forms concerning the physical classroom environment, the snapshot of the classroom, and five-minute samples of interpersonal relations are included. (Author/GDC)

Note-45p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Decision Making, Early Childhood Education, Evaluation Methods, *Federal Programs, Information Dissemination, *Information Utilization, Performance Factors, *Policy Formation, *Preschool Programs, *Program Evaluation

Five different program evaluations were described to indicate those qualities which make an evaluation effective or not effective. Evaluation effectiveness was defined as impact on decision making or long-term policy formation, and influence upon a variety of audiences. Robert D. Matz described the First Chance Project, and concluded that the evaluation methodology used to inform policymakers should be distinct from the approach used to improve teaching. John M. Love, who was associated with the national Home Start Demonstration Program, felt that several factors contributed to the value and use of evaluation information: evaluations planned with the program; timely reports; rigorous experimental design; respect between agency and evaluators; demonstrated relationships between process and outcomes; and non-controversial appeal of the program. Project Developmental Continuity was discussed by Arthur C. Granville. Factors affecting evaluation impact included the relevance of quantitative data; sociopolitical acceptability of the implications; and pertinence to evaluation criteria. Allen G. Smith, who discussed Project Follow Through, supported close relationships between evaluation research and curriculum. Lawrence J. Schweinhart of the Ypsilanti (Michigan) Perry Preschool Project recommended intensive one-site studies, determination of the feasibility of longitudinal studies, and adequate funding. (GDC)

Guidelines are presented for project evaluation techniques with emphasis on the management of a project or an educational program. Part One general considerations discusses the four basic concepts of the decision-making evaluation model: objectives, evaluative criteria, analysis/synthesis, and evaluation. Stages in the evaluation of a system are also outlined. Part Two evaluation design considerations describes the roles of various evaluation personnel; summarizes nine approaches to educational evaluation; lists indicators or evaluation criteria; and presents twelve steps for designing the evaluation. Part Three examples of project evaluation design defines the educational system and evaluation sub-system; discusses the role of teachers, students, and headmasters; and characterizes both macro-evaluation and micro-evaluation. The steps involved in curriculum design, experimentation, and evaluation are also briefly outlined. A questionnaire for designing a micro-educational evaluation is appended, as well as interviews with evaluation specialists representing different approaches to evaluation: consequence-oriented; responsive; and goal-free. Forty-one bibliographical references are included. (GDC)

The problems in implementing and evaluating a television project for teaching reading in thirteen District of Columbia schools are described, and the opinion is offered that the project was successful in producing a rapid improvement in the students' interest in improving their reading ability. Participants were 300 students in grades four through seven and in grade ten who were reading two or more years below grade level. The project was in operation for periods varying from two to four months because of delays in the delivery of essential equipment. A list of data summary tables and attitude questionnaires are appended. Raw data and summary tables are available from the evaluators. (Author/CTM)

Identifiers-Wechsler Intelligence Scale for Children, Wechsler Intelligence Scale for Children (Revised), Wide Range Achievement Test

Regression lines for the prediction of Wide Range Achievement Test (WRAT) scores by Wechsler Intelligence Scale for Children (WISC) and WISC Revised (WISC-R) intelligence quotients were compared across race, by the Potoff technique. Subjects were 36 black and 30 white children who were referred for psychological evaluation because of learning or behavior problems. Regression lines for blacks and white did not differ significantly for the prediction of WRAT scores by either the WISC or WISC-R. Results lend general support for the use of a common regression line in the prediction of achievement scores for the two races. (Author/GDC)

Descriptors-Academic Achievement, *Achievement Rating, *Educational Quality, Elementary Secondary Education, National Norms, *Scores, *Standardized Tests, *State Surveys, *Student Evaluation, Testing Programs

Identifiers-*New York

Data were collected from a number of sources evaluating the performance of elementary and secondary school students in New York State. Comparison of New York students against the other 49 states, and of various regions within New York state, led to the following conclusions. New York state produced a larger number of high-scoring students on college entrance examinations than any other state. Advanced Placement Examinations data indicated that New York state high school students also led in qualifying for college credits. New York high school graduates outperformed the other states in the National Merit and Achievement Scholarship Programs, and formed a large proportion of the Westinghouse Science Talent Search selections. Within the state, the metropolitan New York City area, Albany, and the Binghamton-Ithaca region led in mathematics and reading test scores. The schools in the western portion of the state appeared to be doing the most to overcome demographic conditions. New York City represented a paradox: performance on the Pupil Evaluation Program was far below the state average, yet the city's high school graduates outperformed the entire United States in the Westinghouse Science Talent Search. Descriptors-Achievement Tests, City Wide Programs, Educational Accountability, *Educational Assessment, Educational Objectives, *Educational Testing, Elementary Secondary Education, *Standardized Tests, State Programs, Testing Programs, Test Interpretation

Some uses of achievement tests to provide information for school administrators are described. Three systematic programs are described briefly: (1) a computer-based approach to management and planning designed to answer what is to be learned, how is it to be learned, and has it been learned; (2) a problem solving design for accountability that makes the school the unit of analysis; and (3) a statewide program designed to help classroom teachers, principals, and curriculum directors conduct systematic evaluations. The usefulness of standardized tests for determining how well educational objectives are being met is briefly considered. They are described as probably the most open, most consistent, least biased, cost-effective, and convenient ways of getting information. The importance of a measurement specialist to a school district is mentioned. Comments are made about the importance of using and sharing the information obtained from testing programs. (Author/CTM)

Identifiers-Michigan, Michigan Educational Assessment Program, Rasch Model, *Test Length

A new method of analysis was used in the Michigan Educational Assessment Program to test minimum competencies in fourth grade reading achievement. This technique permitted a substantial decrease in testing time and costs. The original test consisted of 95 items measuring 19 objectives; mastery was indicated by correct responses to four out of the five items measuring each objective. Data from those 1,096 students whose raw scores were between 36 and 83 were re-analyzed. Several tests were used to determine which items were acceptable for analysis using the Rasch model. It was felt that the 95 items fit the Rasch model, and that the item calibrations would yield standard log achievement scores (SLAs) that would accurately summarize where students fell on the latent trait measured by the test. These SLAs provided essentially the same information as the number of objectives mastered, with a shorter test. For most students, the items were relatively simple given student achievement levels; therefore, the amount of information provided was slight. A short, ten-item test was developed; analysis indicated that it imposed a more rigid criterion than the longer test. Mastery decisions using the short test led to 14.9% fewer Type II errors (false negatives) and 1.6% more Type I errors (false positives). (GDC)

Path Analysis: A Brief Introduction.

Note-22p.

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Correlation, *Critical Path Method, Hypothesis Testing, *Mathematical Models, *Multiple Regression Analysis, Predictor Variables, *Research Design, Research Methodology

Path analysis is presented as a technique that can be used to test on a priori model based on a theoretical conceptualization involving a network of selected variables. This being an introductory source, no previous knowledge of path analysis is assumed, although some understanding of the fundamentals of multiple regression analysis might be helpful. Included is a summary of some of the basic procedures involved in performing a path analysis, as well as a discussion of path diagrams, path coefficients, and model testing with path analysis. Additional references, with annotations, to more advanced and detailed discussions of path analysis are also included. The procedure of path analysis is summarized as follows: (1) formulate a theoretical conceptualization of the causal structure for the relevant variables, and construct a path diagram representing your theoretical causal structure; (2) calculate the path coefficients using regression analysis; (3) decompose the bivariate relationship into direct and indirect causal components; (4) delete those paths from the model that were found to be nonsignificant, and reconstruct the original correlation matrix from the modified path model; (5) note the discrepancies between the original and the reconstructed correlation coefficients, and retain or reject the proposed model based on the nature and the number of these discrepancies. Descriptors-*Achievement Tests, Content Analysis, Curriculum, *Curriculum Development, Educational Accountability, Educational Objectives, Intermediate Grades, Relevance (Education), *Student Testing, *Teacher Attitudes, *Teacher Role, Test Selection, *Test Validity

The educational accountability movement is changing the teacher's role in curriculum development from that of autonomous decision maker to agent of public school policy makers. To assess teacher reactions to factors influencing their autonomy, 75 teachers were exposed to pressures to change the content of fourth grade mathematics instruction in a hypothetical school. Teachers were receptive to change whether the pressure came from parents, other teachers, the building principal, published instructional objectives, textbooks, or test results. Furthermore, teachers did not consider new topics as necessarily supplanting the old. Tests have an influence on curriculum because they can be viewed as concrete statements of the public's curriculum expectations. As such, tests should be contructed so that items are written for each of list of predefined objectives. Standardized achievement tests hold students accountable for only a fraction of objectives. The promise testing holds as a mechanism for affecting curriculum depends on communicating test content. A taxonomy has been constructed to identify content differences among standardized achievement tests. As a test selection tool, it should provide an index of the relationship between test and instructional content. A sample page from the taxonomy is appended. (CP)

Identifiers-*Bateria de Examines de Aptitud General, *General Aptitude Test Battery, Test Manuals

The development and norming of a Spanish language edition of the United States Employment Service (USES) General Aptitude Test Battery (GATB) is described. The new edition, called the Bateria de Examenes de Aptitud General (BEAG), was designed to replace an earlier translation, the BGPA, prepared for use in Puerto Rico. Forms A and B were developed to have identical item content with the GATB except for Part 1 (Name Comparison) and Part 4 (Vocabulary) which required Spanish names and vocabulary rather than English. Experimental procedures, norms samples, and results are described for an administration of the tests to bilingual groups of high-school seniors and adults with less than high school education. Item analysis indicated a number of items in Part 4 were unsatisfactory. A revised edition was prepared and a second comparability study was performed. Another study was performed to compare the BEAG with the BGPA. (CTM)

Generalization of Findings From Single Case Studies.
Pub Date-Mar 78
Note-26p.; Paper presented at the Annual Meeting of the American Educational Research Association (62nd, Toronto, Ontario, Canada, March 27-31, 1978); Not available in hard copy due to marginal legibility of original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-*Case Studies, *Data Analysis, Educational Research, *Evaluation Criteria, *Evaluation Methods, *Generalization, Guidelines, *Research Methodology, Sampling, Statistical Analysis
Identifiers-*Sample Size

Although single case studies might be useful to evaluators for a variety of purposes, there are no generally accepted ways for drawing inferences about the generality of findings from a case study. Single case studies are defined in this paper as either studies of single events, or disaggregated studies of multiple events. The data may be qualitative or quantitative, and may be derived from controlled experiments or from observation. There are two spans to the bridge of inference. The statistical span connects the experimental sample to a popluation just like that sample. The second span connects the population to a group judged to be sufficiently similar. In case law or in clinical practice, the judgment of sufficient similarity that is, the judgment of the appropriateness of the generalization is made by the user. This application of single case data may also be appropriate in educational evaluation. (CTM)

Descriptors-*Bayesian Statistics, *Cutting Scores, *Decision Making, Logic, Mastery Tests, *Mathematical Models, Test Interpretation

Identifiers-Decision Theoretic Models, Utility Theory

A coherent system of decision making is described that may be incorporated into an instructional sequence to provide a supplement to the experience-based judgment of the classroom teacher. The elements of this decision process incorporate prior information such as a teacher's past experience, experimental results such as a test score, and preferences or values. Beginning with a basic example in which the prior information is the probability that a student having taken a course will have mastered it; the experimental result is a test item score, and the values expressed are the costs of wrong pass-fail decisions. Equations and numerical examples demonstrate the solution to this and to more complex problems. Following these examples is another group of examples that abandons the notion of loss or costs in favor of the notion of the utility functions for various decisions. There are discussions of the formal structure of decision theory and of utility theory. Many of the examples are complex and much of the argument is expressed in integrals or summation equations. Topics include: normal form analysis and extensive form analysis; continuous posterior probabilities; a binomial model; threshold utility; linear utility; quadratic, exponential, and squared exponential utility; and three action examples. Descriptors-*Analysis of Variance, *Bayesian Statistics, *Mathematical Models, Tests of Significance

The standard statistical analysis of data classified in two ways (say into rows and columns) is through an analysis of variance that splits the total variation of the data into the main effect of rows, the main effect of columns, and the interaction between rows and columns. This paper presents an alternative Bayesian analysis of the same situation that is appropriate for certain types of prior knowledge. It leads to a rather different treatment of the three factors just mentioned. This analysis proposes a four stage model. The first stage describes the dependence of the x's on the thetas; the second, that of the thetas on the alphas and betas; the third describes the structure of the alphas and betas; and a fourth stage is necessary to describe the prior distributions of mus. Appendices provide derivations and a numerical example. (Author/CTM)

Descriptors-Elementary Education, *Evaluation Methods, Evaluation Needs, *Instructional Materials, *Needs Assessment, *Program Evaluation, *Simulation, *Training Techniques, Worksheets, Workshops

The CEVAL simulation exercise is appropriate for use in a workshop setting with up to 30 persons. It gives non-administrative groups school board members, parent advisory councils, teachers, and parents experience in making evaluative decisions, from the perspective of a school principal evaluating five special programs in an elementary school. The exercise, which can be played in 50 to 90 minutes, is designed to acquaint the player with the frustrations and rewards of evaluation, as well as the educational and political context in which evaluation takes place. This document includes instructions for the workshop trainer and one copy of each of four sets of handouts for the participants: (1) summary of rules and background information about the school and its programs; (2) report from the evaluation consultant describing possible methods of evaluation; (3) assessment selection form, used to determine the amount of time devoted to different evaluation activities; and (4) interdistrict memo, which lists eleven questions asked by parents about the effectiveness of the basic education program. Identifiers-Causal Inferences

Recent theoretical and empirical study has considerably refined knowledge as to the dynamics of peer processes operative within secondary schools, but has tended to neglect models incorporating reciprocal effects. This situation results partly from a scarcity of appropriate data, and partly from limitations of older methodologies of estimating such models. This project makes use of rich survey data, including sociometric information and actual peer responses, and applies some recently developed estimation techniques to estimate the parameters, and the relative predictive power, of two alternative models for the influences of peers on academic achievement. The estimations are complicated by the appearance of unusual patterns in the data. However, they tend to indicate a better fit of the conceptualization which postulates direct reciprocal influences of each student's achievement on that of his peers, in contrast to an alternative model in which achievements depend only on the values of self and peers. In addition to the substantive results, the report also describes some methodological issues and comments on them. (Author/CTM)

Descriptors-*Achievement Tests, Course Evaluation, Higher Education, Medical Students, *Program Effectiveness, *Scores, Testing, *Test Wiseness, *Tutorial Programs
Identifiers-*National Board of Medical Examiners Part I Exam

Seventeen medical school students who participated in a commercial test preparation course were matched with 17 other students judged to be of equal ability. These two groups were compared on the basis of their scores on Part I of the National Board of Medical Examiners (NBME). The two groups were matched closely on both the grade point average for the first two years of medical school and scores on a pretest. Students who took the commercial course scored significantly higher on Part I and 16 of the 17 passed, whereas 9 of the control group failed. Questionnaire and interview results indicated that: (1) students were motivated to take the course by fear of failure on the examination; (2) the course offered a well organized approach to condensing two years of study and concentrated on information relevant to the examination; and (3) that instruction in test-taking techniques was not among the most valuable features of the course. Descriptors-Academic Standards, Basic Skills, *Educational Needs, *Educational Problems, *Educational Trends, Elementary Secondary Education, Mastery Learning, *Minimum Competency Testing, *Performance Based Education, School Role, State Programs

Identifiers-Michigan, Michigan Educational Assessment Program

The most important aspect of competency-based education is clearly linked to Bloom's mastery learning model: the establishment of behaviors which ought to be learned and adequately performed by public school students. The main components of competency based education are: (1) establishment of student standards; (2) student testing; and (3) professional development of school staff. These components have been a part of Michigan's competency based program for several years. Competency based education is difficult to institutionalize because school personnel are not trained to provide it; because discrepancies exist between parents' and teachers' expectations of students, textbooks used, tests used, and report cards used. Societal and technological changes in the United States, as well as an interest in equality and in effective use of taxes in support of education, have led to a changing role for today's schools. National policy no longer supports the idea that schools should screen, sort, and select students. Competency based education offers the potential to provide equality, equity and excellence in education, because it supports individualized instruction, emphasis on results, parent involvement, cohesive teacher education, and linking between schooling and employment. Descriptors-Elementary Secondary Education, Evaluation Methods, *Formative Evaluation, Institutional Research, Models, Needs Assessment, *Program Improvement, *School Improvement, School Personnel, *School Planning, *Staff Role

A framework is described for the development of knowledge, skills, and resources necessary to conduct school planning and evaluation activities. The major issues pertaining to a building-based planning and evaluation model are discussed. The building-level approach is recommended because it results in greater efficiency in the development, refinement, and delivery of school services for students. The comprehensive study of a school, as described here, can be easily infused into the accreditation process. These processes were field tested in elementary and secondary schools in Michigan. It was found that the task force approach to planning successfully increased staff involvement in program planning, development, and evaluation. Building personnel were more accepting and supportive of programs which they helped to design. According to the model, involvement of the school principal, the project coordinator, and the building consultant are all essential. The external review team, consisting of accreditation personnel, monitors the progress and products of the school staff. This model can be implemented at the request of the school principal or a divisional director. It consists of five stages: (1) orientation; (2) self-study; (3) cooperative planning; (4) pilot implementation and evaluation; and (5) full-scale implementation and evaluation. (GDC)

Identifiers-Computer Assisted Testing, Tailored Testing, *Test Anxiety

Volunteer college students were assigned to one of six computer administered vocabulary tests, one half with immediate knowledge of results (KR) after responding to each item, and the other half without knowledge of results. The six tests were designed to be at one of three levels of difficulty and consisted either of 50 preselected items (conventional testing) or tailored on the basis of previous candidate responses (stradaptive testing). Results indicated that the mean maximum-likelihood estimates of individuals' ability varied as a joint function of the KR condition and of test difficulty. Students in the KR condition scored higher than the other students on the most difficult test and lower on the least difficult test. Questionnaire results indicated that, although the students perceived the differences in test difficulty, there were not shown to be any effects on mean student anxiety or motivation scores attributable to test difficulty alone. Students in general reacted very favorably to receiving immediate knowledge of results and its provision increased the mean level of reported motivation. (Author/CTM)

Identifiers-Canada, *Students Perception of Ability Scale

The Student's Perception of Ability Scale (SPAS) was developed in response to a need for a reliable and valid instrument to measure academic, rather than general, self-concept in elementary school children. This scale was designed for use with children in Grades 3 to 6. Descriptive data on the SPAS were discussed in terms of its substantive, structural, and external validity. Normative data were given. More specifically, the scale was found to have six meaningful factors, good alpha and test-retest reliability, and strong discriminant and experimental validity. Validity data were presented which indicate that the SPAS clearly differentiates between children who have learning problems and those who do not, and that it correlates about .50 with school grades. The authors concluded that the SPAS measures a unique domain of academic self-concept and has good measurement characteristics. They also discussed possible practical and research implications for the scale. (Author/CTM)

Identifiers-*West Virginia

In response to a directive of the West Virginia Board of Education, the State Superintendent of Schools prepared this overview of student achievement in the state which reviews state level activities to enhance school conditions, and summarizes major recommendations for plans to improve student achievement. Indicators of schooling outcomes include data on the 1977 status of 1976 graduates; average Scholastic Aptitude Test scores for nine previous years; average American College Testing Program scores for nine previous years; and data on placement of vocational students in 1977. The program review discusses state level activities concerning: curriculum, special education, professional development, support services, compensatory education, libraries and other learning resources including innovative projects, child nutrition, equal educational opportunity, transportation, assessment and evaluation, facilities, energy conservation, vocational and adult education, and finance. Five priorities for the coming year are: improving mathematics achievement; improving education for the secondary years; continuing reading achievement improvement; expanding education for exceptional children; and developing a state assessment program. Identifiers-*Evaluation Problems

This survey identified problems encountered by deans and admissions staff from 35 graduate schools regarding a typical undergraduate assessment and reporting procedures such as credit by examination, credit for prior learning or field experience, narrative transcripts, and pass/fail grading. Eighteen of these schools were studied in depth via site visits in order to provide attitudinal and anecdotal information. Graduate school deans and faculty reported that they have not received a great number of nonstandard transcripts or transcripts with nonstandard notation. Nevertheless, when such records do appear in student applications, they cause two major problems: because grades usually are not associated with nonstandard notation, grade-point averages cannot be calculated easily; and information that explains nonstandard notation rarely accompanies the transcripts. Credit by examination, credit for prior learning, and credit for faculty-sponsored field experience cause fewer problems in the admissions process than narrative transcripts, provided the number of these credits is small and not in the student's major field. Narrative descriptions of achievement are problematic because of the lack of a comparative basis for judgment, the uneven nature of the descriptions, and the length of the reports. Survey questions and sample transcripts are appended. (Author/GDC)

Identifiers-*Graduate Record Examinations

The data presented in this report summarize the background characteristics of 234,796 college students who took the Graduate Record Examinations (GRE) Aptitude Test during 1975-1976 and who responded to at least one of the thirteen background questions. Response data are presented for the following questions: (1) whether or not GRE tests have been taken previously; (2) U.S. citizenship; (3) whether or not English is the primary language; (4) ethnic or racial background; (5) undergraduate enrollment of undergraduate institution attended; (6) public, private, or religious affiliation of undergraduate institution; (7) year bachelor's degree received; (8) most recent year in which graduate school was attended at least half-time; (9) public, private, or church affiliation of graduate institution; (10) graduate degree objective; (11) age; (12) undergraduate major; and (13) intended graduate major. Additional tables compare responses to two questions (such as ethnic group, age, degree objective), and cross tabulate verbal and quantitative scores on the GRE or sex of student with selected responses. Identifiers-*Graduate Record Examinations

When two different forms of a particular test are given to different groups of candidates, it is often necessary to make the test results for the two tests or groups as comparable as possible; the statistical process used for this purpose is termed equating. Two different methods of equating Graduate Record Examinations (GRE) Advanced Tests were compared. One method used data from a group of items that were common to both tests, while the other method used data from the GRE verbal aptitude test and quantitative aptitude test, also taken by both groups of candidates. The results of 158 equatings for the 17 GRE Advanced Tests were tabulated and presented graphically. Out of the 17 different test series, nine different series had equating differences at one end or the other of the score distribution equal to about one half a standard deviation, and about three percent of the 158 equatings had differences of over one standard deviation. Descriptors-*Administrator Attitudes, College Deans, *Doctoral Programs, Educational Objectives, *Educational Quality, *Evaluation Criteria, Graduate Study, Higher Education, Institutional Characteristics, *Program Attitudes, Program Content, Program Evaluation, *Success Factors, Surveys

Graduate school deans were surveyed to identify characteristics indicating Ph.D. program quality, as well as acceptable ways to measure such characteristics. Doctoral programs in many different fields of study were considered, but three purposes of a Ph.D. program were emphasized: the training of scholarly researchers, college teachers, and professional practitioners. Two separate questionnaires were sent to 63 deans; 60 responded to at least one questionnaire. The first involved program characteristics that indicate quality for each of the three training goals. The second dealt with the availability and adequacy of measures of these program characteristics. Data were also collected on the background characteristics of the respondents. The results indicated that the most important criteria included: (1) faculty training, research activity/productivity, and teaching effectiveness (2) student ability before and after the program, and graduates' accomplishments; (3) financial support for the program, library, laboratory, and facilities; and (4) program purposes, courses offered, and admission policies. Ways to measure these criteria were suggested; data were provided about their adequacy and availability, and percent of administrators preferring each measure. The respondents also ranked the importance of the major tasks performed in their own institutions. (GDC)

Identifiers-*Graduate Record Examinations, *Tests of Scientific Thinking

This study provides preliminary evidence as to the validity of measures derived from the Tests of Scientific Thinking'' (TST). The TST and the Graduate Record Examinations (GRE) were compared with regard to their relationships to interests, self-appraisals, and accomplishments of students during their first year of graduate work in psychology. Criterion variables were obtained from a questionnaire mailed to students near the end of the spring academic semester. Difficulties in data analysis were created both by the item-sampling character of the experimental test data, and by a relatively small rate of return of questionnaires. It is possible to show, however, that the correlations do exhibit appreciable nonchance variance with regard to consistency across tests and across related questionnaire variables. The GRE tests were found to be more effective than the experimental instruments in predicting quality of the department attended, but the experimental tests were more effective in two other domains: self-appraisals of knowledge of psychology and skills in psychological activities; and professional accomplishments such as research, publications, and teaching. This evaluation report describes the outcomes of the third year of an ESEA Title VII continuation grant to refine an exemplary bilingual/bicultural kindergarten-primary prototype program and to develop three new secondary subjects: English for Latinos, Bilingual Typing, and Career Orientation. The 1,004 pupils in the 1976-77 program varied in language dominance from monolingual English through bilingualism to monolingual Spanish. For these pupils in a developmental'' model, bilingual teachers presented the regular curricula in both Spanish and English in a program emphasizing Hispanic culture. The bilingual/bicultural program and the evaluation design are described. Results are presented for kindergarten, English reading, Spanish reading, bilingual language skills, mathematics, secondary school programs, English for Latinos, and bilingual typing. Additional studies include attitudes toward school, a parent survey, a bilingual typing survey, a modified cloze test for Spanish reading comprehension, a census of limited-English-speaking pupils, and evaluation of a preservice workshop. Identifiers-*Air Force Officer Qualifying Test

The construction and norming of Form N of the Air Force Officer Qualifying Test (AFOQT) is described. The new form serves the same purpose as its predecessor and possesses basically the same characteristics. References are made to the research which provided the basis for most of the changes. Other changes were made because of the admission of women to the Air Force. The test battery yields five composite scores: Pilot, Navigator-Technical, Officer Quality, Verbal, and Quantitative. Two sets of conversion tables are provided for examinees' scores according to educational level two or more years of college, and less than two years of college. Standardization was accomplished by administering the test to samples of examinees from all major sources for commissioned personnel in the Air Force as well as to a sample of second lieutenants. Conversion tables for each raw score composite to percentile ranks are given, as are score distribution summary data and distribution curves. Summaries of item difficulty data and test reliabilities are given. (Author/CTM)

Descriptors-*Chemical Analysis, *Equivalency Tests, Feasibility Studies, *Laboratory Techniques, Laboratory Technology, *Law Enforcement, *National Surveys, Performance Tests, *Science Laboratories, Test Construction, Testing Programs, Work Sample Tests

Identifiers-*Crime Laboratories

A three-year research effort was conducted to design a crime laboratory proficiency testing program encompassing the United States. The objectives were to: (1) determine the feasibility of preparation and distribution of different classes of physical evidence; (2) assess the accuracy of criminalistics laboratories in the processing of selected samples of physical evidence; (3) conduct statistical studies of the tests administered; and (4) establish the basis for the design of education and self-improvement programs which will assist the criminalistics profession to higher levels of proficiency. The following types of samples were manufactured, packaged and distributed: controlled substances, blood, paint, glass, hair, fibers, firearms, physiological fluids (semen, saliva), questioned documents, wood, arson accelerants, soils, and metals. The data were analyzed by giving full, partial or no credit, depending upon how thoroughly the work was performed. It was concluded that voluntary, anonymous proficiency testing is both feasible and necessary, and that there is a need for ongoing proficiency testing. A wide range of proficiency levels was found among the nation's laboratories, with several evidence types posing serious difficulties for the laboratories. The majority of laboratories lacked the financial resources to participate in a proficiency testing program on a fee basis. Several recommendations were made. (Author/GDC)

Descriptors-*Affective Behavior, *Affective Tests, *Age Differences, Attitude Tests, Elementary Secondary Education, Locus of Control, Parent Attitudes, *Racial Differences, *School Attitudes, Self Concept, Self Concept Tests, *Sex Differences, Student Adjustment, Student Attitudes, Student Teacher Relationship, Tables (Data), Test Results, Values

Test results were consolidated from needs assessments or program evaluations conducted between 1969 and 1978, and extensively analyzed. About 120,000 elementary and secondary students and their parents were tested; the majority of the sample is from the Southeast, and of these the largest number are from Alabama. Five tests were interpreted: (1) Feelings About School; (2) Locus of Responsibility Scale (classroom decision making); (3) Relationship Inventory (teacher attitudes toward student); (4) four levels of the Index of Adjustment and Values (perception of self and others); and (5) Parent Inventory. Data were first summarized to provide descriptive and normative statistics and then examined for trends by grade, sex and race. White females had the most positive school attitudes and enjoyed the best relationship with their teachers, although for all groups both attributes decline with increasing age. Parents' attitudes likewise became more negative. The Index of Adjustment and Values gave the most extensive evidence regarding the affective effects of education. Perception of self and others and value adherence deteriorate with age. On self concept, males scored lower than females and whites scored lower than blacks. Blacks scored lower on values than whites. Implications of the results are discussed and copies of the tests are included. (CP)

Descriptors-Conference Reports, *Educational Testing, Evaluation Methods, Federal Regulation, *Government Role, Information Dissemination, *Minimum Competency Testing, Program Evaluation, State Programs, Student Testing, *Testing Problems, *Testing Programs, *Test Interpretation, Test Results

The speeches presented at the second national conference on testing deal with models for program evaluation, reporting of test results, minimum competency programs, and the role of state and federal government in educational testing. Various approaches to program evaluation, and its relationship to testing are described by Michael Scriven, Lee J. Cronbach, and Robert E. Stake. Responsible reporting about testing is then discussed by Frank J. Macchiarola, chancellor, New York City Public Schools; Harry Handler, deputy superintendent, Los Angeles School District; and Ronald D. Moskowitz, education correspondent, San Francisco Chronicle. The problems and prospects of minimum competency testing programs are reviewed by Chris Pipho, Walt Haney, and Ken Loewe, who describes recent experiences in Florida. Speakers on the government role in testing include Alexander I. Law, representing California; A. Craig Phillips, from North Carolina; and John W. Evans and David M. Shoemaker of the U.S. Office of Education. Concluding remarks are made by Michael Scriven. (GDC)

Descriptors-Enlisted Personnel, *Item Analysis, *Occupational Tests, Promotion (Occupational), *Racial Differences, Technical Occupations, *Test Bias, *Test Construction, Test Items, Test Reliability, Test Validity

Identifiers-*Item Difficulty, *Item Discrimination (Tests), Test Length

A comparative study of item analysis was conducted on the basis of race to determine whether alternative test construction or processing might increase the proportion of black enlisted personnel among those passing various military technical knowledge examinations. The study used data from six specialists at four grade levels and investigated item analysis data indicating item difficulty, item-test point-biserial correlation, item-subtest correlation, item differentiation (between high scoring and low scoring groups), and item-criterion correlation (where the criterion was the performance factor rating). It was found that item differentiation was generally lower for blacks than for whites; that the highest item-differentiation values tended to be for easier items; that items that were nearly equal in difficulty for blacks and whites tended to be very difficult items; and that items with high item-criterion correlations tended to have low item-test correlations. It was also found that tests of 20 to 30 items selected by the item-criterion correlation method were more valid than longer tests up to 150 items. Various aspects of item analysis are discussed and data are provided for a variety of comparisons. (Author/CTM)

Identifiers-Auburn University Montgomery AL, Local Norms, Minnesota Teacher Attitude Inventory

Norms are presented for various categories of undergraduate and graduate students of education at Auburn University at Montgomery for the total score on the Minnesota Teacher Attitude Inventory. The population was limited to students enrolled in education courses from fall 1973 through 1976, and included 612 volunteers who responded anonymously. Groups found to have significantly more positive attitudes towards children and school work were students in Early Childhood/Reading and in Elementary-Special Education. Those in Secondary-Academic, Counseling-School, and Administration/Supervision had less positive attitudes. Demographic characteristics associated with more positive attitudes include: having at least one offspring, having no work experience prior to teaching, and being female. Characteristics associated with less positive attitudes include: having six or more siblings, being male, having a younger brother, and having had other work experience prior to teaching. Identifiers-California

Seven prepared papers, with questions from the audience and answers by participants make up the proceedings of this conference on minimum competency testing. A number of conceptual and technical problems were raised, as well as questions about the effects of minimum competency testing on the curriculum and the psychological effects of the program on students, teachers, and others. The moral and legal problems concerned with phase-in periods, the match between the test and the curriculum, the possibility of racial discrimination, and the characteristics of a model program were discussed. Techniques for implementing cut-off decisions were described and the place of human judgment was debated. A suggestion was made that scaled certification was preferable to categorical pass-fail decisions. Comments were made on a series of possible positive and negative effects of minimum competency testing. The California state testing program was described, and questions were raised about the process and validity of setting standards. The speakers included Decker F. Walker, Merle Steven McClung, Carol A. Dwyer, Loretta A. Shepard, Ellis B. Page, Ruth S. Nickse, and Dale Carlson. (CTM)

Descriptors-*Classroom Observation Techniques, Classroom Research, *Data Analysis, *Data Processing, Discriminant Analysis, *Effective Teaching, Observation, *Research Methodology, Scoring, *Teacher Evaluation, Test Reliability

The Carroll County (Georgia) Competency-Based Teacher Certification Project developed a measure of teacher effectiveness, the 341-item Georgia Assessment of Teacher Effectiveness, based upon five previously published classroom observation systems. Three concerns were drawn from the development of this instrument: (1) the reduction of observational data to meaningful units for later analysis; (2) the scoring of these data to produce reliable indices of teacher behavior, and the provision for meaningful feedback in the form of behavioral profiles; and (3) the use of discriminant analysis to contrast a priori groups of teachers on the behavioral indices. The data were recorded by observers and keypunched to be transcribed to machine-readable form. Flexibility, ease of transcription, and compactness were useful characteristics of this process. The observers coded teacher behavior according to low-inference rating processes. The computer program then provided scores for behaviors which were already determined to be indicators of effective teaching. It provided functions for data aggregation, scoring of keys, extimation of reliability, and provision of profiles of each classroom. Discriminant analysis was used to compare the results for three groups of teachers (metropolitan, small town, and rural) and two groups of student teachers (from urban and rural universities). The two groups of student teachers were most extreme in their differences. The data are appended. (GDC)

This is the first of three volumes designed to cover the problems and issues of developing and managing a formal assessment program. They also offer guidelines and illustrations of several aspects of assessment programs, such as administering tests or documenting their results. This volume deals with the regulations governing school assessment programs in Nebraska, the general purposes for which assessment information is collected, and the kinds of measuring instruments used for such collection. It provides a summary of existing measurement theory and measurement technology with respect to educational settings. It outlines general requirements for assessment and special requirements for Title I and for programs for handicapped children. It discusses the purposes of assessment for accountability, diagnosis, and management and criterion measures. It discusses varieties of tests and assessment techniques under three headings: general ability (intelligence or general aptitude and general achievement or educational development); special abilities (primary mental abilities and aptitude batteries and various achievement measures); and measures of typical performance, specifically interest inventories. This is the third of three volumes designed to cover the problems and issues of developing and managing a formal assessment program. They also offer guidelines and illustrations of several of the more special aspects of assessment programs, such as administering tests or documenting their results. This volume contains summaries of technical information. It discusses test reliability and validity. It lists the addresses of several test publishers and provides a classified list of 90 tests or test batteries including achievement tests, diagnostic tests, interest tests, mental ability tests, multi-aptitude tests, personality tests, reading readiness tests, reading tests, and other tests. It lists a variety of sources of information, including professional associations and publications. It provides computing guides for common elementary statistical procedures and a glossary of 67 statistical or measurement terms. (Author/CTM)

Descriptors-Analysis of Covariance, *Cognitive Development, Cognitive Tests, Early Childhood Education, Kindergarten, *Longitudinal Studies, Parental Background, *Preschool Programs, Preschool Tests, *Program Evaluation, Socioeconomic Background

Identifiers-*New York Experimental Prekindergarten Program

In 1975 a longitudinal study was begun to determine the impact of the New York State Experimental Prekindergarten Program on the children's cognitive development. The program enrolls approximately 6,500 children annually. Three cognitive measures were used to evaluate program effects: the Walker Readiness Test for Disadvantaged Children, the Cooperative Preschool Inventory, and the Peabody Picture Vocabulary Test. First-year results indicated that the program had a positive effect on children's performance on the Walker and the Peabody. During the second year, children were studied in kindergarten and in prekindergarten. Results indicate that: (1) the positive effects of the program were still evident on the Walker and the Cooperative at the beginning of kindergarten; (2) effects on the Walker persisted at least until the end of kindergarten; (3) the program was most effective for children whose mothers have the least education and perhaps for children whose families have the lowest income; and (4) the program had a positive effect on the performance of a second wave of children on all three measures administered at the end of prekindergarten. A Paper-Pencil Inventory for the Assessment of Piaget's Tasks.

Pub Date-28 Aug 78
Note-47p.; Paper presented at the Annual Meeting of the American Psychological Association (86th, Toronto, Ontario, Canada, August 28, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-Age Differences, Cognitive Development, *Cognitive Tests, *Developmental Stages, Elementary Secondary Education, Higher Education, Multiple Choice Tests, Test Reliability, Test Validity, *Visual Measures
Identifiers-*Inventory of Piagets Developmental Tasks, Paper and Pencil Tests, *Piagetian Tests

A project to evaluate Furth's Inventory of Piaget's Developmental Tasks is described, particularly as that test might be useful in adapting instruction and curricula to the cognitive level of science students. This multiple-choice paper-pencil inventory has 72 items in five problem areas: conservation, images, relations, classification, and laws. The test was designed to measure both concrete and formal operations for subjects eight years of age and older. This study measured the reliability of the test for groups in third grade, sixth grade, ninth grade, and college. The lowest reliabilities were found in sixth grade, the age closest to the transition from concrete to formal operations. Test validity was studied several ways. Group and individual administrations were found to give similar results. Age trends followed expected patterns. Correlations with test scores and academic grades ranged from .42 to .87. It was concluded that this is a useful test in certain areas, and that it would be valuable to develop norms. The data were not conclusive, but it appeared that this test would also be useful with mildly or moderately retarded adults. (Author/CTM)

Busbee, Cyril B.

South Carolina Statewide Testing Program 1977-78. General Report. Office of Research Report Series. Volume One/Number 40.

South Carolina State Dept. of Education, Columbia. Office of Research.
Pub Date-Aug 78
Note-184p.
EDRS Price MF-$0.83 HC-$10.03 Plus Postage.
Descriptors-*Academic Achievement, *Achievement Tests, Age Differences, Basic Skills, Educational Assessment, Elementary Secondary Education, Grade Equivalent Scores, National Norms, Norm Referenced Tests, *State Programs, *Testing Programs, Test Interpretation, Test Reliability, *Test Results
Identifiers-Comprehensive Tests of Basic Skills, Out of Level Testing, *South Carolina

The results and methodology of the South Carolina 1977-78 statewide spring testing program for grades 3, 6, and 11 are presented and discussed. The discussion of the results focuses on a comparison of the 1978 results to national norms, a comparison of 1978 to 1977 results, a performance comparison across grade levels, and a comparison of skill area and subskill area performance within grade levels. Data are given by race, sex, and Title I status, and statistics are also given for data adjusted to weight white and nonwhite students proportionately to the national normative sample. The first chapter discusses the nature of the testing program, its purpose and objectives, and the changes in the program since its beginning in 1970. Chapter two discusses methodology with respect to student participation, the tests that were chosen, the use of functional-level testing (that is, the use of below-level tests in schools that previously had large proportions of low scoring students), operational procedures, and limitations on the interpretation of test results. Chapter three discusses the interpretation of scores and score reports, describes the various report forms and defines and discusses terminology. The last four chapters present the results of the testing. (Author/CTM)

Descriptors-Cognitive Processes, Deductive Methods, Educational Research, *Educational Theories, Factor Analysis, Individual Differences, Inductive Methods, *Intelligence, *Intelligence Factors, Literature Reviews, *Logical Thinking, Problem Solving, *Psychometrics, Research, *Thought Processes
Identifiers-*Componential Intelligence

The componential conception of intelligence is summarized and contrasted with the psychometric conception. A brief history of concepts of intelligence is presented, beginning with Galton's anthropometric approach and Binet's more educationally relevant approach. Spearman's, and later Thurstone's, contributions to factor analysis promoted a psychometric approach dependent for analysis on individual differences among the persons taking the tests. Sternberg's componential conception, in contrast, is dependent on analyses of the tasks used to elicit evidence of intelligent behavior, the components and metacomponents that the tasks entail, the contents, representations, and formats upon which they operate, and the strategies they allow for combinations of components. Intelligence is conceived of as reasoning ability, either inductive or deductive. Inductive reasoning may be either analogical, classificational, or serial. Deductive reasoning may be transitive or quantified and includes linear, categorical, or conditional syllogistic reasoning. This conception of intelligence suggests numerous possible educational interventions that may be used to increase the intelligent responses that are made in problem solving. This conception of intelligence may serve to strengthen the connections between research on intelligence and research on education. (Author/CTM)

Rudner, Lawrence M.

A Short and Simple Introduction to Tailored Testing.

Pub Date-Mar 78
Note-15p.; Paper presented at the Annual Meeting of the Eastern Educational Research Association (Williamsburg, Virginia, March, 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Ability, Bayesian Statistics, *Individual Tests, *Item Analysis, *Item Banks, *Mathematical Models, Test Construction, *Testing, Testing Problems, Test Items
Identifiers-Adaptive Testing, *Computer Assisted Testing, Fixed Steps Procedure, Flexilevel Tests, Robbins Monro Process, *Tailored Testing, Test Length

Tailored testing provides the same information as group-administered standardized tests, but can do so using fewer items because the items administered are selected for the ability of the individual student. Thus, tailored testing offers several advantages over traditional methods. Because individual tailored tests are not timed, anxiety is reduced and examinee motivation is improved. Economic advantages involve reduced test time, immediate availability of results, and reduced personnel requirements. Effective tailoring occurs at the item level, involving two steps: estimation of the examinee's ability from his or her previous responses, and selection from an item bank of the item likely to measure most effectively. Five methods of estimating item difficulty or appropriateness are: (1) Robbins Monro procedure; (2) fixed step size; (3) flexilevel, which requires a smaller item pool; (4) Bayesian procedures; and (5) stratified-adaptive or stradaptive procedures. (Author/GDC)

Behind the Basic Assumption of Model A.

Pub Date- Mar 78

Note-32p.; Paper presented at the Annual Meeting of the American Educational Research Assoication (62nd, Toronto, Ontario, Canada, March 27-31, 1978)

EDRS Price MF-$0.83 HC-$2.06 Plus Postage.

Descriptors-Academic Achievement, Achievement Tests, Attrition (Research Studies), Compensatory Education Programs, Educational Assessment, Elementary Education, *Evaluation Methods, *Longitudinal Studies, Models, *Norm Referenced Tests, *Norms, Program Evaluation, Research Design, Sampling, *Statistical Bias

Identifiers-Elementary Secondary Education Act Title I, *Regression Effects, *RMC Models

This study explored the assumption that the percentile rank of a group of students should be expected to remain the same on a post-test as on a pretest when the treatment of the group in the intervening period was the same as the treatment of the norms population. This assumption is basic to the use of the norm-referenced model for the assessment of Elementary Secondary Education Act Title I programs. Among the effects which may weaken the usefulness of the assumption are sampling errors, floor effects, out-of-level testing effects, selective drop out, poor match between the curriculum and test content, and regression effects. In this study, longitudinal data were studied for up to four years for Portland, Oregon, public school students selected to be below certain specified pretest percentiles. The differences from one year to another range from zero to nine percentiles. This variation may well be large enough to overshadow Title I effects. (Author/CTM)

Identifiers-*Adjective Checklist (Gough and Heilbrun), Minnesota

The Minnesota Gifted Education Master's Program (MGEMP) was designed to provide practicum experience, leadership training for program implementation, and teaching techniques for achieving and underachieving gifted students. To evaluate the second summer of this four-year program, the twenty-five participants were administered two cognitive tests and two attitude tests on the first and last days of the program. The first test measured knowledge of psychological theory, research, teaching strategy, and educational needs. The second posed three hypothetical situations and requested participants to suggest alternative solutions. Post program scores showed significant gains for both tests. A third test measured attitude toward gifted education programs in general and in participants' own schools, as well as personal teaching preferences. Finally, participants described typical gifted children and gifted students with whom they had personal contact using the complete Adjective Check List. Favorable adjectives describing superior intellectual ability and unfavorable descriptors such as argumentative and opinionated dominated teachers' sterotypes of the gifted. A followup on former MGEMP participants indicated the program was successful in increasing their leadership role. Results for this second year evaluation generally reinforce and replicate those of the previous summer. Course and practicum outlines are appended. (CP)

Descriptors-Academic Achievement, *Accelerated Courses, *Achievement Gains, Junior High Schools, *Predictive Ability (Testing), Program Attitudes, *Program Evaluation, *Secondary School Mathematics, Sex Differences, Student Attitudes, *Talented Students
Identifiers-Cooperative Mathematics Tests, School and College Ability Tests

Fifty-seven outstanding students, grades seven to nine, entered the first or second year of the Minnesota Talented Youth Mathematics Project. First year students earned credit for two years of high school algebra in one year; second year students earned high school credit for either transformational or traditional geometry and trigonometry. Classes met weekly after school for thirty weeks. The search for participants was only partially successful because fewer then one-third of the schools in the Minneapolis-St. Paul area were represented. The selection criteria, based on the School and College Ability Test (SCAT) were significant predictors of algebra achievement but not of geometry and trigonometry achievement. No sex differences in achievement were noted, but girls had a high attrition rate during and after the first year. Although no conclusions could be drawn about attitude change after several administrations of the Mathematics Attitude Inventory, there was a preliminary indication that attitude was related to future mathematics goals. In responding to the Learning Environment Inventory, a classroom climate measure, pupils viewed the program as difficult, goal-directed, and organized. First year graduates who elected not to return cited several benefits of the program: a one to two year advancement in math; the experience of challenge; and a heightened interest in math. (CP)

Descriptors-Clearinghouses, *Educational Resources, Guides, Indexes (Locaters), *Information Retrieval, Information Services, *Information Sources, *Information Systems, Information Utilization, On Line Systems, *Resource Guides
Identifiers-*ERIC, Information Analysis Products

The Educational Resources Information Center (ERIC) system provides information to education writers for newspapers, magazines, radio, and television. ERIC can be used to find the names of reliable sources in a given field, as well as background information for an in-depth article or broadcast. The ERIC collection of documents on microfiche is housed at 650 public institutions, some of which also provide computer searches of the data base for a fee of approximately 15 to 25 dollars. The Thesaurus of ERIC Descriptors suggests the appropriate subject terms for an ERIC search. The computer search results in a printout of abstracts and bibliographic citations; these are scanned in order to decide which microfiche, photocopies, or journals to request. Two printed indexes also provide bibliographic citations and abstracts, and are indexed by ERIC descriptors: (1) Resources in Education (RIE) listing research reports, project summaries, and conference papers that are available as part of the ERIC microfiche collection; and (2) Current Index to Journals in Education (CIJE) which indexes articles from education journals. ERIC does not provide microfiche or photocopies of articles cited in CIJE. A directory of the 16 ERIC clearinghouses, each specializing in a different subject area, is appended. (Author/GDC)

Descriptors-Academic Aspiration, Cultural Background, Cultural Factors, *Cultural Pluralism, Cultural Traits, Family Role, *Females, *Indians, Occupational Aspiration, Religious Factors, Role Perception, Self Esteem, Sex Role, *Social Development, *Socialization, Social Relations, *Sociocultural Patterns
Identifiers-*Canada (Ontario)

Presented in this document is a cross-cultural study dealing with the role socialization, self perceptions, and aspiration levels of over 200 women of both Anglo Saxon and Indian origins living in Ontario, Canada. These dimensions are explored within the context of selected cultural, religious, and philosophical variables. Some of the factors examined are male-female relationships, the influence Hindu concepts have had on the Indian woman's life, and role perceptions held by Indian women which have changed from the strong traditional family orientation to a more liberated view. The change in role perceptions is further discussed in terms of changes in the achievement aspirations, self-concept, and self identity of the Indian woman. Data is provided to show that the resolution of the Indian woman's dilemma between her own aspirations and the realities of her situation in marriage resembles the pattern of experience of many Western women. A brief overview of Canadian attitudes toward Indian women is provided. Data of the survey are analyzed in determining the Indian woman's potential contribution to Canadian society. Recommendations are made for increasing and accelerating the realization of this potential. A reference list and numerous statistical tables are included. (Author/EB)

Identifiers-Bangledesh, *Canada, Guyana, India, Pakistan, *South Asians, Trinidad

The abstract of a scholarly research paper on the status of South Asian women in Canada and tables based both on surveys and questionnaires are contained in this report. In the survey samples, selected cultural, religious, and attitudinal beliefs of South Asian and Anglo-Saxon women living in Canada are presented. Demographic data for participants is provided. Data analysis reveals that (1) education and opportunity are what the South Asian woman wants most from Canada and (2) South Asian Canadians have difficulty dealing with the contrast between a national policy endorsing multiculturalism and the negativism of citizens toward this policy. Further analyses contained in the paper are briefly outlined. Tables of data are included. (WI)

EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors-Academic Aspiration, *Acculturation, Assertiveness, *Cross Cultural Studies, Cultural Factors, Cultural Pluralism, Family Role, *Females, *Indians, Occupational Aspiration, Religious Factors, Role Perception, Self Concept, Social Development, Socialization, *Sociocultural Patterns
Identifiers-*Canada (Ontario), Canadians, *South Asian Canadians

Presented in this document is a cross-cultural study dealing with the role of socialization, self perceptions, and achievement orientation of South Asian and Anglo Sanxon women living in Ontario, Canada. These dimensions are explored within the context of selected cultural, religious, and philosophical variables prevailing in the two cultures. Some of the factors examined and compared include male-female relationships, family orientation, self concept, selected religious values, sense of accomplishment, and achievement aspirations. These factors are further examined in the context of adolescent role and achievement socialization. Reflections of the respondents on particular questions provide cross-cultural perspectives on such issues as the assertiveness in women, the realization of potential, and contribution to the larger society. Insight is provided into the acculturation of a non-western subgroup into the cultural pluralism which characterizes Canadian society. Tables illustrating data collected and a list of references are included. (Author/EB)

Popular Participation and Representation in the Urban Environment: The School Desegregation Issue in Los Angeles.

Pub Date-78
Note-33p.; Paper prepared for presentation at the Annual Meeting of the American Political Science Association (New York, New York, August 13-September 3, 1978)
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Bus Transportation, Civil Rights, *Community Involvement, Elementary Secondary Education, *Group Behavior, Integration Litigation, Integration Methods, *Parent Attitudes, Public Opinion, Public Policy, *School Integration, *Segregationist Organizations
Identifiers-*California (Los Angeles), National Association for Neighborhood Schools, United Parents Against Busing

Most scholarly literature on school desegregation treats opposition to busing as racist, reactionary, or as springing from deeper conditions of alienation or anomie. From this viewpoint, anti-busing demonstrations are episodic, unorganized and not founded on any thoroughgoing comprehension of the immediate policy issue. Busing is merely the triggering event which releases the individual's anger at social injustice. A case study of opposition to busing in Los Angeles (surveying its leadership, members, activities, and organizational characteristics) challenges this description. The account of the anti-busing movement which views it in terms of the collective mass behavior outbursts hypothesized by mass society theories is found to be inappropriate. The reasons individuals join and participate in anti-busing organizations appear to be quite different from the symbolically racist'' characteristics which correlate with verbal opposition to busing in public opinion surveys. Given the undesirability of white flight, anti-busing claimants should be included in pluralistic bargaining over the desegregation plan. (Author/WI)

Descriptors-Affirmative Action, *Black Achievement, Blacks, *Church Role, Civil Rights, *Civil Rights Legislation, Court Cases, *Political Influences, *Racism, Reverse Discrimination, Slavery, *Social Influences
Identifiers-Bakke (Allan)

This paper provides an analysis by three black leaders of how the law, the nation, and the church agencies have responded to liberation issues in recent years. Victor M. Goode analyzes the role and status of blacks under the law from the Scott v. Sandford decision in 1857 through the dismantling of the formal structures of slavery and the modern era of civil rights legislation to the Allan Bakke decision, reverse discrimination and the decline in affirmative action. Charles E. Cobb argues that, because of the social and political systems in the nation, minority interests are of little concern and minorities are prevented from mobilizing to combat the prevailing storm of racism. M. William Howard discusses the current degree of attention given to civil rights by the church. He takes into account events that changed the liberal idealism of the 1960s to the cynicism of the 1970s. (EB)

Identifiers-Hawaii

The response of Asian Americans to the American system and to discrimination and the success they have achieved through their method of response is researched in this study. The relationship between the high Asian American investment in education (in terms of years of schooling completed) and observed income distribution is analyzed. Census data are evaluated in terms of two basic human capital investment models. The theory of human capital investment in education and its relationship to economic discrimination are discussed. Application of the models to Asian Americans indicates that: (1) returns to education are greater for native born than for foreign born Asian Americans; (2) returns are greater for Asian Americans in Hawaii than on the Mainland United States in relation to the dominant group; (3) economic discrimination towards Asian Americans continues to exist. In order for Asians to progress in American society, they must commit themselves to total participation in the mainstream of the culture while preserving their own special cultural identity. Asian unity in strategies for civil and cultural advancement at the local level must not become clouded by excessive involvement in international politics. With unity, such as that provided by the Northern California Asian Leadership Council to increase interchange among Asian leaders, the influence and impact of Asians will increase. However, Asians must become less politically apathetic and must involve themselves in elections and in such groups as the Chinese for Affirmative Action and the various Asian professional groups. Asians must also join with other minority groups with similar interests to combat poverty, discrimination, urban problems, legislative injustice, and educational and employment inequalities. Asian groups must make sure that strong affirmative action policies are not only adopted, but also put into effect. Law enforcement, educational opportunities and knowledge of the English language are essential to Asian success as are economic conditions. Asians must learn to exploit favorable economic conditions, such as the developing trade in the Pacific Basin. However, successful Asians must be sure not to exploit or oppress other members of Asian communities, but rather, must use their influence to advance the status of all Asians in the United States. Descriptors-*Change Strategies, *Chinese Americans, *Cultural Pluralism, *Ethnicity, *Group Unity, *Social Action, Socioeconomic Status

Numerous methods of categorization have been devised to define the cultural types of Chinese living in America. However, an understanding of Chinese ethnicity in America is not limited to understanding ethnicity alone, but to how America itself is perceived. The underlying assumption in considering Chinese in America and Chinese-Americans as two separate groups with parallel perceptions of ethnic awareness and experiences, is that America itself is understood to be a changing society. The melting pot concept of ethnic groups being assimilated into a predominantly European-Anglo-Saxon society by giving up their own ethnicity is rejected. What is seen is a new ideal of cultural pluralism which demands ethnic awareness and identity. The unity of the America of the future must be discovered in and through diversity and pluralism. Here Chinese in America and Chinese Americans can help each other to discover the best in Chinese ethnicity in the American multicultural setting. An understanding of history in the broadest possible context of Chinese-American relations can liberate peoples of Chinese origins in America from narrow and inward self perceptions to new horizons and unlimited possibilities of not only ethnic and American, but international and global, awareness and identity. Descriptors-*Asian Americans, Cultural Background, *Cultural Pluralism, *Ethnicity, *Group Experience, *Racial Discrimination, Racial Factors, *Social Action

Racial pluralism can serve as the basis on which ethnic diversity and the concept of an American unity can come together. Pluralism can take into consideration the present revival of ethnic identity in all ethnic communities including the Asian American. It can also deal with the issue of American identity in the midst of burgeoning ethnic sensitivity. Asian American history is characterized by attempts to exclude Asians from full participation in the society (immigration exclusion acts, miscegenation laws), acts of violence (such as the imprisonment of Japanese-Americans in concentration camps), and the ongoing influences of the larger society. By creating a new ethnic identity within the American context, Asians, like other ethnic groups, have gained a sense of self affirmation and a strong community identity. However Asians must not let the new ethnicity exclude them from the unifying factors of American life and experience. Through racial pluralism, Asian Americans can achieve three major goals: (1) a basis on which they can deal with the whole of society from their own experiences and insights; (2) a means of creating a just society; and (3) power to build an inclusive society in which the educational, economic and political opportunities are open to all. Descriptors-*Chinese, *Chinese Americans, *Composition (Literary), Concept Formation, Cultural Background, Effective Teaching, *English (Second Language), Grammar, Language Instruction, *Language Patterns, Writing Exercises

Because the conceptual and grammatical constructions of English and Chinese vary drastically, Chinese students often have difficulty learning to think and write in English. Cultural conflicts of young Chinese in America compound their difficulties with the English language. The old values expressed by Chinese affect students' abilities to write clearly in English. Belief in the value of life, learning, and self reliance is central to Chinese thought. Writing topics for students involving these subjects should be considered. Using the Chinese idea of the yin/yang concept, teachers can introduce analogies and comparisons as methods for teaching composition. Because of the different structure of the Chinese language, the importance of articles, prepositions, and conjunctions in English should be emphasized. These and other suggestions for improving Chinese student's writing are made in this paper. (WI)

Descriptors-Contrastive Linguistics, *Cross Cultural Studies, Cultural Differences, Language Patterns, *Linguistic Theory, *Psycholinguistics, *Sociolinguistics, *Structural Linguistics, *Transformation Generative Grammar

In this essay, the cross cultural conflicts associated with linguistic problems are explored in terms of the development of linguistic theory from 1933 to the present. The linguistic code, positivism, the existential approach to sociolinguistics, linguistic solidarity, defining the situation, language and culture, and cross-cultural conflicts in linguistic expression (Japan and the United States) are discussed. Ideas set forth in the essay include the following: (1) problems of cross-cultural interference are not all related to mismatches between linguistic codes; (2) positivism is inadequate for dealing with problems of a bilingual or bicultural nature; (3) the concept of a completely homogeneous superstructure of linguistic competence is nonexistent; (4) a system of cultural idealism should replace cultural concepts based on elitist or materialistic frameworks; (5) a parallel can be drawn between the role that an official dialect plays in a society and an official ideology provides for a nation; (6) socially transmitted language inferences play a major role in defining the context of a situation; and (7) a social and psychological approach to language in cross-cultural situations is imperative. Descriptors-*Asian Americans, *Diachronic Linguistics, *Effective Teaching, *English (Second Language), *Linguistic Competence, *Linguistic Theory, Structural Linguistics, Transformation Generative Grammar

In this essay, the relationship of American linguistic theory to teaching English as a second language (ESL) is traced over the past few decades. The limitations of the structuralist paradigm in a language learning situation are discussed. The use of pattern drills based on the structuralist surface feature attention to word placement. The pre-Chomskyan notion of language learning as habit formation is criticized. Discreet point testing is seen as a somewhat distorted measure of language competency. The effect of Chomsky's Tranformational-Generative grammar on ESL is examined. The contrastive analysis hypothesis and the markedness differential hypothesis are outlined. Major revisions within the transformational camp in the late 1960s and early 1970s are defined in terms of their effects on language learning. Several specific problems of Asians in ESL situations are identified. The importance of asking the right questions about language teaching methodologies and linguistic theories is stressed. Identifiers-*Chinatown Planning Council, *New York (New York)

In this paper, the history and activities of the Chinatown Planning Council are described. Formed by individuals in the fields of social service and education, as well as business people and local citizens, the Council set the goal of developing educational and social services for the Chinese Americans in New York's Chinatown as well as for those about to enter the United States as a result of the repeal of the McCarren-Walter Act. The methods used to achieve these goals are outlined in the paper under the headings of employment, day care, the elderly, youth, cultural arts, housing, economic development, research, work in the expanding Chinese Community, uniqueness of the Council's activities, and gaps in service. Each specific activity of the Council centers is explained in terms of the needs it fulfills and the historical reasons for those needs. What emerges is not only a profile of the Council, but a picture of the problems faced by the Chinese American community over the past two decades. (WI)

Identifiers-*China, Taiwan, *United States

In this paper, the United States' foreign policy with regard to normalization of relations with mainland China and the implications of various normalization strategies is discussed. Failures in Kissinger's policy (fixation upon super-actors, but neglect of regional powers and the attitude that Taiwan was disposable) are identified. The effects of the Kissinger legacy are described and problems of balancing power in a world consisting of four major groups (advantaged industrial nations, communist nations, rich but developing nations, and the global poor) are examined. The new United States design for foreign policy and normalization is explained as a shift from balancing the Washington, Moscow, Peking triangle to attempting to achieve a West-South alliance. Both the USSR and China are seen as communist rivals of the United States in the Southern Arc. Intermediate powers are perceived as important to the United States in the event of a showdown with a large Communist power. Based on this perception of the Carter administration policy, problems with normalization include a reluctance to meet Peking's demands and a reluctance to abandon Taiwan totally. This impasse over normalization is shown to be a result of the White House's shift in strategic thinking on foreign policy and Peking's stubbornness with regard to its conditions. (Author/WI)

Descriptors-*Black Mothers, *Blacks, *Females, Marital Instability, *Marriage, Social Factors, Working Women
Identifiers-*Michigan (Detroit)

According to a study of 256 black married women between the ages of 26 and 60 living with their spouses, marital happiness is more common among black women than marital unhappiness. This finding is based on the secondary analysis of a sample of data collected in Detroit in 1968-1969. Variables statistically significant to the marital happiness of the women studied (as tested by Chi-square) were: work status, age, number of children at home, incidence of ulcers, marital disagreement, and general happiness. Stepwise analysis indicated that the variables that contributed most to marital happiness were high levels of general happiness, low marital disagreement, no marital separation, and absence of children at home. Although white collar occupations led to greater marital happiness than blue collar occupations, socioeconomic status, overall, proved to be much less significant than other variables analyzed. Identifiers-*California

In this monograph, the Federal equal employment opportunity law (the legislation and litigation on the seniority conflict) and the nature of seniority rights in the public sector are examined. The concept of affirmative action is discussed with reference to legislation and national policy and the interrelationship of affirmative action to layoffs by seniority. Distinctions between the nature of seniority principles and policies in the private sector and the public sector are outlined. Case law on issues of seniority and affirmative action in both sectors is detailed. Each of the major cases on the issue is critiqued. A case study of layoffs in the public sector in California is presented, with particular attention given to minority layoffs. Recommendations are made concerning alternatives by which public employers and employee organizations might meet the need to reconcile the dual pressures for budgetary restraint and for exemplary and fair employment practices for both career employees and minority entrants into the work force. Descriptors-Business, *City Improvement, *City Problems, *Economic Factors, Federal Aid, Futures (of Society), *Housing Patterns, *Population Trends, *Urban Areas, Urban Renewal, Urban to Suburban Migration

The three major factors affecting the future of the nation's cities are: (1) lack of housing demand due to population migration; (2) the conflict between suburban growth and city restoration; and (3) the combination of racially segregated housing markets, obsolescence of existing buildings, and the high cost structure of both public sector and private sector operations in older cities. Many large older cities in the Northeast and Midwest are experiencing population loss and physical decay leading to extreme fiscal problems. This will continue unless Federally financed intervention is made to alter this process. Ultimately, the nation must choose between two basic methods of accommodating future urban growth and improving the quality of life. One would require further suburban expansion including regional shifts to Sunbelt suburbs. The other would require slowing suburban expansion in order to create in-city housing demands on which the restoration of older cities can be built. The long-run shift of households and resources from the high-cost Northeast to the lower-cost Southwest will continue until cost structures are adjusted downward in the former and upward in the latter. EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-Academic Achievement, Discipline, *Educational Change, *Educational Improvement, Educational Objectives, Elementary Secondary Education, *Parent School Relationship, *School Community Relationship, Teacher Role, *Urban Education

Identifiers-*Great Cities School Improvement Program

In spite of the efforts of the Ford Foundation's Great Cities School Improvement Program in ten large city school systems to provide quality education to children and youth from the ghettos of America's cities, this problem remains unsolved. Cities have never been able to do an adequate job of educating the poor, the immigrants, and the minorities. The public objects to the schools' disciplinary problems and failure to provide basic skills education. Schools and teachers are reluctant to admit their own culpability and inadequacies, preferring to place the blame on sociological factors. Teachers must insist on high standards for their students, but parents, citizens and students must also be held accountable for the quality of education. Parents, by supporting tax levies, encouraging community support, and supporting staff members, can help to increase the quality of education. Educators must reeducate the public about the value of education to society. Schools must direct themselves not only towards teaching basic skills, but also towards preparing students to support themselves in the society and towards instilling a sense of compassion for other human beings. In the final analysis, however, until the schools, community and home can develop a consensus on educational goals, partnership for progress in education will have no meaning. (WI)

The Fiscal Crisis of the State: A Case Study of Education in Detroit.

Pub Date-21 Aug 74
Note-84p.; Paper prepared for presentation at the State and Economy session, World Congress of Sociology (8th, Toronto, Canada, August 21, 1974)
EDRS Price MF-$0.83 HC-$4.67 Plus Postage.
Descriptors-Capitalism, Case Studies, *Economic Factors, *Educational Finance, *Finance Reform, Fiscal Capacity, *Public Education, *Statewide Planning, Taxes, Teacher Militancy, Unions, *Urban Education
Identifiers-*Michigan (Detroit)

In this case study, the effect of the Detroit fiscal crisis on the city's public school system is analyzed in terms of the history of the fiscal crisis, the reasons for the crisis, and State, teacher, public and city reaction to the situation. The changing demography of Detroit and the events leading up to the financial crisis are described. Such factors in school budgeting as inflation, increases in staff salaries, militancy of teacher unions, expansion of social services, and a high rate of disadvantaged youth requiring special programs along with an eroding tax base are considered. Problems of inequitability of taxation are discussed in light of the social burdens placed upon aging cities. It is concluded that the major barrier confronting the Detroit school system's quest to accumulate revenues to meet rising expenditure demands has been tax resistance by local residents and the tax revolt which has been a product of the rapidly mounting tax burden experienced by Detroit residents. Also the seeming lack of effectiveness and efficiency of school district programs has been a problem. The future of the fiscal crisis is examined and suggestions are made for finance reform in Michigan. Current State financing methods for education are reviewed. The role of the capitalist system in creating fiscal crises is stressed. Charts and tables illustrate the city's fiscal situation. (WI)

Descriptors-Academic Aspiration, *Adjustment Problems, Blacks, Caucasians, Elementary Secondary Education, Females, Males, *Racial Differences, *School Integration, *Self Concept, *Sex Differences, *Student Attitudes

Identifiers-*Magnet Schools

It is often suggested that black girls may have a somewhat harder time adjusting to desegregated schools than black boys but that just the opposite is true for white children. This conclusion is based on a relatively small number of studies which have focused on assessing the impact of desegregation on factors such as students' self-esteem or their college aspirations. Very little research has been conducted on students' reactions to and perceptions of their experiences in interracial schools. In the research reported here, 20 randomly selected sixth grade black and white students were interviewed about their reactions to their school near the beginning and the end of their first year of desegregated education. Both black and white students felt very positively about the ``magnet'' school they attended and about relationships between students there. However, 2 x 2 repeated measures analyses of variance showed that, as predicted, black males and white females were considerably more positive about their experiences than were black females and white males. Identifiers-Communes, *Counter Culture, Free Clinics, Free Schools, Radical Therapy

Examined in this document are four phases of what are referred to as the counter environment, a new system of beliefs and counter institutions to care for people. The topics studied fall into the general areas of education, therapy, health care, and utopias. Free schools are discussed in terms of varied definitions, historical growth, basic philosophies, funding resources, structure, basic characteristics, teacher and student roles, and their potential future. Specific free schools are referred to. The basic ideologies of radical therapy are compared to those of conventional therapy. Emphasis is on the roles therapists in each play. Particular counter institutions referred to include collective communes, women's liberation centers, telephone hotlines, and crisis centers for youth. The growth of free clinics, reasons for their growth, their aims, their contributions, and their financial resources are discussed. A collage of vignettes about communal life are used in describing communes. Aspects of communal life dealt with include stability, philosophical and physical characteristics, family units, child raising, and communal relationships. An overview of commune success and/or failure factors is provided. A statement and bill of rights drawn up by the Mental Patients' Liberation Project is appended and a list of references is included. Identifiers-Abolitionists, Bohemianism, Brook Farm, Communes, *Counter Culture, Emerson (Ralph Waldo), New York (New York), Radicalism, Thoreau (Henry David), Transcendentalism

Examined in this document are specific political events, values, and styles of cultural revolt which have structured the parameters of rebellion and forged the tradition of outcast life styles. Some of the political events and values dealt with include the history of radicalism in the United States, and the Declaration of Independence, the Constitution, the wave of popular democracy from 1800-1850, the abolitionists, the Industrial Era, the progressives, and the black revolution of the 1960s. Each of these topics is discussed in terms of their historical and/or social perspectives and their influences on political and social change. Emphasized are the conflict of institutions versus individuals and the discrepancy between the theory and practice of democracy. The styles of cultural revolt analyzed in this paper range from the cultural rebellion of the communal movement through the basic philosophies and proponents of transcendentalism, to aspects of the Bohemian movement in New York City. The emphasis in these analyses is on the tension between outsiders and the institutions of social control. An argument is made that this tension has opened pathways of social transformation and preserved the cultural continuity from within.

Descriptors-*Black Businesses, *Business, *Contracts, Economic Opportunities, *Educational Research, *Federal Aid, Federal Legislation, Federal Regulation, *Minority Groups

Over the last decade, minority firms and individuals have become increasingly more active in the process of educational research and development (R&D) activities. The future of such involvement appears to be one of continued increase, both because of the response of the marketplace and the growth in the number of firms owned by minority individuals. Such firms may be eligible to participate in special procurement programs established at local, State, or Federal levels. At the Federal level, the Small Business Administration's 8(a) Procurement Program enables firms to compete for Federal procurements on a restricted set-aside basis whereby firms are guaranteed a certain portion of the budgetary expenditures of an agency. For a firm to be eligible, 51% of its ownership must be held by minority individuals who can prove that they are socially or economically disadvantaged. However, criteria for determining such eligibility are mainly subjective. All minority firms, whether eligible for 8(a) or not, can compete for other Federal, State, and local contracting opportunities. Recent Federal enactments have mandated that minority firms receive a certain percent of government dollars. (Author/WI)

Family Communications With Schools and the Community.

Pub Date-78
Note-15p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Child Development, *Communication Problems, Elementary Secondary Education, *Family School Relationship, *Parent Participation, *Parent Role, *School Community Relationship, School Role, Socialization, Student Adjustment, Television

The family, responsible for the well being of children, has felt alienated from the schools. One of the reasons has been its inability to communicate personal and social needs to the schools, and the schools' inability to clarify what is expected from parents. Parents and the family unit need to be helped to understand the schools' role in the life of the child. There are several factors affecting this communication process within the family, between the family and the school, and the family and the community: (1) the response of parents to children as students; (2) the role of the teacher; (3) the inclusionary/exclusionary practices of the school; (4) the role of television. As families learn to cope with these factors, communication will be enriched and alienation and negative attitudes will be mitigated. (Author/WI)

Identifiers-*Michigan, *Small Area Forecasts

This document describes aspects of the Small Area Forecast (SAF) process, from the preparation of policy alternatives to measures to provide for evaluation. The three principle areas discussed are: (1) the six alternative sets of public policies which might be followed in the Southeast region of Michigan for meeting population needs in the areas of employment, education, housing, land use, and holding capacities between now and the year 2000; (2) the forecasts of households, population, employment, and land use at the small area level through the year 2000 which flow from the policies; and (3) fiscal and environmental impact measures for each of the forecasts which permit evaluation of policy outcomes. Numerous tables of data are included. (Author/EB)

Identifiers-*Cape Verdeans, *Massachussetts (New Bedford)

There are circumstances under which ethnicity becomes the basis for political action in contemporary America. For example, the uncertain orientation of Cape Verdeans' political participation in New Bedford stems from the complex nature of their ethnic identity. Despite cultural dissimilarities from and limited contact with blacks in New Bedford, Cape Verdeans have not wholly escaped being identified as blacks by others. And, because of racial status distinctions in American Society, most Cape Verdeans prefer to maintain their ties to the larger Portuguese community in the city. However, the lack of continuing political organization in New Bedford, black political activism in the 1960s, and an eye toward potential political gain encouraged many Cape Verdeans to join the United Front thus adopting the rhetoric of black identity. When circumstances began to change relatively early in the life of the United Front, more traditional patterns of politics were followed. As a result, the United Front lost most of its political influence. When gains anticipated by the Cape Verdeans did not materialize, the Cape Verdean ethnic identification reappeared. The realities of ethnic stratification in New Bedford overcame the political alliance between Cape Verdeans and resident blacks. (EB)

Sexual Attitudes and Knowldge Among Black Inner-City Elementary School Students in Philadelphia: A Pilot Study.

Pub Date-1 Apr 78

Note-16p.; Paper presented at the National Sex Institute of the American Association of Sex Educators, Counselors, and Therapists (11th, Washington, D.C., April 1, 1978)

EDRS Price MF-$0.83 HC-$1.67 Plus Postage.

Descriptors-*Black Youth, *Childhood Attitudes, Course Evaluation, Elementary Education, Grade 5, Grade 6, *Sex Education, *Sexuality, Urban Schools

Identifiers-*Pennsylvania (Philadelphia), Sex Inventory (Schiller)

Teenage and/or adolescent pregnancy is on the increase in most American cities and age of first pregnancy within this group is declining rapidly. In this study, sexual attitudes and knowledge among black inner-city elementary school students is documented. The effectiveness of a six week sex education class designed to provide these students with basic knowledge of human sexuality is evaluated by means of a modified Schiller Sex Inventory which was administered to fifth and sixth graders before and after the course. Data indicate that there was a significantly greater number of correct responses after students had completed the course. Participant involvement in the evaluative process led researchers to conclude that after the completion of the program in sex education students: (1) developed healthier and more positive sexual attitudes; (2) had a greater knowledge of sex organs, core gender and their own sexual identity; (3) displayed willingness to approach parents about questions related to sex; and (4) increased their knowledge of birth control information and contraceptive practices. Educational Concerns of Inner-City Black Parents: A Pilot Study.

Pub Date- 78
Note-9p.
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-Basic Skills, *Blacks, Discipline Policy, Elementary Secondary Education, Homework, *Inner City, *Low Income Groups, *Parent Attitudes, *Parent School Relationship, School Integration, Teaching Quality, *Urban Schools
Identifiers-*Pennsylvania (Philadelphia)

The education of low-income urban students, particularly Afro-Americans, has been the subject of much debate in recent years. The purpose of this study was to determine the major educational concerns of a group of twenty-five low-income black parents in the Cobbs Creek area of West Philadelphia, Pennsylvania. More than 50% of the parents agreed that their primary concerns were: (1) their children's acquisition of basic skills, (2) the employment of effective teachers, (3) their input into school programs, (4) better disciplinary procedures, and (5) the lack of homework assignments. These preliminary results suggest implicitly that low-income inner city black parents do not consider school desegregation as a major factor in their children's public education. (Author)

Descriptors-*American Studies, Course Content, Course Objectives, *Curriculum Guides, *Learning Activities, Senior High Schools, Teacher Role, Units of Study, Urban Culture, Urbanization, *Urban Studies

The five units on American Urban Studies presented in this curriculum guide are designed to examine the development, present conditions, and alternatives for the future of urban areas. Major emphasis in these units is on contemporary urban problems and possibilities for their solution. The major objectives covered in this course outline are: (1) to be able to explain what constitutes an urban area; (2) to be able to trace the evolution of American urban areas; (3) to be able to identify changes in the characteristics of urban populations and the effects of the changes; (4) to be able to identify and explain the influence of technological changes on urban life; (5) to be able to list and explain a variety of current urban problems; and (6) to be able to compare and contrast the relative merits of some of the proposed solutions to contemporary urban problems. In addition, more specific objectives and the course content for each unit are outlined. Activities for helping students meet the objectives are described. Strategies suggested for implementing these activities include films, discussion questions, and educational games. The teacher's role in these activities is also discussed. A bibliography and a list of teacher resources are included. (EB)

Descriptors-Blacks, *Caucasians, Demography, Educational Background, Metropolitan Areas, *Racial Factors, Social Class, *Social Differences, *Social Status, *Urban to Suburban Migration

This study is concerned with evaluating some demographic and policy-relevant attributes of central cities that have been proposed as determinants of class-specific, white, city-to-suburb movement. Drawing on migration data from the 1970 census for 39 metropolitan areas, the present investigation: (1) evaluates the aggregate impact that the white city-to-suburb movement imposes on the class structures of large central cities; (2) isolates demographic and policy-relevant flight determinants for white movers at different status levels; and (3) estimates the aggregate impact that policy-relevant attributes impose on the population compositions of individual central cities as a result of city-to-suburb movement. Findings presented indicate that: (1) upper-status white flight is responsive to the central city's racial composition, although this effect is moderated in Southern cities; (2) there exists a feedback relationship between suburb-city disparities in per capita educational expenditures and upper-status flight; and (3) both of these explanations are more important in accounting for the out-movement of a city's college-educated population than for the out-movement of other education classes. A demographic decomposition technique is then employed in the study to estimate the hypothetical redistribution consequences that would be associated with equalizing suburb-city fiscal disparities, lowering the city crime rate, and reducing the percentage of the city's black population. Pub Date-77
Note-40p.
EDRS Price MF-$0.83 HC-$2.06 Plus Postage.
Descriptors-*Academic Achievement, Basic Skills, *Compensatory Education Programs, Elementary Secondary Education, Reading Skills, Remedial Mathematics, *Remedial Programs, Remedial Reading Programs
Identifiers-*Elementary Secondary Education Act Title I, *New York

This report focuses on the achievement in basic skill areas attained by disadvantaged students in compensatory activities. Areas reported on include corrective reading and mathematics. An overview of the report's purpose and methodologies indicates that reading and mathematics achievement data were collected for Title I participants on norm referenced measures. Data collected are presented in tables and graphs for reading and mathematics achievement in both private and public upstate New York and New York City schools. Comparisons of the data presented indicate that participation of disadvantaged students in Title I programs kept them from falling behind and even helped them catch up to their more advantaged peers. In light of the findings, this report lists aspects of the program that contributed to the apparent growth of educationally disadvantaged youngsters in project activities. Detailed descriptions of each of the projects evaluated are included. (EB)

The status of black children in the schools, techniques developed to eliminate obstacles while facilitating growth, and implications for training at the university level are explored through examination of a case study. The School Aid Program,'' a program designed to deliver services to black youths, is described in detail, from its inception. Discussed are: (1) the role of black graduate and undergraduate students as counselors to youths referred to the program; (2) the relationship and attitudes of the schools to the program; and (3) the ways in which the schools functioned to maintain destructive growth in black children. The implications of such a program, the theory behind system interventions, and the problems of training and implementation are also explored. (MC)

Descriptors-*Blacks, *Community Service Programs, *Counseling Services, Family Counseling, *Mental Health Clinics, Problem Solving, Program Administration, *Program Development, *Program Evaluation

The Family Service Community, described in this report, was designed to respond to the low utilization of mental health services by black families, despite the increasing problems of their school-aged children. This was a multiple systems approach to problem-solving in a suburban community mental health center. The patients were parents and their children between the ages of 8 and 12 who were identified by multiple referral sources (i.e., schools, juvenile courts, family recreation centers) as exhibiting problem behavior. The goal was direct help through intervention with the family and indirect help through intervention with adjunct systems in the community. Positive outcomes were enhanced family communication and problem-solving in their own behalf, within themselves, within the family, and within the community. Negative outcomes were the benign neglect posture of the Center administration manifested by the withholding of outreach follow-up staff support, the development of evaluation criteria based solely on statistical reporting criteria, and primary mentality constructs. Descriptors-*Blacks, *Family Relationship, Mobility, *Older Adults, Outreach Programs, Social Adjustment, *Social Isolation, *Social Relations
Identifiers-New Jersey

Presented in this paper is a study undertaken to determine the level of social interaction and isolation in a randomly selected sample of 156 aged blacks in an urban area of New Jersey. The interaction patterns are analyzed in terms of availability, relations with, and reactions toward close and distant relatives and friends. The relation between subjective and objective states of loneliness is examined. Findings presented show no positive relation between living alone and feeling lonely. It is pointed out that, in spite of frequent contacts with children, elderly persons in the sample depend mostly on friends for companionship and for social pursuits such as visiting, shopping, and activities over the weekend and major holidays. Participation in club-type activities and church groups is described as minimal. In addition, it is stated that one third of the sample studied said they felt alone and about two thirds expressed a desire for more social interaction. An argument is made for the need for outreach programs in which social service workers act as kin or friend surrogates. (Author/EB)

Descriptors-Blacks, Educational Benefits, *Females, *Minority Groups, Needs Assessment, *Racism, *Self Concept, *Sex Discrimination, Socialization, Social Status, Sociocultural Patterns

Identifiers-*United Kingdom, *United States

Education is one means by which minority women in the United States and the United Kingdom may be encouraged to build their own particular escape from racism, sexism, and poverty. Of particular importance in their educational preparation to compete in the world are expansion of language competency and an understanding of their own culture and other cultures within their multi-racial, multi-ethnic societies. Other basic educational requirements include: (1) basic health and sex education; (2) family life studies; (3) history of women; (4) political education; and (5) career preparation. Because the socialization of girls in West Indian and East Indian families in Great Britain and in black and Chicano families in the United States exemplifies the concept of cultural dissonance, the education of minority women must help them to break free of the patterns imposed upon them by their own ethnic groups and the larger society. In general, minority women must begin to view themselves and their role in society in a way that will encourage greater self-confidence and help them to determine their future life styles. Descriptors-Administrator Evaluation, Compensatory Education, Educational Facilities, *Educational Problems, Educational Quality, Elementary Secondary Education, Handicapped Students, *Political Influences, *School Environment, *Teacher Attitudes
Identifiers-*Puerto Rico

In this report, the status of education in Puerto Rico is described and recommendations are made for educational improvement. It is found that Puerto Rican schools are not up to the National Education Association minimum standard for schools due to: (1) inadequate physical plants; (2) teachers who are demoralized by what they see as a stagnant system dominated by political favoritism which places emphasis on personal relationships rather than scholarship and achievement; and (3) student violence. Also discussed are problems connected with compensatory and enrichment education and educating the handicapped. Recommendations are made with regard to Congressional investigation, reorganization and depoliticization of the school system, establishment of a workable master plan of education, improvement of physical plants, and the role of the Associacion de Maestros de Puerto Rico (Puerto Rico Teachers Association) in filing class action suits. It is concluded that due to Puerto Rico's economic, social, and political problems, education must become its top priority. (WI)

Descriptors-Administrator Attitudes, *Community Attitudes, *Public Opinion, Q Sort, Research Methodology, *School Integration, Social Differences, Teacher Attitudes

Identifiers-Ohio (Youngstown), *Third Force Coalitions

After a brief description of third force coalitions and their goals, this research attempts to determine what areas of consensus unite such groups and what issues or opinions can potentially divide them. A Q factor analysis is employed to establish a methodology for identifying language that has appeal to various opinion groups. Respondents in this study were drawn from three groups: (1) the third force coalition in Youngstown; (2) teachers and administrators in the Youngstown schools; and (3) people not connected with the schools who, based on their ethnic and socioeconomic status, were assumed to be less favorable to school desegregation. Various statements that reflect a broad array of opinions were gathered over two years and then categorized under different perspectives. These categories were then factor analyzed to locate clusters of respondents with similar opinions. Findings indicate that there is significant agreement on enough points to suggest that a basis exists for coalitions. The three factors or opinion types identified may even be regarded as significant variants of a single viewpoint. On the other hand, there are important and potentially divisive differences among the three groups, especially at the more specific levels of policy.'' (Author/ B)

Identifiers-California (Los Angeles), Indiana (Indianapolis), Massachusetts (Boston), Michigan (Detroit), Ohio (Cincinnati), Texas (Dallas)

These papers examine sociological and political problems associated with school desegregation on the local level in Dallas, Boston, Columbus, Cincinnati, Indianapolis, Detroit, and Los Angeles. Each presentation addresses several of the following concerns: (1) community and school composition, racial and ethnic ratios, and business and political influences; (2) historical parameters; (3) judicial proceedings and precedents; (4) community and group reactions; (5) curricular and instructional programs developed to deal with desegregation such as magnet schools, inservice education training, and multicultural approaches; and (6) the role of social studies teachers in desegregation. There are different emphases and processes discussed in each case study. Beck and Linden write that Dallas has made several compromises in its 1976 desegregation plan. Siegal believes that Boston is making long term progress since the initial violent reaction to desegregation. Bedwell deals with Indianapolis' history of segregation and notes that more court battles are ahead. In Detroit, Gendernalik sees more court action but also notes that community forces are cooperating in that city. Howe writes about the "see-saw" Boards of Education in Cincinnati. Carrison describes 15 years of school desegregation problems in Los Angeles and maintains that a socioeconomic head count must be combined with racial ethnic quotas within a metropolitan environment. References for each presentation are provided. (Author/EB)

Descriptors-Blacks, Bus Transportation, Caucasians, *Community Attitudes, Community Involvement, Elementary Secondary Education, Equal Education, Historical Reviews, *Integration Litigation, Mexican Americans, Parent Participation, *School Integration, *Urban Schools

Identifiers-Magnet Schools, *Texas (Dallas)

Since the 1954 Brown decision, Dallas residents have engaged in avoidance, resistance, legal battles and, finally, cooperation and compromise in the desegregation of Dallas schools. It now appears that Dallas is making some progress toward desegregation. Except for some segments of the black community, who felt they had been betrayed because of a remaining all-black subdistrict, the 1976 Dallas desegregation plan has received strong support from virtually every segment of the Dallas community. Although there is continued controversy over the pupil assignment plan and the effectiveness of magnet schools, the number of one-race schools in Dallas has been reduced by over 50 percent in a two-year period. Present trends in Dallas, however, make the future of Dallas schools uncertain. Several individuals believe that ``freedom of choice'' coupled with quality education are more important than complete integration and the elimination of one-race schools. There is also a concern about retaining or regaining support of the middle class and about the role of the community in enacting urban school changes. In addition, despite numerous innovative approaches and significant desegregation progress, the trend persists that Dallas Anglos often have different perceptions of their schools than do either blacks or Mexican-Americans. Descriptors-Bias, *Children, Classroom Observation Techniques, *Classroom Research, Educational Research, *Elementary School Students, Minority Group Children, *Research Problems, School Role, *Social Factors, Teacher Attitudes, *Teacher Role

The educational research on schools and classrooms is burdened by the unresolved images of children and their place in society. Most educational research exaggerates the dominance of the teacher and neglects the presence and power of children. This tends to support the irresponsible, dependent, and powerless role assigned to children in our culture. Cultural perspectives on chilhood are reinforced by sociological conceptions of the purposes and functions of schools in contemporary society. These views offer a partial and unrealistic picture of classroom life. Neglected are the dynamic and uneven process of socialization and the initiating of creative actions of children in classrooms. There are also methodological and strategic reasons why the interactions and social systems among children in classrooms have been given such minimal attention by researchers. In addition, stereotyped perceptions distort such research and cultural differences account for research misinterpretation, particularly in the case of minority, lower class children. In the process of developing methodological strategies for documenting and analyzing the patterns and interactions and social systems created and sustained by children, researchers must confront current cultural biases, traditional theories and beliefs regarding children and childhood, and views held on the social and economic purposes of schools. Descriptors-Bias, *Children, Classroom Observation Techniques, *Classroom Research, Educational Research, *Elementary School Students, Minority Group Children, Racism, *Research Problems, School Role, *Social Factors, Teacher Attitudes, *Teacher Role

A review of selected literature on classroom processes indicates that the primary preoccupation of educational researchers is with the dominance and centrality of the teacher. The research has primarily been concerned with documenting the strong relationship between the teacher's expectations of a pupil's performance and the actual performance of the pupil, e.g., the ``Pygmalion'' study. Exaggerating the dominance of the teacher and neglecting the power and presence of children in classroom research seems to support the irresponsible, dependent, and powerless roles assigned to children in our culture. Cultural perspectives on children are reinforced by sociological conceptions of the purposes and functions of schools in contemporary society. The focus on the norms and structures of the schools and their power in shaping and controlling the individual development and collective life of children offers a partial vision and unrealistic picture of classroom life. There are also methodological and strategic reasons why the interactions and social systems among children in classrooms have been given such minimal attention by researchers. For example, the social distance between investigator and subjects has been a major dilemma in classroom research, particularly in the case of minority group children. The distortions are related not only to misunderstandings of language and gesture but also to basics of ethnocentrism and racism in the researcher's perceptions. (Author/EB)

Identifiers-*New York (New York)

In this directory, New York City school district programs funded under various Congressional Acts on education are described. Programs listed fall under, among others: the Adult Education Act of 1966, the Comprehensive Employment Training Act, the Economic Opportunity Act, the Education Development Act, and the Elementary and Secondary Education Act (Titles II through VIII). Also included are programs falling under legislation related to emergency employment, emergency school aid, environmental education, private funding, Indian education, refugee assistance, national defense education, highway safety, reading improvement, school lunches and nutrition, special projects, agriculture, vocational education and State aid for special programs. The purpose and structure of each Act is briefly described, both nationally and as it applies to New York City. Each district program is summarized and detailed in terms of budget, grade level, personnel, and contact person. A list of information contacts for Federal and State funded programs is also attached. Descriptors-Board of Education Policy, Census Figures, Compensatory Education, Data Collection, Educationally Disadvantaged, Elementary Secondary Education, *Feasibility Studies, *Resource Allocations, *State Federal Aid, Statistical Data
Identifiers-*Elementary Secondary Education Act Title I

In this report, the feasibility of alternative allocation strategies that would determine school district Title I allocations using district level poverty data and/or mandating the use of a single formula for the calculation of Title I grants is explored. The three criteria, availability of data, reliability of data, and administrative complexity of allocation tasks, were applied to the feasibility of four alternative allocation strategies: (1) single formula subcounty allocation; (2) single formula substitute allocation; (3) single formula direct allocation; (4) multiple formula substate allocation. Findings indicate that there are few availability and reliability problems, but that there are differences in the administrative complexity of the tasks required to implement any of the four allocation strategies. It is found that multiple formula substate allocation is the least complex and single formula direct allocation is the most complex. Charts and tables illustrate the findings. The availability and reliability of census data and of school district and county component AFDC, Foster Child, and Neglected and Delinquent Child Data, are discussed in detail. (WI)

Descriptors-*Compensatory Education, *Educational Finance, Elementary Secondary Education, *Federal Aid, *Finance Reform, *Resource Allocations, *State Aid

Identifiers-*Elementary Secondary Education Act Title I

This document contains a synthesized review of current State subcounty allocation procedures and assesses the impact and feasibility of four alternative allocation strategies. The review indicates that in the current subcounty allocation process, the United States Office of Education (USOE) uses a single formula to calculate county entitlements while State education agencies use a variety of formulas to divide the county allocations among school districts within each county. The four alternative allocation strategies are compared along six dimensions: (1) consistency of treatment of districts; (2) currency of data; (3) hold harmless effects; (4) States most affected and types of districts which would benefit; (5) data availability and feasibility; and (6) administrative complexity. Results of the comparisons are presented in detail. Each alternative is then summarized in terms of the advantages that would be gained or the disadvantages that would be incurred in their respective implementations. (Author/EB)

Descriptors-Blacks, Caucasians, Employment Experience, *Employment Patterns, Equal Opportunities (Jobs), *Family Income, Feminism, Housewives, Socioeconomic Status, *Statistical Data, *Working Women

The distribution of family incomes is now slightly more equal than the distribution of husbands' earnings. Movements toward equal opportunity for women are likely to have only a small effect on family income inequality. In a world with no differences by sex in work behavior, we could expect that the work experience of women and men and the inequality in the distributions of women's earnings and men's earnings would be equal. The most unequal situation for family incomes in such a world would occur if the earnings of husbands and wives were perfectly correlated. Then, the degree of family income inequality would equal the degree of inequality in husbands' earnings (which would be the same as wives' earnings). Thus, in the long run, the women's movement and attempts to equalize opportunity by sex imply only a slight increase in the current degree of inequality even if husbands' and wives' earnings were to become perfectly correlated; under more realistic assumptions it appears that the economic advances of wives will not increase family income inequality. Descriptors-*Caucasians, *Educational Background, *Metropolitan Areas, Migration Patterns, *Population Distribution, Regional Characteristics, Socioeconomic Influences, Statistical Data, *Urban to Rural Migration, *Urban to Suburban Migration

Increased migration to the sunbelt and the metropolitan-nonmetropolitan turnaround'' represent departures from longstanding redistribution trends. Although these patterns have been examined from a number of perspectives, their consequences for individiual metropolitan areas have not been brought to light. In the present study, stream-disaggregated data for the late 1950s and late 1960s are employed to assess the impact of recent migration for the sizes and compositions of white populations in 31 large metropolitan areas. Findings indicate that most large northern standard metropolitan statistical areas (SMSAs) have been experiencing the new'' migration patterns since the late 1950s. They have incurred net out-movements of whites to both metropolitan and nonmetropolitan areas but, due to exchanges with nonmetropolitan areas, have managed to retain greater numbers of college graduates and professional workers. Although southern and western SMSAs had not yet sustained losses to their nonmetropolitan environs during this period, they did appear to gain substantially from the interregional metropolitan redistribution with respect to both their total and high status populations. Descriptors-*Economic Climate, *Economic Status, Employment Opportunities, *Equal Opportunities (Jobs), Labor Legislation, Manpower Needs, *Manpower Utilization, *Salary Differentials, Sex Differences, Unemployment, *Working Women
Identifiers-Civil Rights Act 1964 Title VII, *Recession

The recession of the 1970s eroded equal employment opportunity gains made under Title VII of the Civil Rights Act of 1964. The unemployment rate during the early 1970s interacted with pre-amendment Title VII settlements to limit the increase in female earnings, exaggerate the reduction in male earnings, and restrict the narrowing of the earnings differential. Nevertheless, even with high unemployment rates, Title VII still narrowed the sex differential in earnings. But the real earnings cost was greater and the earnings redistribution less than at a lower employment rate. (Author/EB)

In this book, the many factors necessary to make city spaces more child-sensitive are considered. Particular attention is given to dwellings and play spaces. Child development as it relates to the spatial environment and the child's use of various spaces (houses, apartments, service areas, playgrounds) at different ages are investigated. The importance of the spatial environment in spontaneous learning experiences, social interactions and transmission of values is discussed. In Part I, many aspects of child development from preschool through middle childhood are examined, including physical growth, activities, personal and social development, and intellectual and perceptual development. The relevant design implications are outlined. In Part II, child use of the physical environment is explained with reference to private, public, personal and group spaces. Suggestions are made for planning child spaces. In Part III, design guidelines for planning child environments are set forth. Numerous photographs and diagrams, as well as charts and tables, illustrate design problems and possible solutions. Safety considerations are stressed. Most information presented in the book is based on a report entitled "Children in the Residential Setting: A Discussion Paper Toward Design Guidelines," prepared for the Central Mortgage and Housing Corporation, Ottawa, Canada. Descriptors-Administrator Responsibility, Case Studies (Education), Decision Making, *Educational Alternatives, Elementary Secondary Education, *Open Education, *Program Design, *Program Evaluation, *School Organization, Social Factors, Student Participation, Teacher Participation

Identifiers-Massachusetts (Boston), *Schools Within Schools

In this book, the findings of a study on schools within schools are described. The professional research and literature on alternative public education, with a focus on schools within schools, is explored. Based on the research, a list of elements characteristic to and useful for the implementation and perpetuation of optional alternative programs is compiled. Using this list, the evolution of an open alternative in Boston's Parmenter Elementary School is examined. Ten essential elements of Schools Within Schools are defined and four primary factors for successful programs are established: (1) all programs within a school must be viewed as legitimate educational environments; (2) the principal and faculty are prime facilitators of this desired perception; (3) a shared decision-making approach is appropriate to develop and operate an optional alternative; (4) administrators must be aware of the possibility and potential dangers of unintentional segregation by socioeconomic level, race, religion, etc. Recommendations are made for further research. A lengthy bibliography is included. (Author/WI)

Descriptors-*Change Strategies, Community Involvement, *Cultural Pluralism, *Educational Change, Elementary Secondary Education, *Ethnic Relations, *Multicultural Education, *Social Problems, Teacher Attitudes
Identifiers-*Australia

Due to industrialization, urban growth and an increase in the migrant population, Australia has been transformed from a mono-cultural to a multi-cultural society. The inadequate response of the society to dealing with multi-culturalism has reached a crisis state. Social and educational changes must be instituted to resolve the tensions and conflicts of a multi-ethnic society. Successful change implies a search for legitimate social and educational values and expectations of ethnically different groups. Educators must recognize the Anglo-conformist dominance of education and revise their values with regard to the entire curriculum process. The educational system must be reconstructed in ethnic terms by (1) developing curriculum in conjunction with parents, children and community representatives; (2) incorporating ethnic teachers from overseas into the system; (3) creating resource centers to provide support services and design materials for 'migrant' teachers; (4) encouraging ethnically different teachers to teach their peers; (5) educating teachers to define their courses in cross-cultural terms; (6) extending student programs for ethnically specific teacher training in universities and colleges; and (7) evaluating the needs of ethnic groups of children in terms of the children's perception and expression of those needs. Descriptors-*Educational Innovation, *Educational Planning, Morale, Problem Solving, *Program Design, *Program Development, *Program Evaluation, Teaching Methods, *Team Administration, Team Training
Identifiers-Linkage Model

Described in this paper is a project utilizing the linkage concept in the implementation of a diffused team planning process in six elementary schools undergoing desegregation. Strategies employed in designing the project are reviewed. These reviews include a retrospective analysis of the first two years of the project, a review of the minutes of the team planning sessions, and a review of literature on diffusion. The implementation of the Linkage Model is described in terms of the following: (1) the role of the diffusion manager or ``linking agent'' in helping the participating schools develop systematic problem solving processes within the planning teams and to help link the teams to existing resources within the school system; (2) the concept of the mini-project for dealing with a specific classroom need; (3) a training system for helping each planning team develop, implement, and evaluate a mini-project; and (4) the role of the diffusion task force in solving immediate problems, especially the resources to be allocated to the project. A conclusion summarizes the impact the project had on such factors as student achievement, the sharing of ideas among faculty, personal teaching satisfaction, responses to student attitude, conflict in the school, school morale, and resources or interference from the central office. An argument is made for the potential impact such a project might have if carried out over an extended period of time. (EB)

Descriptors-*Acculturation, Cultural Background, *Cultural Differences, Cultural Traits, Educational Background, Ethnic Groups, Fear of Success, *Females, Identification (Psychological), *Immigrants, *Indians, Religious Factors, Role Perception, Sex Role, Socialization, Social Relations
Identifiers-*Canada

The focus of this paper is on the social, cultural, and psychological problems women of East Indian origin share with other immigrant women in Canada. Also examined are problems that are unique to the East Indian woman and the ways in which she deals with the challenges, conflicting cultural values, and expectations that confront her. The diversity in countries of origin, religious, educational, and cultural backgrounds of the East Indian and other immigrant groups is compared. Other factors considered and compared include the privacy characteristic of East Indian culture, family structure, sex role socialization, achievement socialization and fear of success, language and communication problems, intercultural perceptions of women, and heterosexual relationships. In

addition, it is argued that values perceived by people as critical to the inner self such as a sense of identity and self worth should be nurtured and preserved in these East Indian women for a healthy, evolving, ``new'' self within a host culture and that there is an urgent need for more contact and communication between ethnic ``newcomers'' and the larger society. Identifiers-*Canada

In this paper, various studies and surveys on the status of East Indians in Canada and attitudes towards them are summarized. The history of the East Indian immigration into Canada is sketched. A 1976 survey of attitudes of Canadians toward multiculturalism (Berry, Kalin, and Taylor, 1976) is outlined. A study of the intercultural perceptions of East Indian women based on responses of male and female East Indians and Canadians is described, including the following results: (1) women have a duality in the nature of their life orientation (tradition vs. contemporary); (2) women have a differential approach in their selection of which aspects of Canadian culture to emulate; (3) the strong traditional dimension of their self-concept plays an important role in determining adjustment and acculturation within the host country. Multiculturalism in Canada is discussed from the perspective of socio-psychological theory. Racism in Canada is examined in terms of the Federal ``Green Paper'' on Immigration (1975), the Berry Study on Multiculturalism (1977), the Pitman Report (1977), and the Frances Henry Study of Racism in Toronto (1978). It is suggested that pluralism in Canada be promoted by studying the dynamics of inter-ethnic relationships, creating multicultural government programs, giving East Indians more media recognition, and working to eliminate ethnocentric attitudes. Descriptors-Affirmative Action, Characterization, Childhood Attitudes, Discriminatory Attitudes (Social), Drama, *Equal Opportunities (Jobs), *Ethnic Stereotypes, *Females, *Minority Groups, News Reporting, *Television, Television Commercials

Analyzed in this report are the portrayals of minorities and women in television drama from 1975-1977 and the representation of minorities and women in the network news of 1977. Also analyzed are 1977 employment patterns at local and network television stations and television's effects on viewers and the first amendment. Data presenced show that race and sex stereotyping in television drama continues. Taken into consideration are the age and occupational status of characters and their differentiation by race and sex. Representation of minorities and women in the network news is described as being more encouraging. Findings regarding the employment status of minorities and women at television stations indicate that, despite increases in the numbers of minority and female employees at television stations, they are almost completely absent from decision-making positions. Suggestions are made for an effective affirmative action plan in television employment. The investigation of the effects of television on children center around their perceptions of and knowledge about minorities and about sex and occupational roles as they are influenced by television portrayals of minorities and women, the influence of advertising, and the effects of television violence on their behavior. Recommendations for dealing with the findings of these analyses are made and statistical data collected for the study are appended. (EB)

Identifiers-*Elementary Secondary Education Act Title I, *Georgia

Numerous tables and graphs present data on pupil participation, expenditures, achievement, staffing, and parent advisory councils in Title I financed programs in Georgia. Summaries of data presented for each of these areas indicate the following: (1) Title I in Georgia maintained its basic skills program emphasis with preschool, reading, mathematics, food service, and transportation activities accounting for the major participation in Title I; (2) reading activities accounted for 55.9 percent, mathematics activities 22.5 percent, and preschool activities for 19.9 percent of the total expenditures; (3) preschool activities accounted for the highest per participant expenditures; (4) 57 percent of the participants in preschool activities met or exceeded program objectives; (5) over 60 percent of the participants in reading and mathematics activities met or exceeded the objectives; and (6) in-service training for Title I personnel and parental involvement were important factors in determining the quality of Title I programs. Suggestions are made in the areas of basic skills development, goal expectations, standardized evaluation efforts, and increased technical assistance. (EB)

Identifiers-Magnet Schools, *Rhode Island (Providence)

This report reviews the history of school desegregation in Providence, analyzes the role of various individuals and groups in the desegregation process, and discusses the community's response. Background information on Providence is given in terms of government, population shifts, school enrollment, and school restructuring. An analysis of the evolution of desegregation in Providence deals with racial imbalance, discriminatory practices, community attitudes, magnet schools, and resistance. Basic principles of the Providence Plan are described. These include Providence's three-phase implementation, busing, funding, and staffing. Community concerns discussed range from support by the media, certain community groups, and black parents to the opposition of white parents. Problems with discipline and racial tension are also discussed. In addition, Providence's nine-year process is evaluated on the basis of its successes and failures. Advantages cited include greater understanding among and less stereotyping of different racial, ethnic and cultural groups and a better preparation for life in a pluralistic society. Problems pointed out are the continuing underrepresentation of minority teachers in the school system, the tendency toward resegregation in the classroom, the school department's failure to maintain racial balance in accordance with state guidelines, and the disproportionate number of black students bused under the plan. Descriptors-*Administrator Responsibility, Compensatory Education, Elementary Secondary Education, *Federal Programs, Parent Associations, *Parent Attitudes, *Parent Participation, Parent Responsibility, *Parent School Relationship
Identifiers-*Elementary Secondary Education Act Title I, *Parent Advisory Councils

There are a number of reasons for the lack of parent interest in Title I Parent Advisory Councils (PAC). There are too many officials charged with implementing Title I who do not want to be bothered with an effective PAC. In addition, many officials do not seriously consider the experiences parents bring to their membership and do not have the skills to effectively involve the PAC. The lack of clarity about PAC's role and responsibilities, a lack of planning, a limited number of PAC meetings, and the rapid turnover in PAC membership also contribute to the erosion of parent interest. Specific actions which can be taken to stimulate and maintain parent interest include: (1) a "job description" should be developed for PAC members; (2) local school officials should communicate that PAC is a valued partner in the operation of a Title I project; (3) PAC members should be encouraged to initiate activities; (4) each PAC member should adopt a specific program and follow its progression; and (5) working with PAC should be seen as a continuing process of leadership development. Descriptors-*Athletic Programs, Discriminatory Attitudes (Social), *Educational Legislation, *Educational Policy, *Equal Education, Females, *Finance Reform, *Sex Discrimination

Identifiers-*Education Amendments 1972 Title IX

In this paper, the proposed policy interpretation regarding Title IX and intercollegiate athletics and a review of the issues as viewed by women's groups are summarized. The basic concept underlying the draft policy is that an institution will be presumed to be in compliance with the Title IX athletic regulations if it can demonstrate that it (1) has eliminated discrimination in financial support and other benefits and opportunities in its existing athletic programs'' and (2) follows an institutional policy that includes procedures and standards for developing an athletic program that provides equal opportunities for men and women to accomodate their interests and abilities.'' Responses of women's groups to eight selected questions suggest that the proposed interpretation provides maximal flexibility for institutions at the expense of women's equity, that numerous loopholes are detailed (allowing almost any discrepancy to be justified by the nature or level or scope of compensation), and that no examples of violations are given, although the are many examples of how discrepencies can be justified. Presented in this document are 37 guided lesson plans designed to further appreciation of Haitian culture. Included are lesson plans for three levels: (1) kindergarten through second grade; (2) third grade through sixth grade; and (3) seventh grade through ninth grade. The lesson format includes pre and post tests, materials, vocabulary, motivation, aim, procedure, homework, and follow-up. The aim of each lesson plan, presented in question form in the children's language, is intended to guide the children to achieve the objectives of the lesson. Terminal objectives chosen for this unit are based on different aspects of culture, geography, economic system, and history in Haiti. Also considered are comparisons between Haiti and New York City and students' daily needs. The objectives for each lesson are presented in behavioral terms for the teacher's direction. (EB)

Identifiers-*Elementary Secondary Education Act Title I

Various types of early childhood education programs, supported by Title I funds, are assessed in this report. Factors considered in the assessment of overall program implementation and effectiveness include: (1) children's performance; (2) the roles, attitudes and perceptions of teachers, teacher-aides and parents; and (3) the committment and support of administrators. Components of the Preschool Expansion Program are described and an overview of the evaluation project is provided. Methods and procedures of the study are outlined. Results of child cognitive measures are presented for prekindergarten, kindergarten, and first grade levels. Comparisons are made by program components, sex, type of preschool experience, length of preschool day, and the presence or absence of teacher-aides in the classroom. Accompanying each set of results is a discussion of the findings. Results from the descriptive measures used to assess the characteristics and the impact of adults in the preschool program are presented separately for teachers, teacher-aides, parents, principals, and administrators. Samples of the measures used and descriptions of some of the cognitive measurement tests are appended. (Author/EB)

Identifiers-*Australia, *Karmel Report, School Renewal

Different aspects of an educational renewal program in Australian schools are evaluated in this volume. The Karmel Report which was concerned with detailing proposals for a new and large-scale initiative by the Federal government in the financing of primary and secondary schools in Australia is analyzed and assessed by various individuals along sociological, political, and economic dimensions. Sociological aspects dealt with include the needs of education, teachers, the public and educational change and approaches to the goal of educational equality. Political concerns looked at include autonomy and control in educational renewal and accountabilitiy in education. The macro-economics of educational renewal and finance for independent schooling are two of the economic concerns discussed. Developments subsequent to the Karmel report are analyzed and innovative programs implemented in the renewal effort are evaluated. In addition, main issues facing Australian schools five years after the initiation of the renewal effort, such as curriculum development, funding, educational goals, and the relationship between school and work, are surveyed. An extensive bibliography relating to the Australian Schools Commission is included. (EB)

Descriptors-Community Information Services, *Economically Disadvantaged, Federal Aid, *Interagency Coordination, *Legal Aid, *Legal Aid Projects, Legal Education, Outreach Programs, Resource Allocations, State Aid
Identifiers-*Legal Services Corporation

The Legal Services Corporation, established in 1974, is the primary provider of funds for free civil legal services for the poor. Substantial sums for such services are also available from other Federal, State, and local sources and are administered by Corporation and non-Corporation providers. Some Corporation grantees are not aware, however, of other providers and resources available in the service area. Coordination among providers of legal services, efforts by Corporation grantees to establish service priorities based on local needs, and grantee legal education and outreach activities have been limited. In order to improve this situation, the Corporation should increase coordination activities at the national and local levels and make sure that its grantees periodically assess community needs and improve legal education and outreach efforts. This document discusses the activities of the Legal Services Corporation and its grantees. (Author/EB)

Meddlin': Aggression as Cultural Dissonance in a Desegregated School.

Pub Date—18 Nov 78
Note—13p.; Paper prepared for the annual meeting of the American Anthropological Association, Panel on the Anthropology of Work (November 14-18, 1978); Not available in hard copy due to reproduction quality of the original document
EDRS Price MF-$0.83 Plus Postage. HC Not Available from EDRS.
Descriptors—*Aggression, *Behavior Problems, *Black Students, Caucasian Students, *Classroom Communication, Communication Problems, Competition, Elementary Secondary Education, Nonverbal Communication, Racism, *School Integration, *Social Relations, Verbal Communication

A study of communication patterns in a desegregated school, located in an urban middle class black neighborhood, revealed "meddlin'" (verbal and nonverbal aggression) to be a key area of cultural dissonance. This pattern is more common among blacks. Name calling, rumor mongering, body bluster, verbal intimidation, taking or destroying others' property, and physical assaults are some of the manifestations of individual and group attack. Reasons for this aggression include: (1) racism and the need to earn respect; (2) socialization to violence; (3) inadequate academic work and the need to save face; (4) responding to the self-fulfilling prophecy that blacks are more physical; (5) poor impulse control of anger; (6) sexual competition; (7) desire to test one's strength and establish position in a peer hierarchy; (8) peer pressure; and (9) desire for attention. "Meddlin'" occurs more in the classroom than the playground and also in the hallways and especially the bathrooms. Both blacks and whites are targets of aggression and most fights are intra-racial. The long term negative consequences of "meddlin'" outweigh the positive gains in self-esteem sometimes made by individual aggressors. (Author/EB)

Descriptors-Academic Achievement, *Black Students, Disadvantaged Youth, *Effective Teaching, Elementary Education, Individual Instruction, *Research Methodology, *Teacher Characteristics, Teacher Education, Teaching Experience, Teaching Techniques, *Urban Education, Urban Schools, Vocabulary Development

Identifiers-Educational Production Function Research, Process Product Research

Investigated in this paper is the extent to which variables used in two major research approaches explain differences in the effectiveness of teachers in improving the vocabulary skills of inner city black children in four elementary grade levels. The two approaches investigated, educational production function research and process-product research, are described in terms of a multivariate model which takes into account teacher characteristics and other factors which affect children's achievement. Results of the study indicate that concepts used in both approaches provide indicators of teacher effectiveness. In particular, the general teaching approach known as direct instruction is described as being especially effective in teaching children from low income families. In addition, it is pointed out that teaching experience is related to teaching effectiveness. These findings are explained, their relationships discussed, and their implications for teacher training are outlined. A list of references is also included. (Author/EB)

White Opposition to Busing in Los Angeles: Is Self Interest Rejuvenated?

Pub Date-78
Note-20p.; Paper prepared for presentation at the Symposium, Desegregation Research: The Present and Future Directions,'' of the American Psychological Association Conference (Toronto, Ontario, August 1978)
EDRS Price MF-$0.83 HC-$1.67 Plus Postage.
Descriptors-*Bus Transportation, Caucasians, Males, *Parent Attitudes, *Political Attitudes, *Racism, *School Integration
Identifiers-*California (Los Angeles)

The conventional explanation for adult white opposition to busing for school desegregation emphasizes a rational, objective self interested component. Whites are seen as opposing busing because its costs far exceed its benefits. However, little of the social psychological literature supports this view. Studies by and large support the findings that rather than rational gain-loss calculations, symbolic racism and political conservatism are the main determinants of busing opposition. The literature has not adequately examined busing sentiment in a local setting on the eve of actual implementation. In a study of a sample of white adult residents randomly selected from the Los Angeles County area during December 1976, approximately 20 months prior to actual implementation of the Los Angeles desegregation plan, it was found that symbolic racism and political conservatism related substantially to busing opposition. However, a comparatively moderate, but nonetheless significant self interest effect, indexed by whether or not the respondent had children who might be concretely affected by the implementation of busing, also emerged. The implications of these findings suggest that further research is needed to isolate socialization attitudes from self-interest variables in understanding busing opposition. (Author/WI)

The Case for Affirmative Action for Blacks in Higher Education.

Howard Univ., Washington, D.C. Inst. for the Study of Educational Policy.

Pub Date-78

Note-436p.

Available from-Howard University Press, 2935 Upton Street, N.W., Washington, D.C. 20008 ($8.95)

Document Not Available from EDRS.

Descriptors-*Affirmative Action, Black Employment, Black History, *Blacks, *Case Studies, Civil Rights, College Faculty, *Equal Opportunities (Jobs), *Faculty Integration, Federal Legislation, Federal Programs, *Higher Education, Labor Market

Identifiers-Florida State University, Harvard University MA, Merritt College CA, Oberlin College OH

In this book, affirmative action within the higher education community is analyzed in terms of black education and job opportunities for blacks. The importance of affirmative action and other strategies for achieving equal opportunity are discussed. The status of black education in America from the time prior to the Civil War to the time prior to affirmative action is examined. The constitutional and legal basis for affirmative action and related Federal programs is described. Policies and practices of implementation by the Federal government are detailed. Four case studies of affirmative action in institutions of higher learning are presented. The current labor market in academia and opportunities for black faculty are analyzed in light of racial discrimination, affirmative action, and public policy. Numerous tables illustrate the findings. A lengthy bibliography is included. (WI)

Mental Health: A Challenge to the Black Community.
Pub Date-78
Note-375p.
Available from-Dorrance and Company, 35 Cricket Terrace, Ardmore, Pennsylvania 19003 ($10.00)
Document Not Available from EDRS.
Descriptors-Adult Development, *Black Community, Black Employment, *Blacks, Family (Sociological Unit), Family Role, Health Services, *Mental Health, Mental Health Programs, Minority Groups, Networks, Older Adults, *Public Policy, *Social Factors, Youth Problems

In this anthology, fourteen articles on mental health and the black community are collected. Topics considered include family life, childhood environment, adolescence, work and adulthood, the black aged, functions of the social network, ecological influences, mental health services, public policy, the black mental health network force, and research on the mental health of black people. Contributors identify stress as the chief component of mental illness among blacks, particularly as it relates to work experience and life in the inner city. The need for developing a definition of mental health for blacks that does not depend upon white behavior as a normative standard is emphasized. It is concluded that mental health rests on the ability of black people to utilize their resources, including their built in social networks, to fight the debilitating effects of institutional and personal racism. Tracing the history of mental health care for minorities in America, with reference to public policy of the last two decades, it is suggested that there is a need for greater participation of blacks in the total mental health care delivery system.
